General Information

Overview of the College

Finger Lakes Community College provides a high quality educational experience that serves as a basis for life-long learning. Affordable tuition, grants, loans, and scholarships are available to provide open access to higher education. Through its transfer and career programs, the College provides a solid education that prepares students to be successful in meeting their academic and career goals. Transfer programs parallel the first two years of a four-year college or university, thus acting as a stepping stone for those who plan to pursue advanced study and training. Career programs help students achieve their goal of specialized education that will lead to satisfying jobs in a wide range of fields.

Finger Lakes Community College is proud of the many exceptional co-curricular opportunities available to students outside of the classroom. A wide variety of clubs bring students together who share mutual interests. Many extracurricular activities and events are planned through the Student Corporation to enhance and expand students' social growth and awareness. Athletic events, theatre productions, and visiting lecturers and artists create a well-rounded, positive cultural environment.

Instruction is conducive to individual development, and students at Finger Lakes Community College receive personal attention. The smaller-sized classes allow for close interaction between student and professor which, in turn, leads to a challenging, exciting, and rewarding teaching/learning environment. The highest priorities for the College’s faculty members are teaching, advising, and guiding students toward achieving their educational goals.

College History and Uniqueness

Finger Lakes Community College was established in 1965 as a unit of the State University of New York, under the sponsorship of Ontario County. It was created as a two-year, co-educational institution of higher learning serving the citizens of the county, region, and state.

The College opened in September 1967 offering specialized, non-credit courses under the Division of Continuing Education. The first full-time freshman class entered in January 1968. At that time, enrollment totaled 85 full-time and 125 part-time students. There were seven full-time faculty members.

Today, more than 6,800 full- and part-time students are enrolled. The College now employs approximately 320 full-time and 250 part-time faculty and staff.

Finger Lakes Community College provides an opportunity for students and faculty to work together to accomplish educational goals. Each student is seen as an individual, with diverse needs and unique strengths.

The 250-acre park-like campus is located adjacent to the scenic and recreationally-rich Canandaigua community, 45 minutes southeast of Rochester, in the heart of the Finger Lakes region. The multi-level campus includes science and computer laboratories, a simulated hospital nursing station, a recording studio and control room, a large music rehearsal hall, greenhouse, television studio, gymnasium, and fitness center. It also houses a state-of-the-art library and the Williams-Insalaco Gallery 34, which exhibits art by students, alumni, faculty and special guests. In spring 2012, the College opened a new Student Center, which includes a 411-seat auditorium, an expanded cafeteria and bookstore, space for student activities and the College’s Student Life offices. In addition, all enrollment services – Admissions, Financial Aid, Student Records, Student Accounts and Educational Planning and Career Services – were reorganized into a One Stop Center, offering students a convenient, centralized location to address all of their enrollment needs.

The beautiful foliage and tranquil setting of the campus have been preserved. Campus grounds include streams, ponds, nature trails, wooded areas, outdoor classrooms, athletic fields, and a number of scenic study spots, including an arboretum, gazebo, and picnic pavilion. A child care center is also located on campus grounds. Additionally, the 48-acre Muller Field Station, located near the southern end of Honeoye Lake, and the College’s new East Hill Campus in Naples provide students with unique outdoor experiences.

Finger Lakes College Suites offers modern, apartment-style student housing located just a short walk from classes and college activities. Finger Lakes College Suites is privately owned by Association Housing, L.L.C. and operated by United Realty Management, Inc.

Finger Lakes Community College operates campus centers in Geneva, Victor and Newark, thereby serving the populations in the eastern and northern sections of its four-county service area.

The campus is also the site of the Constellation Brands Marvin Sands Performing Arts Center (CMAC).

Mission and Vision Statements

Mission Statement

Finger Lakes Community College is a supportive, learning-centered environment that empowers our students, provides enriching life experiences, and enhances the quality of life throughout our community.

Vision

Finger Lakes Community College will be the college of choice for students and a dynamic regional learning resource, central to the cultural and economic vitality of the area.

FLCC fosters a learning-centered environment:
  • a comprehensive, relevant curriculum focused on student learning outcomes
  • a culture that recognizes learning as central to everything we do
  • access initiatives that address barriers to participation faced by many potential community college students
  • facilities and technology carefully designed to promote learning
  • a climate that encourages and supports the professional development of employees
  • dedicated faculty who encourage each student to reach his or her full potential

FLCC empowers our students and provides enriching life experiences:
  • mentoring and community connections that encourage learning beyond the classroom
  • opportunities to participate in interdisciplinary projects
  • opportunities to cultivate an appreciation of the arts
  • a focus on health and lifetime wellness
• exposure to broad perspectives to stimulate interest in the world and its people

FLCC enhances the quality of life throughout our community:
• commitment to modeling and teaching environmentally sustainable practices
• active outreach as stewards of the natural beauty of the area
• an appealing venue for the arts, enriching the cultural life of the region
• active involvement in community service activities
• programs that develop an educated workforce to support economic growth
• a vital partner in attracting and retaining talented workers and new businesses

**FLCC Strategic Plan: 2008 – 2013 Strategic Goals**

**Learning and Student Success**
To improve engagement, learning, and successful transfer/employment.

**Strategic Growth**
To increase the enrollment of traditional and non-traditional students within the College service area by identifying and addressing emerging educational needs and new markets.

**Efficient and Effective Operations**
To strengthen the College’s financial position by improving the efficiency and effectiveness of college programs and operations.

**Community Value**
To increase the College’s cultural and economic impact on the service area.

---

**FLCC Learning Outcomes (Competencies)**

Finger Lakes Community College is committed to a comprehensive General Education program, based on long-standing institutional convictions. The College has developed ten Learning Outcomes which Finger Lakes Community College graduates should demonstrate. The process of implementing the Learning Outcomes is seen as ongoing and leading to the continuous improvement of teaching and learning through feedback and interaction between faculty and students.

**Writing**
Students will:
• produce coherent texts within common college-level written forms.
• demonstrate the ability to revise and improve such texts.

**Oral Communication**
Students will:
• orally communicate for a defined purpose within the specific context of a communication episode.

**Mathematics**
Students will demonstrate the ability to:
• interpret and draw inferences from mathematical models such as formulas, graphs, tables, and schematics.
• represent mathematical information symbolically, visually, numerically, and verbally.
• employ quantitative methods such as, arithmetic, algebra, geometry, or statistics to solve problems.
• apply principles of mathematics to solve problems in the Program.

**Computer Literacy**
Students will:
• use applications to create a product or solve problems.

**Critical Thinking**

1. Reasoning
   Students will:
   • identify, analyze, and evaluate arguments as they occur in their own or others’ works.
   • demonstrate well reasoned arguments.
   • and/or

2. Problem Solving
   Students will:
   • demonstrate a pattern of comprehensive exploration of issues, ideas, artifacts, data and/or events before accepting or formulating an argument, opinion, conclusion, or plan of action.
   • apply prior knowledge to new situations.

**Citizenship**
Students will:
• recognize the knowledge, skills, and values that will contribute to involvement in one’s community.

**Global Concerns**
Students will:
• identify the knowledge and skills necessary to live interdependently in a diverse, sustainable global community.

**Information Resources**
Students will:
• demonstrate the ability to identify, locate, evaluate, use, and share information from relevant resources for a given problem.
Reading
Students will:
• demonstrate the ability to comprehend, interpret, analyze, and evaluate college-level materials.

Ethics and Values
Students will:
• apply academic and professional ethics and values.

How the Learning Outcomes may be achieved:*
• Writing: ENG 101, HON 104, ENG 102, HON 105, ENG 103, and/or specified courses in the Program
• Oral Communication: COM 110, COM 115, and/or specified courses in the Program
• Mathematics: Any Mathematics offering, and/or specified courses in the Program
• Computer Literacy: CSC 100, or one of the following options:
  • Option 1: CSC 134, CSC 135, CSC 136, or
  • Option 2: CSC 134, CSC 135, CSC 139, or
  • Option 3: CSC 105, and/or specified courses in the Program
• Critical Thinking: All Natural, Physical, and Social Science Courses; All Math Courses; Specified courses in the Program
• Citizenship: Specified courses in the Program
• Global Concerns: Specified courses in the Program
• Information Resources: Specified courses in the Program
• Reading: Specified courses in the Program
• Ethics and Values: Specified courses in the Program

Graduate Statistics
The College surveys recent graduates to determine the subsequent education and employment success of alumni, together with their opinions about the contribution of their Finger Lakes Community College education to this success.

Responses from the most recent survey of graduates (2010) indicates that 97 percent of graduates with transfer degrees (A.A. and A.S. degrees) continued their education or are employed after completing study at the College. Sixty-eight percent of graduates were attending college and 24 percent were employed.

Results from the same survey indicate that 65 percent of graduates with career degrees (A.A.S. degrees) are employed after graduation. Another 30 percent have continued their education.

Fifty-five percent of Finger Lakes Community College graduates who continue their education attend SUNY four-year colleges or universities.

Degrees and Certificates Awarded
Finger Lakes Community College is authorized by the Board of Regents of the University of the State of New York to grant the following degrees and certificates:

Associate in Arts
• Liberal Arts and Sciences
• Childhood Education (Teacher Education Transfer)

Associate in Science
• Liberal Arts and Sciences
• Biotechnology
• Business – Business Administration
• Communications
• Computer Science
• Engineering Science
• Environmental Studies
• Fine Arts
• Human Services
• Information Systems
• Music
• Music Recording Technology
• New Media
• Physical Education Studies
• Sports and Tourism Studies

Associate in Applied Science
• Architectural Technology and Building Sciences
• Business – Accounting
• Business – Business Administration
• Business – Office Technologies – Administrative Assistant
• Chemical Dependency Counseling
• Criminal Justice
• Culinary Arts
• e-Commerce
• Emergency Medical Technician – Paramedic
• Fisheries Technology
• Game Programming and Design
• Graphic Design
• Horticulture
• Hotel and Resort Management
• Information Technology
• Instrumentation and Control Technologies
• Marketing
• Mechanical Technology
• Natural Resources Conservation
• Natural Resource Conservation: Law Enforcement
• Nursing (Leading to R.N. licensure)
• Paralegal
• Therapeutic Massage/Integrated Health Care
• Tourism Management
• Viticulture and Wine Technology

Certificates
• Applied Computer Applications
• Criminal Justice
• Culinary Arts
• Emergency Medical Technician – Paramedic
• Horticulture
• Information Security
• Paralegal
• Natural Resources Conservation
• Office Technology
• Taxidermy
• Teaching Assistant
• Wildland Fire Suppression
Admission Policy

Finger Lakes Community College subscribes to the Full Opportunity Plan of the State University of New York. Admission is open to any person whose academic potential, record, and/or qualifications suggest that the student may profitably pursue one of the programs of study offered by the College. Finger Lakes Community College does not discriminate on the basis of race, color, creed, religion, national origin, sex, age, personal affiliations, disabilities, marital or veteran status in its admission policies.

The Admissions Office can be reached by calling 585.785.1279 or emailing admissions@flcc.edu. We recommend that students considering Finger Lakes Community College visit the campus and attend an Admissions Information Meeting to gain a firsthand perspective of the College.

Requirements for Admission

The following is required of applicants who wish to become candidates for a degree at Finger Lakes Community College:

1. Submission of a complete Finger Lakes Community College Application for Admission with a $20 non-refundable application fee. (Although a Finger Lakes Community College application form is preferred, the State University of New York College Application form is also accepted. SUNY applicants are required to complete an Applicant Information Report [AIR] form, which the College will forward to the applicant.)

2. Applicants must have earned a high school diploma (local, regents, or advanced regents), GED, or its equivalent prior to acceptance to the college as a matriculated student.

3. Academic preparation appropriate for the desired course of study. (Students lacking prerequisites for entry into their program of interest may be advised to take courses designed to prepare them for course work in their chosen major.)

4. Proof of immunization is required for students born on or after January 1, 1957. Students taking six or more credit hours must also receive and respond to information on Meningococcal Meningitis disease (see page 12 for specific information). Within their Admissions Portfolio, applicants born after January 1, 1957 will receive a Certificate of Immunization form which must be completed and forwarded to Student Health Services. Those students who are accepted into the Nursing and Therapeutic Massage/Integrated Health Care Programs are required to submit a satisfactory health history/physical examination report completed by a physician. Students who intend to participate in intercollegiate sports must submit a satisfactory physical examination report to the Athletic Department.

5. Admission to the Nursing Program and Therapeutic Massage/ Integrated Health Care Program is competitive. Students qualify for a review of their application upon completion of the following prerequisites:
   - Submission of an official high school transcript showing graduation from an accredited high school or a high school equivalency diploma.
   - High school students must have obtained a minimum overall GPA of 2.5 for Nursing and 2.0 for Therapeutic Massage.
   - Transfer students are required to submit official college transcripts from all institutions previously attended. A minimum cumulative GPA of 2.5 is required for Nursing and 2.0 for Therapeutic Massage. (All major course requirements must be C or above.)
   - Any student required to take Basic Skills tests for English placement must place into ENG 101 to finalize acceptance into the Nursing program.
   - Students who have completed major course requirements with grades below C must repeat the course and obtain a grade of C or better prior to consideration for admission.
   - One unit of either high school biology (Regents recommended) or one semester of college biology.
   - One unit of high school algebra or its college equivalent. This requirement is not satisfied for students who have completed a high school equivalency program (GED). DST 142 Fundamentals of Mathematics and Algebraic Skills or its equivalent must be completed prior to starting professional nursing coursework.
   - One unit of high school chemistry (lab included) or the college equivalent to this course (nursing applicants only). Students without chemistry may be admitted provisionally to the Nursing Program; however, they must successfully complete CHM 102 Physical Science II or its equivalent prior to starting professional nursing course work.

While students may qualify for review upon completion of the above prerequisites, applicants with the strongest academic credentials will have the greatest chance of admission. Additional information about selection criteria can be obtained from the website or Admissions Office. For consideration, students must have a complete application on file in the Admissions Office by February 1 of the year in which admission to the Nursing Program or the Therapeutic Massage/Integrated Health Care Program is being sought.

6. The deadline for students to matriculate into the College for the Fall Semester is November 1, and for the Spring Semester the deadline is March 1.

7. Home-Schooled Applicants: The Finger Lakes Community College policy for the admission of home-schooled applicants reflects policy guidelines approved by the State University of New York for all colleges and universities within the system. Home-schooled applicants must provide documentation of their home-schooled education in one of the following ways in order to complete their application for admission and be reviewed for acceptance to Finger Lakes Community College:
   a) Submit certification of a high school equivalent home instruction program to be provided by the superintendent of the school district in which the student resides.
   b) Complete the GED and submit the test scores.
   c) Submit transcripts showing successful completion of five prescribed Regents comprehensive exams.

In addition, home-schooled applicants must provide to the Finger Lakes Community College Admissions Office a home-school transcript of work completed at the high school grade levels 9 - 12. (This does not apply to home-schooled students who have completed and submitted the GED.)

The New York State Department of Education does not recognize a high school program of correspondence study completed by a New York resident. Therefore based on this policy, Finger Lakes Community College cannot accept completion of correspondence school (online) study as the equivalent of a high school diploma.
Procedures for Admission

1. Applicants must complete and submit a Finger Lakes Community College online application form and request that official high school and college transcripts be mailed to the Admissions Office.
   - Current high school students applying online for admission upon graduation should make a copy of the Counselor Form for their high school counselor. The high school counselor is responsible for completing the form and returning it with the student's high school transcript to the Admissions Office. The applicant is responsible for forwarding a final, official high school transcript to the Admissions Office once his/her graduation has been recorded.
   - High school graduates must send an official high school transcript showing graduation from an accredited high school. Applicants who have submitted official transcripts showing completion of an associate or bachelors degree from an accredited college or university are not required to submit high school transcripts or a High School Equivalency Diploma, except for those seeking admission to the selective programs of Nursing or Therapeutic Massage/Integrated Health Care.
   - Applicants with a High School Equivalency Diploma (GED) must complete the application and submit a copy of their High School Equivalency Diploma and test scores.
   - Those who have not earned a high school diploma, as well as those who have completed an Individualized Education Program (IEP) Diploma, should first complete the GED before applying. Contact the FLCC GED program coordinator for more information.

2. The results of standardized tests such as the American College Test or the Scholastic Application Test may be submitted but are not requirements for admission. Such test results are not criteria for admission. However, applicants who submit standardized test scores and achieve the minimum score or higher may be exempt from the College's Basic Skills testing in reading and writing.

3. All applicants are encouraged to visit campus before or after formal acceptance to the College. At an Admissions Information Meeting, general information on the College, programs, financial aid, registration, etc., will be discussed, and the questions of prospective students will be answered. Campus tours are also available. Admissions meeting, event, and tour information and sign ups are available at www.flcc.edu/admissions.

4. The College does not have special academic programs for students with learning and physical disabilities. It does, however, provide support services to assist students with learning and physical disabilities in regular classes. Applicants are encouraged to notify the Admissions Office of this classification early in the application process. We will then be able to give the student appropriate information to help in the decision of whether or not Finger Lakes Community College has the services necessary to meet the individual's needs. Information about Procedures for Services to Students with Disabilities is available upon request from the One Stop Center, Admissions Office, Student Health Services, or Developmental Studies Department.

5. At acceptance to the College, applicants will receive enrollment instructions which will provide detailed instructions and a checklist regarding the enrollment process.

Admission Status

All applicants will be notified in writing by the Admissions Office concerning their admission status. Admission may be conditional, pending the successful completion of any specific academic degree program prerequisites as indicated in this catalog.

Felony Conviction/Disciplinary Dismissal
The College complies with the State University of New York Admissions Policy for Ex-Offenders. Applicants who have been convicted of a felony, suspended or dismissed from a college or university for disciplinary reasons must participate in an admissions review process which includes completion of a supplemental Admissions Review Form and, in some cases, an interview with the Admissions Review Board. This policy also applies to former students or applicants who have requested that the Admissions Office re Activate their matriculated status from a previous semester. Failure to disclose a felony conviction and/or disciplinary dismissal on the Admissions Application Form may result in expulsion from the College.

Transfer Students

Transferring Credits to Finger Lakes Community College
In addition to the regular Admission procedures, transfer students are responsible for submitting an official College transcript from each collegiate institution that they have attended. College-level work completed through an accredited degree-granting institution will be evaluated for applicable transfer credit. Credits may be accepted for transfer credit from non-accredited colleges and universities; evaluation for transfer credit will be made on a course-by-course basis. Training that has been evaluated by the American Council on Education (ACE) may be transferred as college credit based on ACE recommendations. Individuals who have served in the military should submit an AARTS, SMART, or CLAF transcript to the Admissions Office; DD214 forms will be evaluated for physical education credits. Evaluation of credit appropriate for transfer is done on an individual basis. Grades of “C-” and higher are considered for transfer if the course work meets degree requirements. Only courses completed at Finger Lakes Community College are used in computing the cumulative Grade Point Average. Upon admittance, the student will be sent a transfer credit evaluation indicating the transfer credits awarded toward the student's chosen degree program.

Residency Requirements
In order to be eligible to receive an associate's degree from Finger Lakes Community College, transfer students must complete a minimum of 32 credit hours with FLCC. Students must also complete a minimum of 50% of the credit hours required in the intended discipline(s) of study at Finger Lakes Community College (e.g.: computer science, criminal justice, Horticulture, tourism management).

To receive a certificate a student must complete a minimum of 50% of the credits required at Finger Lakes Community College.

Petition for waiver may be submitted by the department offering the discipline(s), on behalf of the student, to the Associate Vice President.

International Student Admissions
International students applying to the College should first complete the online application form. Once completed, an International Student Admissions application packet will be emailed to the applicant. Applicants must complete and submit the International Student
Admission application and submit an official TOEFL test score report and official transcripts. Official transcripts or diplomas that are not in English must be accompanied by an exactly worded and certified translation. FLCC is authorized under federal law to enroll non-immigrant students.

Completed international student applications must be received in the Admissions Office by December 1 to be considered for the Spring Semester and by June 1 for the Fall Semester.

The minimum TOEFL score necessary to be considered for admissions at Finger Lakes Community College is 450 on the paper-based examination or 133 on the computer-based examination.

Basic Skills Assessment Program

In order to assess the skill levels with which students enter the College, all matriculated students are required to complete the College’s basic skills tests in reading comprehension, sentence skills, and mathematics.

All incoming, degree-seeking students (as well as any individuals seeking to enroll in Composition I or are taking a course that requires Math placement) are required to complete computer-based, ACCUPLACER placement tests. The results of these tests, in combination with previous academic work, are used to assure proper placement in courses. Students will complete a reading comprehension test and a sentence skills test, each of which consists of no more than 22 multiple-choice questions. In addition, students will complete an algebraic skills test and some will also take a test of college level math skills. Each test consists of multiple-choice questions and is administered without time limits. Students are not permitted to bring calculators to the test. A calculator is provided through the computer-based test. Students entering the Music or Music Recording degree programs are required to take a 35-question music theory test as well.

Basic skills tests in reading comprehension, sentence skills, mathematics, and music are offered on a regular basis, and students who have applied to the College are eligible to take the placement tests. Testing times and locations are available via Webadvisor. More information (including sample questions) can be found on the College’s website at www.flcc.edu/testing.

Accommodations for the Basic Skills Assessment Tests

If a student has a disability and wishes to utilize testing accommodations, the student should contact the Coordinator of Services to Students with a Learning Disability at 585.785.1390 or the Coordinator of Services to Students with Disabilities at 585.785.1441. More information is available on the College’s website at www.flcc.edu/disabilityservices.

Placement Guidelines

English

All students who are pursuing a degree or seeking to enroll in ENG 101 Composition I must take the English placement tests unless they:

- have previously received an associate or bachelor’s degree* OR
- are a high school graduate and have completed a course, with a grade of C- or better at a regionally accredited college, that is equivalent to Finger Lakes Community College ENG 101 Composition I OR
- are a high school graduate and have received at least the minimum required score on the advanced placement (AP), International Baccalaureate (IB), or CLEP exam for Freshman English OR
- are a high school graduate who scored 500 or higher on the SAT verbal exam or a 21 or higher on the ACT English/writing exam OR
- are a re-entry student who previously completed ENG 101 Composition I and/or the Basic Skills tests at Finger Lakes Community College.

*A transcript noting successful completion must be received by the Admissions Office prior to your registration date.

Basic skills testing will determine which of the following three English sequences students will pursue:

a) DST 095 Foundational Writing*
   
   ENG 101 Composition I
   ENG 102 Introduction to Literature

Admission for Full-Time Students

To become a full-time student (12 or more credit hours) at Finger Lakes Community College, admission must be made to the College. To apply to the College, go to www.flcc.edu/apply to access our online application form and instructions about supplemental documents needed.

Admission for Part-Time Students

To become a part-time student at Finger Lakes Community College, contact the One Stop Center regarding application procedures. Students enrolling in one or two courses do not need to immediately file a formal application for admission unless they are interested in receiving financial aid and/or being accepted into a specific degree program.

Part-time students interested in going beyond a few courses and/or who are seeking a degree should apply for admission to the College. It is strongly recommended that no more than 12 credit hours of college course work be completed before seeking formal acceptance to the College. The online application for admission to Finger Lakes Community College may be obtained at www.flcc.edu/apply.

Admission for Second Associate Degree Program

Currently enrolled students interested in obtaining a second degree should make application through the One Stop Center. Those not currently enrolled at the College should make application for a second degree through the Admissions Office.

For those who matriculated at the College effective with the Fall 1981 semester and thereafter (except for Certificate Programs), there must be a 15 credit hour difference in the requirements of the two degrees for approval of the second degree to be granted. If the two degrees are earned, they may be awarded concurrently.

In order to assess the skill levels with which students enter the College, all matriculated students are required to complete the College’s basic skills tests in reading comprehension, sentence skills, and mathematics.

All incoming, degree-seeking students (as well as any individuals seeking to enroll in Composition I or are taking a course that requires Math placement) are required to complete computer-based, ACCUPLACER placement tests. The results of these tests, in combination with previous academic work, are used to assure proper placement in courses. Students will complete a reading comprehension test and a sentence skills test, each of which consists of no more than 22 multiple-choice questions. In addition, students will complete an algebraic skills test and some will also take a test of college level math skills. Each test consists of multiple-choice questions and is administered without time limits. Students are not permitted to bring calculators to the test. A calculator is provided through the computer-based test. Students entering the Music or Music Recording degree programs are required to take a 35-question music theory test as well.

Basic skills tests in reading comprehension, sentence skills, mathematics, and music are offered on a regular basis, and students who have applied to the College are eligible to take the placement tests. Testing times and locations are available via Webadvisor. More information (including sample questions) can be found on the College’s website at www.flcc.edu/testing.

Accommodations for the Basic Skills Assessment Tests

If a student has a disability and wishes to utilize testing accommodations, the student should contact the Coordinator of Services to Students with a Learning Disability at 585.785.1390 or the Coordinator of Services to Students with Disabilities at 585.785.1441. More information is available on the College’s website at www.flcc.edu/disabilityservices.

Placement Guidelines

English

All students who are pursuing a degree or seeking to enroll in ENG 101 Composition I must take the English placement tests unless they:

- have previously received an associate or bachelor’s degree* OR
- are a high school graduate and have completed a course, with a grade of C- or better at a regionally accredited college, that is equivalent to Finger Lakes Community College ENG 101 Composition I OR
- are a high school graduate and have received at least the minimum required score on the advanced placement (AP), International Baccalaureate (IB), or CLEP exam for Freshman English OR
- are a high school graduate who scored 500 or higher on the SAT verbal exam or a 21 or higher on the ACT English/writing exam OR
- are a re-entry student who previously completed ENG 101 Composition I and/or the Basic Skills tests at Finger Lakes Community College.

*A transcript noting successful completion must be received by the Admissions Office prior to your registration date.

Basic skills testing will determine which of the following three English sequences students will pursue:

a) DST 095 Foundational Writing*
   
   ENG 101 Composition I
   ENG 102 Introduction to Literature

Admission for Full-Time Students

To become a full-time student (12 or more credit hours) at Finger Lakes Community College, admission must be made to the College. To apply to the College, go to www.flcc.edu/apply to access our online application form and instructions about supplemental documents needed.

Admission for Part-Time Students

To become a part-time student at Finger Lakes Community College, contact the One Stop Center regarding application procedures. Students enrolling in one or two courses do not need to immediately file a formal application for admission unless they are interested in receiving financial aid and/or being accepted into a specific degree program.

Part-time students interested in going beyond a few courses and/or who are seeking a degree should apply for admission to the College. It is strongly recommended that no more than 12 credit hours of college course work be completed before seeking formal acceptance to the College. The online application for admission to Finger Lakes Community College may be obtained at www.flcc.edu/apply.

Admission for Second Associate Degree Program

Currently enrolled students interested in obtaining a second degree should make application through the One Stop Center. Those not currently enrolled at the College should make application for a second degree through the Admissions Office.

For those who matriculated at the College effective with the Fall 1981 semester and thereafter (except for Certificate Programs), there must be a 15 credit hour difference in the requirements of the two degrees for approval of the second degree to be granted. If the two degrees are earned, they may be awarded concurrently.
b) ENG 101 Composition I**
ENG 102 Introduction to Literature

c) ENG 104 Freshman English I Honors***
ENG 105 Freshman English II Honors

* Students placed in DST 095 who are enrolling in more than six credits should take the course in their first semester; if enrolling in six or fewer credits, DST 095 should be completed during one of the first two semesters of attendance. A grade of “C” or better must be achieved before advancing to ENG 101.

** Students placed in ENG 101 who are enrolling in more than six credits should take the course in their first semester; if enrolling in six or fewer credits, ENG 101 should be taken during one of the first three semesters of attendance.

*** Students placed in the Honors sequence have the option of substituting the ENG 101/102 sequence.

Mathematics
All students who are pursuing a degree must take the math placement test(s) unless they:

- have completed a course equivalent to a DST or MAT course in the chart below with a grade of C- or better* OR
- have received advanced placement credit for calculus with a minimum score of 3 or International Baccalaureate credit [high level] with a minimum score of 4.

*A transcript noting successful completion must be received by the Admissions Office prior to your registration date.

Achieving various Math Levels is determined by a student’s scores on the Elementary Algebra test and the College Level Math test:

a) Level 0-DST 042 Fundamental Mathematics and Algebraic Skills*

b) Level 1-DST 043 Intermediate Algebra* or MAT 121 Statistics I**

c) Level 2-MAT 145 College Algebra***

d) Level 3-MAT 152 Pre-Calculus***

e) Level 4-MAT 271 Calculus***

* DST 042 Fundamental Mathematics and Algebraic Skills and DST 043 Intermediate Algebra carry imputed (financial aid) credit. They do not fulfill FLCC’s Mathematics or general elective requirements. They should only be taken by students that need to take MAT 121, MAT 145, MAT 152 or higher, and are placed into either course because of the placement test.

** MAT 121 Statistics I requires Math placement. This course is suitable for students in programs that specify this course and students whose programs do not specify a particular MAT course. Prerequisite: DST 042 Fundamental Mathematics and Algebraic Skills or placement into Math Level 1 or higher.

*** MAT 145 College Algebra (Prerequisite: DST 043 Intermediate Algebra or placement into Math Level 2), MAT 152 Pre-Calculus (Prerequisite: MAT 145 College Algebra or placement into Math Level 3), and MAT 271 Calculus I (Prerequisite: MAT 152 Pre-Calculus or placement into Math Level 4) all require Math placement. These courses also earn MAT credit, but should only be taken by students whose programs require them.

MAT 101 College Mathematics I and MAT 110 Business Mathematics do not have pre-requisites, and do not require Math placement. These courses meet minimum requirements for degrees that do not specify particular MAT courses. These courses do not prepare a student for future study in any area of Mathematics. Students are advised to check requirements at 4-year institutions to which they may transfer.

MAT 180 Mathematics for Elementary School Teachers I does not require Math placement. While this course does earn a student MAT credit, it should only be taken by students pursuing programs requiring or recommending this course.

Music
Music and Music Recording Technology students who score below a specific cutoff point on the music theory test will be required to enroll in course work that is designed to help them succeed by providing a foundation of music knowledge. Such students will be unable to complete their degree within four semesters.

In addition...
Students whose scores on the basic skills tests suggest the need for additional academic support will be required to complete a combination of courses designed to increase academic success. Some of the courses that may be required include DST 092 Foundational Reading, GST 116 College Study Strategies, and/or GST 101 First Year Student Seminar. Full-time students will enroll in these courses during their first semester of attendance. Part-time students must enroll in the courses within their first two semesters of attendance.

Immunization Requirements for College Students

Measles, Mumps, Rubella
New York State Public Health Law 2165 requires students attending college within New York State, taking six (6) or more credit hours, to show proof of immunity* against measles, mumps and rubella.

Persons born before January 1, 1957 are exempt.

Proof of immunity must be provided in order to register as a full-time student (12 or more credit hours) or part-time student (6-11 credit hours) at Finger Lakes Community College. Law will not permit continued attendance by individuals failing to present the required proof by the 30th day of the semester. Students who have not submitted proof of immunity by the 30th day will be administratively withdrawn from classes.

Students who have been administratively withdrawn for lack of compliance with the N.Y.S. Immunization Law and are seeking to be reinstated must contact Student Health Services.

Noncompliance can jeopardize course completion, future registrations, and financial aid eligibility. Students administratively withdrawn from classes, due to their failure to comply with the law, will not be granted refunds of tuition or fees. (Please refer to the section on Tuition and Fees for further information concerning financial obligations.)

In the event that an outbreak of one of the illnesses noted above occurs, access to College facilities will be restricted only to those having proof of immunity.
Persons requiring additional information or having questions relative to health or religious matters, should direct their inquiries to Student Health Services or call 585.785.1297.

Meningitis Response Requirements
Effective August 15, 2003, New York State also requires that all students enrolled in 6 or more credits (except students in the FLCC: Gemini Program) receive information on meningococcal meningitis disease and vaccine availability. The student or parent of a minor child must sign and return to Student Health Services a form indicating that they have received the meningitis information, and have either (1) had the vaccine, or (2) decline to receive the vaccine. The meningitis response form and information can be obtained from: http://www.flcc.edu/pdf/ meningitis_form_factsheet.pdf. This form can also be completed through your WebAdvisor account; it is accessible under “Registration”.

Proof of Immunity
• Measles – (two doses of live measles vaccine given 1968 or after [the first dose must have been given on or after 12 months of age. The second dose must have been given on or after 15 months of age], or physician-documented history of disease, or serologic evidence of immunity).
• Rubella – (one dose of live rubella vaccine received on or after the first birthday, or serologic evidence of immunity).
• Mumps – (one dose of live mumps vaccine on or after the first birthday, or a physician-documented history of the disease, or serologic evidence of immunity).

Early Admissions

College Level Program
The College offers the high school senior an opportunity to earn college credit on a part-time or full-time basis. The Early Admissions Program is designed for the senior who has completed most required high school courses. Early Admissions students are not eligible for financial aid.

Part-time Study: The high school senior remains enrolled in a high school program while taking one or two college courses during the morning, afternoon, and/or evening. Written permission must be secured from the high school counselor or the principal. The high school senior must register and pay the tuition fee at regular college registration times. Immunization requirements will apply to high school seniors.

Full-time Study: The high school senior attends the College on a full-time basis and uses college credits to complete high school graduation requirements. Written permission from the high school counselor or the principal must be submitted and must include a list of Finger Lakes Community College courses required for high school graduation. Seniors should follow the standard college admissions procedures.

For further information, call the Office of Admissions at 585.785.1279.

College Courses for High School Students

FLCC: Gemini – Concurrent Enrollment Program
Finger Lakes Community College and area high schools partner to provide eligible high school students with the opportunity to receive college credit at an affordable cost. Qualified high school teachers are approved by Finger Lakes Community College and deliver the college course in their school.

FLCC: Gemini is a viable option to provide students with more course options, alleviate the high stakes testing associated with AP and IB courses, and provide the academic edge needed for acceptance into highly selective colleges.

Students in the FLCC: Gemini Program are part-time Finger Lakes Community College students with library and other student privileges. As students, they have the opportunity to transfer their college credits to other college institutions (SUNY and private) by receiving an official Finger Lakes Community College transcript.

Finger Lakes Community College’s FLCC: Gemini Program is accredited by the National Alliance of Concurrent Enrollment Partnerships (NACEP), a nationwide organization with an established set of programmatic standards indicative of quality concurrent enrollment programs. Finger Lakes Community College is included in a charter group of four institutions to be the first accredited by NACEP.

Note: It is the prerogative of any receiving college whether to accept transfer credit. All students should keep a portfolio of their work and consult with their anticipated future college before taking a college course.

3-1-1 Program
Through the 3-1-1 program, high school seniors take Finger Lakes Community College courses (Gemini and Articulated) at their high school. These students then travel to Finger Lakes Community College and take additional part-time college courses at the College or its campus centers.

Canandaigua Academy, Marcus Whitman High School, Penn Yan Academy and Victor High School have participated in the 3-1-1 program. Eligible students must have completed their junior year and have an overall “B” average (80%) or above. 3-1-1 students can fully participate in all high school sports and activities. At the end of the year, they can earn college sophomore level status at Finger Lakes Community College.

The 3-1-1 program offers a savings of more than forty percent of Finger Lakes Community College’s traditional costs. Financial aid is not available for concurrently enrolled students; however, a payment plan is available.

A significant portion of this program is contingent upon future enrollment at Finger Lakes Community College. The articulated courses completed in 3-1-1 can only be transferred to Finger Lakes Community College. After matriculating to Finger Lakes Community College, the articulated courses are added to the student’s academic record. Therefore, to be more effective, students should attend Finger Lakes Community College upon graduation.

Students Under the Age of 16
Requests from individuals under the age of 16 to enroll in coursework at Finger Lakes Community College will be reviewed on a case-by-case basis by the Director of Admissions. Permission will be granted based on the student’s academic and emotional preparedness for college-level
work, completion of course prerequisites, and age appropriateness of course material. If permission is granted, the student would be permitted to enroll as a non-matriculated student only (i.e. non-degree seeking student).

High school students enrolled in programs involving special articulation agreements between FLCC and area high schools as well as the FLCC Home School Initiative are exempt from this policy.

Individuals under the age of 16 wishing to enroll for a course as a non-matriculated student should contact the Admissions Office at (585) 785-1279 for further details.

Procedures for Admission of Students Under the Age of 16:

1. Complete a non-matriculated student registration form.

2. Student and parent or guardian must meet with the Director of Admissions to discuss student's intent within the timeframe listed below.
   - Summer session course: by June 1
   - Fall Semester course: by August 1
   - Spring Semester course: by January 1

3. At the time of the interview, students should provide the Director of Admissions with the following:
   a) A copy of the completed mail-in registration form
   b) A written statement from the student explaining why he/she should be permitted to enroll in the selected course(s)
   c) A letter of recommendation from an adult other than the parents (preferably from a teacher or high school counselor) speaking to the student’s ability to perform college-level work and the student’s level of maturity

If the student plans to take a math or an English course, he/she will be required to take the Basic Skills test before approval will be granted to register.

If the student has a learning or physical disability, appropriate documentation as outlined in the Procedures for Services to Students with Disabilities guide should accompany any requests for special testing accommodations. The above mentioned guide can be obtained online or in the Admissions Office.

4. If a student under the age of 16 applies to enroll in course work, he/she will receive notification of the decision within 5 working days of the interview. If approved, the student will be responsible for submitting the completed registration form to the One Stop Center and fulfilling all other requirements listed on the form (i.e. payment of tuition and fees, validation of residency, and proof of immunization, if applicable.)

5. Admission decisions may be appealed to the Vice President for Academic & Student Affairs with a final decision rendered within 15 working days of the appeal.

UNITED STATES AIR FORCE ROTC

Through the Rochester Area Colleges consortium, full-time Finger Lakes Community College students are eligible to participate in the Air Force ROTC program and compete for scholarships. Students attend Air Force ROTC classes at Rochester Institute of Technology while enrolled at FLCC. Students awarded AFROTC scholarships are entitled to additional benefits including non-taxable monthly stipends and money for books. Students also have the opportunity to participate in Professional Development Training around the world during the summer months. Successful graduates are guaranteed at least four years of active duty leadership experience as Air Force officers. Contact information for details on classes and scholarship opportunities is provided below:

Air Force ROTC – Rochester Institute of Technology, Rochester, NY
Telephone: 585.475.5197
website: https://www.rit.edu/~w-afrotc/

Credit by Examination, Contract Study, and Prior Learning Experiences

Finger Lakes Community College students come from diverse backgrounds and bring unique skills and knowledge to the College. There are a number of ways in which students may have acquired college level learning. These may include advanced placement high school courses, pursuit of personal interests, travel in the armed forces, reading and independent study, professional development, or work experience. When this knowledge parallels college course work, taking examinations is a way to prove that college level learning has taken place in order to receive credit toward a degree. A number of programs exist that design and administer examinations in college subject areas:

- Advanced Placement (AP)
- DANTES Subject Standardized Tests (DSST)
- Excelsior College Examinations
- College Level Examination Program (CLEP)
- Departmental Challenge Examinations
- International Baccalaureate

A maximum of 32 credit hours may be granted toward an FLCC degree through any combination of the above. Examination credit (except for Departmental Challenge Exams) is not included in the minimum of 32 credits which must be taken at FLCC in order to earn an FLCC degree and is not used in calculating a student’s grade point average. Students who have participated in these examination programs (except Departmental Challenge Exams) must have an official examination grade report sent to the Student Records Office for evaluation. Finger Lakes Community College utilizes the ACE (American Council on Education) recommendations for minimum scores, and number and type of credits awarded, for these examination programs.

Advanced Placement (AP)
The Advanced Placement Program, sponsored by the College Board, offers secondary students an opportunity to study one or more college-level courses and, depending on examination results, to receive advanced placement and/or college credit. A grade of three (3) or higher will qualify for credit.
International Baccalaureate (IB) Diploma Program

FLCC will consider transfer credit for those students who have completed HL (Higher Level) courses and earned a grade of 4 or higher on a particular final exam. Transfer credit evaluations will be done on a course-by-course basis by the Student Records Office in consultation with Academic Department Chairpersons.

In order to be eligible to receive a degree from Finger Lakes Community College, transfer students must complete a minimum of 32 credit hours and a minimum of 50% of the credit hours required in the intended discipline(s) of study at FLCC.

DANTES Subject Standardized Tests (DSST)

DSST (DANTES Subject Standardized Tests) exams are given in liberal arts, business, and technology subjects. Information and study guides are available on the web at www.getcollegecredit.com.

Excelsior College Examinations

Excelsior College Examinations are offered in liberal arts, business, and nursing subjects. Registration is done directly with Excelsior College in Albany – www.excelsior.edu. Exams are scheduled and administered at a nearby Prometric Testing Center.*

College Level Examination Program (CLEP)

CLEP (College Level Examination Program) exams are offered in liberal arts and business areas. Registration is with the test center. Visit www.collegeboard.com/clep for more information and a list of test centers.

Earning Credit for Life Experience through Portfolio Assessment

Finger Lakes Community College acknowledges that learning does take place beyond the classroom and in other venues. Credit for life experience can be defined as the awarding of credit for learning that is acquired outside of the classroom/college environment. Therefore, students are invited to demonstrate that the course requirements, as outlined in the syllabus, have been fulfilled through their life experience. Students will provide substantive evidence that course learning outcomes have been achieved by completing a portfolio.

Students must be matriculated, in good academic standing, have a cumulative GPA of at least 2.0; and must have accumulated 12 college credit hours before receiving credit for life experience. In addition, students will be responsible for tuition of 50% of the in-state tuition rate per credit hour. See the Student Records Office for a list of courses approved for portfolio assessment.

Students must be matriculated, in good academic standing, have a cumulative GPA of at least 2.0; and must have accumulated 12 college credit hours before receiving credit for life experience. In addition, students will be responsible for tuition of 50% of the in-state tuition rate per credit hour. See the Student Records Office for a list of courses approved for portfolio assessment.

Departmental Challenge Examinations

Departmental challenge examinations may be offered for college credit at the discretion of the individual department for any course that is not represented in the above examination programs. The exact nature of the examination is the responsibility of the department.

The student should consult with the respective department chairperson who will verify the applicant’s qualifications to take the departmental examination.

The student must receive a grade “C” or higher to receive credit. Each individual department will determine the level of proficiency it will accept. The candidate may not repeat examinations which have been failed. Credits will be recorded on the student’s permanent record with the notation, “Credit-by-exam.”

The cost of the examination will be a fee which will be equal to the cost of one credit hour of tuition regardless of the amount of credit involved. However, an additional fee will be charged in cases where there is a written examination plus a practical application. The cost of the examination cannot be included in the student’s regular credit load; this is an additional fee.

Contract Study at Finger Lakes Community College

Independent Study

Independent Study is designed to enable a student to conduct a special research project under the guidance of a faculty member. It is not intended to be a substitute for a regular course offering.

Proposals must clearly state the nature of the project, the frequency with which instructor and student meet, behavioral objectives, anticipated learning outcomes, and the method by which the student will be evaluated.

No student may pursue more than a total of six (6) credit hours under Independent Study while earning any associate degree. All proposals must conform to the rules of standard written English.

Any exception to the above-stated requirements may be granted only through permission of the Associate Vice President for Instruction and Assessment. Students registering for Independent Study are cautioned to await approval of the Associate Vice President before commencing any of the actual course work.

The student eligibility requirements for an Independent Study project are:

1. The Independent Study credit hours must be included in the regular semester load.

2. The grade issued for Independent Study will be in accord with the College’s grading system and will be assigned credit hours and quality points.

The student shall obtain a Contract Study form from the One Stop Center and then shall obtain approval from the following before registering for Contract Study:

• faculty member, academic advisor, department chairperson, and

• Associate Vice President for Instruction and Assessment.

There are additional fees associated with independent study for full-time students.

Tutorial Instruction

Finger Lakes Community College does not normally provide instruction for credit on a one-to-one basis for regularly scheduled courses. In exceptional instances, such as the student who is unable to fulfill graduation requirements through regular classroom instruction, the Associate Vice President for Instruction and Assessment may allow a student to register for a course on a tutorial basis. In the case of tutorial instruction, credits will be recorded in the student’s permanent record by actual course number and name.

There are additional fees associated with tutorial instruction for full-time students.

Articulation Agreements

Articulation agreements have been approved between Finger Lakes Community College and the organizations noted below to permit individuals who have completed appropriate training programs to receive partial credit towards Finger Lakes Community College degree program requirements. For further information, contact the Admissions Office at 585.785.1279.
Guidelines for the Granting of a High School Equivalency Diploma on the Basis of Earned College Credit or by Taking the GED Examination

Persons without a high school diploma may receive a New York State Equivalency Diploma (GED) in two ways:

1. Successfully complete 24 credit hours as a candidate for a college level degree or certificate and maintain a Grade Point Average of 2.0 or better. To obtain a High School Equivalency Diploma (GED), students must take courses in the following areas:
   - 6 credits English Language Arts
   - 3 credits Math
   - 3 credits Natural Science
   - 3 credits Social Science
   - 3 credits Humanities
   - 6 credits Pertaining to FLCC degree

   Students interested in earning the GED by successfully completing 24 hours of college credits should discuss their plans with a member of the Admissions staff. See Procedures for Admission, page 9.

   Once students have earned the prescribed 24 hours of college credit, they should request the New York State Education Department form to apply for their High School Equivalency Diploma. These application forms are available. Students not planning to send for the GED must complete the prescribed courses to earn an Associate Degree from Finger Lakes Community College.

2. Enroll in preparation courses for the GED test to receive a High School Equivalency Diploma. The classes diagnose skill areas to be worked on and guide the student through a process to learn the necessary material for the test. These classes are offered at no charge to the student. The GED test itself is given a number of times during the year at area locations.

   To take the test, students must be at least 19 years of age, or 17 or 18 years of age and have been either out of school at least one year, or a member of a high school class which has graduated. For information on when classes start, and for testing dates and locations, contact the Developmental Studies Department by calling 585.785.1431.
Tuition and Fees

Tuition and fees are payable at registration according to the payment schedule released by the College. The tuition figures and fees listed on this page and on the next page may be changed prior to the opening of the College academic year. The responsibility for payment of tuition and fees rests upon the student. The student's course schedule will be cancelled for the appropriate semester if the established due dates for payment are not met.

For additional information, please call the One Stop Center at 585.785.1000.

Full-Time and Part-Time Students

A full-time student is one enrolled for 12 or more credit hours. A part-time student is one enrolled for less than 12 credit hours. A student enrolled for 12 or more credit hours at any time during the Fall or Spring Semester will be charged the full-time student rates.

Tuition (2012-2013)*

For Full-time Students (per semester):
New York State residents
with Certificate of Residence (affidavit required)** $ 1,827.00

Out-of-state residents or New York State residents
with no Certificate of Residence $ 3,654.00

For Part-time Students (per credit hour):
View Detailed Tuition/Fee Rates and Refund Policies for Part-time Students at http://www.flcc.edu/costs/parttime.cfm

New York State residents
with Certificate of Residence (affidavit required)** $ 138.00

Out-of-State residents or New York State residents
with no Certificate of Residence $ 276.00

Variable Tuition for College Credit
with Certificate of Residence (affidavit required)** $ 46.00

Variable Tuition for College Credit
with no Certificate of Residence $ 92.00

Fees (2012 - 2013)*

For Full-time Students (per semester, unless noted):
Athletic Fee (finances intercollegiate activities) $ 40.00

Auxiliary Services Fee (SUNY I.D.; student insurance; graduation cap/gown) $ 25.00

Student Activities Fee (finances student activities, lectures, concerts, and student publications) $ 72.00

SUNY Learning Network Course (per credit hour) $ 10.00

Technology Fee (finances periodic replacements of all student-used desktop computer systems, servers, and other related resources) $ 70.00

For Part-time Students (per credit hour, unless noted):
Student Activities Part-Time Fee $ 6.00

SUNY Learning Network Course (per credit hour) $ 10.00

Technology Fee $ 7.00

Variable Tuition for College Credit-Administrative Fee $ 1.00

Other Fees*
Challenge Examinations for Advanced Credit (per course) (affidavit required)** $ 138.00

Course Overload Fee-over 19 credit hours for Spring and Fall terms; over 13 credit hours for Summer Session, and over 7 credit hours for Winter Session (per application) $ 100.00

Culinary Arts (per course)
(for courses: CUL 100, CUL 110, CUL 200, CUL 210) $ 187.00

EMT Fee (Critical Care Transport) (per course) $ 200.00

Independent Study Course for students carrying a full-time schedule fee (per credit hour)(affidavit required)** $ 69.00

Independent Study Course for students carrying a part-time schedule tuition (per credit hour) (affidavit required)** $ 138.00

Lab Fees (maximum, per course) $ 5.00-$50.00

Late Payment Fee (per semester) $ 20.00

Late Registration Fee (per semester/$10 per course-$40 maximum per student) $ 10.00-40.00

Liability-Malpractice Insurance (estimated)
(per year/applicable to Nursing, Therapeutic Massage, and EMT students) $ 15.00

Returned Check Fee (per occurrence) $ 20.00

Transcript Fee (per transcript) $ 5.00

Wildland Fire Suppression Materials (in addition to the tuition) (for CON 255 Course, one-time fee): $ 6.00

Music Fees (in addition to the tuition for applicable courses):
Applied Music Fee (per course)
(for courses: MUS 131-137, 160, 161, 163-165) $ 214.00

Music Recording Technology Student Course Fee (per semester) (for courses: MUS 170, 270-272, 275) $ 30.00
Nursing Assessment Testing & Remediation Fee (per course in addition to the tuition) (for courses: NUR100, NUR101, NUR202 and NUR203) (pays for a testing and remediation program through Kaplan Testing. It will assist students in success in nursing courses and on the national licensing examination - NCLEX-RN.) $112.50

Nursing Lab Supplies Fee (in addition to the tuition) (per course for courses: NUR 100, NUR 101 and NUR 202) $45.00

Physical Education Course Fees (in addition to the tuition): (per course for PE 242 and PE 244 Courses) $35.00

* Tuition and fees are subject to change without notice and pending approval of the Board of Trustees.
** Any student who has been a resident of New York State for one year or more is eligible to obtain a Certificate of Residence from his/her County Treasurer’s Office.

Methods of Payment

- Cash
- Check or Money Order: Acceptable if made payable to Finger Lakes Community College. A $20.00 charge will be assessed for all checks issued to the College and not paid upon presentation to the bank.
- Credit Card: The College will accept Discover, VISA, American Express or MasterCard charges only if the card submitted is in the name of the student. The name on the credit card and the person registered for the course(s) must be the same individual.
- Deferred Tuition Payment Plan: The College has made arrangements with an external payment plan company to service students in financing a time payment plan for tuition and fees. Information regarding this plan may be obtained from the One Stop Center. Generally, there are four (4) payments per semester, starting before the semester begins: in July for Fall and in December for Spring.

Delinquent Accounts

Students with delinquent accounts with the College may be denied the privilege of pre-registering for the next semester. Also their statement of grades and/or official transcripts will be withheld until their delinquent balance is paid in full at the Student Accounts Office. It is the College’s policy to assign delinquent accounts to a collection agency. After proper notification, students who have an unpaid balance in their account for the semester may be assigned to a collection agency. Students will be responsible for the outstanding balance, PLUS all late payment fees, collection agency fees in the range of 33.33% to 66.67%, court costs, and attorney fees. Furthermore, the collection agency will notify all credit reporting agencies of the outstanding debt. It is, therefore, important and advantageous to pay account balances in full when they are due.

Sponsorship Deferrals

All Students who expect their semester bill to be paid by a Sponsor must submit a valid written Sponsor Authorization, addressed to FLCC Student Accounts Office that provides the actual sponsored amount and the date a payment will be sent to FLCC-Student Accounts Office. A Sponsorship Agreement Form may be downloaded from: www.flcc.edu/bursar.

Course Drop and Withdrawal Procedures

A student who finds it necessary to withdraw from classes must complete appropriate paperwork. Students withdrawing from all classes must complete a withdrawal form with the Office of Educational Planning and Career Services. The withdrawal form is available at www.flcc.edu/eduplanning. Submit the completed form in person, or via mail or fax 585.394.8304. The effective date of the withdrawal is the date the form is received in the Office of Educational Planning and Career Services.

Students dropping individual courses must submit a completed drop form to the One Stop Center. Online students may drop a course by emailing the One Stop Center at onestop@flcc.edu. The effective date of the course drop is the date of receipt in the One Stop Center. Call the One Stop Center at 585.785.1000, with questions.

To determine the impact that dropping a course or completing a total withdrawal will have, students are strongly recommended to meet with a staff member in the Office of Educational Planning and Career Services and to contact the One Stop Center prior to finalizing the change. Students who drop classes or withdraw for any reason, including medical reasons, are subject to the Tuition Refund as well as the academic standards detailed on page 39.

Lack of attendance or a verbal notice by a student to an instructor, advisor, or any Finger Lakes Community College staff member does not constitute a formal course drop or withdrawal and will not result in a reduction of tuition and fees.

Tuition Refund

Credit Courses – Fall and Spring Semesters

If tuition has been paid by cash, check or credit card, or financial aid has been accessed from the government to pay the account, you may be entitled to a refund if timely drop slips or withdrawal documentation is submitted to the One Stop Center at 585.785.1000.

The date on which the One Stop Center receives the forms will be used to determine refunds.

A verbal notice by a student to an instructor, advisor, or any FLCC staff member does not constitute a formal course withdrawal or drop.

Lack of attendance does not reduce tuition and fees; therefore, timely withdrawal or drop slips will ensure proper credit to your student account.

To receive a 100% refund of already paid tuition and fees, the completed forms must be received by the One Stop Center as follows:
- For credit courses 15 weeks or more, one business day prior to the official semester start date.
The schedule for tuition refund for credit courses 15 weeks or more is as follows:

- Approved drop/withdrawal one business day prior to semester start date
  Tuition and fees 100%
- Approved drop/withdrawal during 1st week of semester
  Tuition only 75%
- Approved drop/withdrawal during 2nd week of semester
  Tuition only 50%
- Approved drop/withdrawal during 3rd week of semester
  Tuition only 25%
- Approved drop/withdrawal after 3rd week
  (20th day) of semester
  No Refund

For credit courses less than 15 weeks, one business day prior to the official start date of the classes.

The schedule for tuition refund for credit courses less than 15 weeks is as follows:

- The date on which the One Stop Center receives the Course Drop/Withdrawal forms will be used to determine refunds. To receive 100% REFUND of already paid tuition and fees, the completed forms must be received by the One Stop Center one business day prior to the first class meeting date.
- If you drop a class within seven calendar days from the start date of the class, you will be entitled to a 25% refund (of tuition only). There is NO REFUND granted for course drops after the seven calendar days from the start date of the class.

If courses are canceled by the College which changes your status from full- to part-time, the appropriate tuition and fees will be refunded. If a student changes from full to part-time status (11 or less credit hours/semester) after the semester has started, refund will be issued according to the schedule for tuition refund.

Credit Courses – Winter Session and Summer Semesters

- The date on which the One Stop Center receives the Course Drop/Withdrawal forms will be used to determine refunds. To receive 100% REFUND of already paid tuition and fees, the completed forms must be received by the One Stop Center one business day prior to the first class meeting date.
- If you drop a class within seven calendar days from the start date of the class, you will be entitled to a 25% refund (of tuition only). There is NO REFUND granted for course drops after the seven calendar days from the start date of the class.

Non-Credit Courses

- Refunds will be processed for those students who officially cancel their registration and submit a drop slip to the One Stop Center one business day prior to the start date of classes. Please contact the Division of Professional Studies and Continuing Education (Telephone: 585.785.1660) one business day prior to the class start date if you wish to drop the course.

### Disbursement of Title IV Funds and Other Aid

The first receipt of Title IV funds and other aid by the Student Accounts Office (which may include Federal Unsubsidized Stafford Loan, Federal Subsidized Stafford Loan, Federal Parent (Plus) Loans, Federal Pell Grant, Federal SEOG, other Title IV Programs, and any scholarships or aid) will be applied to the student's account. The student account charges may consist of tuition, fees (http://www.flcc.edu/costs/index.cfm), housing, bookstore, meals, and emergency loans. After the student account is paid in full, any subsequent financial aid will be refunded when the funds are received.

#### Federal Financial Aid Award Program Participants

Federal regulations (the Higher Education Amendments of 1998, regulation 34 CFR part 668.22) require each school to have a written policy for the refund and repayment of Federal Title IV aid* received by students who withdraw during a term for which Title IV aid payment has been received. These policies are effective only if the student completely terminates enrollment (i.e., cancels his/her registration, withdraws, or is dismissed) or stops attending classes before completing more than 60% of the enrollment period.

#### Refund Policy

The amount of a refund of tuition and fees for students who withdraw will be calculated as outlined in the College Catalog under “Course Drop and Withdrawal Procedure” and “Tuition Refund – Credit Courses.”

#### Repayment Of Title IV Funds Policy

1. The amount of Title IV financial aid that a student must repay is determined by using the Federal Formula for Return of Title IV funds as specified in Section 484B of the Higher Education Act. The amount of Federal Title IV financial aid assistance that the student earns is determined on a pro rata basis. Once the student has completed more than 60% of the payment period, all financial aid assistance is considered to be earned. The school returns the lesser of:
   - Percent earned = Number of calendar days completed up to the withdrawal date** divided by the total calendar days in the payment period with an allowance for any scheduled breaks that are at least 5 days long.
   - Percent unearned = 100% minus percent earned

2. When a student has received Federal financial aid in excess of earned aid, the school returns the lesser of:
   - Institutional charges multiplied by the unearned percentage, or
   - Title IV Federal financial aid disbursed multiplied by the unearned percentage

   the student:
   - returns any remaining unearned aid not covered by the school.
   - repays any loan funds in accordance with the terms of the promissory note. (That is, scheduled payments to the holder of the loan over a period of time.)
   - returns any grant amount the student has to repay (considered a grant overpayment and arrangements must be made with the school or Department of Education to repay the funds).

Unearned Title IV Federal financial aid shall be repaid to the following programs in the following order:

1. Federal Unsubsidized Stafford Loan
2. Federal Subsidized Stafford Loan
3. Federal Parent (PLUS) Loans
4. Federal Pell Grant
5. Federal SEOG
6. Other Title IV Programs

---

**Withdrawal date: The date the student officially cancel their registration or last day of attendance as determined by the school.
3. The student is billed for funds the College is required to repay. The Student Accounts Office bills the student, and any account that is not paid within 30 days is turned over to a collection agency.

4. The tuition and fees, procedures, and policies listed above supersede those published previously and are subject to change at any time.

* Federal Title IV financial aid includes the Federal Pell Grant, Federal Supplemental Opportunity Grant (SEOG), Federal Stafford Loans (Unsubsidized and Subsidized), Federal Parent PLUS Loans, and other Title IV Programs.

** Withdrawal date is defined as the actual date the student begins the institution’s withdrawal process, the student’s last date of academic-related activity, or the midpoint of the payment period for a student who leaves without notifying the institution.

**Property Damage**

Although there is no deposit required to cover property damage, students are held responsible for any damages incurred and shall be assessed accordingly.

**Certificate of Residence**

This document is necessary for each year that a student attends a community college in New York State. A Certificate of Residence must be obtained from the student’s county (or counties) of residence. One must have been a resident of New York State for one full year or more in order to be eligible to obtain this Certificate from their County Treasurer’s Office. The Certificate must be dated no earlier than 60 days prior to the start of classes and no later than 30 days after the start of classes. If the student moves from one county to another during the academic year, before registering for the next semester, a new Certificate of Residence must be obtained which indicates in which counties the student resided for the previous six month period. Some counties require an application form from the College; please check with the One Stop Center.

The One Stop Center will process and notarize Ontario County residents’ certificates. Identification showing the student’s current address and signature on it must be brought to the office. Note: living in Ontario County to attend college does not constitute permanent residency.

Failure to submit an updated form may result in out-of-county/state rates used on an account.

**Transcripts**

Students may request copies of their permanent record of academic work by completing a transcript request form available at the One Stop Center, on the College website, by making written request to the One Stop Center, or through Web Advisor. Telephone and e-mail requests cannot be accepted. Written requests should include: student’s name as it appears on College records and any name change since leaving the College, date of birth, social security number or Student ID number, dates attended, a current mailing address, name/address transcript is being issued to, and signature. There is no fee for an unofficial transcript. A fee of $5.00 is charged for each official transcript. Transcripts will not be sent for anyone with an outstanding financial obligation to the College.

**Online Western New York Learning Alliance**

OWL is an alliance of SUNY community colleges which allows students to combine courses among regional partner colleges, working toward an affordable, quality SUNY degree or certificate in any of 38 fully online programs. Working adult students who need the convenience of online courses are able to work with a concierge at their home college to “mix & match” courses which apply to their chosen program, allowing for greater flexibility, maximum course availability, and potentially quicker degree completion.

**Cross Registration**

Full-time matriculated students at Finger Lakes Community College are entitled to register without additional tuition in courses offered by any member of the Rochester Area Colleges, Inc. (RAC) on a space-available basis. Member colleges include: Alfred University, Colgate-Rochester/Bexley/Crozier, SUNY College of Technology at Alfred, Empire State College, Keuka, Monroe Community College, Nazareth College, Roberts Wesleyan, Rochester Institute of Technology, St. John Fisher, SUNY Geneseo, and the University of Rochester.

The following limitations apply to the cross registration:

1. The student must be enrolled at Finger Lakes Community College for 12 or more credits.

2. The course is not being offered at Finger Lakes Community College during the semester, and it is applicable to the student’s degree program. All necessary prerequisites for the course must be met.

3. The course must be taken in the Spring or Fall Semester. The cross registration policy does not apply to Winter Session or Summer courses.

4. The student must receive approval from the Associate Vice President of Instruction and Assessment, or the Registrar.

5. Permission must be received from the College where the course is offered. The student is responsible for any fees assessed by the College where the course is being taken.

Cross registration forms are available at the One Stop Center.

Any full-time visiting student from participating Rochester Area Colleges, who has approval from their home school to register for Finger Lakes Community College courses, will have the tuition waived. Fees in addition to tuition are not waived for any student.
Overload Policy

Finger Lakes Community College students may register for a maximum of 19 credit hours during the fall/spring semester. Summer session students may register for a maximum of 12 credits with no more than six (6) credit hours taken in one session. Winter Session students may register for a maximum of 6 credits. A student who is not on academic probation or who has not been academically dismissed may complete an overload petition to register for 20 or more credit hours during the Fall and/or Spring Semesters. Petition forms are available in the One Stop Center. The form should be completed and signed by the student and approved by the student’s advisor and the Associate Vice President of Instruction and Assessment. Upon approval, the petition form is then submitted to the Student Accounts Office with the $100 overload fee. The One Stop Center will be notified and the course(s) will be added to the student’s schedule. Overload petitions will not be granted to first-time college students except under extenuating circumstances.

Course Audit

The privilege of auditing a credit course at Finger Lakes Community College is open to both full- and part-time students. There is no audit provision for non-credit courses.

Part- and full-time students wishing to audit a course must register for the course and pay regular tuition and fees for the course. Permission to audit must be obtained from the instructor of the course and the student's advisor, if applicable. Approval to audit a course must be presented to the One Stop Center by the end of the drop/add period (third week of semester). Please see the Grading System for explanation of the AU grade.

Senior Citizens

New York State legislation states that community colleges “may permit persons who have reached 60 years of age or over to audit courses given therein without tuition, examination, grading or credit therefore upon a space available basis.”

Finger Lakes Community College welcomes senior citizens on a space available basis as determined at the close of normal registration. This auditing privilege is restricted to courses that are offered for college credit. Course materials or supplies needed for class, not covered by normal tuition, will be the responsibility of the student.

Courses must have the required minimum of paying registrants (exclusive of senior citizen audits) in determining whether course registrations meet the College’s minimum enrollment requirement.

Contact the One Stop Center for senior citizen audit registration procedures.
Financial Aid

The goal of the Financial Aid Office of Finger Lakes Community College is to promote equal access to education by awarding and assisting students in the location of necessary funds to meet educational expenses based on the student’s long-term educational objectives and complete financial situation.

A detailed explanation of the available financial aid programs is accessible online at www.flcc.edu/aid.

How to Apply

Students wishing to be considered for financial assistance should file a Free Application for Federal Student Aid (FAFSA), and a NYS Tuition Assistance Program (TAP) application. The FAFSA should be completed as soon after January 1 as possible. Go to www.flcc.edu/aid/apply.cfm to apply for financial aid.

Financial aid is awarded on a first come, first served basis. The recommended filing deadline is March 15th for the Fall Semester and November 1st for the Spring Semester.

Financial Assistance Available to Students

Scholarships
There are scholarships administered through the Finger Lakes Community College Foundation, Inc. For a complete listing of these scholarships, please see pages 23-24.

Students may also wish to check with the Financial Aid Office for a listing of various outside scholarships offered, eligibility requirements, and deadline dates for filing.

Grants: No Obligation to Repay
1. New York State Tuition Assistance Program (TAP) – file FAFSA and TAP, (NYS Regents Child of Veteran Scholarship, and Child of Deceased Police Officer-Firefighter Award must file special application).
2. Federal Pell Grant – file FAFSA
3. Federal Supplemental Educational Opportunity Grant (SEOG) – file FAFSA
4. Educational Opportunity Grant (EOP) – file FAFSA
5. Veterans’ Benefits
6. Vocational Rehabilitation Funds
7. New York State Aid for Part-time Study (APTS) – file APTS application
8. New York State Part-Time TAP – file FAFSA and TAP

Loans: Fixed interest rate – Repayment begins six months after a student drops below 6 credit hours, graduates, or stops attending.
1. Federal Direct Stafford Loan – file FAFSA, Master Promissory Note and Entrance Interview.
2. Federal Direct PLUS Loan – file FAFSA, Master Promissory Note, and PLUS Supplemental Form.

Terms and Expected Schedules for Repayment
The student must comply with terms stated in the Promissory Note. Federal Stafford Loan repayment schedules are established by the servicer. The student should contact the lending institution or the U.S. Department of Education for further details.

Work: Part-time Employment on Campus
1. Federal Work Study – file FAFSA
2. Student Aid Positions – apply to individual departments
3. Tutor Positions – apply to Division of Developmental Studies

General conditions and terms applicable to the Federal Work Study Program are outlined at www.flcc.edu/jobs/workstudy.cfm

Eligibility Requirements
1. Student must be a citizen of the United States or an eligible non-citizen.
2. Student must be at least half-time (6 credits) for certain programs.
3. Student must be matriculated.
4. Student must be a New York State resident (EOP, APTS, Part-Time TAP and TAP only).
5. Student must maintain good academic standing.
6. Student may not be in default on a previous loan, or owe a repayment on an over-award.

Payments of Awards
All financial aid, except Federal Work Study, may be used to credit the student’s tuition bill. The amount of aid in excess of that bill will be disbursed to the student during each semester that he/she is enrolled. Disbursements normally begin six weeks into the semester.

* Tuition and fees reflect 2012-2013 costs and are subject to increase at any time by the Board of Trustees.

** Consideration is given for expenses incurred by parents for maintenance costs for students living at home.

**NOTE:** For information on academic standards required for financial aid, see page 42.

---

### Part-Time Students

The cost of attendance for a student who enrolls part-time will be prorated using the full-time scale. Part-time tuition and fees are listed on page 16.

### Veterans’ Benefits

Veterans should be aware that the Veterans’ Administration provides assistance for eligible veterans seeking further education. Additional information on Veterans’ Benefits may be obtained by contacting either the Veterans’ Service Agency Advisor or the Financial Aid Office at the College.
The Finger Lakes Community College Foundation is a not-for-profit corporation established to seek private support for the College’s mission. Given the growing constraints placed upon public funding, private giving is increasingly important to public higher education. Private contributions help maintain the standard of excellence at Finger Lakes Community College.

The Finger Lakes Community College Foundation assists the College with faculty development, special projects, equipment purchases, and scholarships. Many named scholarships have been established by individuals, businesses, or community organizations to honor the memory of individuals who were connected with the College and its mission.

The Finger Lakes Community College Scholarship Program

The Finger Lakes Community College Foundation Scholarship Program has two goals:

• to assist incoming students who have demonstrated academic excellence in high school, or who are returning to college as non-traditional age adult students, and
• to assist returning students who have demonstrated the ability to achieve success at Finger Lakes Community College.

Scholarships range from $250 per year to full tuition.

Scholarships for New Students (Traditional/Non-Traditional)

General Interest Scholarships
- Alton B. Corbit Scholarship
- FLCC Alumni Association Scholarship
- FLCC Alumni Association Excellence Scholarship
- FLCC Board of Trustees Scholarship
- FLCC President’s Scholarship
- Garlock Sealing Technologies, Inc. Scholarship
- The Michaels Family Memorial Scholarship
- New York Firefighters Foundation Scholarship
- Kenneth A. Poormon ’97 Memorial Scholarship
- POW/MIA Award

Adult Student Scholarships
- Charlotte Cowie Memorial Scholarship
- Finger Lakes Development Center for Business

Business Scholarships
- Joanne Glover Memorial Scholarship

Conservation Scholarships
- Constellation Brands Viticultural Scholarship
- New York State Conservation Law Officers Association Scholarship
- Amy Steverson Scholarship

First in Family Scholarship
- The Max and Marian Farash Charitable Foundation

- New York State Sheriff’s Association

Hotel and Resort Management Scholarship
- AVI Fresh, Inc. Hospitality Scholarship

Human Services Scholarships
- Alice C. Southgate Home Bureau Scholarship
Mathematics and Computing Sciences Scholarships
- Brenda S. (Bockman) Beck Memorial Scholarship
- FLCC Mathematics Department Award in Memory of Sherman Hunt

Nursing Scholarships
- Mary Capozzi Integrated Health Care Scholarship
- Canandaigua Lions Memorial Scholarship in Memory of Barbara Collins
- Mr. and Mrs. Elwood A. (Emma) Garner Memorial Scholarship
- Frances F. MacLeod Legacy Scholarship
- Frances F. MacLeod Memorial Scholarship
- Jane Milne Mills Memorial Scholarship
- Nursing Alumni Legacy Scholarship
- Alice C. Southgate Home Bureau Scholarship

Science/Technology Scholarships
- FLCC Science/Technology Faculty Scholarship
- G.W. Lisk Excellence Scholarship
- Murray F. Gardner Memorial Scholarship
- Ed Morrell Biology/Biotechnology Scholarship
- Bill Parham Memorial Scholarship
- Eugene B. Risser Technology Scholarship

Therapeutic Massage Scholarships
- Mary Capozzi Integrated Health Care Scholarship
- Massage Therapy Scholarship
- Melissa Young (Hawk Child Wandering) Massage Scholarship

Tourism Scholarship
- A Finger Lakes Visitors Connection, Ontario County, NY Scholarship

Visual and Performing Arts Scholarships
- Marie DePalma Art Award
- Dr. Henry Buxbaum Fine Arts Prize
- Catherine J. Kamm Vocal Music Award
- Dr. Charles J. Meder Scholarship for the Arts
- John M. Meuser Memorial Scholarship
- Dr. A. John Walker Music Awards
- Professor Wayne Williams Award in Honor of his Parents Ashley and Pauline Williams
- Dr. A. John Walker Music Awards

Graduating Student Awards
Computing Sciences Scholarship
- Patricia Nettnin Memorial Scholarship

Education Scholarship
- Delta Kappa Gamma Society International Scholarship

Nursing Scholarship
- Nursing Alumni Legacy Scholarship
Cultural Diversity

Finger Lakes Community College is committed to cultural diversity in its student body and staff. It also seeks to have an environment that promotes and supports differences of opinions and views. To this end, the curriculum and co-curricular activities are encouraged to reflect a variety of perspectives that foster cultural diversity.

Equal Opportunity/ Affirmative Action

Finger Lakes Community College prohibits and will not tolerate discrimination or harassment on the basis of race, religion, color, national origin, sex, age, sexual orientation, disabilities, genetic information, marital or veteran status or any other characteristic protected by law in its educational programs, admissions, activities, or employment policies.

Retaliation is prohibited against any person who files a charge of discrimination.

The College, in its continuing effort to seek equity in education and employment, and in support of Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, and federal and state anti-discrimination legislation, provides a grievance procedure for the prompt and equitable investigation and resolution of allegations of unlawful discrimination on the basis of race, color, national origin, religion, age, sex, disability, marital status, sexual orientation, genetic information, or veteran status. Information and a copy of the Equal Opportunity/Affirmative Action Grievance Procedures may be obtained from the Human Resources Officer at the College.

Inquiries regarding compliance with Title IX, Section 504, and the ADA may be directed to:

Religious Beliefs

1. No person shall be expelled from or be refused admission as a student to an institution of higher education for the reason that he or she is unable, because of his or her religious beliefs, to attend classes or to participate in any examination, study or work requirements on a particular day or days.

2. Any student in an institution of higher education who is unable, because of his or her religious beliefs, to attend classes on a particular day or days shall, because of such absence on the particular day or days, be excused from any examination or any study or work requirements. Students should provide this information to their faculty during the first week of the term.

3. It shall be the responsibility of the faculty and of the administrative officials of each institution of higher education to make available to each student who is absent from school, because of his or her religious beliefs, an equivalent opportunity to make up any examination, study, or work requirements which he or she may have missed because of such absence on any particular day or days. No fees of any kind shall be charged by the institution for making available to the said student such equivalent opportunity.

4. If classes, examinations, study, or work requirements are held on Friday after four o’clock post meridian or on Saturday, similar or makeup classes, examinations, study, or work requirements shall be made available on other days, where it is possible and practicable to do so. No special fees shall be charged to the student for these classes, examinations, study, or work requirements held on other days.

5. In effectuating the provisions of this section, it shall be the duty of the faculty and of the administrative officials of each institution of higher education to exercise the fullest measure of good faith. No adverse or prejudicial effects shall result to any student, because of availing himself or herself of the provisions of this section.

6. Any student, who is aggrieved by the alleged failure of any faculty or administration officials to comply in good faith with the provisions of this section, shall be entitled to maintain an action or proceeding in the Supreme Court of the county in which such institution of higher education is located for the enforcement of his or her rights under this section.

6a) A copy of this section shall be published by each institution of higher education in the catalog of such institution containing the listings of available courses.

7. As used in this section, the term “institution of higher education” shall mean schools under the control of the Board of Trustees of the State University of New York or the Board of Higher Education of the City of New York or any community college.
Sexual Harassment Policy

The Federal Equal Employment Opportunity Commission has defined sexual harassment as: “Unwelcome sexual advances, requests for sexual favors, sexual violence, and other verbal, electronic or physical conduct of a sexual nature, when

1. "submission to such conduct is made either explicitly or implicitly as a term or condition of an individual’s employment” (the College interprets this statement to include a student’s participation in academic courses, programs, or activities);

2. "submission or rejection of such conduct by an individual is used as the basis for employment decisions affecting such individual” (the College interprets this statement to include educational decisions affecting a student); and

3. “such conduct has the purpose or effect of unreasonably interfering with an individual’s work performance or creating an intimidating, hostile or offensive working environment” (the College interprets this statement to include a student’s educational experience or learning environment).

Finger Lakes Community College’s policies are consistent with Federal, State, and SUNY’s policies that ensure fair treatment to all individuals, and protection from sexual harassment is afforded to students as well as employees.

Sexual harassment is a violation of both the federal law under Section 703 of the Civil Rights Act of 1964 and Title IX Education Amendments of 1972 and the state law under the New York State Human Rights Act.

Retaliation against an individual for reporting sexual harassment or for participating in an investigation is prohibited by the College policy and state and federal law. Any act of retaliation will subject offender to sanctions independent of the sexual harassment allegation.

It is a violation of this policy for any person to knowingly make false accusations of sexual harassment. Failure to prove a claim of sexual harassment is not equivalent to a false allegation. Sanctions may be imposed for making false accusations of sexual harassment.

Inquiries regarding compliance with Title IX may be directed to:

Human Resources Director Grace Loomis or
Associate Vice President of Student Affairs Dr. Kerry Levett
Finger Lakes Community College
3325 Marvin Sands Drive
Canandaigua, NY 14424

Family Educational Rights and Privacy Act (FERPA)

Pursuant to the requirements of the Family Education Rights and Privacy Act (FERPA) of 1974, Finger Lakes Community College has adopted a policy which ensures that students will have the right to inspect and review certain education records maintained under their names and to obtain copies of those records. Further, Finger Lakes Community College will not disclose personally identifiable information from the education records of a student without the prior written consent of the student except as permitted by the Act and specified in the College’s statement of policy.

The College reserves the right to release Directory Information without prior written consent, unless the College has been informed in writing by the student during the annual notification period that all or part of the student’s Directory Information may not be released. Directory Information includes: name, address, email address, and telephone number; photograph or likeness; date and place of birth; major field of study; participation in officially recognized activities and sports; weight and height of members of athletic teams; dates of attendance at Finger Lakes Community College; enrollment status; degrees, certificates, and awards received; and the most recent previous educational agency or institution attended by the student. Students have the right to restrict disclosure/release of directory information to third-parties. While students are attending Finger Lakes Community College they must file the notification to withhold Directory Information annually during the Fall Semester. Forms for this purpose are available from the One Stop.

Students have the right to file complaints concerning alleged failure on the part of Finger Lakes Community College to comply with the requirements of the Act by writing to:

Family Educational Rights and Privacy Office
Department of Education
330 Independence Avenue, S.W.
Washington, DC 20201

Drug-Free Workplace/
Drug-Free Campus Policy

Finger Lakes Community College is committed to the maintenance of a drug free work environment. As an educational institution, the College endeavors to promote healthy lifestyles for its staff and students and has established policies concerning alcohol and tobacco use on its premises. In keeping with this goal, a Campus Community Coalition was established to address issues of substance use through a strategic wellness plan. The College clearly does not condone the unlawful use, possession, distribution, or manufacture of controlled substances or the abuse of alcohol on its premises.

This policy, as outlined in the Student Handbook, describes the philosophy of Finger Lakes Community College and the program elements the College will use to meet our commitment.

Students may obtain a copy of the Student Handbook from a variety of sources, including the Student Life Office, and at the FLCC Geneva Campus Center and Wayne County Campus Center.
Smoking Policy

Finger Lakes Community College maintains a smoke-free environment. No person shall carry a lighted cigar, cigarette, pipe, or any other form of smoking object or device in any indoor area of the College, including College vehicles and all off-campus facilities. In addition, the College has established exterior entrances as “Smoke Free Zones.” The zones are marked with signs and blue striping across the sidewalks.

Children on Campus

The College is an educational enterprise that is focused on adults and generally does not have an environment that is conducive to the presence of children. Students or prospective students should make appropriate child care arrangements for their children when conducting business at a Finger Lakes Community College site. Bringing children to registrations or classes is strongly discouraged.

The following guidelines apply when it is necessary for children to accompany their parents to the College premises:

1. Children on campus are to remain in the direct supervision of a parent/guardian. Any unsupervised children may be detained by a College representative. In that event, the child’s parent/guardian will be contacted immediately, and the Office of Campus Safety shall be notified.

2. Children shall not be allowed to disrupt the learning environment. The parent/guardian and child may be asked to leave the classroom or service office at the discretion of the faculty or staff member.

3. The College may interpret a child’s disruptive behavior as the parent/guardian student’s violation of the Student Code of Conduct.

The College recognizes that many of our students do have child care needs. In order to assist students in providing appropriate care for their children while coming to the College, a Child Care Center has been established at the main campus. For those students who are unable to utilize the Center, and for students at the Geneva Campus Center or the Wayne County Campus Center, the College provides referral information on other child care centers.

Student Code of Conduct Policy and Grievance Procedures

As explained in its Mission Statement, Finger Lakes Community College – a public, open-access institution – is a supportive, learning-centered environment that empowers our students, provides enriching life experiences, and enhances the quality of life throughout our community.

The Student Code of Conduct Policy at FLCC is intended to foster and protect the free and open exchange of ideas. This Code applies to students and student organizations of Finger Lakes Community College. Students are subject to this Code of Conduct during academic terms for which they are enrolled, during breaks between terms, during College holidays and vacations, and during periods of suspension. The Code of Conduct outlines the rights and responsibilities of students, behaviors prohibited on and/or off campus, possible sanctions, and the procedural rights of students and student organizations.

The Code embraces several important values: the rights of free speech and peaceable assembly; the freedom of inquiry and the right to make constructive criticism; the central importance of honesty to this community; and the desire that all students participate on campus in an environment that respects differences of culture, gender, religion, race, ability, or background.

Students who have questions about the Student Code of Conduct Policy should contact the Director of Community Standards at 585.785.1211. The Student Code of Conduct Policy may also be viewed at www.flcc.edu/offices/judicial/index.cfm.

Grievance Procedures

Finger Lakes Community College has adopted an internal grievance procedure providing for prompt and equitable resolution of academic complaints, discrimination complaints, and/or sexual harassment complaints. All other complaints and disputes, other than those previously specified, should be presented to the Associate Vice President of Student Affairs within ten (10) College working days following the occurrence. Students who have questions about the Grievance Procedures should contact the Associate Vice President of Student Affairs at 585.785.1211. The Grievance Procedures may be viewed at www.flcc.edu/offices/judicial/index.cfm.

College Closing/ Cancellation of Classes

In the event of severe and hazardous weather and/or road conditions, or an emergency situation, Finger Lakes Community College may close entirely or cancel classes for a given period of time. The cancellation of day classes does not automatically impact evening classes and/or campus centers and sites. Area television and radio stations will announce these cancellations. The College will also utilize SUNY NY ALERT to notify of school closings. Closings and cancellations will be posted on the FLCC website home page, www.flcc.edu.
Annual Security and Fire Safety Reports

As required by the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (also referred to as the Clery Act), the Office of Campus Safety makes its Annual Security Report and Annual Fire Safety Report available to the public free of charge. These reports contain crime and fire safety statistics, and related policies. This information is reported to the United States Department of Education annually. Copies of these reports may be obtained by contacting the College’s Office of Campus Safety at 585.785.1900 or by viewing the FLCC Campus Safety webpage at www.flcc.edu/offices/safety. More information about safety and security on campus can be found at the United States Department of Education’s website at www.ope.ed.gov/security/search.asp.

Parking and Traffic Regulations

Finger Lakes Community College offers the public ample free parking in our main A and G parking lots. A permit is not required to park in A or G lot. Handicap parking is available in parking lots B, D, and E. Handicap parking permits are required to park in these areas. A New York State handicap permit, issued by any municipality, is valid for handicap parking areas on campus. Temporary college handicap permits are available at the Office of Campus Safety. D and B lots are reserved for permit parking. These areas are clearly marked with signs indicating that parking is by permit only. Permits are issued by the Office of Campus Safety. Call Campus Safety at (585) 785-1900 if you have any questions about parking on campus.

Students are expected to be familiar with parking regulations on campus. A parking guide is available in the Office of Campus Safety and it may also be viewed online at www.flcc.edu/offices/safety.

Violations of parking regulations will result in a parking ticket being issued, and may result in the vehicle being towed at the owner’s expense without prior notification. Failure to pay parking fines can result in the withholding of grades and transcripts, and/or the loss of privilege to park or drive on campus grounds.
Student Affairs

The following offices report to the Office of the Associate Vice President of Student Affairs:
- Educational Planning and Career Services
- Student Life
- Student Health Services
- Office of Community Standards
- Project Success

Vision Statement

The Student Affairs unit seeks to promote student development and the attainment of student goals.

Mission Statement

Our mission is to support the mission of FLCC by promoting a community that fosters an environment of learning in and out of the classroom, developing co-curricular programs and services that inspire and motivate students to grow and become productive world citizens, and by advocating for student success and personal achievement.

Educational Planning and Career Services

Educational Planning and Career Services serves as a central resource and information center for students. The specific services of the office are the following:

Advisement
Advisement services are available to all students at Finger Lakes Community College. Part-time students seeking advisement regarding degree requirements should schedule an appointment with a staff member in Educational Planning and Career Services. Full-time students are assigned a faculty advisor who will assist them with course selection and questions related to their majors.

Students are responsible for ensuring that all graduation requirements are met.

Students who wish to change their major are encouraged to meet with a staff member in Educational Planning and Career Services to complete a degree audit and discuss degree requirements. The staff can also help students who wish to change their faculty advisor.

Personal Development
Personal development services at Finger Lakes Community College are designed to help students define and accomplish their personal goals. Students can meet with a qualified staff member in a helpful and informal atmosphere to discuss:
- their strengths and weaknesses;
- their needs regarding social, academic, career, and emotional adjustments to the college setting;
- goals and appropriate methods of achieving their potential;
- any academic challenges they face; and
- career and transfer opportunities.

Additionally, staff members are available in Educational Planning and Career Services to discuss a variety of concerns sometimes expressed by college students. These concerns may involve relationships, drug/alcohol use, family, sexuality, personal identity, and others.

Finger Lakes Community College staff members may make referrals to appropriate community agencies when necessary. Personal development services are strictly confidential.

Transfer Services

Students who are interested in transferring to a four-year college or university are encouraged to use the resources available in Educational Planning and Career Services to select an institution that matches their career interest and is appropriate for their goals and abilities. Additionally, while attending Finger Lakes Community College, students are encouraged to plan their course selection carefully by working with their faculty advisor to meet Finger Lakes Community College’s graduation requirements while satisfying the requirements of the four-year school.

Evaluational Planning and Career Services offers students comprehensive resources needed to completely investigate transfer options. The Transfer Services website www.flcc.edu/transfer has numerous resources which aid in transfer college planning including course advisement guides, Steps to a Successful Transfer, and links to a variety of transfer resources. The transfer library, located in the Office of Educational Planning and Career Services, includes computerized college selection software and other resources that help students identify the four-year institutions which suit their educational goals and objectives.

The transfer professionals in Educational Planning and Career Services are eager to assist students with the transfer process. It is recommended that students interested in participating in transfer articulation agreements or transferring to a four-year college explore their options as early as possible, but no later than their third semester at Finger Lakes Community College.

Career Services

Career Services’ mission is to guide individuals through career education, career coaching, and comprehensive programs that provide opportunities to learn strategies and practical applications needed to make informed academic and career decisions.

Career development is a thoughtful process of considering what you want out of your education and your life. Making connections and knowing as much as possible about oneself are the first steps in the career development process. Career Services’ resources can help students define and explore interests, personality, skills, values, and help identify degree programs and career fields that are connected and realistic.

Through the Career Services Office, students can learn and develop a plan for choosing a major, discover career opportunities related to their personal and professional objectives, and gain knowledge of the job search process to obtain internships and employment with:
- Myers-Briggs Type Indicator (MBTI), Strong Interest Inventory,
FOCUS2, assessments to identify interests, preferences, and skills related to academic and career choices

- Career Resource Library, interactive website links including “What Can I Do With This Major…?” and Alumni Connections with recent graduates and career professionals
- Job preparation and search techniques including Optimal Resume, an online resume builder designed specifically for FLCC students
- Employment and internship resources for students, alumni, and community with the free online Job Board and Internship Search listings

For more information, contact Career Services at 585.785.1270, or visit the Career Services homepage at www.flcc.edu/career.

Educational Opportunity Program (EOP)

The Educational Opportunity Program, known as EOP, is an academic and financial support program of the State University of New York. The program is designed to put a college education within the reach of citizens of New York State who are educationally underprepared and economically disadvantaged.

“Educationally underprepared” has many meanings, but generally refers to those who have achieved poorly in previous school experiences. This may be evidenced by high school grades or standardized test scores (SAT, ACT, etc.) or a lack of pre-requisite academic course work required for their chosen degree. Students eligible for admission to EOP may be “underprepared,” but demonstrate in other ways a potential for successfully completing a college program.

Income guidelines have been established by the State to determine economic eligibility for first-time EOP applicants. Students applying for the program must document historical and present “economic disadvantage” to be considered for admission.

Transferring and returning students who were enrolled in a similar post-secondary opportunity program such as EOP, HEOP, SEEK, or College Discovery at their previous institutions may be eligible for EOP at Finger Lakes Community College. Verification of previous status is required.

Students enrolled in EOP are offered tutoring and academic advising as well as career, educational, and personal development services. Students may also be eligible for additional financial aid to supplement their college expenses through an EOP grant. In addition, a pre-freshman summer orientation program is offered to students enrolling during the Fall Semester to acquaint them with the college environment.

For additional information, contact the EOP Coordinator at 585.785.1268 or visit the website at www.flcc.edu/eop.

Crisis Response Team

The Crisis Response Team at Finger Lakes Community College responds to student mental health crisis situations in which a student is in imminent danger of harming self or others. When the crisis response procedures are implemented on behalf of a student, the student will be responsible for any costs incurred and parental/legal guardian/emergency contact notification will occur. A student who receives assistance from the Crisis Response Team will be encouraged to meet with the Associate Vice President of Student Affairs to develop a follow up plan. This step is intended to link the student to appropriate services that will support the attainment of his/her educational goals. The Team is comprised of Division of Student Affairs professionals, as well as representatives from a variety of other campus departments. The Crisis Response Team may be contacted through Educational Planning and Career Services at 585.785.1268. After hours, contact 911.

Student Health Services

Health and wellness are important to being a successful student. The College maintains Student Health Services to provide wellness care, care of health problems, treatment of minor illnesses, and health counseling. Services are provided under the direction of a Registered Nurse to promote and facilitate students’ positive lifestyle changes. A Campus Community Coalition, comprised of faculty, staff, students, landlords, law enforcement and other community officials implements strategies to encourage students to engage in the greater community without the abuse of alcohol, drugs or other destructive activities.

Health history and medical records are handled with strict confidentiality. Student Health Services is in compliance with several State and Federal mandates.

Members of the College Community who are experiencing medical problems or who are made aware of a medical emergency or injury will call 911 to initiate an emergency response, or 911 from inside the main campus building. Ambulance fees are billed based on the level of service.

All Finger Lakes Community College full- and part-time students are covered by basic accident benefits while on College premises or while participating in College-sponsored activities, both on and off campus. This benefit is included in the Student Auxiliary fee. Information and applications regarding optional sickness insurance coverage are available by contacting Student Health Services at 585.785.1297.
Project Success

Project Success is a grant-funded Student Support Services program sponsored by the Department of Education to support eligible students in achieving academic success. Project Success staff members are trained to empower students as they take control of their educational decisions while providing the support they need to make independent decisions.

Project Success students have access to the following services, free of charge:
• Participation in a Project Success Seminar
• Academic Coaching
• Peer Mentoring and Tutoring
• Participation in SuccessShops
• Career Development Programs
• Student Leadership Development Programs
• Community Service Opportunities

Eligibility
To be eligible for Project Success, students must:
• be a U.S. citizen or meet the residency requirements for Federal student financial assistance
• be an enrolled or accepted student at FLCC
• have a demonstrated need for academic support
• meet certain income requirements and/or be a first generation college student

Contacts
Project Success
Phone: 585.785.1663
Email: success@flcc.edu
Website: www.flcc.edu/success
Student Life

Through various activities, students at Finger Lakes Community College have the opportunity to become an active force in the on-going operation of the College. The objective is to provide our students with realistic, growth-oriented, and practical experiences which they can take with them into any home, business, or community situation upon completing their formal education. Co-curricular activities encourage social, cultural, educational, and community awareness and involvement by:

- providing opportunities for leadership development through participation in the Student Corporation and workshops;
- promoting student self-governance as a means of developing the responsibility and effectiveness required in today’s world;
- participating in the planning of campus-wide programs and events that prepare students to get involved and meet the challenges of our global community; and
- enriching the educational program of the College through these various activities.

The Student Life Office includes offices of the Student Corporation, Student Senate, Campus Activities Board, and various campus clubs and organizations. The cafeteria, student lounges and Stage 14 (live entertainment area) are conveniently located near the Student Life Office.

For more information, please contact the Director of Student Life at 585.785.1264.

Student Corporation

The purpose of the Student Corporation at Finger Lakes Community College is to promote the interests and concerns of the student body to both the faculty and administration. It is the students’ formal link to those who create and execute policies which affect the student population and shape the educational environment of the College. It is also the responsibility of the Student Corporation to help foster an environment of meaningful and enriching co-curricular activities to provide a well-rounded and exciting educational experience at Finger Lakes Community College. Students interested in leadership opportunities with the Student Corporation should contact the Student Life Office at 585.785.1399.

Campus Activities Board

The Campus Activities Board, a standing committee of the Student Corporation, provides the majority of the social and cultural activities at Finger Lakes Community College. An on-going program of live performances, films, speakers, dances, picnics, trips, sporting event trips, noontime entertainment, curriculum/departmental events, and other special events are sponsored throughout the academic year.

Membership is open to any student interested in the experience of planning and implementing programs which fulfill the social, cultural, entertainment, and educational needs of the students, faculty, staff, and community.

The Campus Activities Board strives in its programming efforts to create a climate of positive, student-to-student, and student-to-staff relationships; provide real-life experiences; encourage positive College and community relationships; develop programs that are supplemental to and an integral part of the academic mission at Finger Lakes Community College; broaden individuals’ awareness of cultural expression and our world; and entertain.

Clubs and Activities

To see a complete listing of the clubs and organizations that are current and active, please visit www.flcc.edu/studentlife.

Honor Societies

Alpha Beta Gamma
Alpha Beta Gamma is the national business and computer science honor society for men and women at junior and community colleges.

Criteria for induction are matriculation in an eligible business or computing science curriculum at the College, and maintaining at least a 3.5 cumulative grade point average after 30 credits.

Phi Theta Kappa
Phi Theta Kappa is a national honor society of two-year community colleges and junior colleges. This student-run organization is dedicated to scholarship, leadership, service, and fellowship. The Finger Lakes Community College chapter, Alpha Epsilon Chi, was chartered in 1981.

Criteria for induction are a 3.5 cumulative grade point average and the accumulation of at least 15 credit hours for full-time students. Criteria for induction of part-time students are a 3.75 grade point average and an accumulation of at least 30 hours.

FLCC Association, Inc.
(Auxiliary Services)

Mission Statement

The Finger Lakes Community College Association was incorporated in 1972 to establish, operate, manage, and promote educationally-related services for the benefit of the campus community, including faculty, staff, and students, in harmony with the educational mission and goals of the College.

The Finger Lakes SUNY ID Card

The Finger Lakes SUNY ID card is an integral part of the student experience at Finger Lakes Community College. THE SUNY ID card not only serves as the FLCC ID card, but is also used to access the library, gym, and Finger Lakes College Suites. Excess Financial Aid proceeds can be added to the SUNY ID card for book vouchers and meal plans. In addition, students can place their own money on the card and receive an additional 5% in spending power when using the card to make purchases.
**Child Care Center**
The Child Care Center offers students an on-campus, NYS-licensed, NAEYC-accredited child care program. A typical day includes educational and developmentally-structured activities for children 18 months through preschool. Before- and after-school care for children up to age eight is also available. This service is available Monday through Friday from 7:30 a.m. to 5:30 p.m. year-round. A variety of rate and schedule options is offered. For more information, call (585) 394-6666.

**Bookstore**
The bookstore sells all required textbooks as well as general and art supplies for FLCC courses. It also offers educational pricing on software and carries reference books and paperback titles. The bookstore sells a full line of FLCC-imprinted clothing and gift items, greeting cards, postage stamps, candy, snacks, and beverages. Customers may special-order items not in stock.

The bookstore is located on the first floor of the Student Center. Regular semester hours are 8:00 a.m. to 6:30 p.m. Monday through Thursday and 8:00 a.m. to 4:00 p.m. Friday. Extended hours are scheduled at the beginning of each semester to allow students ample opportunity to purchase textbooks and supplies.

Students may use excess Financial Aid monies to purchase textbooks and required supplies. These charging privileges are available beginning two weeks prior to the start of the fall and spring semesters and are active until the end of the third week of each semester. FLCC SUNY ID cards are required to activate and use Financial Aid monies for book charges.

The bookstore offers a pre-packaged textbook delivery service at the Geneva, Victor, and Wayne County Campus Centers during the first week of both the fall and spring semesters. Textbook buyback is conducted during the last week of the fall and spring semesters at all sites as well as in the summer at the Canandaigua campus during regular business hours.

Additional information may be obtained on the bookstore section of the FLCC website, www.flcc.edu, via email at bookstore@flcc.edu, or by calling (585) 785-1685.

**Dining Service**
The Finger Lakes Café offers a variety of high-quality food and beverage options prepared fresh daily by AVI. Made-to-order stir fry dishes, pastas, and hot entrees are prepared to order, ensuring that a healthy, home-cooked meal is always available. The deli features a variety of subs, wraps, and paninis. Pizza, calzones, and daily specials are available at the pizza station. The grill features daily specials as well as AVI’s signature melts and everyday offerings. In addition to vegetarian options at each of the stations, there are soup and salad options. A convenient selection of prepared foods is packaged for take-out in the Grab-and-Go section. Cash, credit and debit cards, and meal plan cards are accepted. The hours of operation for the Café are 7:30 a.m. to 7:30 p.m. Monday through Thursday and 7:30 a.m. to 2:00 p.m. on Friday. Catering is also available (www.flcc.avifoodweb.com).

**Athletics**
Competition in intercollegiate sports at Finger Lakes Community College includes the following sports: men’s and women’s soccer, men’s and women’s basketball, women’s volleyball, men’s and women’s outdoor track and field, men’s and women’s cross country, men’s lacrosse, baseball, softball, and woodsmen teams. The intercollegiate athletic program, in addition to healthful exercise, provides the student with an opportunity to share in the pride of fair play and sportsmanship with an understanding and appreciation of good teamwork.

Any student who meets the eligibility requirements of the College and NJCAA may try out. Copies of the Equity in Athletics Disclosure Act are available from the Athletic Department. For more information go to www.flccathletics.com.

**Student Wellness/Recreation/Intramurals**
The College offers daily use of the gymnasium and fitness center to all Finger Lakes Community College students. The gymnasium hours are for open-student use or may include scheduled activities based on student interest. Monthly schedules of available hours may be obtained from the Athletic Department or at www.flccathletics.com. Use of the facilities is free of charge upon presentation of the Finger Lakes SUNY ID card.

The Intramural Program at FLCC is designed to provide an opportunity for all students, faculty, and staff to participate in organized recreational competition. The goal is to provide all students a positive experience through a diverse selection of activities that will fit their athletic and fitness needs while providing a safe and healthy environment.

We are always open to any ideas, suggestions, or comments you may have concerning our intramural program. Please feel free to give us input so we can improve your experience in any way. Contact the athletic department or visit www.flccathletics.com/recreation/intramurals for more information.

**Auxiliary Services**
Additional auxiliary services offered include student health and accident insurance; an on-site nurse practitioner; student emergency loans; and graduation cap, gown, diploma, and reception.

**Housing**
FLCC is committed to assisting students in locating suitable housing accommodations. With the opening of Finger Lakes College Suites, the College’s affiliated student residence hall, FLCC has evolved from a commuter institution to a residential campus. The 356-room College Suites is owned by Association Housing, LLC, a subsidiary of the FLCC Association, Inc., and dedicated to providing an environment conducive to academic success. Adjacent to campus, College Suites offers a variety of four-, three-, two- and one-bedroom suites. Each suite contains a common living area, kitchen, and bathroom. Trained Resident Assistants, as well as on-site management, provide supervision to students residing in College Suites.

The Office of Housing and Residential Life also offers services to assist those students who are looking for off-campus housing. It provides a Rental Property Listing, an on-line resource where students can find available housing in the Canandaigua area; Roommate Finder, a search index exclusively for students; and The Guide to Student Housing, which focuses on independent student living. The Guide to Student Housing is designed to assist students in making off-campus housing arrangements.

Whether a student is considering College Suites or private off-campus properties, the Office of Housing and Residential Life strongly suggests considering options carefully. Reading and understanding all terms and receiving clarification prior to entering into an agreement are extremely important. FLCC does not own, operate, nor endorse any off-campus housing. College personnel do not supervise any off-campus properties and the College does not become party to private landlord-tenant matters nor involve itself in any transaction between or on behalf of landlords or student tenants.

New students are urged to look for housing during the winter and spring months prior to the fall semester and in the fall months prior to the spring semester. Students who are accepted by FLCC are not guaranteed housing. The application process for Finger Lakes College Suites is separate. It is suggested that students interested in residing in College Suites apply prior to April.

For more information on housing options and assistance with a housing search, visit www.flcc.edu/housing or contact the Office of Housing and Residential Life at (585) 785-1643.
The Library provides students and faculty at Finger Lakes Community College as well as community residents with excellent access to information resources in print and media formats. The College’s collection consists of 70,000 volumes, 450 current periodical titles, and 4,000 media programs. Additional books and periodical articles can be obtained for patron use through the Library’s participation in a nationwide computerized interlibrary loan system. Librarians are always available to provide individual assistance in locating and using information resources.

The Library has an Aleph online public access catalog and circulation system listing all items owned by the Library. This computer system also permits users to directly search for items located in other SUNY libraries across the State. The Aleph catalog is available to students both at the main campus, FLCC Geneva Campus Center, FLCC Wayne County Campus Center and the FLCC Victor Campus Center. Terminals located throughout the Library provide access to these computer systems.

The Library provides several quiet study areas as well as attractive lounges for leisure reading and relaxation. Media facilities allow individual and small group use of audio and video tapes, CDs, DVDs, and records. Membership and participation in cooperative regional activities expand Finger Lakes Community College’s Library services. These memberships include SUNY Open Access, which allows students, faculty, and staff direct borrowing privileges from State University of New York college and university libraries.

The College Library is a member of the Rochester Regional Library Council, a consortium of academic, research, public, and industrial libraries in the greater Rochester area. The Council is a regional enterprise of the NYS Reference and Research Library Resources program, serving the counties of Livingston, Monroe, Ontario, Wayne, and Wyoming. All college and public libraries in these counties belong to the Council, along with many large corporations and medical libraries. Finger Lakes Community College’s students and faculty can obtain books and photocopies of journal articles through the Council’s Regional Interlibrary Loan Network.

The Library has attractive individual and small group study spaces, production studio (for use by students enrolled in the College’s Communications program), a well-equipped photocopy/multimedia technology center, an electronic classroom for hands-on instruction in the use of computerized library resources, and space for print collections. The Library’s upgraded computer systems provide students with direct access to numerous computerized information databases, including the internet.

The Library can be accessed 24 hours a day, seven days a week via the internet. Students can search the Library’s website, catalog, and databases from any computer that has internet access.

Institutional Support Services

Charles J. Meder Library

The Library provides students and faculty at Finger Lakes Community College, as well as community residents, with excellent access to information resources in print and media formats. The Council is a regional enterprise of the NYS Reference and Research Library Resources program, serving the counties of Livingston, Monroe, Ontario, Wayne, and Wyoming. All college and public libraries in these counties belong to the Council, along with many large corporations and medical libraries. Finger Lakes Community College’s students and faculty can obtain books and photocopies of journal articles through the Council’s Regional Interlibrary Loan Network.

The Library has attractive individual and small group study spaces, production studio (for use by students enrolled in the College’s Communications program), a well-equipped photocopy/multimedia technology center, an electronic classroom for hands-on instruction in the use of computerized library resources, and space for print collections. The Library’s upgraded computer systems provide students with direct access to numerous computerized information databases, including the internet.

The Library can be accessed 24 hours a day, seven days a week via the internet. Students can search the Library’s website, catalog, and databases from any computer that has internet access.

Instructional Technology Services

Instructional Technology Services (ITS) offers a variety of technological resources and services to assist the college community. Services include:

- Classroom Media Equipment and Support
- Classroom Technology Design
- Presentation Support
- Training/Workshops/Short Courses
- Special Event Support
- Camera, Video Camera, Projector, and Presentation Equipment Loans

To meet the needs of the College community, ITS strives to provide enhanced instructional technologies and event support that can improve student learning by providing rich, instructionally sound technologies, training opportunities, and multi-media experiences.

Media Production

Media Production provides multimedia services to all faculty and staff. The Creative Services Suite is a work space dedicated for the production of visual media. Services and resources include:

- Poster and Sign Printing
- Print Mounting and Lamination
- Video Production and Streaming Video
- DVD and CD Duplication
- Design and Digital Imaging

Visual communication is a vital element to instruction and administration. Media Production provides the services and resources for the college community to support that communication on a variety of platforms.

Developmental Studies Department

The Developmental Studies Department at Finger Lakes Community College is designed to offer courses to every student with the intent of providing the best possible opportunities for success, regardless of prior educational background. The Department’s courses strive to enhance a student’s college experience by providing the following:

- Courses
  The Developmental Studies Department coordinates the following courses:
  - First Year Student Seminar
  - Foundational Writing
  - Foundational Reading
  - College Study Strategies

Each of these courses is designed to assess a student’s academic ability and to increase that ability by the end of the semester. Small class size allows for interaction between instructor and student.

- Adult Basic Education
  This program helps students without a high school diploma improve basic reading, writing, and math skills, and prepare for the GED test. Currently, there is no cost for this program.
Students With Special Needs

Finger Lakes Community College is committed to providing an equal opportunity for all qualified students. The College does not have a formal program of study for special populations. Finger Lakes Community College believes that the needs of each person with a disability are individual and unique. Therefore, services are provided on an individual basis.

Advisement and support services are available to students who meet the eligibility guidelines as outlined in the guidebook, Procedures for Services to Students with Disabilities. A copy of the guidebook is available upon request from the Admissions Office or Developmental Studies Department.

Learning Disabilities
Students with a documented learning disability should contact the Coordinator of Services for Students with a Learning Disability at 585.785.1390 for additional information.

Physical and/or Psychological Disabilities
Students with a documented physical and/or psychological disability should contact the Coordinator for Services to Students with Disabilities at 585.785.1441 for additional information.

Academic Commons

The Academic Commons is located on the third floor of the Charles J. Meder Library. It is the center for all academic support services that are available at main campus in Canandaigua. The following services are located within the Commons:

• **Academic Support Center**
  Academic assistance is available to all students who wish to improve their skills in areas such as: reading, grammar, writing, study skills, computational skills, mathematics, or science. The Academic Support Center faculty offer assistance with any course taught at Finger Lakes Community College.

• **Peer Tutoring Program**
  This program offers peer tutoring on a one-to-one basis and on a group basis. Peer tutoring arrangements can be made by contacting the Academic Support Center faculty.

• **The Math Center**
  Support for all math courses is offered through the Math Center. Professional tutoring is provided on a drop-in basis.

• **The Write Place**
  Finger Lakes Community College’s writing center, The Write Place, is located in the Academic Commons on the third floor of the library. Staffed with both faculty and trained peer tutors, the writing center provides writing assistance for all students, in all disciplines, on any project. Our mission is to help students become more confident, fluent writers by providing specific, text-based feedback during any part of the writing process. Tutors work by appointment and on a drop-in basis.

  Also available, by appointment only, is grammar tutoring. A faculty tutor will work with students to provide help identifying and correcting grammatical and mechanical concerns that students may have. This is neither a drop-off nor a proofreading service; tutors work directly with students, using one-to-one teaching strategies to help writers become more adept at recognizing and gaining grammatical correctness in their writing.

  The Write Place also offers real-time, online assistance through Meebo for students who have quick questions; maintains current documents and handouts on our FLCC webpages; and has hard copies of citation information packets and other text-based references on-site.

  Academic Support Services are available to students at the Geneva, Wayne County and Victor Campus Centers.

Computer Resources

The College’s extensive computer facilities for student use consist of more than 1000 computer systems at the Canandaigua, Geneva, Victor, and Wayne County Campus Centers. Each lab or classroom has computers, software, and peripherals tailored to the needs of the classes held there. Current information regarding the systems and software in use is available on the College’s website.

• Wireless access to the internet is available for registered students and staff at all campus locations.

• All computer labs are equipped with Windows compatible Intel or Macintosh systems which access laser printers, the internet, email, and the internal LAN. All registered students are provided with web-based student Email, local network accounts with data storage, access to the FLCC wireless network and off-campus access to library databases.

• Computer science classes use four computer labs for their course work with Microsoft Office or Adobe Creative Suite applications, game programming, web development, business applications programming, database development, networking, and programming with Visual Studio languages or Java.

• Business classes meet in two computer labs for their work with standard Windows office suite applications and other software for accounting, paralegal training, office automation, word processing, and travel/tourism management.

• In the Science Department, laptops and desktop computers with specialized software are available in five labs and two classrooms for use by students in biology, engineering, chemistry, and physics classes.

• Students in Mechanical Technology or other sciences use CAD applications in the Autodesk Master Suite, ArcView GIS, Labview, and various engineering programs installed in several student labs.

• The graphic design studio features the most current industry standards, including 20 high-end Apple workstations with a complete suite of design, web and imaging software. This area also features a large format color printer, black and white laser printer, film scanner, flatbed scanner, and a non-toxic mounting area.

• The Nursing Department maintains a lab with specialized multimedia programs for nursing instruction. Additional stations in the nursing skills lab simulate centralized record keeping in a typical clinical environment.

• Math classes meet in a computer lab for statistics and calculus courses. In addition to standard office suite applications, the systems have Minitab, Derive, and other specialized math programs.

• Three computer labs are available at the FLCC Geneva Campus Center, providing all programs needed by the classes that meet there. Additional systems provide for individual tutorial activities and adaptive access.

• Two computer labs are available at the FLCC Wayne County Campus Center, providing all programs needed by the classes that meet there. Additional systems provide for individual tutorial activities and adaptive access.
• Five computer labs at the FLCC Victor Campus Center provide all programs needed by the classes that meet there. Additional systems provide for academic support efforts.
• Computerized assistance with research tasks is available in the main campus library. Registered students may also borrow laptop computers for use in the library. The library maintains a hands-on lab for group instruction in search techniques. Additional computers provide access to other libraries, information systems, and remote databases. Registered students and college staff can access the library’s online databases from the internet.
• Specialized Macintosh systems for student instruction in performing arts are located in the music wing, the media lab, the keyboarding lab and the theater lab.
• The Academic Support Center on Main Campus uses a computer lab with software for developmental studies classes, tutorial activities, and other special needs. The systems also have standard office suite software, math applications, and programming languages as needed for peer tutoring or other individual assistance.
• An open lab is available on Main Campus for students to work on assignments when their regular classroom lab is in use for other classes. Systems in this lab have most of the software that are used in classes.
• A multimedia lab may be reserved on an ad hoc basis for occasional use by classes which do not ordinarily meet in a computer lab. It is available for open use when not reserved for a class meeting.

Gladys M. Snyder Center for Teaching and Learning

The mission of the Gladys M. Snyder Center for Teaching and Learning at Finger Lakes Community College is to foster innovation, communication, and opportunities for professional development in all areas of teaching effectiveness.

Our long-term vision positions us at the intersection of scholarship and teaching.

Goals:
• To foster teaching effectiveness and enhance student learning.
• To facilitate and support faculty development.
• To coordinate and share educational resources and expertise.
• To encourage classroom research and teaching innovation.
• To support peer mentoring.

Objectives:
• To provide opportunities for learning about new classroom strategies and new teaching technology, and to facilitate discussions of pedagogical issues.
• To create opportunities for peer interaction and cooperation.
• To increase awareness of the learning needs of an increasingly diverse student body and to develop and implement strategies to meet these needs.
• To sponsor workshops, seminars, conferences, and sharing sessions requested by faculty.
• To increase and strengthen faculty networks for the exchange of ideas, teaching materials, and instructional information.
• To work with neighboring educational institutions, including secondary schools, colleges and universities, in the promotion of teaching effectiveness.

Campus Centers

Finger Lakes Community College offers a wide variety of courses at its Campus Centers to meet the needs of the residents of those communities and the surrounding area. Students can complete a majority of their degree programs or take courses for self-enrichment.

Geneva Campus Center: With its convenient location, flexible scheduling options and in-demand degree programs, FLCC’s Geneva Campus Center makes it possible to juggle college and your busy life. You can complete just about all of your degree program right in your own community. The Geneva Campus Center offers courses toward many programs, including Liberal Arts and Sciences, Criminal Justice and Business Administration.

Wayne County Campus Center: Get the education and experience you need to begin a successful career – right in your own community. Degree programs include Accounting, Human Services, Business Administration, Pre-Nursing and Liberal Arts and Sciences just to name a few. You’ll be able to complete nearly all of your degree program at the conveniently located Wayne County Campus Center.

Victor Campus Center: Whether you are looking for traditional transfer degrees or hi-tech, career focused programs, you can find it at FLCC’s Victor Campus Center. At this state-of-the-art facility, you’ll be able to complete nearly all of your degree program in one convenient location. Plus, you’ll be able to take advantage of FLCC’s Regional Learning Partnerships, which lets you earn credit from four-year colleges and universities right at the Victor Campus Center. The center encourages student life and academic support. We believe that the college experience assists in the development of each student in their drive for personal growth, life goals and cultural understanding.

All regulations for admission, tuition, and academic excellence described in the Catalog apply to the campus centers as well. For additional information, contact the FLCC Geneva Campus Center at 315.789.6701 or geneva@flcc.edu or the FLCC Wayne County Campus Center at 315.331.9098 or newark@flcc.edu or the FLCC Victor Campus Center at 585.742.6337 or victor@flcc.edu.
Community Affairs

The Advancement Division
As a public institution, it is important that the College communicates regularly with regional stakeholders and manages its reputation as a valuable community resource and partner. The Advancement division plans and implements a comprehensive institutional advancement strategy designed to enhance the image of the College in the community, fosters community-college partnerships, and ensures a strong base of ongoing financial support of the College. Advancement division functions include reputation and issues management, community affairs, media relations, workforce development, publications, fundraising, grants, events, alumni affairs, and sustainability. Two departments operate under the division umbrella, including the Office of Resource Development (ORD) and Community Affairs. The College’s Sustainability program and Professional Development and Continuing Education (PDCE) report into the Advancement division.

Sustainability
The College has a strong commitment to environmentally friendly practices with staff assigned to develop and implement sustainable programs and initiatives in cooperation with other College offices and staff. Sustainability initiatives include supporting the President’s Climate Commitment, the Green Office program aimed at incorporating sustainable practices in daily office operations, an annual Garbage Assessment to collect data on College recycling efforts, recycling and composting initiatives, awareness-building programs such as the restroom stall signs encouraging sustainable practices, educational events and many other College-wide programs. For more information, visit our web page at www.flcc.edu/green. You may also contact Sustainability Coordinator Emily Staychock at 585.785.1615 or by email at stayches@flcc.edu.

Office of Resource Development
The Office of Resource Development (ORD) focuses on building strategic relationships with various stakeholders of the College, including alumni, community supporters, donors and government leaders. The department supports grants, alumni affairs, fundraising, events and government relations. Donor research, planning, cultivation and gift stewardship are also managed by the department. In addition, ORD coordinates student scholarships, oversees College fundraising policies and procedures, and provides resources in support of the FLCC Foundation, a separate 501 © 3 organization. The Office of Resource Development is located in room A147 on the first floor of the main Canandaigua campus building. For more information, you may call 585.785.1205 or email blackejm@flcc.edu.

Community Affairs
The Community Affairs department strategically positions the College to inform the College community and local service region of FLCC news, events, program offerings, and contributions that enhance our region’s quality of life. Among the department’s responsibilities are internal and external communications, Finger Lakes Television (FLTV), the development of electronic and print publications, reputation and issues management, community partnerships, media relations and events. A key mission of the College is to provide regional economic development through professional education, workforce development and continuing education. Community Affairs supports economic development and economic growth through its Professional Development and Continuing Education (PDCE) workforce development program.

Finger Lakes Television (FLTV) - FLTV is the public access station that serves the region through broadcasts on Channel 12 of the Time Warner cable system. Though not a department of the College, FLCC hosts the station on the main campus as a community service and to augment the College’s communications program. Community members and students have full access to the channel and the station’s facilities and help produce public, educational and governmental programming.

Community Affairs is located in room B128 on the first floor of the main Canandaigua campus building. You may call 585.785.1660 or email Community Affairs Director Bob Matson at matsonrc@flcc.edu.
Professional Development and Continuing Education (PDCE)

Professional Development and Continuing Education (PDCE) provides direct support to employers seeking to strengthen their workforce through customized training and certificate programs. PDCE also offers a wide array of offerings for individuals seeking personal enrichment and ways to hone and strengthen their professional skills set.

More than 600 professional, vocational and career offerings are available in several categories, including:

- Workforce Development Solutions
- Advanced Manufacturing Machinist
- Allied Health Programs
- Dual Certificate Nurse Assistant/Home Health Aide
- Professional Licensure Courses and Programs
- Personal and Cultural Enrichment
- Small Business Development Center (SBDC)

To view PDCE’s non-credit course and program offerings, visit our web page at www.flcc.edu/pdce. For additional information, call 585.785.1660 or email pdce@flcc.edu. At the main Canandaigua campus, the PDCE office is located on the first floor in room B128.

Business Training Solutions

Businesses seeking to remain competitive in today’s economy must invest in developing and maintaining a highly skilled workforce. Professional Development and Continuing Education (PDCE) is the College’s center for workforce development solutions and program offerings. To help companies remain competitive, improve satisfaction, and keep employee skills current, a variety of options are available. PDCE offerings include online non-credit and credit courses, one-on-one coaching, small group training, and non-credit course offerings which may lead to certification.

Advanced Manufacturing Machinist

Advanced Manufacturing Machinists work in the exciting field of advanced manufacturing. This industry is rapidly evolving and significant job opportunities exist, especially at the machinist/technician level, based on strong growth trends. Today’s machinists work with sophisticated state-of-the-art equipment and use their advanced knowledge of the working properties of metals and their skills with machine tools to plan and carry out the operations needed. They help produce sophisticated machine products that meet highly precise specifications. The parts machinists make range from automotive parts to components used in aerospace and medical instruments. The FLCC Advanced Manufacturing Machinist program prepares students for employment in the field.

Allied Health Programs

Online Allied Health courses and programs are designed to prepare students for jobs in health care. Topics offered include Veterinary Assistant, Advanced Coding for the Physician’s Office, HIPPA Compliance, Medical Transcription, and ICD-10 Medical Coding: Preparation and Instruction for Implementation.

Dual Certificate Nurse Assistant/Home Health Aide

This Certified Nurse Assistant (CNA) and the Home Health Aide (HHA) fields are closely related and duties often overlap. Students can boost their employability by obtaining a dual certificate through this combined program.

Nurse Assistant: By completing this FLCC course and passing the New York state certification exam, students can become Certified Nurse Assistants. This non-credit program includes classroom training in the principles and practices of patient care and clinical experience in a long-term care setting. Orientation and an interview are required prior to registering for the Nurse Assistant course.

Home Health Aide: The demand for experienced Home Health Aides continues to increase – largely due to our aging population and the rising demand for in-home or agency-based health care services from a well-trained professional. Through this program, students learn the basic medical and personal services required to care for clientele. Home Health Aides are employed by home health agencies, hospitals and nursing homes.

Professional Licensure Programs and Courses

PDCE’s Professional Licensure programs and courses include:

- Child Development Associate (CDA)

Personal and Cultural Enrichment Offerings

A variety of personal and cultural enrichment courses are available. Additional information is on our web page at www.flcc.edu/pdce.

Small Business Development Center

The Small Business Development Center (SBDC) at FLCC is partially funded by the U.S. Small Business Administration and is administered by the State University of New York. Services are offered, free of charge, to assist people with starting their own businesses, including developing a business plan. For more information, contact the Regional SBDC office at 585.232.7310.
Academic Standards

Philosophy

Academic programs and co-curricular services and activities of the College directly support the College mission to promote a supportive, learning centered environment that empowers our students, provides enriching life experiences, and enhances the quality of life throughout our community. Academic instruction in the fields of Developmental Studies, Liberal Arts and Sciences, and several career oriented areas are designed to promote sharply focused disciplinary knowledge together with more generic critical thinking, problem solving and decision making skills. Co-curricular services, programs and activities complement the academic curriculum, providing opportunities for experiences that promote the development of personal and interpersonal competencies and appreciation for the value of continuous self-discovery and lifelong learning.

The policies of Finger Lakes Community College encourage the pursuit of scholarship within a positive and supportive environment. Academic Standards and Regulations are designed to support this philosophy, and the College has adopted the following guidelines to assist in this purpose. The College faculty are authorized to specify attendance, testing, and grading policies consistent with the purpose and nature of the course and the Academic Standards and Regulations that are listed in this section.

Definition of Terms

Curriculum: A program of courses approved for a specific degree or certificate.

Electives: Credit courses, not required in a given curriculum, but which may be taken for credit toward graduation.

Full-time Student: A student enrolled for twelve (12) or more credits.

Part-time Student: A student who is taking fewer than twelve (12) hours during a semester.

Imputed Credit: Credit assigned to remedial courses that can be used for financial aid purposes but does not count as fulfilling requirements for a degree.

Good Standing: A student who successfully accumulates credit hours and meets a cumulative grade point average according to the College’s Standards of Progress (see page 41).

Academic Probation: A student who fails to meet the College’s Standards of Progress (see page 41). A student on academic probation is limited to a maximum of 13 credit hours.

Academic Dismissal: A student who fails to meet the minimum Standards of Progress following a probationary semester (see page 41). A student, who has been academically dismissed, must complete the academic appeal process to be reinstated. The dismissal remains in effect until the student has been readmitted by the Committee on Academic Standing or, in certain circumstances, the Director of Community Standards.

Matriculated Student: A student is matriculated upon acceptance into a program of study at the College that leads to a degree or certificate.

Non-Matriculated Student: An individual who is taking courses without applying or being accepted for matriculation in a degree program. Non-matriculated students are restricted to a maximum of eleven (11) hours of credit during any one term.

Overload Status: A student may petition to pursue overload status, in any given term, by securing approval from their advisor and the Associate Vice President of Instruction and Assessment. An additional fee is required.

Prerequisites: Certain courses require that you have prerequisites in order to add that course to your schedule. These courses are identified by the word “Prerequisite” at the end of the course description in WebAdvisor and in the College Catalog. Prerequisites may be successful completion of one or more college level courses with a C- or better unless otherwise noted and/or a minimum placement test score, or a minimum grade in a prerequisite course.

Co-requisite: Concurrent (simultaneous) enrollment in or prior successful completion of a companion course is required.

Grading System

The following grades are awarded in credit courses for which grade points are computed. The grades A, B, C, and D are applicable toward graduation requirements.

- A An honor grade given for work of excellence and distinction
- B Represents work of consistently high quality
- C Represents work of average quality, within broad ranges, which meets the essential requirements of the course
- D Indicates some evidence of accomplishment but substantially below-average quality work
- F Negligible academic accomplishment

The following grades are awarded for certain courses:

- S Satisfactory completion of the course requirements
- U Unsatisfactory work

The following symbols may be used for credit or non-credit courses. These are not counted toward graduation:

- Q Unofficial Withdrawal
  Unofficial Withdrawal from a course that occurs when a student discontinues a course prior to a time when the instructor can properly assign any earned grade. Excessive absence from class may be interpreted as unofficial withdrawal. Students are encouraged to withdraw officially if they are not attending class.

- W Official Withdrawal
  Official Withdrawal from a course without penalty to a student’s grade point average is permitted any time on or before the Friday of the week the class has met eighty percent of its scheduled time. The formal withdrawal is initiated by the student. The form becomes official when it is submitted to the One Stop and the grade of W (withdrawal) is entered on the student record. Course withdrawals during the first three weeks of a course will not be entered on the student’s record.

- I Incomplete
  Incomplete indicates that a student was unable to complete a small portion of the course work by the end of the semester due to extenuating circumstances. This grade may be assigned at the discretion of the instructor and is a temporary grade. Instructors
may require a signed contract that includes a description of the work to be completed and a deadline for completion. The deadline for completing incomplete work is at the instructor’s discretion, but should not exceed one calendar year. After the student has completed the work, the instructor will submit a “Change of Grade Notice” to the One Stop for the removal of the “I” grade, and the student will be notified of the new grade. The One Stop will notify the instructor of the course prior to the pending change of an “Incomplete” to a failure. Unless otherwise notified by the instructor, if the “I” grade has not been removed within one calendar year, it will be administratively changed to an “F.” The student will be notified when the grade change occurs.

- **X Administrative Withdrawal**
  Students will be administratively withdrawn if they fail to provide proof of immunity and acknowledgment of meningococcal meningitis vaccine information as required by New York State Public Health Law 2165 and Health Law 2167. A grade of “X” will not be calculated in the student’s grade point average and cannot be used toward graduation.

- **AW Conduct Withdrawal**
  Students will be assigned a grade of AW, according to the Student Code of Conduct, for conduct reasons leading to suspension or dismissal. An AW grade will usually be accompanied by a Permanent Transcript Notation. Please see the Student Code of Conduct, “Sanctions”, for more information.

- **AU Audit**
  A student may audit a course only with the written approval of the instructor. Such approval must be submitted to the Student Records Office prior to the end of the drop/add period. The student must pay the required amount as if registering for credit in the course. An auditor student may change status only during the normal drop and add period established by the College. A grade of AU is not earned credit and cannot be used to fulfill graduation requirements.

### Consequences

Disciplinary action for violations of academic honesty will be determined by the instructor. The consequences for such violations may range from a warning to receiving a grade of “F” in the course. Students who have been assigned a grade of “F” for a course as a result of academic dishonesty will not be permitted to change that grade by withdrawing from the course. An instructor may also request that the Community Standards Office investigate alleged academic dishonesty and take appropriate action based on the Student Code of Conduct.

### Repeat Courses

A student who repeats a course (that cannot be repeated for credit) for a higher grade can only count the course as credit towards full-time status for purposes of financial aid if the student initially received a grade of “F” in the course or a higher grade is required by the academic department. For those students who do repeat a course, the higher grade will be calculated in the cumulative grade point average and count as credits completed. Both courses will continue to appear on the student’s transcript.

### Grade Point Average

The Grade Point Average (GPA) is determined by dividing the total hours of credit hours with grade points into the total number of grade points earned. Credit hours for courses with a grade of “F” are added into the total number of credit hours for calculation of the GPA. All grades carrying grade points are used in calculation of the GPA. In the case of repeated courses, the higher grade is calculated in the GPA.
meet the College’s Standards of Progress for two semesters in succession a student will be placed on academic probation. A student who fails to

The Dean’s List is recognition of high academic achievement for a semester. Full-time students are eligible if they are matriculated and achieve a 3.5 Grade Point Average for the semester (12 or more hours of earned credit) with no grade below passing and no incompletes.
Part-time students are eligible if they are matriculated, have completed a minimum of 12 credit hours at FLCC, earn a combined total of at least six credit hours for a given year and achieve a 3.5 Grade Point Average with no grade below passing and no incompletes. The student must be part-time for both semesters. The Dean’s List for part-time students is compiled at the end of the Spring term only.

**Standards of Progress**

Finger Lakes Community College requires students to maintain a standard of progress to keep matriculation in a degree program and eligibility for financial aid. Good academic standing is important to all students. In order to be in good academic standing and to be making academic progress toward a degree or certificate, a student must meet a minimum cumulative grade point average and successfully accumulate credits according to the table below. At least once each semester, students should meet with their faculty advisor or with a staff member in the Office of Educational Planning and Career Services to review their academic progress.

If the standard of progress is not achieved at the intervals noted below, a student will be placed on academic probation. A student who fails to meet the College’s Standards of Progress for two semesters in succession is not in good academic standing and may be academically dismissed from FLCC.

Students should be aware that grades of F (failing), U (unsatisfactory), AW (conduct withdrawal), I (incomplete), Q (unofficial withdrawal), W (withdrawal), and X (administrative withdrawal) count as “credits attempted,” but do not count as “credits completed” under the Standards of Progress. In order to remain in good academic standing, students should minimize these types of grades.

</table>

If a student fails to meet the minimum Standards of Progress, the student may be academically dismissed from the College. Academic dismissal means that the student
is no longer in a degree program, loses all financial aid, and is not eligible to return to FLCC without completing the Academic Appeal process (refer to Academic Appeals, below). A student may appeal the dismissal only due to extenuating circumstances. Dismissed students, regardless of their financial aid status, must appeal in order to continue or reactivate enrollment. Academic dismissal remains in effect until the student has been readmitted by the Committee on Academic Standing or, in certain cases, the Director of Community Standards.

**Academic Appeals**

A student who has been academically dismissed from FLCC may appeal the dismissal if extenuating circumstances contributed to this dismissal (including, but not limited to: illness, injury, medical reasons, etc.) To begin the Academic Appeal process, the student must complete an Academic Dismissal Appeal and submit documentation to support the appeal. Academic Dismissal Appeal forms are available online at www.flcc.edu/offices/advisementcenter/index.cfm. Students are strongly encouraged to meet with a staff member in the Office of Educational Planning and Career Services to review the Academic Appeal process. The appeal and all supporting documentation must be returned to the Director of Community Standards by the stated deadline. The Committee on Academic Standing will review and act on the appeal. The Committee on Academic Standing is comprised of faculty members, representatives from the Office of Educational Planning and Career Services, Financial Aid Office, Student Accounts, Project Success, and the Director of Community Standards. Appeals are reviewed by the Committee on Academic Standing and/or Director of Community Standards on a periodic basis throughout the academic year. The Committee on Academic Standing is the final authority on appeals of academic dismissal. Students will be notified in writing regarding the outcome of their appeal. Students may contact the Director of Community Standards with any questions regarding the Academic Appeal process at 585.785.1211.

**Reinstatement for Academically Dismissed Students**

A student who has been academically dismissed for not meeting the College’s Standards of Progress may gain re-admission if extenuating circumstances contributed to this failure (refer to Academic Appeals, above). If extenuating circumstances did not contribute to this failure, the student may appeal after leaving the College for two academic semesters (fall and spring).

When an Academic Appeal is granted, the student will be reinstated with probationary status and required to meet conditions specified by the Committee on Academic Standing, and/or the Director of Community Standards, including, but not limited to, completing a specific course(s), limiting the number of credit hours for which the student may register, achieving a semester grade point average of 2.00, restriction from online courses, and successfully completing all coursework. Students failing to meet the conditions would be required to be separated from the College as follows:

- 1st failed contract/dismissal – One year leave from Finger Lakes Community College
- 2nd failed contract/dismissal – Three years leave from Finger Lakes Community College
- 3rd failed contract/dismissal – Three years leave from Finger Lakes Community College

Students may contact the Director of Community Standards with any questions regarding reinstatement at 585.785.1211.

**Standard of Satisfactory Academic Progress for Purpose of Determining State Aid (TAP)**

**Pursuit of Program**

Program pursuit must be determined independently from the College’s Standards of Progress. Satisfactory program pursuit is defined as receiving a passing or failing grade in a certain percentage of a full-time course load each term an award is received. The percentage increases from 50% of the minimum full-time course load in each term of study in the first year an award is received, to 75% of the minimum full-time course load in each term of study in the second year an award is received, to 100% of the minimum full-time course load in each term thereafter (refer to the table below). Students may not receive more than six (6) semesters of TAP in their pursuit of an Associate’s Degree unless they are Educational Opportunity Program students.

* The credits are prorated for students receiving Aid for Part-Time Study.
** Applicable to Educational Opportunity Program students only.

**Standards of Good Academic Standing**

A student must be able to meet the College’s Standards of Progress, Pursuit of Program requirements, and the Satisfactory Academic Progress Standards to remain eligible to receive State aid. Some of the programs affected are the Tuition Assistance Program (TAP), Child of Veteran Award, and Aid for Part-time Study (APTS).

The following chart should be used for students in the Educational Opportunity Program (EOP) or students who first received TAP in 2009-10 or earlier.

Waiver for Reinstatement of State Financial Aid Eligibility
Students who lose their eligibility for State financial aid (TAP, APTS and Part-Time TAP) for failing to make Pursuit of Program and/or Standards of Good Academic Standing (noted above) may apply for this waiver to have their State financial aid eligibility reinstated. Such a waiver can be granted only one time in a student’s undergraduate academic career. In order to apply for a Waiver for Reinstatement of State Financial Aid Eligibility, the student must demonstrate that an unusual/extenuating circumstance existed while the student was enrolled at FLCC and had affected their academic performance; that the circumstance is now resolved or no longer exists; and provide documentation of the circumstance.

State Aid and Courses within a Degree Program
Full-time students must be enrolled in a minimum of 12 credit hours within their degree program each semester to be eligible for a Tuition Assistance Program (TAP) award. If a student is receiving a TAP award and wishes to enroll in coursework outside their degree program, the course(s) must be above and beyond the minimum full-time load of 12 credit hours. An exception is made for students who are entering their final semester (that is, the semester the student is scheduled to graduate). In the final semester, the student is not bound by the requirement and is permitted to enroll in coursework outside of their degree program in addition to the courses necessary for graduation to receive a TAP award.

Part-time students receiving Aid for Part-Time Study (APTS) or Part-Time TAP can only be funded for those courses pertaining to their degree program.

State Aid and Repeat Courses
In determining a student’s eligibility for State aid, repeating a course in which a student earned a ‘D-’ grade or better cannot be counted toward full-time or part-time course load, unless it is required by the student’s curriculum. Full-time students must maintain a minimum of 12 credit hours, not including the repeat course, to be eligible to receive a Tuition Assistance Program (TAP) award. Part-time students receiving Aid for Part-Time Study (APTS) or Part-Time TAP will not receive payment for the portion of the award that would be used to cover the repeated course.

Transfer Students
The College will evaluate a student’s academic transcript from the transfer institution to determine the number of transferable credit hours. That assessment and information concerning the number of awards the student had previously received will be used to place the student at the appropriate point on the Standards of Academic Progress chart. Placement may be either in accord with the number of payments received or number of credits earned – whichever is more beneficial to the student.

Standard of Satisfactory Academic Progress for Purpose of Determining Eligibility for Federal Aid
In order to receive funding under any of the financial assistance programs authorized by Title IV of the Higher Education Act (Federal PELL, Federal Perkins Loan, Federal Supplemental Educational Opportunity Grant, Federal Work Study, Federal Stafford Loans, or Federal Parent Loans), a matriculated student must maintain academic progress. These standards are measured by using 3 components:
1. Academic progress (GPA) See the College’s Standards of Progress on page 41.
2. Pace (credits attempted versus credits completed) See the College’s Standards of Progress on page 41.
3. Maximum time frame (must complete degree in certain period of time) See below.

Maximum Time Frame
Federal financial aid regulations require that students complete their 2-year degree within the equivalent of six (6) full-time semesters. See chart below.

<table>
<thead>
<tr>
<th>Number of credits required to complete degree</th>
<th>Maximum number of attempted credits allowed in order to remain eligible for federal financial aid at FLCC</th>
</tr>
</thead>
<tbody>

<td>102</td>
</tr>
</tbody>
</table>

Financial Aid Implications for Students Not Meeting Standards of Satisfactory Academic Progress

Financial Aid Warning
When a student fails to meet the College’s academic Standards of Progress (see page 41) a student will be placed on academic probation. If the student is receiving federal financial aid, they will also be placed on a Financial Aid Warning. A student on a Financial Aid Warning will be eligible for only one (1) additional semester of federal financial aid. At the conclusion of the semester on Financial Aid Warning, the student may
1. Move to academic standing if progress is achieved and continue to receive federal financial aid
2. Continue to be on academic probation but lose eligibility for federal financial aid
3. Be academically dismissed and lose federal financial aid eligibility

Financial Aid Probation
When a student loses eligibility for federal financial aid (see #2 and #3 above), the student may submit a Financial Aid Appeal of Satisfactory Academic Progress for Federal Aid. Staff will review the appeal and, if accepted, the student will be placed on Financial Aid Probation. During the semester for which the student is granted Financial Aid Probation, they are eligible to receive federal financial aid. Upon conclusion of the semester on Financial Aid Probation, a student must meet the College’s academic standards of progress. If not, a student will lose eligibility. A student will NOT be able to appeal again.

Academic Plan
A student with an accepted Financial Aid Appeal of Satisfactory Academic Progress for Federal Aid who will not be able to regain good academic standing in one semester will be placed on an academic plan. (For example: A student must receive a 2.0 GPA for the TERM and NOT receive a grade of W, F, Q, U or I.) Upon completion of a semester on an academic plan, a student must meet all terms of the plan or lose future eligibility for all federal aid (loans, grants and work-study). An academic plan must be taken seriously. A student will NOT be able to re-appeal the loss of eligibility if he/she does not meet the requirements in their academic plan.

Not Receiving Degree in Maximum Time Frame (6 semesters)
If a student reaches 102 credits and has still not received a degree, the student is no longer eligible for federal financial aid. A student may
appeal this decision if they have extenuating circumstances that have prevented them from completing a degree in this time frame. Students interested in appealing must submit a letter of appeal to the Director of Financial Aid. The letter of appeal should provide a detailed explanation as to why it has taken the student more than the equivalent of six semesters to complete a degree. Students should address dropped courses or semesters and include their expected graduation date. The fact that a student is pursuing two degrees at the same time is not grounds for an appeal. Before submitting a letter of appeal, students are strongly encouraged to meet with an academic advisor to determine what courses and time frame are needed to their complete degree.

Remedial Coursework
Non-credit remedial coursework (DST courses) will be counted in a review of academic standards.

Repeated Coursework
A student will be funded federal financial aid to repeat a course if the student has not passed the course. If the course was passed but the student wants to repeat to get a better grade, the student will be funded for one (1) repeat of the course. All repeated course work will be included in credits attempted and credits completed.

Fresh Start Policy
Finger Lakes Community College has instituted an institution specific policy recognizing the fact that some students may attend the College prior to actually being ready to pursue a college education. Students may attend a semester or two and receive failing or near failing grades. Often the student may stop attending and return many years later only to have the grades from their previous academic endeavor negatively impact their current academic work.

Students returning to Finger Lakes Community College after an absence may petition to have their prior work excluded from their current GPA. Petition forms are available from the Director of Community Standards, the Office of Educational Planning and Career Services, and from the College website. Upon written petition to the Director of Community Standards, students who have been away from the College for five or more years may be granted a "Fresh Start." If a student has less than a five year absence from the College but has extenuating circumstances that warrant a Fresh Start, the student may also petition the Director of Community Standards with appropriate documentation. Fresh Start petitions are granted at the discretion of the Director of Community Standards and/or the Committee on Academic Standing. Greater consideration will be given to candidates demonstrating a large disparity between prior and current academic performance. Students should be aware that Fresh Start petitions which would remove from GPA calculations acceptable (C- or better) grades are unlikely to be granted. Students are discouraged from submitting petitions in an attempt to qualify for scholarships, join organizations, or enter certain academic programs. If the petition is approved, the student will be granted a Fresh Start.

If a student is granted a Fresh Start, the transcript will be modified as follows: grades of S (satisfactory) and C- or better will not be calculated in the GPA but the credit will count towards graduation requirements. The courses and grades would remain on the transcript to reflect an accurate academic history. Courses with grades of D+, D, D-, F, and U will also remain on the transcript to reflect an accurate academic history, but the grades would no longer be calculated into the GPA, and the credit would no longer count towards graduation requirements.

Students can be granted only one Fresh Start petition during their academic career at Finger Lakes Community College and must petition no later than the fourth week of the semester following their second semester back at FLCC.

Application for Degree or Certificate
Students are responsible for submitting a Graduation Application form to the One Stop Center prior to the start of the semester in which they plan to graduate. Failure to apply by this time may delay the awarding of the degree.

Students who fail to complete a Graduation Application Form will not be listed in the annual commencement program and may not be certified as graduates.

Graduation Requirements
Degree candidates must meet the requirements of the specific program of study in which they are matriculated. They must also have successfully completed a minimum of 32 semester credits at Finger Lakes Community College and earned a cumulative Grade Point Average of 2.0 or above.

Graduation with Honor
Candidates for a degree or certificate who complete their requirements with a final cumulative Grade Point Average of 3.5 or higher will be considered honor graduates. Those achieving a final cumulative Grade Point Average of 3.8 or higher will be graduated with high honor. Notation of the honor received will be made on the graduate’s diploma.
Transfer Opportunities

An element of the Finger Lakes Community College mission is to prepare students for transfer to four-year colleges and universities to continue their studies toward a baccalaureate degree. Finger Lakes Community College has established agreements with public and private four-year institutions to facilitate transfer of students once the associate degree is obtained. It is important to note that Finger Lakes Community College graduates transfer to many colleges and universities in addition to those noted below. Students who are transferring to four-year institutions should follow the general education course requirements for transfer to SUNY and non-SUNY schools as explained on pages 53-55.

Two types of transfer agreements currently exist at Finger Lakes Community College:

- Joint Admissions Agreements
- Transfer Articulation Agreements
Joint Admissions Agreements enable entering, first-time freshmen to earn admission to Finger Lakes Community College and certain four-year colleges and universities at the same time. Students completing an Associate in Arts (A.A.) or Associate in Science (A.S.) degree program are generally eligible to participate in a joint admissions agreement. Students participating in a joint admissions program will transfer with full junior status, will not have to submit a transfer application, and may receive early registration privileges at that four-year college. Students should indicate their interest in joint admissions when applying to FLCC. Certain restrictions may apply to the joint admissions programs. Consult with a transfer counselor in Educational Planning and Career Services.

Finger Lakes Community College has Joint Admissions Agreements with the following colleges and universities:

**SUNY College at Brockport**
Joint Admissions for all parallel baccalaureate degree programs:

- A.S. Business Administration to:
  - B.S. Accounting
  - B.S. Business Administration
  - B.A. International Business and Economics

- A.S. Communications to:
  - B.S./B.A. Communication
  - B.S./B.A. Journalism

Genesee Community College
A.A.S. Respiratory Care: Through a regional articulation agreement with Genesee Community College, Finger Lakes Community College offers access to a two-year Associate in Applied Science degree program in Respiratory Care. This agreement allows students to apply for admission to the program and complete their first-year course requirements at Finger Lakes Community College’s Canandaigua campus. In the second year, they attend classes at Genesee Community College and complete clinical internships at health care facilities in their home area. Upon completion of all curriculum requirements, students apply for graduation through Genesee Community College and, if all requirements are met, the A.A.S. degree in Respiratory Care is awarded by GCC. For more information, contact the FLCC Office of Admissions at 585.785.1278.
Degrees

Associate in Arts (A.A.) and Associate in Science (A.S.) Degrees: accredited degree programs that can be completed in approximately two years of full-time study with a focus of study in either science-related or liberal arts-related areas. Designed to prepare graduates for transfer to four-year colleges and universities in pursuit of bachelor’s degrees.

Associate in Applied Science (A.A.S.) Degree: an accredited degree program that can be completed in approximately two years of full-time study and is designed to prepare graduates for entry into the workforce by providing marketable job skills and experience.

Certificate Program: an accredited program designed to prepare graduates with entry-level skills in a specific professional field. A certificate can typically be completed in one year of full-time study. Credited courses taken for an FLCC certificate program may apply toward degree requirements should the graduate choose to continue his or her education after earning a certificate.

General Requirements for Degrees

Finger Lakes Community College is authorized by the Board of Regents of the State University of New York to award three degrees: The Associate in Arts (A.A.), Associate in Science (A.S.), and Associate in Applied Science (A.A.S.). Each degree must meet the New York State Education Department’s minimum requirement of 60 credit hours. Of these credit hours, 45 must be in the liberal arts for the A.A. degree, 30 must be in the liberal arts for the A.S. degree, and 20 credit hours must be in the liberal arts for the A.A.S. degree. The Board of Regents has also authorized the College to award Certificates.

Finger Lakes Community College has the following general graduation requirements for all degrees:

- 6 credit hours of English (3 credit hours of either ENG 101 Composition I or ENG 104 Freshman English I Honors; and 3 credit hours of either ENG 102 Introduction to Literature or ENG 105 Freshman English II Honors).
- A minimum grade point average of C (2.0).
- A minimum of 32 credit hours total must be taken at Finger Lakes Community College, and additionally a minimum of 50% of the courses in a student’s major must be taken at the College.*

- 4 credit hours of physical education in addition to the minimum of 60 credit hours required by New York State. (Some degree programs will require specific physical education courses or varying credits).

The philosophy of the Department of Physical Education and Integrated Health Care is based on the belief that all students, regardless of their interest, age, sex, ability or disability, can benefit from the opportunity to participate in the Physical Education program at Finger Lakes Community College. Commitment to this belief is demonstrated by the broad selection of courses offered by the Department of Physical Education and Integrated Health Care. The courses are designed to meet a variety of student needs. The Department of Physical Education and Integrated Health Care adheres to a no waiver policy. This policy states that credit is granted under the following conditions:

1. Transfer credit is awarded by the Student Records Office when an official transcript is received and an evaluation completed. Transfer credit for physical education courses will be granted if the student’s transcript shows a grade of C- or better; or a grade of S = Satisfactory, or P = Pass was awarded by another accredited college or university. Transfer credit will be awarded based on credit earned or successful hours completed. Personal enrichment courses will not transfer as Physical Education credit.

2. A student who completes Emergency Medical Services courses: EMCR 130 Certified First Responder, EMCR 200 Emergency Medical Technician with Defibrillation, or a higher level EMS credit course will be granted up to 3 credits of Physical Education.

3. The Physical Education Department adheres to the guidelines set forth in The American Council of Education’s Guide to Evaluation of Educational Experience in the Armed Services. As of September 1979, it is recommended that four (4) credits of Physical Education be granted for completion of Basic Military Training. The student must present his/her military discharge papers (DD 214) to the Student Records Office in order to verify military service.

* A.A.S. Paralegal requires 70% of legal specialty courses be taken at the College.

Liberal Arts

Courses from the humanities, social science, and natural science and mathematics categories fulfill liberal arts requirements.

Humanities

Courses beginning with the following prefixes fulfill humanities requirements:

- ART Art
- ASL American Sign Language
- CIN Cinema
- COM Communications
- ENG English
- FRN French
- HON Honors*
- HUM Humanities
- MUS Music
- PHL Philosophy
- SPN Spanish
- THE Theatre

* Honors courses may be given Liberal Arts credit in the area appropriate to the topic of course.
Natural Science and Mathematics
Courses beginning with the following prefixes fulfill natural science and mathematics requirements:
- BIO Biology
- CHM Chemistry
- MAT Mathematics
- NS Nutritional Science
- PHY Physics
- SCI Science

Note: SCI 100 carries science credit for science/technology majors only.

Social Science
Courses beginning with the following prefixes fulfill social science requirements:
- ANT Anthropology
- ECO Economics
- HIS History
- POL Political Science
- PSY Psychology
- SOC Sociology
- SSC Social Science

General Electives
Courses beginning with the following prefixes do not fulfill liberal arts requirements. These courses do fulfill the major or general requirements of a degree.
- ACC Accounting
- AGR Agronomy
- ASL American Sign Language
- BUS Business
- CDC Chemical Dependency Counseling
- CJC Criminal Justice
- CON Conservation
- CSC Computing Sciences
- CUL Culinary Arts
- DIG Digital Media
- EDU Education
- EMCR Emergency Medical Services
- ENV Environmental Science
- ESC Engineering Science
- FS Freshman Seminar
- GIS Geographic Information Systems
- GST General Studies
- HRT Horticulture
- HTM Hotel and Resort Management
- HUS Human Services
- MAS Massage
- NUR Nursing
- OFT Office Technology
- PE Physical Education
- PLG Paralegal
- TAX Taxidermy
- TECH Technology
- VIT Viticulture and Enology
- WFS Wildland Fire Suppression

FLCC General Education Course Requirements for Transfer Programs

In December 1998, the State University of New York Board of Trustees established general education requirements for all baccalaureate degree candidates at the University’s state operated campuses. In January of 2010, the SUNY Board of Trustees amended the general education requirements, effective beginning with the Fall 2010 Semester. In response, Finger Lakes Community College reviewed the College’s general education requirements for the two general transfer degrees: Associate in Arts in Liberal Arts and Sciences and the Associate in Science in Liberal Arts and Sciences.

The FLCC general education requirements are in compliance with the SUNY general education knowledge and skill areas noted below. Students interested in transfer to SUNY should complete additional general education requirements for optimal transfer. Students are encouraged to complete 30 credit hours (or the equivalent) of SUNY general education requirements prior to transferring to an upper level SUNY institution. Students should consult with the institution they are interested in transferring to after FLCC, to determine the best options for completing general education requirements.

Students enrolled in the Associate in Arts (A.A.) Liberal Arts and Sciences degree program are required to take the following, in addition to other program requirements, in order to meet Finger Lakes Community College general education program requirements:

1. Basic Communication knowledge and skill area
   - one course from ENG 101 Composition I or ENG 104 Freshman English I Honors
   - one course from COM 110 Public Speaking or COM 115 Interpersonal Communication

2. Mathematics knowledge and skill area
   - one course in mathematics knowledge and skill area listed on page 54

3. Fine Arts knowledge and skill area
   - one course in Fine Arts knowledge and skill area listed on page 54

4. History knowledge and skill area
   - one course from either the American History, Western Civilization, or Other World Civilizations knowledge and skill areas listed on page 54

5. Social Science knowledge and skill area
   - one course from the Social Science knowledge and skill area as listed on page 54

Students enrolled in the Associate in Science (A.S.) Liberal Arts and Sciences degree programs are required to take the following, in addition to other program requirements, in order to meet Finger Lakes Community College general education requirements:

1. Basic Communication Knowledge and Skill Area
   - one course from ENG 101 Composition I or ENG 104 Freshman English I Honors
   - one course from COM 110 Public Speaking or COM 115 Interpersonal Communication

53
2. Mathematics knowledge and skill area
   - one course in mathematics knowledge and skill area listed on this page

3. History knowledge and skill area
   - one course from either the American History, Western Civilization, or Other World Civilizations knowledge and skill areas listed on this page

4. Social Science knowledge and skill area
   - one course from the Social Science knowledge and skill area as listed on this page

5. American History
   - HIS 110 United States History I
   - HIS 111 United States History II

   Note: Students who complete the U.S. History Regents with a grade of 85 or better may choose HIS 206 The Indian in American History.

6. Western Civilization
   - HIS 100/HUM 100 Shaping of Western Society I
   - HIS 101/HUM 101 Shaping of Western Society II

7. Other World Civilizations
   - HIS 122 Modern World History

8. Humanities
   - ENG 102 Introduction to Literature
   - ENG 105 Freshman English II Honors

9. Fine Arts
   - ART 100 Art History I
   - ART 101 Art History II
   - ART 213 History of American Art
   - CIN 110 Cinema of Spain
   - CIN 115 Cinema of Latin America
   - CIN 260 Cinema as Art Form: Silent Era
   - CIN 261 Cinema as Art Form: Sound Era
   - CIN 263 Minority Groups in Film
   - CIN 264 Global Cinema
   - ENG 213 Introduction to Dramatic Literature
   - MUS 100 Music Appreciation
   - MUS 105 Basic Musicianship
   - MUS 111 Master Composers
   - MUS 156 Jazz History
   - THE 104 Introduction to Theatre
   - THE 210 Introduction to Dramatic Literature

For Transfer to SUNY Colleges and Universities

Students transferring to SUNY four-year institutions are encouraged to successfully complete courses in Basic Communication, Mathematics, at least five of the other eight SUNY General Education Requirement knowledge and skills areas, and the two SUNY General Education Requirement competency areas. The two SUNY General Education Requirement competency areas of Critical Thinking (Reasoning) and Information Management are infused throughout the SUNY General Education program. For optimal transfer students should complete 30 credit hours of general education prior to transferring to an upper level SUNY institution.

Knowledge and skill areas may also be met by some Advanced Placement (AP), CLEP, International Baccalaureate, or Dantes Examinations. See the Registrar for more information. Students who complete three years of sequential math in high school and score 85 or higher for the third year have met this requirement.

Knowledge and Skill Areas

1. Basic Communication (one course from ENG and one from COM is required)
   - ENG 101 Composition I
   - ENG 103 Composition II
   - ENG 104 Freshman English I Honors
   - COM 110 Public Speaking
   - COM 115 Interpersonal Communication

2. Mathematics
   - MAT 101 College Mathematics
   - MAT 110 Business Math
   - MAT 121 Statistics I
   - MAT 122 Statistics II
   - MAT 145 College Algebra
   - MAT 152 Pre-Calculus
   - MAT 220 Discrete Mathematics
   - MAT 271 Calculus I
   - MAT 272 Calculus II
   - MAT 280 Mathematics for Elementary School Teachers II

   Note: Students completing 3 years of sequential math in high school and scoring 85 or higher on the Regents Course 111 exam have met this requirement
Online Learning

Whether it’s one class or an entire degree program, online learning lets you choose when, where and how you get your education. Students that are successful online learners possess motivation, discipline, time management skills, and are comfortable using a computer and the internet.

Benefits to Taking Online Classes
- Anytime, anywhere learning: Online access helps students overcome job, time, and geographic location obstacles.
- Independence and flexibility: Some learners find that online learning meets their learning style better than face-to-face courses.
- Dedicated, experienced instructors: Faculty that teach our online courses are often the same faculty you would get if you took a face-to-face course.
- A proven solution: FLCC is partnered with the SUNY Learning Network, a world leader in online learning.

Online Degree Programs
FLCC has several fully accredited degree programs offered totally online, including:
- A.A.S. e-Commerce
- A.A.S. Business Administration
- A.S. Business Administration
- AA Liberal Arts and Sciences
- AS Sports and Tourism Studies
- A.A.S. Tourism Management

FLCC also has many more online degree programs currently in development.

Hybrid Learning
Hybrid courses offer the “best of both worlds” by combining face-to-face classroom instruction with online learning activities. In a typical hybrid course, students will attend class on campus for a limited amount of time during the semester and then complete additional coursework online through the campus course management system. Depending on the course, students might meet once a week or just a few times throughout the semester.

For Transfer to Non-SUNY Colleges and Universities

Students transferring to colleges other than SUNY should check with the institution to which they plan to transfer regarding recommended courses for transfer or consult any current articulation agreement with Finger Lakes Community College and the transfer colleges to ensure transfer at the junior level. Further questions regarding general education and transfer requirements should be discussed with an FLCC faculty or transfer advisor.

Learning Options

From the traditional to the online, learning options offered by Finger Lakes Community College may be tailored to meet the needs of students’ individual learning styles and busy lifestyles.
Degrees Awarded

Finger Lakes Community College is authorized by the Board of Regents of the University of the State of New York to grant the following degrees and certificates. Enrollment in other than registered or otherwise approved programs may jeopardize a student’s eligibility for certain student aid awards.

The HEGIS (Higher Education General Information Survey) code is a Federal designation adopted by most states for codifying academic programs and disciplines.

FLCC Honors Studies

Honors Studies is an academic program of study wherein students complete 12-18 credits of Honors coursework in tandem with their respective program of study. The essential function of Honors courses is to stimulate and enrich motivated students through a sequence of courses that place special emphasis on critical thinking and creative self-expression.

The goal of Honors Studies at FLCC is to bring curious, highly motivated students together in small seminar classes to create an inspiring scholastic and social community. Honors Studies seminars are designed to engage students intellectually and artistically. If you are eager for such an opportunity, you might consider Honors Studies at FLCC. Courses are open to both full and part time students. Successful completion of Honors courses or an Honors Certificate may increase your transfer options to four-year institutions.

The Honors Certificate is earned by completing and maintaining a “B” average and completing 12 honors credits. An Honors Diploma is earned by completing 18 honors credits. The Core Honors Curriculum includes:
- English 104: Freshman English I Honors
- English 105: Freshman English II Honors
- Honors 100: Interdisciplinary Honors Seminar I
- Honors 200: Interdisciplinary Honors Seminar II

Honors Seminars are team-taught by faculty from different fields and are topic-oriented based on the interest and expertise of the team. Recent topics have included “Science and Religion in Modern Life,” “Archetypes of the Collective Unconscious in American Literature and Art,” “Popular Culture,” “Internet, Culture, and Identity,” “The Graphic Novel,” “Mythology and Music,” and “Fiction to Film.”

In addition to the Core Honors Curriculum, you can earn credit towards an Honors certificate or diploma in two other ways:
- Honors Option: Any course for which you complete an Honors Project approved by your instructor and the Director of Honors Studies.
- Honors Electives: Each semester select courses will be designated as Honors Electives. These are courses that meet the interdisciplinary and active learning criteria of Honor Studies.

You may be invited into Honors Studies in one of the following ways:
- High scores on FLCC placement tests
- Advisor Recommendation
- Exemplary performance in English 101 and recommendation from the English 101 instructor

Honors courses are open to all interested students. Inquiries should be directed to Curtis Nehring Bliss, Director of Honors at 585.785.1367.

Writing Intensive Courses

Finger Lakes Community College recognizes that strong writing skills not only promote effective learning but also foster academic and career success. Therefore, in order to meet the College-wide expectations for students to develop their writing skills, FLCC integrates writing into its curriculum through specially designated writing intensive courses.

Writing intensive courses are offered in a variety of areas of study including business, cinema, conservation, biology, economics, English, mathematics, music, nursing, physical education, psychology, science, sociology, and theatre. These courses have content as their primary focus but also reinforce writing skills by using formal and informal writing activities as a normal, recurring, and integral part of the teaching and learning process throughout the semester. Course offerings vary by semester.

In a writing intensive course, formal writing assignments such as case studies, laboratory reports, structured journals, letters, essays, research papers, proposals, and summaries of scholarly articles emphasize a collaborative writing process involving drafting and guided revision based on instructor feedback, peer review, or self-assessment.

To be eligible to enroll in a writing intensive course, students must have successfully completed or be concurrently enrolled in ENG 101.

Both the College’s course listings and WebAdvisor indicate the course sections that carry the writing intensive (WI) course designations. When students successfully complete a WI course, it will be indicated on their transcripts. This may assist in future job or transfer opportunities.

For more information, contact the course instructor or Brooke Baker, Director of the Writing Center at 585.785.1602.
The Degree
Associate in Arts (A.A.) Liberal Arts and Sciences

The Outlook
Liberal arts students have skills that are in demand—and the flexibility of the degree means they can take their career paths in diverse and exciting directions. The skills employers say they want most in a candidate, such as written communication and critical thinking, are those for which liberal arts students are known.

The Program
Finger Lakes Community College offers a two-year program leading to the Associate in Arts Liberal Arts and Sciences degree. This degree is intended for students who wish to prepare to transfer to four-year institutions to pursue a baccalaureate degree. When all requirements of the Associate in Arts Liberal Arts and Sciences degree are met, students will have courses equivalent to those offered during the freshman and sophomore years of most four-year institutions. The Associate in Arts Liberal Arts and Sciences degree at Finger Lakes Community College is designed to transfer to most four-year institutions in the State University of New York system as well as other colleges and universities. This degree is recognized in articulation agreements between Finger Lakes Community College and other institutions. Students should consult with an advisor concerning the specific requirements of the four-year institution to which they will transfer.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 64 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- ENG 104 Freshman English I Honors
- COM 110 Public Speaking
- COM 115 Interpersonal Communication

Social Science
- 3 credit hours of History (HIS) Electives
- 9 credit hours of Social Science Electives

Mathematics/Science
- 9 credit hours of Mathematics Electives/Science Electives (Must include at least one Math and one Science course.)

Liberal Arts
- 9 credit hours of Liberal Arts Electives
- 3 credit hours of Art Electives

Information Management
- 3 credit hours of Computer Science Electives

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

General Electives
- The remainder of the required credit hours must be made up of approved electives. If you plan to prepare for transfer into a specific subject area or degree program at a four-year college or university, you should consult with your advisor regarding your course selection.

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs web page for details.

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester (16-17 Credit Hours)
- ENG 101 Composition I ........................................... (3)
- ENG 104 Freshman English I Honors ....................... (3)
- History (HIS) Elective ........................................... (3)
- Mathematics Elective ........................................... (3-4)
- Science Elective .................................................. (3-4)
- Humanities Elective ............................................. (3)
- Computer Science (CSC) Elective ............................ (3)
- Health/Physical Education (PE) Elective .................. (1)

Second Semester (16-17 Credit Hours)
- ENG 102 Introduction to Literature ............................ (3)
- ENG 105 Freshman English II Honors ...................... (3)
- Social Science Elective ........................................... (3)
- Mathematics Elective ........................................... (3-4)
- Science Elective .................................................. (3-4)
• COM 110 Public Speaking ..................................(3)
  OR
• COM 115 Interpersonal Communication ......................(3)
• General Elective ...........................................(3)
• Health/Physical Education (PE) Elective .......................(1)

Third Semester  (16-17 Credit Hours)
• Foreign Language .............................................(3)
• Social Science Elective ......................................(3)
• Mathematics Elective ......................................(3-4)
  OR
• Science Elective .............................................(3-4)
• General Elective .............................................(3)
• General Elective .............................................(3)
• Health/Physical Education (PE) Elective .......................(1)

Fourth Semester  (16 Credit Hours)
• Liberal Arts Elective ...........................................(3)
• Liberal Arts Elective ...........................................(3)
• Liberal Arts Elective ...........................................(3)
• Social Science Elective ......................................(3)
• General Elective .............................................(3)
• Health/Physical Education (PE) Elective .......................(1)

Subject Areas for Transfer Opportunities
By appropriate course selection in consultation with a faculty advisor, students pursuing the A.A. Liberal Arts and Sciences degree may prepare for transfer to upper-level study in subject areas including, but not limited to:
• American Sign Language
• Athletic Training
• Early Childhood
• History
• Humanities
• Psychology
• Social Science
• Sociology
• Teacher Education Transfer (Adolescent)
• Theatre Arts

To successfully complete the A.A. Liberal Arts and Sciences degree at Finger Lakes Community College and transfer to upper level study in a subject area, the student should have had sufficient mathematics and science preparation at the high school level. If the student lacks sufficient mathematics and science preparation, the student may receive that instruction at FLCC, but it may take more than two years to complete the A.A. Liberal Arts and Sciences degree. The articulation agreements which support transfer from Finger Lakes Community College to four-year institutions are discussed in more detail in the “Transfer Opportunities” section.
Childhood Education
(Teacher Education Transfer)
Associate in Arts Degree (A.A.)
HEGIS 5068

The Degree
Associate in Arts (A.A.)

The Outlook
Employment in childhood education is expected to grow moderately over the next several years due to the retirement of a large group of teachers, according to the U.S. Department of Labor. Through the Associate in Arts (A.A.) Liberal Arts and Sciences: Childhood Education (Teacher Education Transfer) program, students transfer from FLCC to bachelor’s degree programs in childhood education to become certified teachers of first- through sixth-grade students.

The Program
The early childhood program introduces students to the historical, philosophical, and social foundations of education; explores the role of the teacher; provides coursework in the structure and organization of schools; and offers the opportunity for structured school observations. It also provides the liberal arts coursework necessary for students to transfer to childhood education programs at SUNY and private colleges.

The degree is recognized in transfer (articulation) agreements with a large number of public and private four-year institutions in New York State and across the nation.

Honors Courses: In addition, FLCC offers Honors courses, open to all qualified students, that provide enhanced educational experiences for students with outstanding ability. Successful completion of Honors courses or an Honors Certificate may increase your options for transfer to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 64 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
  AND ENG 102 Introduction To Literature
  OR
- ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking
- 6 credit hours of Foreign Language*
- 3 credit hours of Arts Electives**
- 3-4 credit hours of Liberal Arts Electives**

Social Science
- HIS 100 Shaping of Western Society I
  OR
- HIS 101 Shaping of Western Society II
- HIS 110 United States History I
  OR
- HIS 111 United States History II
- HIS 122 Modern World History
- PSY 100 Introduction to Psychology
- PSY 225 Child Psychology
- SOC 100 Introduction to Sociology

Mathematics/Science
- MAT 180 Math for Elementary School Teachers I
- MAT 280 Math for Elementary School Teachers II
- 8 credit hours of one of the following Lab Science sequences:***
  - BIO 118 Contemporary Biology I
    AND BIO 119 Contemporary Biology II
  - BIO 121 General Biology I
    AND BIO 122 General Biology II
  - BIO 171 Human Anatomy and Physiology I
    AND BIO 172 Human Anatomy and Physiology II
  - CHM 121 General Chemistry I
    AND CHM 122 General Chemistry II
  - CHM 211 Organic Chemistry I
    AND CHM 212 Organic Chemistry II
  - PHY 118 College Physics I
    AND PHY 119 College Physics II
  - PHY 151 General Physics I
    AND PHY 152 General Physics II

Education
- EDU 200 Foundations of American Education
- EDU 210 Schools in America: Organization and Issues

Health/Physical Education
- PE 212 Health
- 1 credit hour of Health/Physical Education (PE) Elective

Students intending to transfer to a SUNY Institution should consult with their advisor for course selections that meet general education requirements and consult www.suny.edu/tett for more information about transfer to a SUNY Institution.

Notes:
* See Advisor for Foreign Language Requirements.
** Appropriate electives vary depending upon teaching area.
*** Some bachelor’s programs prefer a two-semester sequence in one Science area, some prefer one course in two different Science areas, e.g. one Chemistry and one Biology.

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

Associate in Science

Liberal Arts and Sciences
Associate in Science Degree (A.S.)
HEGIS 5649

The Degree
Associate in Science (A.S.) Liberal Arts and Sciences

The Outlook
Liberal arts students have skills that are in demand—and the flexibility of the degree means they can take their career paths in diverse and exciting directions. The skills employers say they want most in a candidate, such as written communication and critical thinking, are those for which liberal arts students are known.

The Program
Finger Lakes Community College offers a two-year program leading to the Associate in Science Liberal Arts and Sciences degree. This program is designed to provide students with sufficient background to transfer and compete successfully in a four-year institution. It is especially suited for students with a strong interest in science and mathematics. When all degree requirements are met, students will have courses equivalent to those offered in the freshman and sophomore years of most four-year institutions. The Associate in Science Liberal Arts and Sciences degree is designed for transfer to most four-year institutions in the State University of New York system as well as other colleges and universities and is recognized by articulation agreements between Finger Lakes Community College and other institutions. Students should be certain that their selection of courses meets the requirements of the specific four-year institution to which they will transfer. The rigors of many science and technology courses necessitate an adequate mathematics and science background at the high school level in order to complete these programs in two years. If the student lacks background in mathematics and science, he/she can acquire it at Finger Lakes Community College, but it will take more than two years to complete the A.S. Liberal Arts and Sciences degree. To facilitate transfer, students are strongly encouraged to take full advantage of advisement from faculty in their area of interest.

The goals of this program are:

• To provide students with sufficient academic background to enter and compete within science and mathematics programs at four-year institutions.
• To develop in students all of the 10 Competencies identified by Finger Lakes Community College as learning outcomes of a liberal education.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 64 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
• ENG 101 Composition I
  AND ENG 102 Introduction to Literature
  OR
• ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors
• COM 110 Public Speaking
  OR
• COM 115 Interpersonal Communication

Social Science
• 3 credit hours of History (HIS) Electives
• 6 credit hours of Social Science Electives

Science and Mathematics
• 24 credit hours of Science Electives and Mathematics Electives
• Minimum of one of the following sequences:
  • BIO 121 General Biology I
    AND BIO 122 General Biology II
  • CHM 121 Chemistry I
    AND CHM 122 Chemistry II
  • PHY118 College Physics I
    AND PHY 119 College Physics II
  • PHY 151 Physics I
    AND PHY 152 Physics II
  • BIO 171 Human Anatomy and Physiology I
    AND BIO 172 Human Anatomy and Physiology II
  • MAT 145 College Algebra*
  • MAT 152 Pre-Calculus*

Information Management
• 3 credit hours of Computer Science Electives

Health/Physical Education
• 4 credit hours of Health/Physical Education (PE) Electives

General Electives
• 15 credit hours of General Electives

The remainder of the required credit hours must be made up of approved electives. If you plan to prepare for transfer into a specific subject area or degree program at a four-year college or university, you should consult with your advisor regarding your course selection.

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs web page for details.

For you to successfully complete the A.S. Liberal Arts and Sciences degree and transfer to an upper-division institution with full junior status in Mathematics or the Sciences, you may be required to start at FLCC in the Pre-Calculus or Calculus level of Mathematics. High School students are encouraged to contact their guidance office and make use of the Mathematics Alert Program to become more familiar with the requirements in Mathematics to pursue specific college degrees. If you lack sufficient Mathematics and Science preparation, you may receive instruction at FLCC, but it may take more than two years to complete this degree.

Notes:
* If this competency has been met before entering the program, students must select at least 6 credit hours in other higher Mathematics courses approved by their advisor.
Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester (15-17 Credit Hours)
- ENG 101 Composition I ......................................... (3)
- OR
- ENG 104 Freshman English I Honors ........................ (3)
- Mathematics Elective .......................................... (3)
- Science Elective ................................................ (3-4)
- Mathematics Elective ......................................... (3-4)
- OR
- Science Elective .............................................. (3-4)
- History (HIS) Elective ........................................ (3)

Second Semester (17-19 Credit Hours)
- ENG 102 Introduction to Literature ............................ (3)
- OR
- ENG 105 Freshman English II Honors ........................ (3)
- Mathematics Elective .......................................... (3)
- Science Elective ................................................ (3-4)
- Mathematics Elective ......................................... (3-4)
- OR
- Science Elective .............................................. (3-4)
- Social Science Elective ........................................ (3)
- Health/Physical Education (PE) Elective ...................... (2)

Third Semester (16-18 Credit Hours)
- COM 110 Public Speaking ...................................... (3)
- OR
- COM 115 Interpersonal Communication ...................... (3)
- CSC Elective ................................................... (3)
- Mathematics Elective ........................................ (3)
- Mathematics Electives ........................................ (6-8)
- OR
- Science Electives ............................................ (6-8)
- Health/Physical Education (PE) Elective ...................... (1)

Fourth Semester (16-18 Credit Hours)
- Social Science Elective ......................................... (3)
- General Elective ............................................... (3)
- Mathematics Elective ........................................ (3)
- Mathematics Electives ........................................ (6-8)
- OR
- Science Electives ............................................ (6-8)
- Health/Physical Education (PE) Elective ...................... (1)

Subject Areas for Transfer Opportunities
By appropriate course selection in consultation with a faculty advisor, students pursuing the A.S. Liberal Arts and Sciences degree may prepare for transfer to upper-division study in the subject areas listed:
- Biology
- Chemistry
- Horticulture
- Human Nutrition And Food
- Mathematics
- Physics
The Outlook
From altering the genetic information of plants and animals to producing cells to create pharmaceutical products, the science of biotechnology is using cutting-edge technology and the basic ingredients of life to benefit society. Students can participate in what many consider to be the most important applied science of the 21st century through the biotechnology degree program at Finger Lakes Community College.

Career opportunities in biotechnology are diverse and intriguing, including areas such as cloning, forensics, bio-engineered food, and more. According to a recent survey funded by the Empire State Development Corporation, most biotech employers in the region expect continued growth. In fact, 88 percent reported that they anticipate hiring new employees to keep up with industry demands.

The Program
Biotechnology, an associate in science (A.S.) degree program, is designed to prepare students either to transfer to a four-year institution as a biotech major or to develop marketable skills as they prepare to enter this dynamic job market.

Skills and Methods: Courses in the program focus on skill development in the following areas:

Genetic Research Techniques
- Cloning
- Protein separation methods
- Hydrophobic Interaction Chromatography
- Size exclusion chromatography
- Ion-exchange chromatography
- Bioinformatics

Cell Tissue and Culture
- Culture equipment and safety
- Sterile and aseptic technique
- Media preparation and the culture environment
- Quantitative methods (cell count/viability)
- Cryopreservation
- Primary cell culture techniques
- Subculturing techniques
- Cell differentiation
- Applied techniques (transfection, histochem)

Electrophoresis
- Principles of PAGE and agarose electrophoresis
- Electrophoresis equipment and operation
- Formal laboratory report writing
- Micropipetting technique
- Gel preparation (pour, load, and process)
- Calculation of molecular weights from gels
- Gel photography and image analysis
- Restriction enzyme digests
- Restriction mapping

Genetics Laboratory
- Mendelian Genetics and crosses
- Cloning techniques (restriction digestion, ligation, transformation)
- PCR applications
- PCR primer design
- DNA fingerprinting
- DNA isolation
- Quantitative DNA applications
- Bioinformatics

Bacteriological Methods
- Laboratory safety
- Sterile technique
- Selective and differential media
- Plaque assay
- Microscopy
- Media preparation
- Culture techniques
- Reagent and stain preparation
- Bacterial conjugation and transformation

Facilities: Facilities for the program include a fully equipped instrument lab, extensive spectrophotometric resources, cell culture and cryogenic equipment, and enough electrophoresis equipment to ensure that every student has the opportunity to work with his or her own gel box.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 67 credit hours with a grade point average of not less than C (2.0). The recommended Math sequence of MAT 152 Pre Calculus and MAT 271 Calculus I would lead to 68 credit hours (see sample schedule). It is strongly recommended that students planning to transfer to a four-year institution complete a sequence in CHM 211 Organic Chemistry I and CHM 212 Organic Chemistry II.

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
  AND ENG 102 Introduction to Literature
  OR
- ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking

Social Science
- 3 credit hours of History (HIS) Electives
- 6 credit hours of Social Science Electives

Mathematics
- MAT 152 Pre-Calculus
- MAT 271 Calculus I
with regard to specific courses and requirements. If you plan to transfer to a four-year institution, you should check with your transfer institution when planning your schedule. If you plan to continue your studies at a four-year institution, you should consult with your advisor when some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

Sample Schedule

The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester (18 Credit Hours)
- ENG 101 Composition I ................................................. (3)
- ENG 104 Freshman English I Honors ............................... (3)
- BIO 121 General Biology I ........................................... (4)
- CHM 121 General Chemistry I ....................................... (4)
- MAT 152 Pre-Calculus .................................................. (3)
- CSC 134 Core Word .................................................... (1)
- CSC 135 Core Excel .................................................... (1)
- CSC 136 PowerPoint ................................................... (1)
- Health/Physical Education (PE) Elective ........................... (1)

Second Semester (19 Credit Hours)
- ENG 102 Introduction to Literature ................................. (3)
- ENG 105 Freshman English II Honors ............................. (3)
- BIO 122 General Biology II ......................................... (4)
- BIO 240 Principles of Genetics ..................................... (3)
- BIO 241 Laboratory in Genetics ..................................... (1)
- CHM 122 General Chemistry II .................................... (4)
- MAT 271 Calculus I ...................................................... (4)

Third Semester (16-18 Credit Hours)
- BIO 222 Introduction to Cell Biology ............................... (3)
- BIO 230 Microbiology .................................................. (4)
- BIO 238 Electrophoresis .............................................. (2)
- BIO 287 Introduction to Biomanufacturing I ..................... (1)
- History (HIS) Elective ................................................ (3)
- General Elective* ...................................................... (3-5)

Fourth Semester (15-19 Credit Hours)
- COM 110 Public Speaking ............................................ (3)
- BIO 286 Cell and Tissue Culture .................................... (1)
- BIO 288 Introduction to Biomanufacturing II .................... (1)
- Social Science Electives** .......................................... (6)
- Health/Physical Education (PE) Elective** ....................... (3)
- General Elective*** .................................................... (1-5)

Notes:
* In the third semester, it is strongly recommended that students take CHM 211 Organic Chemistry I if planning to transfer to a four-year institution.
** In the fourth semester, students must complete one Social Science course that meets one of the following competencies not met by the History (HIS) Elective: US History, Western Civilization, or Other World/Non-Western Civilization.
*** In the fourth semester, it is recommended that students take PE 214 Advanced First Aid, CPR and AED if planning to enter the job market. If planning to transfer, the three credit hours of Health/Physical Education (PE) electives may be spread out across the first, third, and fourth semesters.
**** In the fourth semester, it is strongly recommended that students take CHM 212 Organic Chemistry II if planning to transfer to a four-year institution.
The Degree
Associate in Science (A.S.)

The Outlook
The diversity of occupations held by Business Administration graduates accounts for the popularity of this degree program. Among two-year colleges, both public and private, Business Administration is one of the most widely held degrees, second only to Liberal Arts and Sciences. Both Associate in Science (A.S.) and Associate in Applied Science (A.A.S.) degrees at Finger Lakes will prepare you for the ever-changing business world, allowing you to enter the job market in any number of positions: service sales representative, management analyst and consultant, management trainee, appraisers, recruiter, training specialist, benefits specialists, compensation specialists, business strategists, production planner, inventory control specialist, store manager, office manager, bank teller, warehouse manager, and more.

The Program
A.S. Degree: The A.S. degree is designed to prepare you to transfer to a four-year college or university such as SUNY Colleges at Geneseo, Brockport, Cortland and Fredonia, Nazareth College of Rochester, St. John Fisher College, Rochester Institute of Technology, Syracuse University, and Canisius College, among others*, to pursue a baccalaureate degree in accounting, business administration, management information systems, or secondary education.

Online Courses: As part of the SUNY Learning Network (SLN), students pursuing the A.S. in Business Administration degree may take all of the curriculum requirements online. Students may take a course at a convenient time and place without the need to travel to campus, thus eliminating any time and location restrictions a student may have.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students enrolled in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 68 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- AND ENG 102 Introduction to Literature
- OR
- ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors
- OR
- COM 110 Public Speaking
- OR
- COM 115 Interpersonal Communication

Social Science
- ECO 210 Principles of Macroeconomics
- ECO 211 Principles of Microeconomics
- 3 credit hours of Social Science Electives

Mathematics/Science
- BIO 118 Contemporary Biology I
- AND BIO 119 Contemporary Biology II
- OR
- BIO 121 General Biology I
- AND BIO 122 General Biology II
- OR
- CHM 121 Chemistry I
- AND CHM 122 Chemistry II
- OR
- PHY 118 College Physics I
- AND PHY 119 College Physics II
- OR
- PHY 151 Physics I
- AND PHY 152 Physics II
- OR
- MAT 121 Statistics I
- AND MAT 122 Statistics II
- AND MAT 152 Pre-Calculus*
- 3 credit hours of Mathematics Electives/Science Electives

General Elective
- 3 credit hours of General Electives

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

Business
- ACC 101 Principles of Financial Accounting
- ACC 102 Principles of Managerial Accounting
- BUS 120 Business Organization**
- BUS 222 Marketing
- BUS 227 Business Law I
- 3 credit hours of Business Electives

Information Management
- CSC 100 Computing in the Information Age
- OR
- 3 credit hours of Computer Science (CSC) Electives

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs web page for details.

Notes:
* If the student has already achieved competency equivalent to successful completion of MAT 152 Pre-Calculus, the student should choose other Mathematics courses relevant to future plans, pending approval by the advisor.
** OR BUS 124 Organizational Behavior upon recommendation of academic advisor.

**** Business Electives include courses with the following prefixes: ACC, BUS, CSC, HTM, and OFT. Courses coded as PLG may be used with permission of Department Chair.
**Business Administration**

**Associate in Science Degree (A.S.)**

**Accelerated**

**HEGIS 5004**

**The Degree**

Associate in Science (A.S.)

**The Outlook**

Employment among business managers is expected to grow at a faster rate than the average through 2020. Demand for the workers with business education and experience will grow as organizations continue to seek ways to improve efficiency and control costs.

**The Program**

If you’ve been thinking about starting or finishing a degree, you’re probably also trying to figure out how to fit an education into your already busy life. With FLCC’s innovative accelerated program in Business Administration, you’ll take advantage of a schedule and course load that is designed for busy but motivated adults seeking to earn a versatile and in-demand college degree.

**Hybrid Courses: The Best of Both Worlds**

Using hybrid learning - a combination of in-class and online learning - you can earn your degree in as little as two years by attending class just once a week. All face-to-face courses take place at the conveniently-located FLCC Victor Campus Center, and you’ll also have the option of earning college credit online. Students in the accelerated program take two classes at a time for two seven-week “Minimesters” (or mini semesters) while also taking a full 15-week class online or in-person.

Make no mistake - this program is intense. While classes meet in-person only once per week, there is significant out-of-class time spent online and on-task. But if you are a goal-oriented adult who understands the importance of a college degree plays in your future success, this could be just the program for you.

**Curriculum Requirements**

As a student in this program, you are required to complete a minimum of 68 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

**Humanities**

- ENG 101 Composition I
  - AND ENG 102 Introduction to Literature
  - OR
- ENG 104 Freshman English I Honors
  - AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking

** BUS 221 is an elective designed for hybrid offering. Students have the option of substituting another Business elective for BUS 221 and may schedule that course at a time that is more convenient.
Communications
Associate in Science Degree (A.S)
HEGIS 5008

The Degree
Associate in Science (A.S.)

The Outlook
According to a U.S. Department of Labor report on the fastest growing careers, communication skills are among the most sought after by employers. Surveys of Fortune 500 executives and human resource managers identified communication skills as valuable for both obtaining employment and successful job performance. The A.S. Communications degree program at Finger Lakes Community College provides you with the solid foundation and hands-on experience needed for a career in video production, broadcasting, journalism, public relations or advertising. In addition, the marketable skills you will develop can be applied to a career in almost any area you choose.

Technology: Facilities for the program include new digital media labs, equipped with editing systems and state of the art graphics and audio software, a 900-square-foot television studio, digital camcorders, still cameras, teleprompters, and digital studio cameras.

Honors Courses: In addition, the College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students enrolled in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 66 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
• ENG 101 Composition I
  AND ENG 102 Introduction to Literature
  OR
• ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors
• ENG 223 Journalism
• 3 credit hours of Humanities Electives

Social Science
• 3 credit hours of History (HIS) Electives
• 9 credit hours of Social Science Electives

Mathematics/Science
• 9 credit hours of Mathematics Electives/Science Electives* (Must include at least one Mathematics and one Science course.)

Communications
• COM 110 Public Speaking
  OR
• COM 111 Vocal Communication
• COM 123 Video Production I
• COM 202 Introduction to Mass Communication
• One of the following Advisement Areas:
  • Broadcast Advisement Area:
  • COM 122 Television Advertising
  • COM 124 Video Production II
  • 3 credit hours of Business Electives
  • Communications Advisement Area:
  • COM 115 Interpersonal Communication
  • 3 credit hours of Communications (COM) Electives
  • 4 credit hours of General Electives

Theatre
• THE 102 Acting I

Business
• BUS 229 Advertising

Health/Physical Education Elective
• 4 credit hours of Health/Physical Education (PE) Electives

General Electives
• 3 credit hours of General Electives*

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs web page for details.

Computer Science
Associate in Science Degree (A.S.)
HEGIS 5101

The Degree
Associate in Science (A.S.)

The Outlook
According to the U.S. Labor Department, several disciplines within the computing sciences have been identified as growing occupations in the U.S. through the year 2020. Faster than average growth is expected in the fields of computer systems analysts, database administrators, and software developers. Computerworld’s annual Hot Skills list identifies programming and application development (especially mobile applications and health care), project management, and business intelligence as areas that are in demand.

The Computer Science degree program at Finger Lakes Community College is designed to meet the needs of a technical field that is continuously evolving and changing.

The Program
The Associate in Science (A.S.) degree in Computer Science at Finger Lakes Community College is a technical degree, offering a solid core of required computer science courses. The degree also requires a core of mathematics (including Calculus I and II) and science courses, in addition to required liberal arts courses necessary to transfer with full junior status to a four-year institution. The curriculum in the program is continually updated to reflect new changes in technology, such as mobile application development, object-oriented programming and design, multimedia development, current computing platforms, and networking technologies.

Honors Courses: In addition, the College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 66 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. - 4 credit hours of Health/Physical Education (PE) Electives

General Electives
- The remainder of the hours must be approved electives.

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs web page for details.

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester (16 Credit Hours)
- ENG 101 Composition I ............................................ (3)
- OR
- ENG 104 Freshman English I Honors .................. (3)
- CSC 103 Computing Sciences Portal .................. (2)
- CSC 115 Introduction to Programming and Computing .... (3)
- MAT 271 Calculus I ....................................... (4)
- Social Science Elective .................................. (3)
- Health/Physical Education (PE) Elective ........... (1)

Second Semester (17 Credit Hours)
- ENG 102 Introduction to Literature .................. (3)
- OR
- ENG 105 Freshman English II Honors ........ (3)
- CSC 190 Data Structures I ......................... (3)
- MAT 272 Calculus II .................................. (4)
- History (HIS) Elective ............................... (3)
- General Elective .................................. (3)
- Health/Physical Education (PE) Elective .......... (1)

73
Third Semester (18 Credit Hours)
- CSC 200 Data Structures II ........................................ (4)
- MAT 220 Discrete Mathematics ................................. (3)
- Natural Science Elective** ......................................... (4)
- Social Science Elective ............................................. (3)
- General Elective ....................................................... (3)
- Health/Physical Education (PE) Elective ....................... (1)

Fourth Semester (15 Credit Hours)
- COM 110 Public Speaking .......................................... (3)
  OR
- COM 115 Interpersonal Communication ....................... (3)
- 200-Level CSC Elective ............................................. (3)
- 200-Level CSC Elective ............................................. (3)
- Natural Science Elective** ......................................... (4)
- General Elective ....................................................... (1)
- Health/Physical Education (PE) Elective ....................... (1)

Notes:
* If not sufficiently prepared, a Pre-Calculus course may be necessary.
** If a scientific background is desired, PHY 151 General Physics I and PHY 152 General Physics II should be taken, beginning in the first semester.
The Degree
Associate in Science (A.S.)

The Outlook
The Occupational Outlook Handbook reports that employment opportunities in all areas of engineering -- mechanical, electrical, civil, chemical, biomedical, aerospace, environmental, industrial, and others -- are expected to remain strong through the year 2020. Competitive pressures and advances in technology will fuel improvements and updates to product design, manufacturing processes, and productivity. With the use of new computer and communications systems, engineers are better able to produce and analyze product designs rapidly and in collaboration with other engineers throughout the world. The A.S. Engineering Science degree program at Finger Lakes Community College provides a core mathematics and science education and prepares you to pursue a bachelor’s degree in any engineering specialty.

Course work and facilities: The curriculum offers courses in calculus, physics, chemistry, engineering graphics, computer programming, mechanics, thermal science, electric circuits and engineering design.

Facilities for the program include a well equipped engineering lab with laptops, machining equipment, wind tunnel, tensile testing machine, and electronic devices. Students also have access to the CAD lab and 3D printer. The majority of the core courses needed for this degree are offered at FLCC’s Victor Campus Center.

Honors Courses: In addition, the College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students enrolled in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 71 credit hours with a grade point average of not less than C (2.0). Additional hours are recommended depending upon Engineering emphasis.

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
• ENG 101 Composition I
AND ENG 102 Introduction to Literature
OR
• ENG 104 Freshman English I Honors
AND ENG 105 Freshman English II Honors

Social Science
• 3 credit hours of History (HIS) Electives
• 3 credit hours of Social Science Electives

Mathematics
• MAT 271 Calculus I
• MAT 272 Calculus II
• MAT 273 Calculus III
• MAT 274 Differential Equations

Science
• CHM 121 General Chemistry I
• PHY 151 General Physics I
• PHY 152 General Physics II

Engineering Science
• ESC 100 Introduction to Engineering
• ESC 105 Engineering Graphics
• ESC 173 Computing for Engineers I
• ESC 174 Computing for Engineers II
• ESC 210 Engineering Design I
• ESC 211 Mechanics I (Statics)
• ESC 220 Engineering Design II
• ESC 222 Electrical Circuits

Technology Electives
• Choose 9 credit hours from the following courses based on your specialization.
  • CHM 122 General Chemistry II
  • CHM 211 Organic Chemistry I
  • CHM 212 Organic Chemistry II
  • ESC 212 Mechanics II
  • ESC 213 Strength of Materials
  • ESC 235 Thermodynamics
  • MAT 220 Discrete Mathematics
  • MAT 276 Linear Algebra
  • PHY 253 Physics III: Modern Physics and Waves

Health/Physical Education
• 4 credit hours of Health/Physical Education (PE) Electives

Electives
• Based on transfer school requirements

Specializations
As a student of this degree program, you may select courses that reflect your interests and goals. The following specializations are suggested for students who plan to transfer to a four-year program in these areas. In many cases, the subject areas indicate sequences of courses that will prepare you to transfer into specific degree programs with full junior standing. Learn more about the Transfer Articulation Agreements by visiting www.flcc.edu/transfer.

Recommended Technology Electives for various Engineering fields which you may pursue upon transfer to a four-year institution:

Mechanical, Aerospace and Civil Engineering:
• ESC 212 Mechanics II (Dynamics) ............................................. (3)
• ESC 213 Strength of Materials ..................................................... (3)
• ESC 235 Thermodynamics .......................................................... (3)
Electrical Engineering:
- MAT 220 Discrete Mathematical Structures ...................(3)
- MAT 276 Linear Algebra ...........................................(3)
- ESC 212 Mechanics II (Dynamics) .............................(3)
- ESC 235 Thermodynamics ........................................(3)
- PHY 253 Physics III: Waves and Modern Physics ............(4)

Chemical, Ceramic and Environmental Engineering:
- CHM 122 General Chemistry II .................................(4)
- CHM 211 Organic Chemistry I ................................(5)
- CHM 212 Organic Chemistry II .................................(5)
- ESC 212 Mechanics II (Dynamics) .............................(3)
- ESC 235 Thermodynamics ........................................(3)

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs webpage for details.

**Sample Schedule**

The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

**First Semester**
- ENG 101 Composition I ...........................................(3)
- OR ENG 104 Freshman English I Honors ....................(3)
- CHM 121 General Chemistry I ................................(4)
- ESC 173 Computing for Engineers I .........................(2)
- ESC 174 Computing for Engineers II .......................(2)
- ESC 100 Introduction to Engineering ........................(1)
- MAT 271 Calculus I ...............................................(4)
- Health/Physical Education (PE) Elective .....................(1)

**Second Semester**
- ENG 102 Introduction to Literature ...........................(3)
- OR ENG 105 Freshman English II Honors ....................(3)
- ESC 105 Engineering Graphics ................................(3)
- MAT 272 Calculus II .............................................(4)
- PHY 151 General Physics I .....................................(4)
- Health/Physical Education (PE) Elective .....................(1)
- History Elective .....................................................(3)

**Third Semester**
- ESC 210 Engineering Design I ................................(2)
- ESC 211 Mechanics I (Statics) .................................(3)
- MAT 273 Calculus III ............................................(4)
- PHY 152 General Physics II ...................................(4)
- Technology Elective ............................................(3)
- Health/Physical Education (PE) Elective .....................(2)

**Fourth Semester**
- ESC 220 Engineering Design II ................................(2)
- ESC 222 Electric Circuits .......................................(4)
- MAT 274 Differential Equations ...............................(3)
- Technology Elective ............................................(3)

The sequence above is only an example, and variations in the curriculum sequence are possible. Review the following specializations and consult with your advisor to learn about possible variations.

**Specializations**

As a student of this degree program, you may select courses that reflect your interests and goals. The following specializations are suggested for students who plan to transfer to a four-year program in these areas. In many cases, the subject areas indicate sequences of courses that will prepare you to transfer into specific degree programs with full junior standing. Learn more about the Transfer Articulation Agreements by visiting www.flcc.edu/transfer.

**Recommended Technology Electives for various Engineering fields which you may pursue upon transfer to a four-year institution:**

**Mechanical, Aerospace and Civil Engineering:**
- ESC 212 Mechanics II (Dynamics) .........................(3)
- ESC 213 Strength of Materials .................................(3)
- ESC 235 Thermodynamics ......................................(3)

**Electrical Engineering:**
- MAT 220 Discrete Mathematical Structures ................(3)

- ESC 235 Thermodynamics ......................................(3)
- PHY 253 Physics III: Waves and Modern Physics ........(4)

**Chemical, Ceramic and Environmental Engineering:**
- CHM 122 General Chemistry II .............................(4)
- CHM 211 Organic Chemistry I ...............................(5)
- CHM 212 Organic Chemistry II .............................(5)
- ESC 212 Mechanics II (Dynamics) .........................(3)
- ESC 235 Thermodynamics ......................................(3)
Environmental Studies
Associate in Science Degree (A.S)
HEGIS 5499

The Degree
Associate in Science (A.S.)

The Outlook
Career opportunities for Environmental Studies graduates include positions in fish and wildlife management, natural resource conservation, soil conservation, environmental consulting, land management, and environmental education. Challenging and diverse positions exist in the private sector and with government agencies such as the Department of Environmental Conservation, the Natural Resources Conservation Service, the National Park Service, the Bureau of Land Management, and the Department of Health.

The Program
FLCC’s Associate in Science degree program in Environmental Studies is designed to prepare students who plan to transfer to four-year institutions in pursuit of a bachelor’s degree. Through classroom and field study, it provides fundamental math and science preparation, knowledge of current environmental issues, and hands-on experience in natural resource management. The program also allows students to enroll in environmental courses and begin studying within their field of interest early in their academic career.

Courses are offered in fish and wildlife; environmental conservation, terrestrial and aquatic ecology, field botany, limnology, wildlife management and other science and natural resource-related subjects.

Field work: Field trips to local fish hatcheries and wildlife refuges, work with conservation agencies, and experiences on wilderness camping trips enhance classroom studies. The Muller Conservation Field Station, located at the southern end of Honeoye Lake, and the East Hill Campus in Naples provides additional outdoor experiences.

Expeditions: Intensive ecology expedition courses to unique wilderness areas are also offered. Past trips include expeditions to the Florida Everglades, the Rocky Mountains, and East Coast maritime communities. Students have a rare opportunity to observe and study the animals, birds, plants, and geology of these natural areas. Led by FLCC professors, the itinerary for these three-credit expedition courses may include camping, backpacking, kayaking, and hiking trips.

Technology: Students have the opportunity to use industry-standard research technology such as electro-fishing equipment, water quality probes, GIS computer software, and wildlife tracking radio-telemetry devices.

Ranger School Transfer Opportunity: Through the Forest Technology 1+1 articulation agreement with the SUNY College of Environmental Science and Forestry Ranger School, located in Wanakena, N.Y., you can complete one year of study at FLCC and then transfer to the Ranger School to pursue a career as a surveyor, forest ranger, or forester.

The Program at FLCC will introduce you to environmental conservation and focus on the courses necessary for transfer to the Ranger School. At the Ranger School, you continue your studies using the school’s impressive outdoor teaching facilities. The school has a 2,800 acre managed forest and is surrounded by New York’s beautiful Adirondack Park. Graduates of the program work with private companies and public agencies such as the New York Department of Environmental Conservation and the National Park Service.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 67 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- ENG 102 Introduction to Literature
- OR
- ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors
- 3 credit hours of Humanities Electives

Social Science
- 9 credit hours of Social Science Electives

Mathematics/Science
- CHM 121 Chemistry I
- BIO 121 General Biology I
- BIO 122 General Biology II
- BIO 221/CON 202 Principles of Ecology
- 6 credit hours of approved Mathematics Electives*
- 3 credit hours of Science Electives

Natural Resources Conservation
- CON 100 Introduction to Environmental Conservation
- CON 102 Introduction to Fish and Wildlife
- CON 190 Conservation Field Camp**
- 6 credit hours of Conservation Electives

Health/Physical Education Elective
- 4 credit hours of Health/Physical Education (PE) Electives

General Electives
- 6 credit hours of General Electives

Notes:
* Approved mathematics elective: MAT 121, MAT 122, MAT 145, MAT 152, MAT 220, MAT 271, MAT 272, MAT 273, MAT 274, MAT 276.
** CON 190 Conservation Field Camp is held in May, immediately after the Spring Semester, and runs for one week. This course is required and should be taken as early as possible.

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs web page for details.

Your electives should be carefully selected in consultation with your advisor, and they should be based on your areas of interest and recommendations from transfer institutions.
Sample Schedule

The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester  
(17 Credit Hours)

- ENG 101 Composition I ...........................................(3)
- OR
- ENG 104 Freshman English I Honors ..........................(3)
- BIO 121 General Biology I ........................................(4)
- CON 100 Introduction to Environmental Conservation ....(3)
- Mathematics Elective ............................................(3)
- Social Science Elective ..........................................(3)
- Health/Physical Education (PE) Elective .......................(1)

Second Semester  
(17-18 Credit Hours)

- ENG 102 Introduction to Literature .........................(3)
- OR
- ENG 105 Freshman English II Honors .......................(3)
- BIO 122 General Biology II .....................................(4)
- CON 102 Introduction to Fish and Wildlife ................(3)
- Social Science Elective ..........................................(3)
- Mathematics Elective* ..........................................(3-4)
- OR
- Science Elective ...................................................(3-4)
- Health/Physical Education (PE) Elective .......................(1)

Summer Session  
(3 Credit Hours)

- CON 190 Conservation Field Camp** .........................(3)

Third Semester  
(17-19 Credit Hours)

- BIO 221/CON 202 Principles of Ecology .................(3)
- Conservation Elective ..........................................(3-4)
- Mathematics Elective ..........................................(3-4)
- OR
- Science Elective ...................................................(3-4)
- CHM 121 Chemistry I ...........................................(4)
- General Elective ..................................................(3)
- Health/Physical Education (PE) Elective .......................(1)

Fourth Semester  
(16-18 Credit Hours)

- Conservation Elective ..........................................(3-4)
- Mathematics Elective ..........................................(3-4)
- OR
- Science Elective ...................................................(3-4)
- Social Science Elective .........................................(3)
- Humanities Elective .............................................(3)
- General Elective ..................................................(3)
- Health/Physical Education (PE) Elective .......................(1)

Notes:

* Approved mathematics elective: MAT 121, MAT 122, MAT 145, MAT 152, MAT 220, MAT 271, MAT 272, MAT 273, MAT 274, MAT 276.
** CON 190 Conservation Field Camp is held in May, immediately after the Spring Semester, and runs for one week. This course is required and should be taken as early as possible.
Fine Arts
Associate in Science Degree (A.S.)
HEGIS 5610

The Degree
Associate in Science (A.S.)

The Outlook
Career prospects for those who enter the field of fine arts include art education, gallery and museum exhibition work, art dealership, and the creation and sale of original artwork. The U.S. Department of Labor anticipates modest growth in the field through the year 2020 due to population growth, rising incomes, and an increase in the number of people who appreciate fine art. Through the A.S. Fine Arts degree program at Finger Lakes Community College, you can build a foundation to begin working as a creative artist and prepare for transfer to a four-year college or university.

The Program
The Associate in Science (A.S.) degree in Fine Arts at FLCC is designed to help you develop your artistic knowledge and proficiency and prepare you to transfer to a four-year institution as a junior-level art major.

The course work includes art history, design, printmaking, drawing, painting, sculpture, and ceramics. Students develop strong portfolios demonstrating their abilities in a variety of media. Facilities at Finger Lakes include drawing and painting studios, a sculpture foundry, a darkroom, and computer labs.

Faculty: One of the highlights of the program is our distinguished art faculty, which includes internationally known artists whose works have been exhibited in New York, San Francisco, and throughout the northeast and midwest. Our outstanding instructors bring real-life experience as artists and play an important role in your success.

Honors Courses: In addition, the College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 64 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
• ENG 101 Composition I  
  AND ENG 102 Introduction to Literature  
  OR  
  ENG 104 Freshman English I Honors  
  AND ENG 105 Freshman English II Honors

Art
• ART 100 Art History I  
• ART 101 Art History II  
• ART 102 Foundation Drawing I

• ART 103 Foundation Drawing II  
• ART 104 Design I  
• ART 105 Design II  
• 18 credit hours of approved Art Electives*

Social Science
• 3 credit hours of Social Science Electives  
• 3 credit hours History (HIS) Electives

Mathematics and/or Science
• 8 credit hours of Mathematics Electives and/or Science Electives

Health/Physical Education
• 4 credit hours of Health/Physical Education (PE) Electives

General Electives
• The remainder of required hours must be made up of approved electives.

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs web page for details.

Your electives should be carefully selected in consultation with your advisor, and they should be based on your areas of interest and recommendations from transfer institutions.

Notes:
* Approved Art Electives include:  
  • ART 106 Ceramics I  
  • ART 200 Figure Drawing I  
  • ART 201 Figure Drawing II  
  • ART 202 Painting I  
  • ART 204 Painting II  
  • ART 205 Modeling and Sculpture I  
  • ART 206 Modeling and Sculpture II  
  • ART 207 Photography I  
  • ART 208 Photography II  
  • ART 209 Printmaking I  
  • ART 210 Printmaking II  
  • ART 212 Ceramics II  
  • ART 221 Advanced Drawing

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester (16-17 Credit Hours)
• ENG 101 Composition I .................................................. (3)
  OR  
  • ENG 104 Freshman English I Honors .................................. (3)
  • ART 100 Art History I .................................................... (3)
  • ART 102 Foundation Drawing I ......................................... (3)
  • ART 104 Design I ......................................................... (3)
  • Mathematics Elective .................................................... (3-4)
  OR  
  • Science Elective ........................................................... (3-4)
  • Health/Physical Education Elective ................................... (1)
Second Semester (16-17 Credit Hours)
- ENG 102 Introduction to Literature .......................... (3)
- OR
- ENG 105 Freshman English II Honors .......................... (3)
- ART 101 Art History II ........................................ (3)
- ART 103 Foundation Drawing II .................................. (3)
- ART 105 Design II .............................................. (3)

- Art Elective .......................................................... (3)
- Social Science Elective ............................................ (3)
- General Elective ..................................................... (3)
- Health/Physical Education Elective ............................. (1)

Notes:
Most upper level studio courses require ART 102 Foundation Drawing I and ART 104 Design as prerequisites.
Human Services
Associate in Science Degree (A.S)
HEGIS 5501

The Degree
Associate in Science (A.S.)

The Outlook
The U.S. Labor Department expects employment for human service workers to grow faster than the average due to the expansion of facilities and programs for the elderly and disabled and services for families in crisis. The Human Services degree program at Finger Lakes Community College is designed to prepare you for these expanding employment opportunities.

The Program
The Associate in Science (A.S.) degree in Human Services is designed for students interested in careers in human services, working with children, youth, persons with disabilities, the elderly, and those in need, and for those who want to develop skills for employment in community agencies providing health, education, and welfare services.

Technology: The program requires you to use Internet search techniques, with several classes held in FLCC’s new technology-enhanced classrooms. The classroom structure in this degree program is conducive to small group and cooperative learning.

Honors Courses: In addition, the College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students enrolled in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 64 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- ENG 102 Introduction to Literature
- ENG 104 Freshman English I Honors
- ENG 105 Freshman English II Honors
- COM 110 Public Speaking
- COM 115 Interpersonal Communication
- 3 credit hours of History (HIS) Electives
- 3 credit hours of Social Science Electives

Mathematics/Science
- 9 credit hours of Mathematics Electives/Science Electives, determined through advisement. (Must include at least one Mathematics and one Science course.)

Human Services
- HUS 102 Human Services in Contemporary America
- HUS 103 Case Management
- HUS 204 Field Experience I
- HUS 205 Field Experience II

Information Management
- 3 credit hours of Computer Science Electives based on your individual background and determined through advisement

Health/Physical Education
- PE 214 Advanced First Aid, CPR and AED
- PE 212 Health
- 1 credit hour of Health/Physical Education (PE) Electives

Electives
- 7 credit hours of General Electives

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs web page for details.

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester (16 Credit Hours)
- ENG 101 Composition I ...............................(3)
- OR
- ENG 104 Freshman English I Honors ..............(3)
- HUS 102 Human Services in Contemporary America .......(3)
- PSY 100 Introduction to Psychology ..................(3)
- MAT 121 Statistics I ....................................(3)
- Computing Sciences Elective* ..........................(3)
- Health/Physical Education (PE) Elective ..........(1)

Second Semester (15 Credit Hours)

Information Systems
Associate in Science Degree (A.S.)
HEGIS 5103

The Degree
Associate in Science (A.S.)

The Outlook
For growth and performance, computer information systems are critical to the business operations of most companies and organizations. Businesses today are seeking individuals who can provide effective technical solutions to meet the specific needs of their business. This goal requires that employees possess both information technology skills and an understanding of business processes. Through the Associate in Science Information Systems degree program offered by Finger Lakes Community College, students can gain the fundamental preparation needed to meet the need for qualified information systems professionals.

The Program
The Associate in Science Information Systems degree program is designed to prepare students for transfer to four-year institutions into business division studies, primarily into the management information systems (MIS) area. Students can transfer to four-year colleges and universities such as SUNY Fredonia, SUNY Morrisville, Rochester Institute of Technology, and others.* Students possess both information technology skills and an understanding of business processes. Through the Associate in Science Information Systems degree program offered by Finger Lakes Community College, students can gain the fundamental preparation needed to meet the need for qualified information systems professionals.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 66 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- ENG 102 Introduction to Literature
- ENG 104 Freshman English I Honors
- ENG 105 Freshman English II Honors
- COM 110 Public Speaking
- COM 115 Interpersonal Communication

Social Science
- ECO 210 Principles of Macroeconomics
- ECO 211 Principles of Microeconomics
- 3 credit hours of History (HIS) Electives

Business
- ACC 101 Principles of Financial Accounting
- BUS 123 Business Communications
- BUS 222 Marketing

Mathematics/Science
- MAT 121 Statistics I
  AND MAT 122 Statistics II
  OR
- MAT 271 Calculus I
  AND MAT 272 Calculus II
- 6-8 credit hours of Math Electives
- 8 credit hours of Lab Science Electives

Computer Science
- CSC 103 Computing Sciences Portal
- CSC 115 Introduction to Programming and Computing
- CSC 190 Data Structures I
  AND CSC 200 Data Structures II
  OR
- CSC 215 Visual Basic
  AND CSC 271 A+ Hardware and Operating Systems Technologies
- CSC 243 System Analysis and Design I
- CSC 251 Applied Database Concepts

Health/Physical Education Elective
- 4 credit hours of Health/Physical Education (PE) Electives

Advisor Electives
- 3 credit hours of 200-Level Computer Science (CSC) Electives
  OR
- 3 credit hours of History (HIS) Electives

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs web page for details.

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester
- ENG 101 Composition I ............................................. (3)
  OR
- ENG 104 Freshman English I Honors .................... (3)
- CSC 103 Computing Sciences Portal ....................... (2)
- CSC 115 Introduction to Programming and Computing .. (3)

Music
Associate in Science Degree (A.S)
HEGIS 5610

The Degree
Associate in Science (A.S.)

The Outlook
According to the U.S. Labor Department, employment opportunities for music educators in elementary and secondary schools should increase as a large number of teachers reach retirement age in the near future. Competition for performance musicians will continue to be keen, as clubs and restaurants seek highly talented musicians. The Music degree program at Finger Lakes Community College offers you theoretical skills and performance opportunities to prepare you to continue your education.

The Program
The Associate in Science (A.S.) degree in Music at FLCC is designed to enable you to transfer into four-year baccalaureate degree programs in music. The program is also an appropriate course of study if you are preparing for one of the many careers in music that do not require a four-year degree. This challenging curriculum includes courses in music history, theory, and master composers, in addition to applied music and music ensemble.

Facilities: Our program is supported by a facility that includes music recording studios, music rehearsal hall, applied music studios, practice rooms, and a midi keyboard laboratory.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 64 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- AND ENG 102 Introduction to Literature
- OR
- ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors

Social Science
- 3 credit hours of History (HIS) Electives
- 6 credit hours of Social Science Electives

Mathematics/Science
- 5 credit hours of Mathematics Electives/Science Electives (Must include one Mathematics course.)
- PHY 105 Physics of Sound

Music
- MUS 106 Music Theory I
- MUS 106L Music Theory I Lab
- MUS 107 Music Theory II
- MUS 107L Music Theory II Lab
- MUS 111 Master Composers I
- MUS 117 Master Composers II
- MUS 206 Music Theory III
- MUS 206L Music Theory III Lab
- MUS 207 Music Theory IV
- MUS 207L Music Theory IV Lab
- MUS 215 Music History I: Medieval to Baroque
- MUS 216 Music History II: Classic to Modern

Applied Music
- 4 credit hours of Applied Music Electives* (Four semesters in one specific instrument or voice are required)

Performance/Music Ensemble
- 4 credit hours of Music Ensemble Electives** (Four semesters are required)

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

Notes:
* Applied Music Electives: MUS 131 Piano, MUS 132 Voice, MUS 133 Trumpet, MUS 134 Flute, MUS 135 Classical Guitar, MUS 137 Saxophone, MUS 160 Percussion, MUS 161 French Horn, MUS 163 Jazz Bass, MUS 164 Trombone, MUS 165 Clarinet, MUS 167 Jazz Piano, MUS 169 Jazz Voice, and MUS 168 Jazz Guitar. (Four semesters in one specific instrument or voice required)

** Music Ensemble Electives: MUS 109 Vocal Jazz Ensemble, MUS 118 Guitar Ensemble, MUS 119 Percussion Ensemble, MUS 120 Finger Lakes Chorale, MUS 125 Finger Lakes Camerata, MUS 126 College Singers, MUS 127 Jazz Ensemble, MUS 129 Performance Class I, MUS 145 Chamber Wind Ensemble, and MUS 229 Performance Class II. (Four semesters required)

Sample Schedule

Music Recording Technology
Associate in Science Degree (A.S.)
HEGIS 5399

The Degree
Associate in Science (A.S.)

The Program
The Associate in Science in Music Recording Technology degree program is designed to provide you the opportunity to learn your craft, both as a musician and a recording technician. You will receive the extensive hands-on training that is needed to achieve a thorough understanding of modern recording. The coursework is appropriate if you are interested in preparing to transfer to a baccalaureate degree program or beginning a career in music recording immediately after graduation. Our faculty bring real-life experience as musicians and recording technicians and play an important part in your success.

Facilities: The program is housed in four John Storyk designed state-of-the-art facilities, all with ProTools, three HD systems, two c24’s and a Toft ATB 32. An extensive array of outboard gear includes preamps and compressors by Avalon, Neve, Universal Audio, and Groove Tubes as well as a sizable high-end microphone collection with mics by Neumann, Telefunken, BLUE, Royer, AKG, Sennheiser, Beyer and Shure.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Equipment Needs:
Required
• Portable Hard Drive: 80Gig or more Firewire Drive, 7200rpm, 8MB cache (Must be formatted for Mac only)
• Headphones: Audio Technica ATHM50, Sony MDR 7506, or AKG K240MKII

Recommended
• Computer: Mac Pro or MacBook Pro
• Pro Tools Interface and Software: Any hardware with the latest version of ProTools Software.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 68 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
• ENG 101 Composition I
AND ENG 102 Introduction to Literature
OR
• ENG 104 Freshman English I Honors
AND ENG 105 Freshman English II Honors
• MUS 106 Music Theory I
• MUS 106L Music Theory I Lab
• MUS 107 Music Theory II
• MUS 107L Music Theory II Lab
• MUS 206 Music Theory III
• MUS 206L Music Theory III Lab
• MUS 207 Music Theory IV
• MUS 207L Music Theory IV Lab

Social Science
• 3 credit hours of History (HIS) Electives
• 3 credit hours of Social Science Electives

Mathematics/Science
• 5 credit hours of Mathematics Electives/Science Electives* (must include one Mathematics course.)
• PHY 105 Physics of Sound

Applied Music
• 4 credit hours of Applied Music Electives** (Four semesters in one specific instrument or voice are required)

Performance/Music Ensemble
• 4 credit hours of Music Ensemble Electives*** (Four semesters are required)

Music Recording
• MUS 170 Techniques of Audio Recording I
• MUS 176 Music Business
• MUS 270 Techniques of Audio Recording II
• MUS 271 Techniques of Audio Recording III
• MUS 272 Techniques of Audio Recording IV

Information Management
• CSC 100 Computing in the Information Age or higher as determined by advisement

General Electives
• 1 credit hours of General Electives****

Health/Physical Education
• 4 credit hours of Health/Physical Education (PE) Electives

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs web page for details.

Notes:
* PHY 151 General Physics I, PHY 152 General Physics II and MAT 271 Calculus I are recommended.
** Applied Music Electives: MUS 131 Piano, MUS 132 Voice, MUS 133 Trumpet, MUS 134 Flute, MUS 135 Classical Guitar, MUS 137 Saxophone, MUS 160 Percussion, MUS 161 French Horn, MUS 163 Jazz Bass, MUS 164 Trombone, MUS 165 Clarinet, MUS 167 Jazz Piano, and MUS 168 Jazz Guitar. (Four semesters in one specific instrument or voice required)

*** Music Ensemble Electives: MUS 109 Vocal Jazz Ensemble, MUS 118 Guitar Ensemble, MUS 119 Percussion Ensemble, MUS 120 Finger Lakes Chorale, MUS 125 Finger Lakes Camerata, MUS 126 College Singers, MUS 127 Jazz Ensemble, MUS 129 Performance Class I, MUS 145 Chamber Wind Ensemble and MUS 229 Performance Class II. (Four semesters required)

**** Students may qualify for MUS 275 Audio Recording Special Project or MUS 250 Audio Recording Practicum/Internship. Consult your advisor for the appropriate course.

** Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution or MUS 275 Audio Recording Special Project or MUS 250 Audio Recording Practicum/Internship. Consult your advisor for the appropriate course.

First Semester (19 Credit Hours)
- ENG 101 Composition I ..................................(3)
- OR
- ENG 104 Freshman English I Honors ..................(3)
- CSC 100 Computing in the Information Age ............(3)
- MUS 106 Music Theory I ..................................(3)

- Health/Physical Education (PE) Elective ...............(2)

Notes:
* Applied Music Electives: MUS 131 Piano, MUS 132 Voice, MUS 133 Trumpet, MUS 134 Flute, MUS 135 Classical Guitar, MUS 137 Saxophone, MUS 160 Percussion, MUS 161 French Horn, MUS 163 Jazz Bass, MUS 164 Trombone, MUS 165 Clarinet, MUS 167 Jazz Piano, MUS 168 Jazz Guitar, and MUS 169 Jazz Voice. (Four semesters in one specific instrument or voice required.) Students wishing to enter a 2+2 program should consult with their advisor regarding the specific requirements of the transfer school.

** Music Ensemble Electives: MUS 109 Vocal Jazz Ensemble, MUS 118 Guitar Ensemble, MUS 119 Percussion Ensemble, MUS 120 Finger Lakes Chorale, MUS 125 Finger Lakes Camerata, MUS 126 College Singers, MUS 127 Jazz Ensemble, MUS 129 Performance Class I, MUS 145 Chamber Wind Ensemble, and MUS 229 Performance Class II. (Four semesters required)

*** Students may qualify for MUS 275 Audio Recording Special Project or MUS 250 Audio Recording Practicum/Internship. Consult your advisor for the appropriate course.
New Media
Associate in Science Degree (A.S)
HEGIS 5012

The Degree
Associate in Science (A.S.)

The Outlook
Digital technology continues to grow and evolve, transforming communication and changing the way we do business. This growth and evolution is opening up new career options for students in this emerging field. Finger Lakes Community College’s A.S. in New Media combines the elements of computer science, fine arts, music, and communications to provide a comprehensive program which will give our students exposure and expertise with the technologies and tools that are defining the industry.

The Program
The Associate in Science (A.S) degree in New Media is designed to provide students with practical experience with new communication technologies and to build student understanding of the creative process, while promoting and encouraging personal creative expression.

Through integrated coursework in video production and editing, multimedia, audio production, and graphic design, students will learn how to design and create graphics, audio, video, and other content for websites, DVDs, and other emerging technologies. Courses include Video Production I, Digital Video Editing, Script Writing, Introduction to Visual Basic, Multimedia Development, Web Site Development and Programming, Introduction to Digital Media, Digital Design, Audio for Film and Video, and New Media Production.

Students will gain practical experience in two Macintosh media labs, extensive PC computer labs, and a 900-square foot on-campus television studio. Students will utilize industry-standard tools, such as Avid nonlinear editing software, Pro Tools, Adobe Creative Suite, digital still cameras, digital camcorders, and digital studio cameras.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to successfully complete a minimum of 65 credit hours of study with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
  AND ENG 102 Introduction to Literature
- ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors

- COM 110 Public Speaking
- COM 115 Interpersonal Communication

Social Science
- 9 credit hours of Social Science Electives

Math/Science
- 9 credit hours of Math Electives/Science Electives (Must include 3 credit hours of Math Electives and 3 credit hours of Science Electives.)

Communications
- COM 123 Video Production I
- COM 215 Script Writing
- ENG 223 Journalism
- COM 220 Digital Video Editing

New Media
- DIG 100 Introduction to Digital Media
- DIG 120 Digital Media Design
- DIG 200 Audio for Film and Video
- DIG 230 New Media Production

Computing Sciences
- CSC 116 Introduction to Visual Basic
- CSC 252 Multimedia Development
- CSC 262 Web Site Development and Programming

Liberal Arts
- 3 credit hours of Liberal Arts Electives

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Physical Education Studies
Associate in Science Degree (A.S.)
HEGIS 5299.30

The Degree
Associate in Science (A.S.)

The Outlook
Employment in the health and physical education field is expected to grow as interest in fitness and health for individuals and special groups increases. A large number of openings in the field of elementary and secondary school teaching are expected due to a large group of teachers reaching retirement age, according to the U.S. Department of Labor. The Physical Education Studies degree program at Finger Lakes Community College is designed to prepare you for baccalaureate studies in Physical Education by building a solid liberal arts foundation.

The Program
The Associate in Science (A.S.) degree in Physical Education Studies is suitable for students whose goals include coaching, teaching, sports management, and overall fitness and wellness careers. The program introduces you to the field of Physical Education and provides background knowledge and skills that are important to Physical Education professionals, with courses ranging from health, human anatomy and physiology, nutrition, and psychology to required liberal arts courses.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 64 credit hours with a grade point average of not less than C (2.0)

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367. For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
  AND ENG 102 Introduction to Literature
  OR
- ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking

Social Science
- PSY 100 Introduction to Psychology
- 3 credit hours of History (HIS) Electives
- 3 credit hours of Social Science Electives

Science
- BIO 110 Fundamentals of Human Anatomy and Physiology
- BIO 171 Human Anatomy and Physiology I
- BIO 172 Human Anatomy and Physiology II
- NS 115 Introduction to Nutrition

Mathematics
- MAT 121 Statistics I
- MAT 122 Statistics II

Health/Physical Education
- PE 102 Basic Rhythms
- PE 190 Care and Prevention of Athletic Injuries
- PE 212 Health
- PE 214 Advanced First Aid, CPR and AED
- PE 260 Kinetics of Exercise and Sport
- PE 275 Instructional Practices of Physical Education
- Physical Education (PE) Swimming*
- 1 credit hour of Physical Education (PE) Activity Class**
- Choose two of the following:
  - PE 204 Instructional Methods for Soccer
  - PE 205 Instructional Methods for Tennis
  - PE 206 Instructional Methods of Physical Fitness

Information Management
- 3 credit hours of Computing Science (CSC) Electives**

Chemical Dependency Counseling
- CDC 102 Concepts of Chemical Dependency I

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs web page for details.

Notes:
* The specific course will be determined by the instructor and student based on the student’s background in swimming.
** The specific course will be determined by the advisor based on the student’s background in computers.

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester (16 Credit Hours)
- ENG 101 Composition I ........................................... (3)
  OR
- ENG 104 Freshman English I Honors .......................... (3)
- BIO 110 Fundamentals of Human Anatomy and Physiology .. (3)
- Computing Science Elective* .......................................... (3)
- Social Science Elective ................................................... (3)
- PE 275 Instructional Practices of Physical Education ........... (3)
- PE Swimming** ......................................................... (1)

Second Semester (16 Credit Hours)
- ENG 102 Introduction to Literature .............................. (3)
  OR
- ENG 105 Freshman English II Honors ......................... (3)
- BIO 171 Human Anatomy and Physiology I .................. (4)
- PE 102 Basic Rhythms ............................................... (2)
- PE 190 Care and Prevention of Athletic Injuries .............. (3)
- PE Instructional Methods *** ......................................... (1)
- PSY 100 Introduction to Psychology ............................ (3)
Third Semester  (16 Credit Hours)
- BIO 172 Human Anatomy and Physiology II ...................(4)
- COM 110 Public Speaking .......................................(3)
- MAT 121 Statistics I ...........................................(3)
- NS 115 Introduction to Nutrition ...............................(3)
- PE 214 Advanced First Aid, CPR and AED .................(3)

Fourth Semester  (16 Credit Hours)
- CDC 102 Concepts of Chemical Dependency I ..............(3)
- MAT 122 Statistics II ...........................................(3)
- History (HIS) Elective ...........................................(3)
- PE Instructional Methods*** .................................(1)
- PE Health ..........................................................(3)
- PE 260 Kinetics of Exercise and Sport .......................(3)

Notes:
* The specific course will be determined by the advisor based on the student’s background in computers.
** The specific course will be determined by the instructor and student based on the student’s background in swimming.
*** Choose one of the following:
- PE 204 Instructional Methods for Soccer
- PE 205 Instructional Methods for Tennis
- PE 206 Instructional Methods of Physical Fitness
Sports and Tourism Studies
Associate in Science Degree (A.S.)
HEGIS 5011.0

The Degree
Associate in Science (A.S.)

The Outlook
From youth sporting leagues to international events such as the Olympic Games, sporting events draw millions of visitors and billions of dollars each year locally, regionally, and globally. In fact, Street and Smith's Sportsbusiness Journal reports that in the United States alone sports is a $422 billion industry.

Sports and Tourism Studies, an Associate in Science (A.S.) degree program, initiates the preparation students need to tap into this expanding, profitable industry. Graduates will be prepared to transfer to four-year institutions in pursuit of baccalaureate degrees in sports management, sports marketing or tourism-related areas. Finger Lakes Community College is one of the only community colleges in the state to offer this unique program.

The Program
The A.S. Sports and Tourism Studies program provides the preparation needed for transfer to bachelor's degree programs. Students select an advisement area on which to focus their studies, choosing from:
- sport studies
- tourism studies

FLCC students will learn through classroom instruction, integrated case studies, and visits to venues and destinations. Conferences and special opportunities to learn from high profile sports professionals play a key role in our commitment to providing a field-based education.

Field Trips: In recent years, students have traveled to attend Management in Sports and Events Conferences held in Chicago and Salt Lake City, attending sessions presented by notable sports professionals such as Bob Costas of NBC, famed sports agent Scott Boras, and Vice President of Marketing for Anheuser-Busch Tony Ponturo. Additionally, students have attended the Travel Industry of America Marketing Outlook Forum (TIA) and the New York State Governor's Conference.

For many students, these experiences bring the program to life, connecting the case studies and theories learned in the classroom to real-life examples. This experience can often help a student confirm his or her choice of advisement area and develop a broader view of these exciting and diverse career fields.

Online Courses: As part of the SUNY Learning Network (SLN), students pursuing the A.S. in Sports and Tourism Studies degree may take all of the curriculum requirements online. Students may take a course at a convenient time and place without the need to travel to campus, thus eliminating any time and location restrictions a student may have.

Honors Courses: Students in this program may enroll in our Honors courses, open to all qualified students, which provide enhanced educational experiences for students with outstanding ability. Successful completion of Honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Four-year institutions that offer bachelor's degrees in sports and tourism studies and related areas include SUNY Brockport, SUNY Cortland, Niagara University, St. John Fisher College, Ithaca College, Clemson University, Medaille College, University of Massachusetts, St. John's University, and others.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 65 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- AND ENG 102 Introduction to Literature
- OR
- ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors
- AND ENG 102 Freshman English II Honors
- COM 110 Public Speaking
- OR
- COM 115 Interpersonal Communication

Social Science
- ECO 210 Principles of Macroeconomics
- ECO 211 Principles of Microeconomics
- 6 credit hours of Social Science Electives

Mathematics/Science
- MAT 121 Statistics I
- MAT 122 Statistics II
- 8 credit hours of Science Electives

Business
- ACC 101 Principles of Financial Accounting
- ACC 102 Principles of Managerial Accounting

Information Management
- CSC 100 Computing in the Information Age
- OR
- Higher Level CSC course

Tourism Management
- Sports Focus
- BUS 100 Introduction to Tourism
- BUS 126 Introduction to Sports Studies
- BUS 232 Event Management
- BUS 231 Sports Marketing
- Tourism Focus
- BUS 100 Introduction to Tourism
- BUS 205 Services Marketing
- BUS 215 Tourism Planning and Development
- OR
- BUS 225 Destination Marketing
- BUS 232 Event Management

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

General Electives
- 3 credit hours of General Electives

If you plan to transfer to a four-year institution, you should follow the general education course requirements for transfer to SUNY and non-SUNY schools. Visit the course requirements for transfer programs web page for details.
Sample Schedule

Notes:
* Dependent on Advisement Area
The Degree
Associate in Applied Science (A.A.S.)

The Outlook
The Occupational Outlook Handbook reports that employment opportunities for accountants and auditors are expected to grow through the year 2020. Stricter laws and regulations, particularly in the financial sector, will likely increase the demand for accounting services as organizations seek to comply with new standards. While many accountants and auditors are licensed as Certified Public Accountants, the majority are unlicensed management and government accountants and auditors.

Training in accounting is also invaluable for those interested in becoming appraisers, budget officers, loan officers, financial analysts, bank officers, actuaries, underwriters, tax collectors and revenue agents, FBI special agents, securities sales workers, and purchasing agents. The Accounting degree at Finger Lakes provides preparation in the latest accounting theories and principles.

The Program
The Associate in Applied Science (A.A.S.) in Accounting degree program at Finger Lakes Community College prepares students to meet the changing needs of today's business world. By keeping class size small, the program provides students with individualized attention. The program also prepares students to further their educational experiences and has an expanding number of transfer (articulation) agreements with four-year colleges and universities for those who wish to transfer into baccalaureate accounting programs.

Honors Courses: In addition, the College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students enrolled in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 68 credit hours with a grade point average of not less than C (2.0). In addition, you must have a C+ average or better in Principles of Accounting I and II before you may go on to Principles of Accounting III.

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
AND ENG 102 Introduction to Literature
OR
- ENG 104 Freshman English I Honors
AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking

Social Science
- ECO 210 Principles of Macroeconomics
- ECO 211 Principles of Microeconomics

Mathematics and/or Science
- 3 credit hours of Mathematics Electives
- 3 credit hours of Mathematics Electives and/or Science Electives

Business
- ACC 101 Principles of Financial Accounting
- ACC 102 Principles of Managerial Accounting
- ACC 201 Intermediate Accounting I
- ACC 202 Intermediate Accounting II
- ACC 205 Cost Accounting OR
- ACC 207 Income Tax Accounting
- ACC 210 Contemporary Accounting Applications
- BUS 120 Business Organization* OR
- BUS 123 Business Communications
- BUS 222 Marketing
- BUS 227 Business Law I OR
- BUS 228 Business Law II

Computer Science
- CSC 100 Computing in the Information Age OR
- CSC Elective

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

Electives
- The remaining credit hours must be made up of approved electives.

Notes: * OR BUS 124 Organizational Behavior upon recommendation of academic advisor.

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. - General Elective .................................................................(3)
- Health/Physical Education (PE) Elective ....................................(1)

**Notes:**
* OR BUS 124 Organizational Behavior upon recommendation of academic advisor.
** Recommended Mathematics Electives: MAT 121 Statistics I and MAT 122 Statistics II

**Accounting Degree with Internship**
The Business Department's Internship Program will enable you to supplement your academic status and increase career awareness through a semester of full-time work experience. This work experience will be available during the 15-week Spring Semester and for a 12-week session in the Summer. If you are interested in participating in this program, consult with your advisor.
Architectural Technology and Building Sciences
Associate in Applied Science Degree (A.A.S.)
HEGIS 5304

The Degree
Associate in Applied Science (A.A.S)

The Outlook
The U.S. Department of Labor forecasts growth for the field of architectural technology and building sciences through the year 2018. Those who have completed at least two years of post-secondary training and have developed strong technical skills and experience using CAD systems will be well qualified for the many opportunities that are anticipated. The A.A.S. Architectural Technology and Building Sciences degree at Finger Lakes is designed to provide you with the skills and experience to compete in today's job market.

The Program
The Architectural Technology and Building Sciences degree provides knowledge and technical experience that allows students to advance beyond entry-level drafting to more complex designs. Instruction emphasizes technical competence and utilizes computer-aided drafting (CAD). The faculty work closely with architectural firms in the area to assure the program meets the needs of the architectural community. The majority of the core courses needed for this degree are offered at FLCC's Victor Campus Center.

Technology: The CAD Lab offers twenty four networked PCs with current versions of AutoCAD, Inventor, AutoCAD Architecture, and Microsoft Office. Networked output devices include a 3D printer, color laser printer, and large format color plotter.

Honors Courses: In addition, the College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students enrolled in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Our Science Studies Certificate is an option if you are a recent high school graduate or a returning student preparing for a career in science and technology and entering a two-year degree program.

Curriculum Requirements
Students are required to complete a minimum of 72 semester hours with a grade point average of not less than C (2.0).

All associate degree programs require English 101 Composition I and English 102 Introduction to Literature. Students must pass skills assessment for entrance into these courses. Students who are well prepared may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG101 and ENG102. Students who are considering the English Honors sequence should consult the Director of Honors by calling 585.785.1367.

All technology students take a common core of courses during the first semester along with an introductory course in their chosen degree program. After the first semester, it is possible for the student to transfer from one degree program to another without loss of credit.

Students must successfully complete the following core courses:

Humanities
- ENG101 Composition I
- ENG 102 Introduction to Literature
- ENG104 Freshman English I Honors
- AND ENG105 Freshman English II Honors

Social
- 6 credit hours

Mathematics
- 6 credit hours from the following electives:
  - MAT 145 College Algebra
  - MAT 152 Pre-Calculus
  - MAT 271 Calculus I
  - MAT 272 Calculus II

Physics
- PHY 118 College Physics I
- AND PHY 119 College Physics II
- OR
- PHY 151 General Physics I
- AND PHY 152 General Physics II

Architectural Design & Drafting
- TECH 130 Construction Materials
- TECH 242 Construction Management
- TECH 244 Residential Design & Drafting
- TECH 246 Commercial Design & Drafting
- TECH 248 Structural Design
- TECH 249 Building Mechanical Systems
- TECH 260 Construction Estimation

Technology
- TECH 105 Engineering Drawing I
- TECH 106 Engineering Drawing II (2D AutoCAD)
- TECH 115 Technology Freshman Seminar
- TECH 216 Statics and Strength of Materials

Approved Technology Electives
- 6 credit hours from the following:
  - TECH 101 Materials and Processes I
  - TECH 102 Materials and Processes II
  - TECH 122 Electronic Theory
  - TECH 123 Digital Electronics
  - TECH 205 Engineering Drawing III
  - TECH 206 Engineering Drawing IV
  - TECH 219 3D AutoCAD
  - TECH 220 Machine Design I
  - TECH 221 Machine Design II
  - TECH 250 Technology Co-op
  - ANT 111 Cultural Anthropology
  - ANT 200 Comparative Cultures
  - ART 100 Art History I
  - ART 101 Art History II
  - ART 102 Foundation Drawing I
  - ART 103 Foundation Drawing II
  - ART 104 Design I
  - ART 105 Design II
  - ART 205 Modeling and Sculpture I
  - ART 206 Modeling and Sculpture II
  - ART 207 Photography I
  - ART 208 Photography II
  - COM 110 Public Speaking
  - CON 101 Principles of Soils, Waters, Forests
General Electives
- 3 credit hours of general electives

Health/Physical Education Elective
- 4 credit hours of health/physical education elective

Sample Schedule
The schedule below shows how the requirements for the A.A.S. Architectural Technology and Building Sciences degree may be completed in four semesters. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. Many students attending Finger Lakes Community College who have work and/or family obligations choose a different sequence of courses and take more than four semesters to fulfill the requirements for the A.A.S. Architectural Technology and Building Sciences degree. An evening sequence designed for qualified part-time students is available. Students should consult their advisor when they plan their schedule. All technology students at Finger Lakes take the same core courses in their first semester. This enhances your understanding of all technologies, and gives you the opportunity to explore different areas of technology without loss of credit.

First Semester (17 Credit Hours)
- ENG 101 Composition I ..............................................(3)
- OR
- ENG 104 Freshman English I Honors .................................(3)
- TECH 115 Technology Freshman Seminar ...........................(2)
- TECH 105 Engineering Drawing I .................................(3)
- TECH 130 Construction Materials .................................(3)
- Math Elective ..............................................................(3)
- Social Science Elective ...................................................(3)

Second Semester (18 Credit Hours)
- ENG 102 Introduction to Literature .......................................(3)
- OR
- ENG 105 Freshman English II Honors .................................(3)
- PHY 118 College Physics I ..............................................(4)
- TECH 106 Engineering Drawing II (2D AutoCAD) ...................(3)
- Math Elective ..............................................................(3)
- Social Science Elective ...................................................(3)
- Health/Physical Education Elective ....................................(2)

Third Semester (18 Credit Hours)
- PHY 119 College Physics II ..............................................(4)
- TECH 216 Statics and Strength of Materials ...........................(3)
- TECH 242 Construction Management ...................................(3)
- TECH 244 Residential Design & Drafting ............................(3)
- Technology Elective .......................................................(3)
- Health/Physical Education Elective ....................................(2)

Fourth Semester (19 Credit Hours)
- TECH 246 Commercial Design & Drafting .............................(3)
- TECH 248 Structural Design ............................................(4)
- TECH 249 Building Mechanical Systems ............................(3)
- TECH 260 Construction Estimation ....................................(3)
- Technology Elective .......................................................(3)
- General Elective .........................................................(3)
Business Administration
Associate in Applied Science
Degree (A.A.S)
HEGIS 5004

The Degree
Associate in Applied Science (A.A.S)

The Outlook
The diversity of occupations held by Business Administration graduates accounts for the popularity of this degree program. Among two-year colleges, both public and private, Business Administration is one of the most widely held degrees, second only to Liberal Arts and Sciences. Both Associate in Science (A.S.) and Associate in Applied Science (A.A.S.) degrees at Finger Lakes will prepare you for the ever-changing business world, allowing you to enter the job market in any number of positions: service sales representative, management analyst and consultant, management trainee, appraisers, recruiter, training specialist, benefits specialists, compensation specialists, business strategists, production planner, inventory control specialist, store manager, office manager, bank teller, warehouse manager, and more.

A.A.S. Degree: The A.A.S. degree is designed to prepare you for employment upon graduation in a variety of positions in the business community, with a broad-based business foundation in accounting and economics as well as intense study in the fields of marketing, management, or business administration. A.A.S. students are also accepted at St. John Fisher College, Rochester Institute of Technology, and Nazareth College of Rochester.*

Online Courses: As part of the SUNY Learning Network (SLN), students pursuing the A.S. or A.A.S. in Business Administration degree may take all of the curriculum requirements online. Students may take a course at a convenient time and place without the need to travel to campus, thus eliminating any time and location restrictions a student may have.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students enrolled in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 66 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

**Humanities**
- ENG 101 Composition I
- AND ENG 102 Introduction to Literature
- OR
- ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking
- OR
- COM 115 Interpersonal Communication

**Social Science**
- ECO 210 Principles of Macroeconomics Electives
- ECO 211 Principles of Microeconomics Electives

**Mathematics and/or Science**
- 3 credit hours Mathematics Electives* OR
- 3 credit hours Mathematics Electives and/or Science Electives*

**Business**
- ACC 101 Principles of Financial Accounting
- ACC 102 Principles of Managerial Accounting
- BUS 120 Business Organization**
- BUS 123 Business Communications
- BUS 222 Marketing
- BUS 227 Business Law I
- OR
- BUS 228 Business Law II
- 12 credit hours of Business Electives

**Computer Science**
- CSC 100 Computing in the Information Age
- OR
- 3 credit hours of CSC Electives

**Health/Physical Education**
- 4 credit hours of Health/Physical Education (PE) Electives

**Electives**
- The remainder of required electives must be made up of approved electives and include a minimum of 12 hours of Business Electives.

**Business Administration Internship**
- BUS 250 Business Internship Program: The Business Internship Program enables students to supplement their academic status and increase career awareness through a semester of work experience. This work experience is available during a 15-week session in the Fall Semester or Spring Semester or a 12-week session in the Summer. BUS 250 is counted as 3 credit hours of Business Electives and/or General Electives.

Notes: * Recommended Mathematics Electives: MAT 121 Statistics I and MAT 122 Statistics II.
- ** OR BUS 124 Organizational Behavior upon recommendation of academic advisor.

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year

Notes: * Recommended Mathematics Electives: MAT 121 Statistics I and MAT 122 Statistics II.

Notes:
* OR BUS 124 Organizational Behavior upon recommendation of advisor.
** Recommended Mathematics Electives: MAT 121 Statistics I and MAT
  122 Statistics II.
*** Business Electives include courses with the following prefixes: ACC,
  BUS, CSC, HTM, and OFT. Courses coded as PLG may be used with
  permission of the Department Chair.

Subject Areas for Transfer Opportunities: By appropriate course selection in
consultation with a faculty advisor, students pursuing the A.A.S. Business
Administration degree may prepare for transfer to upper-division study in the
subject areas listed: Business Administration, Management, and Marketing.
Administrative Assistant
Associate in Applied Science
Degree (A.A.S.)
HEGIS 5005

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
Empower yourself with the knowledge and skills to pursue a fulfilling and challenging career in today's high-tech office. According to the Occupational Outlook Handbook, administrative assistants and secretaries rank among the largest occupations in the U.S. economy. Projected employment opportunities vary by specialty with the fastest growth expected in the industries of construction, legal, and services fields including education; healthcare; social assistance; professional; science; and technology. Additionally, many positions will become available due to employment growth, vacancies created as people are promoted into positions with additional responsibilities, or career changes.

The Administrative Assistant degree program at Finger Lakes Community College can help you enter the job market with strong high-tech, management, communication, and the other skills required by business.

The Program
The Associate in Applied Science (A.A.S.) Administrative Assistant degree program provides an individualized approach by providing small class sizes and supportive faculty and staff.

Technology: Classrooms are equipped with state-of-the-art computers utilizing administrative software programs as well as ergonomically designed office furniture to simulate an actual work environment.

In addition to the associate degree, the College offers a Certificate in Office Technology, which can be earned in as little as nine months and is fully transferable to the degree program.

Honors Courses: In addition, the College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students enrolled in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 64 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
  - AND ENG 102 Introduction to Literature
  OR
- ENG 104 Freshman English I Honors
  - AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking

Social Science
- ECO 100 Survey of Economics
- PSY 124 Organizational Behavior

Mathematics and/or Science
- 3 credit hours of Mathematics Electives and/or Science Electives
- 3 credit hours of Mathematics Electives

Computer Science
- 3 credit hours of Computer Science Electives

Business and Office Technologies
- BUS 120 Business Organization
- BUS 200/OFT 200 Office Management
- OFT 141 College Keyboarding II
- OFT 150 Basic Accounting
- OFT 156 Office Communications
- OFT 210 Word Processing I
- OFT 211 Word Processing II
- OFT 213 Office Automation
- OFT 247 Office Procedures I
- OFT 248 Office Procedures II
- 3 credit hours of Business Electives

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

Electives
- The remainder of the required hours must be made up of approved electives.

Chemical Dependency Counseling
Associate in Applied Science
Degree (A.A.S.)
HEGIS 5506

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
An increased demand for professionals in the area of chemical dependency counseling and a greater emphasis on alcohol and drug abuse education has created positions in rehabilitation centers, hospitals, and government and social service agencies. The Occupational Outlook Handbook reports that employment opportunities in the field are expected to grow at a faster-than-average rate through the year 2020. Through the A.A.S. Chemical Dependency Counseling degree program at Finger Lakes Community College, you can prepare for entry-level positions in the field or for transfer to four-year colleges and universities.

The Program
By combining academic background with extensive field experience, the Associate in Applied Science (A.A.S.) degree program in Chemical Dependency Counseling at FLCC educates and trains you to work as a counselor with alcoholics and addicts. The program prepares you to take the Chemical Dependency Counseling examination and utilizes the technically advanced Educational Technology Classrooms and videos.

Honors Courses: In addition, the College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 65 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
• ENG 101 Composition I
  AND ENG 102 Introduction to Literature
  OR
• ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors
• COM 110 Public Speaking
  OR
• COM 115 Interpersonal Communication
• 3 credit hours of Humanities Electives

Social Science
• PSY 100 Introduction to Psychology
• PSY 150 Interviewing and Counseling
• PSY 200 Developmental Psychology
  OR
• PSY 205 Adolescent Psychology
  OR
• PSY 215 Biological Psychology
  OR
• PSY 220 Abnormal Psychology
• SOC 100 Introduction to Sociology
• SOC 110 Social Problems

Mathematics and/or Science
• BIO 115 Human Biology
• BIO 118 Contemporary Biology I
• 3 credit hours of Mathematics Electives

Human Services
• HUS 102 Human Services in Contemporary America

Chemical Dependency
• CDC 102 Concepts of Chemical Dependency I
• CDC 103 Concepts of Chemical Dependency II
• CDC 200 Addiction Counseling
• CDC 210 Field Experience I
• CDC 211 Field Experience II

Health/Physical Education
• PE 214 Advanced First Aid, CPR and AED
• 1 credit hour of Health/Physical Education (PE) Elective

Electives
• The remainder of required hours must be made up of approved electives.

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Criminal Justice
Associate in Applied Science
Degree (A.A.S.)
HEGIS 5505

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
Employment opportunities in the criminal justice field are expected to increase at a rate faster than average through the year 2020. The Occupational Outlook Handbook reports that a more security-conscious society coupled with concerns about terrorism and drug-related crimes will influence this demand. Through the Criminal Justice Degree at Finger Lakes Community College, you can gain the academic knowledge and field experience needed for positions such as police officers, security guards, detectives, corrections officers, and special agents.

The Program
Associate in Applied Science (A.A.S.)

The Associate in Applied Science (A.A.S.) degree in Criminal Justice at FLCC is designed to provide you with the knowledge, understanding, and appreciation for statutory, procedural, and constitutional law. You will learn to communicate effectively with professionals in criminal justice and related agencies.

If you are interested in pursuing a baccalaureate degree in criminal justice at a four-year institution, you will find that the A.A.S. program is designed to focus on specific subject areas such as corrections, police science, probation, and youth and/or community service.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 64 credit hours with a grade point average not less than C (2.0).

Each full-time Criminal Justice student with a minimum 2.5 GPA must take one six-credit course in Cooperative Education during the third or fourth semester. (Those students who do not have a minimum 2.5 GPA will be required to take six additional credit hours in criminal justice courses.) Based on your area of career choice, you will be assigned to an agency or department within FLCC’s service area. Cooperative Education is offered during the Spring and Fall Semesters.

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

- ENG 101 Composition I
  AND ENG 102 Introduction to Literature
  OR
- ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking

If you are considering the English Honors sequence, Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Social Science
- SOC 100 Introduction to Sociology
- PSY 100 Introduction to Psychology
- 6 credit hours of Social Science Electives

Mathematics and Science
- 3 credit hours of Mathematics Electives
- 6 credit hours of Science Electives

Criminal Justice
- CJC 100 Introduction to Criminal Justice
- CJC 117 Issues in Constitutional Law
- CJC 200 Cooperative Education
  OR
- 6 credit hours of Criminal Justice (CJC) Electives
- CJC 210 Family Court
- CJC 105 Criminal Law
  OR
- CJC 110 Criminal Procedure Law

The balance of Criminal Justice courses will be selected from the following courses in consultation with an advisor. A total of 27 credit hours in Criminal Justice courses is required.

- CJC 105 Criminal Law
  OR
- CJC 110 Criminal Procedure Law
- CJC 115 Law of Evidence
- CJC 120 Corrections Procedure
- CJC 125 Juvenile Justice
- CJC 130 Probation Administration
- CJC 205 Philosophy of Criminal Investigation
- CJC 212 Introduction to Criminalistics
- CJC 215 Current Practices in Corrections
- CJC 220 Contemporary Practices in Probation
- CJC 225 Police Community Relations
- CJC 227 Introduction to Terrorism

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

Electives
- The remainder of required hours must be made up of approved electives.

Culinary Arts
Associate of Applied Science
Degree (A.A.S.)
HEGIS 5404

The Degree
Associate of Applied Science (A.A.S.)

The Outlook
According to the National Restaurant Association (NRA), the restaurant industry employs 12.7 million people in both front-of-the-house and kitchen positions, and is one of the largest private-sector employers. And while almost 60% of all chefs, cooks and food preparation workers are employed in restaurants and other retail eating and drinking places, about 20% work in institutions such as schools, universities, hospitals and nursing homes. Grocery stores, hotels, and other organizations make up the difference. The outlook for career opportunities is promising, as the restaurant industry is projected to add 1.3 million positions in the next decade.

The Program
The Associate in Applied Science (A.A.S.) Culinary Arts degree program at Finger Lakes Community College is designed to prepare students for a career in the food services industry immediately upon graduation. Developed in partnership with the New York Wine & Culinary Center, the program will prepare students for a career in the very diverse food services industry and give them the foundation to continue towards a Bachelor’s degree if they desire.

The A.A.S. program will broaden the student’s knowledge of culinary arts, wine and beverage education and agriculture. The program includes additional course work in written and oral communications, science, math, business and history. Students will gain a greater educational background to integrate theory and practice. All culinary courses will take place at the New York Wine & Culinary Center, a short distance away from FLCC’s main campus in Canandaigua.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 64 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367. For this degree program, you must successfully complete the following:

Humanities
• ENG 101 Composition I
AND ENG 102 Introduction to Literature
OR
• ENG 104 Freshman English I Honors
AND ENG 105 Freshman English II Honors
• COM 110 Public Speaking
• SPN 140 Occupational Spanish

Social Science
• HIS 105 Regional History of the Finger Lakes

Mathematics / Science
• NS 115 Introduction to Nutrition
• 3 credit hours of Math elective

Business
• BUS 123 Business Communications

Culinary Arts
• CUL 100 Culinary Fundamentals
• CUL 110 Basic Culinary Application & Baking
• CUL 150 Front of the House Practicum
• CUL 200 Advanced Culinary Application & Baking
• CUL 210 Advanced Customer Service
• CUL 250 Back of the House Practicum
• CUL 260 Culinary Capstone Internship

Health / Physical Education
• PE 214 Advanced First Aid, CPR and AED
• PE 164 Stress Reduction through Exercise (recommended)
• PE 214 Advanced First Aid, CPR and AED (recommended)

Electives
• 3 credits liberal art elective
• 4 credits general elective

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

- HIS 105 Regional History of the Finger Lakes ......................... (3)
- SPN 140 Occupational Spanish .............................................. (3)
- General Elective ................................................................. (3-4)

Please note: Students in this program are required to purchase culinary uniforms and knife sets.
e-Commerce
Associate in Applied Science
Degree (A.A.S.)
HEGIS 5099

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
Much of the way we do business has evolved over the past decade, our students are finding that more and more of the requirements from their prospective employers are becoming “click and order” management versus “brick and mortar” management. As Finger Lakes Community College prepares students for this paradigm, the e-Commerce degree offers students an opportunity to learn in the way they will be doing business - online.

The Program
The A.A.S. degree in e-Commerce will be offered fully-online or as a combination of online and traditional face-to-face courses. The program is designed to provide students with a balanced background in business and web-based application development and to give students experience in professional online collaboration and communication. This program will challenge students as they evolve into the business and computer commerce professionals of tomorrow.

The Program's online courses are offered through the award-winning SUNY Learning Network (SLN). Online coursework will be completed through online forums with instructors and fellow students. Students completing the degree program entirely online will be able to access all administrative services either online or by phone, including application processing, course registration, payment, advisement, technical support, purchase of books and supplies, and library services and materials.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 66 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- ENG 102 Introduction to Literature
- ENG 104 Freshman English I Honors
- ENG 105 Freshman English II Honors
- COM 115 Interpersonal Communication

Social Science
- ECO 210 Principles of Macroeconomics
- ECO 211 Principles of Microeconomics

Mathematics
- MAT 121 Statistics I
- MAT 122 Statistics II

Business
- ACC 101 Principles of Financial Accounting
- BUS 120 Business Organization
- BUS 222 Marketing
- BUS/PSY 124 Organizational Behavior
- PLG 110 Computer Law and Policy

Computer Science
- CSC 115 Introduction to Programming and Computing
- CSC 135 Core Excel
- CSC 211 MS Access
- CSC 215 Visual Basic
- BUS/CSC 247 Electronic Commerce
- CSC 250 Computing Sciences Internship
- CSC 252 Multimedia Development
- CSC 262 Web site Development and Programming
- CSC 270 Principles of Information Security

Physical Education Elective
- PE 122 Concepts of Wellness
- PE 164 Stress Reduction through Exercise

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

Emergency Medical Technician – Paramedic
Associate in Applied Science Degree (A.A.S.)
HEGIS 5299

The Degree
Associate in Applied Science Degree (A.A.S.)

The Outlook
EMT Paramedics provide a vital service to our community, giving immediate care in emergency situations and transporting the sick or injured to medical facilities. According to the Occupational Outlook Handbook, employment opportunities for qualified professionals are forecast to grow at a faster rate than the average for all occupations through the year 2020.

As our population ages and individuals face increased medical concerns, the need for well-rounded knowledgeable paramedics will continue to grow. In Ontario County, health care and social services is the third largest job category, accounting for some 16% of total jobs. Four of the ten largest employers in Ontario County are hospitals. Graduates in the certificate in Paramedicine have been successful in acquiring paramedic positions with the ambulance corps in our local area. The addition of the degree will allow graduates the ability to move up the career ladder and fulfill the ever changing positions of management and statutory requirements set by municipalities, State and Federal governments.

The Program
The Associate in Applied Science in EMT-Paramedic prepares students for the careers in the emergency medical field. Students should already be certified as New York State Emergency Medical Technicians at the Basic level. The Associate's degree builds on the courses offered in the Certificate program and is offered to broaden the student's knowledge of the field in paramedicine. The program includes additional coursework in oral and written communication, science, math, and psychology. Students will gain a greater educational background to integrate theory and practice. As a pre-hospital care provider, paramedics must learn to adapt to the ever changing trends in health care and technology. This associate's degree will provide students education in the current thinking and practice in paramedicine and the associated sciences and communication skills necessary to be an effective successful paramedic.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
Before entering this program, you should already be certified as a New York State Emergency Medical Technician at the Basic level. This degree program builds on the courses offered in FLCC's EMT Certificate program and offers broadened knowledge of the field in paramedicine.

As a student in this program, you are required to complete a minimum of 69 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
  AND ENG 102 Introduction to Literature
  OR
- ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking
  OR
- COM 115 Interpersonal Communication

Social Science
- PSY 100 Introduction to Psychology
- 3 credit hours of Social Science Electives

Mathematics and Science
- MAT 110 Business Mathematics
- BIO 110 Fundamentals of Human Anatomy and Physiology
  OR
- BIO 115 Human Biology

Emergency Medical Services
- EMCR 125 EMS Management
- EMCR 146 Introduction to Paramedicine
- EMCR 156 Paramedic Airway and Patient Management
- EMCR 166 Paramedic - Cardiology
- EMCR 176 Paramedic - Medical Emergencies
- EMCR 186 Paramedic - Trauma
- EMCR 200 Emergency Medical Technician with Defibrillation

Health/Physical Education
- 1 credit hour of Health/Physical Education (PE) Elective

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Fisheries Technology
Associate in Applied Science
Degree (A.A.S.)
HEGIS 5403

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
Career opportunities for Fisheries Technology graduates include positions as fisheries technicians, fish culturists, aquaculture technicians, hatchery technicians/operators, and water treatment operators. Additionally, positions exist in the private sector and with government agencies such as the Department of Environmental Conservation and the United States Fish and Wildlife Service. In this growing field, graduates will also have the potential for self-employment.

The Program
The Associate in Applied Science (A.A.S.) degree in Fisheries Technology is designed to provide students with knowledge, field experience, and training that will prepare them for careers in areas of fisheries management and fish culture. Specifically, students will gain hands-on experience with modern fisheries equipment and procedures. Additionally, the required internship will provide real-world experience in fisheries work.

Graduates of the Fisheries Technology degree program will be competitive candidates for entry-level positions within local, state, and federal natural resource agencies. Graduates will also be employable at private fish hatcheries, preserves, and environmental consulting firms.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 67 credit hours with a grade point average of not less than C(2.0)

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- AND ENG 102 Introduction to Literature
- OR
- ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors

Social Science
- 6 credit hours of Social Science Electives

Natural Sciences and Mathematics
- BIO 121 General Biology I
- BIO 122 General Biology II
- BIO 221/CON 202 Principles of Terrestrial and Aquatic Ecology
- MAT 121 Statistics I

Conservation
- CON 100 Introduction to Environmental Conservation
- CON 102 Introduction to Fish and Wildlife
- BIO/CON 103 Environmental Science
- CON 116 Fisheries Techniques
- CON 200 Field Experiences in Conservation I
- CON 214 Fisheries Management
- CON 218 Fish Culture Techniques
- CON 219 Introduction to Aquaculture
- CON 229 Stream Ecology and Monitoring
- CON 246 Limnology

Information Management
- CSC 134 Core Word
- CSC 135 Core Excel
- CSC 136 PowerPoint

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

General Electives
- 3 credit hours of General Electives*

Notes:
* COM 110 Public Speaking recommended

Sample Schedule

Game Programming and Design Associate in Applied Science Degree (A.A.S.)
HEGIS 5103

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
Game programming is one of the fastest growing industries in the computer programming and technology sector. According to The U.S. Department of Labor’s Bureau of Labor Statistics, employment in the software publishing industry, of which game design and programming is a part, will continue to experience rapid growth through 2020.

The Program
Students in the A.A.S. in Game Programming and Design degree program will learn how to use the most recent technologies and tools for web application development. Students will also gain a high degree of hands-on experience with the design and development of game application software while also learning the theory and fundamentals of game design and programming, such as developing and applying an algorithmic approach to problem solving, using structured programming techniques, and designing and building databases. The capstone project for this program is the design and development of an actual game software application. Throughout the program, students will collect samples of their work and create a professional portfolio to be used in pursuing a job in the game industry.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 66 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

# Graphic Design Associate in Applied Science Degree (A.A.S.)

**HEGIS 5012**

## The Degree

Associate in Applied Science (A.A.S.)

## The Outlook

According to the U.S. Labor Department, strong demand for art, illustration, and design by advertising agencies, publishing firms, and other businesses will stimulate faster-than-average growth for graphic artists through the year 2020.

Job prospects will be best for experienced, creative graduates who communicate well. The experience provided by the Graphic Design degree program at Finger Lakes Community College can help you meet the challenges of a highly competitive job market.

## The Program

The Associate in Applied Science (A.A.S.) degree in Graphic Design at FLCC stresses a solid foundation in drawing and two-dimensional design. The course work involves both theoretical and practical problem solving.

**Technology:** Computer technology plays a major role in the graphic arts industry, and our students are expected to become proficient in computer use. Our computer graphics lab has Macintosh computers equipped with publishing, design, and illustration software packages. Networked computer peripherals include laser printers, scanners, and color ink-jet printers.

**Honors Courses:** In addition, the College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

## Curriculum Requirements

As a student in this program, you are required to complete a minimum of 64 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

### Humanities
- ENG 101 Composition I
- AND ENG 102 Introduction to Literature
- OR
- ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors
- 6 credit hours of Humanities Electives

### Social Science
- 6 credit hours of Social Science Electives

### Mathematics and/or Science
- 6 credit hours of Mathematics Electives and/or Science Electives

## Sample Schedule

The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

## Horticulture

### Associate in Applied Science (A.A.S.)

**HEGIS 5402**

### The Degree

**Associate in Applied Science (A.A.S.)**

### The Outlook

According to the U.S. Labor Department, a growth in the area of landscape development is expected through 2020, due to an increase in new construction and a growing commitment to environmental planning and historic preservation. In addition, environmental concerns and increased demand for sustainably designed projects will spur demand for professionals with this area of expertise.

Employment opportunities exist in golf courses and lawn management, landscape design and sales, arboriculture, plant propagation and nursery management, floriculture and greenhouse management, integrated pest management, garden center management, applied research, and education.

### The Program

The Associate in Applied Science (A.A.S.) degree in Horticulture is designed for students who enjoy working with nature to preserve plants and improve the environment. Horticulture enhances our living environment and merges the natural ecology of the land with the preservation and development of ecologically sound landscapes. Students in this program master the culture and production of plants, the development of landscape plans, and the protection of shrubs, trees, turfgrasses, and foliage plants from pests. They also learn to determine what composition of plant life will not only survive in a landscape, but will benefit the environment.

FLCC’s Horticulture Program is widely respected for its emphasis on quality. Our instructors are experts in the field and are often called upon for consultation and assistance by local and national agencies. Our small class size allows for individual attention, enabling you to uncover your talents and develop strong skills.

### Honors Courses:

The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

### Curriculum Requirements

Students are required to complete a minimum of 67 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

**Humanities**

- ENG101 Composition I
- AND ENG 102 Introduction to Literature
- OR
- ENG104 Freshman English I Honors
- AND ENG105 Freshman English II Honors

**Social Science**

- 6 credit hours of Social Science electives

**Natural Science**

- BIO 121 General Biology
- BIO 251 Plant Structure and Function
- BIO 260 Plant Pathology
- BIO 280 Entomology

**Ornamental Horticulture**

- AGR 100 Soil Science
- HRT 110 Introduction to Horticulture
- BIO/HRT 151 Plant Materials
- HRT 200 Integrated Pest Management
- HRT 220 Field Experiences in Horticulture
- 12 credit hours of Horticulture Electives

**Natural Resources Conservation**

- BIO/CON 103 Environmental Science
- BIO 221/CON 202 Principles of Terrestrial and Aquatic Ecology

**Health/Physical Education Elective**

- 4 credit hours

**Electives**

- 3 credits hours Mathematics
- OR
- BUS 147 Small Business Management

### Sample Schedule

The schedule below shows how the requirements for the A.A.S. Horticulture degree may be met in four semesters. This schedule is an example of one of many possible schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. Many students attending Finger Lakes Community College who have work and/or family obligations choose a different sequence of courses and take more than four semesters to fulfill the requirements for the A.A.S. Horticulture degree. Similarly, students who find they need to take some additional course work to better prepare them for courses included in the A.A.S. Horticulture degree program may plan a schedule that takes more than four semesters to complete the degree. All students should consult their advisor when they plan their schedule.

#### First Semester (17 Credit hours)

- **ENG 101 Composition I** .................................................. (3)
- **OR**
- **ENG 104 Freshman English I Honors** .......................... (3)
- **AGR 100 Soil Science** ..................................................... (3)
- **BIO 121 General Biology I** ............................................ (4)
- **BIO/HRT 151 Plant Materials** ....................................... (3)
- **HRT 110 Introduction to Horticulture** ........................... (3)
- **Health/Physical Education Elective** ............................. (1)

#### Second Semester (18 Credit hours)

- **ENG 102 Introduction to Literature** ............................. (3)
- **OR**
- **ENG 105 Freshman English II Honors** .......................... (3)
- **BIO/CON 103 Environmental Science** .......................... (4)
- **BIO 251 Plant Structure and Function** .......................... (4)
- **Horticulture Elective** .................................................. (3)
- **Horticulture Elective** .................................................. (3)
- **Health/Physical Education Elective** ............................. (1)
Third Semester (17 Credit hours)

- BIO 221/CON 202 Principles of Terrestrial and Aquatic Ecology ...(3)

Hotel and Resort Management Associate in Applied Science Degree (A.A.S.)
HEGIS 5010

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
The Occupational Outlook Handbook reports that employment opportunities in hotel and resort management are most promising for those who have earned college degrees in the field. Increasing business travel will drive the growth of employment for lodging managers, and large, full-service hotels will continue to offer many trainee and managerial opportunities. Through the A.A.S. Hotel and Resort Management degree program at Finger Lakes Community College, you can prepare for a successful career in this exciting industry, locally or anywhere in the nation.

The Program
The Associate in Applied Science (A.A.S.) degree in Hotel and Resort Management at FLCC is designed to provide you with a broad-based knowledge of the hotel and resort industry by analyzing hotel management theories and industry trends. Throughout the program, students spend considerable time in hotels for a firsthand look at this dynamic field.

Technology: Our program utilizes the most advanced industry computer software, including the Logistix property management system. You will also work with desktop publishing packages to produce menus and industry-related flyers and make use of the Internet to correspond with other hotel students and with companies throughout the world.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 69 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
  AND ENG 102 Introduction to Literature
  OR
- ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking
  OR
- COM 115 Interpersonal Communication
- SPN 140 Occupational Spanish

Social Science
- ECO 100 Survey of Economics
- 3 credit hours of Social Science Electives

Mathematics and/or Science
- MAT 121 Statistics I
- 3 credit hours of Mathematics Electives and/or Science Electives

Computer Science
- CSC 100 Computing in the Information Age
  OR
- CSC Elective

Business
- ACC 101 Principles of Financial Accounting
- BUS 123 Business Communications

Hotel and Resort Management
- HTM 100 Principles of Hotel/Resort Operations
- HTM 130 Introduction to Food and Beverage
- HTM 135 Rooms Division Management
- HTM 205 Principles of Food Production
- HTM 210 Hospitality Computer Applications
- HTM 220 Hospitality Marketing and Sales
- HTM 225 Meeting Planning and Conference Management
- HTM 230 Hotel Law
- HTM 250 Hotel Internship

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

General Electives
- 3 credit hours of General Electives

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester (16 Credit Hours)
- ENG 101 Composition I ................................................. (3)
  OR
- ENG 104 Freshman English I Honors .......................... (3)
- CSC 100 Computing in the Information Age .................... (3)
- ECO 100 Survey of Economics* ................................. (3)
- HTM 100 Principles of Hotel/Resort Operations ............... (3)
- HTM 130 Introduction to Food and Beverage ................ (3)
- Health/Physical Education (PE) Elective ....................... (1)

Second Semester (19 Credit Hours)
- ENG 102 Introduction to Literature ................................. (3)
  OR
- ENG 105 Freshman English II Honors ......................... (3)
- BUS 123 Business Communications ............................ (3)
- HTM 135 Rooms Division Management ......................... (3)
- HTM 230 Hotel Law .................................................. (3)
- MAT 121 Statistics I .................................................. (3)
• General Elective ........................................... (3)
• Health/Physical Education (PE) Elective ..................... (1)

Third Semester  (19 Credit Hours)
• ACC 101 Principles of Financial Accounting .................. (4)
• COM 110 Public Speaking ..................................... (3)
  OR
• COM 115 Interpersonal Communication ....................... (3)
• HTM 220 Hospitality Marketing and Sales ...................... (3)
• HTM 225 Meeting Planning and Conference Management .... (3)
• SPN 140 Occupational Spanish ................................... (3)
• Health/Physical Education (PE) Elective** ...................... (3)

Fourth Semester  (17-18 Credit Hours)
• HTM 205 Principles of Food Production ....................... (4)
• HTM 210 Hospitality Computer Applications .................. (3)
• HTM 250 Hotel Internship ..................................... (3)
• Mathematics Elective ............................................ (3-4)
  OR
• Science Elective ................................................. (3-4)
• Social Science Elective .......................................... (3)
• Health/Physical Education (PE) Elective ....................... (1)

Notes:
* Students planning to pursue a B.S. degree in Hotel Management should take ECO 210 Principles of Macroeconomics.
** PE 214 Advanced First Aid, CPR and AED is recommended.
Information Technology Associate in Applied Science Degree (A.A.S.)
HEGIS 5103.00

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
With the global explosion of mobile devices and Internet-based technologies, and the need to manage digital information and communications in secure environments, the field of information technology is undergoing rapid changes. The A.A.S. degree program in Information Technology at Finger Lakes Community College is continually evolving to meet the demands of the field and our regional industries and businesses.

According to Computerworld's Hot IT Skills for 2012, companies are planning significant hiring in the areas of Programming and Application Development (Mobile Applications Development), Project Management, Help Desk/Technical Support, Networking, Business Intelligence (decision-making based on information analysis), Data Center (organizations moving to virtualization and cloud computing), Web 2.0 Technologies, Security, and Telecommunications.

The Program
In the A.A.S. Information Technology program, students complete a set of core courses that provide a strong foundation for their studies in information technology. Students complete courses in application programming, networking, hardware and operating systems, and at the end of their studies each student is required to complete an internship experience allowing them to apply the skills learned in lab-based classrooms to a real-time business environment.

Advisement areas: Based on their individual career goals, students then select one specialty area, called advisement areas, on which to focus their studies. FLCC's program includes two separate advisement areas in:

- Networking and Security
- Web and Multimedia Application Development

Advantages: The program is accredited and flexible. It meets many employers' tuition reimbursement policies and allows students to earn college credits for their studies, while at the same time receiving the preparation needed for certification exams. While certifications rapidly become outdated, college credits retain their value and provide the student with a strong foundation for professional growth. An additional advantage of FLCC's program is that it can be completed through part-time, evening studies.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 66 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
  AND ENG 102 Introduction to Literature
  OR
- ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking
  OR
- COM 115 Interpersonal Communication

Social Science
- ECO 210 Principles of Macroeconomics
- ECO 211 Principles of Microeconomics

Mathematics
- 6 credit hours of Mathematics Electives (MAT 121 or higher)

Information Technology Core
- CSC 103 Computing Sciences Portal
- CSC 115 Introduction to Programming and Computing
- CSC 250 Computing Sciences Internship
- CSC 260 Networking Technologies
- CSC 271 A+ Core Hardware and Operating Systems

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

Information Technology Advisement Areas (choose one):
Networking and Security Advisement Area 1
- CSC 231 Systems Administration
- CSC 248 Command Line Network Administration
- CSC 261 Routing and Switching
- CSC 270 Principles of Information Security
- CSC 272 Linux
- CSC 273 Ethical Hacking
- CSC 274 Computer Forensics and Investigation
- PLG 110 Computer Law and Policy
- Advisor Approved Elective*

Web and Multimedia Application Development Area 2
- CSC 215 Visual Basic
- CSC 222 Web Development I
- CSC 223 Web Development II
- CSC 224 User Interface Design
- CSC 232 Programming Mobile Applications
- CSC 235 Server Side Scripting
- CSC 251 Applied Database Concepts
- CSC 252 Multimedia Development
- Advisor Approved Elective **

Notes:
* Advisement Area 1 – 3 credits of CSC at the 200 level
** Advisement Area 2 – 3 credits of CSC at the 200 level, or PLG 110 Computer Law and Policy, or 3 credits of ART elective

Sample Schedules
The schedules below show how the requirements for this degree may be met in four semesters. The schedules are an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different...
sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

Instrumentation and Control Technologies
Associate in Applied Science Degree (A.A.S.)
HEGIS 5314

The Degree
Associate in Applied Science Degree (A.A.S.)

The Outlook
According to the U.S. Department of Labor, advanced manufacturing will continue to be a high-growth industry through 2020. Employers need workers who are continually focused on innovating products and services, as well as production and business processes.

Demand will remain high for ready and qualified employees that possess the technical skills are essential to businesses that fall into the category of advanced manufacturing. Additionally, employers are seeking workers who are able work in teams, have strong computer skills, are able to read and translate diagrams and flow charts, and have and strong communication skills.

The Program
Finger Lakes Community College offers a two-year program leading to the Associate in Applied Science in Instrumentation and Control Technologies degree. This program provides graduates with multidisciplinary expertise to address workplace demands of emerging technology based businesses, by providing basic proficiencies for emerging knowledge and skill areas in data acquisition, automation, mechatronics, and control systems.

The tight integration of the courses in mathematics, physics, computational skills; in turn are leveraged in subsequent courses in electronics, design, process improvement, data acquisition and automation technologies; all in a context of active learning methodologies such as project based hands-on problem solving, case studies, and reinforced through job shadowing and required internships. Soft skills such as communication (written, verbal, presentation) and teamwork are integral part of each of the technical courses in the program. The majority of the core courses needed for this degree are offered at FLCC’s Victor Campus Center.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 65 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367. For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- AND ENG 102 Introduction to Literature
- OR

- ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking

Mathematics
- MAT 145 College Algebra
- MAT 152 Pre-Calculus

Natural Science
- PHY 108 Applied Physics I
- PHY 109 Applied Physics II

Computing Science
- CSC 139 MS Access

Engineering Science
- ESC 105 Engineering Graphics
- ESC 174 Computing for Engineers II

Technology
- TECH 101 Materials & Processes I
- TECH 116 Introduction to Emerging Technologies
- TECH 122 Electronic Theory I
- TECH 123 Digital Electronics
- TECH 231 Automation of Data Acquisition
- TECH 232 Automation Control I
- TECH 233 Introduction to Process Improvement
- TECH 234 Automation Control II
- TECH 250 Technology Co-op

Physical Education
- 4 credit hours

Sample Schedule
The following schedule shows how the requirements for the A.A.S. Instrumentation and Control Technologies may be completed in four semesters. This schedule is an example of one of many possible schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. Many students attending Finger Lakes Community College who have work and/or family obligations choose a different sequence of courses and take more than four semesters to fulfill the requirements for the A.A.S. Instrumentation and Control Technologies degree. Students should consult their advisor when they plan their schedule.

First Semester (15 Credit Hours)
- ESC 174 Computing for Engineers II ........................................ (2)
- MAT 145 College Algebra .................................................. (3)
- PHY 108 Applied Physics I ............................................... (4)
- TECH 101 Material and Processes I ..................................... (3)
- TECH 116 Introduction to Emerging Technologies ................. (3)

Second Semester (16 Credit Hours)
- ESC 105 Engineering Graphics ........................................ (3)
- MAT 152 Pre-Calculus ................................................ (3)
- PHY 109 Applied Physics II .......................................... (4)
- TECH 122 Electronic Theory I ......................................... (3)

Marketing
Associate in Applied Science
Degree (A.A.S.)
HEGIS 5004

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
According to the Occupational Outlook Handbook, opportunities for employment in marketing-related fields such as advertising, promotions, public relations, and sales is expected to increase faster than the average for all of these occupations through 2020. Marketing, advertising, and promotions will continue to be essential for organizations as they look to maintain and expand their share of the market. To succeed in a career in marketing, students need to understand the relationship between the business world and the changing demographics of the workforce and consumers. Coursework focusing on the latest business trends combined with the opportunity to gain hands-on experience through a business internship brings this relationship into focus.

The Program
The Associate in Applied Science (A.A.S.) degree in Marketing at Finger Lakes Community College provides several advantages to students. Most of the required business courses have no more than twenty students, providing the opportunity for students and faculty to get to know each other. A student in this program has a name, not just a number, and academic advisement is given a high priority. The versatility of the degree prepares students for a variety of jobs which are readily available upon graduation.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students enrolled in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 65 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- ENG 102 Introduction to Literature
- OR
- ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors
- OR
- MAT 110 Business Math
- OR
- ACC 101 Principles of Financial Accounting
- OR
- BUS 222 Marketing
- OR
- BUS 227 Business Law I
- OR
- BUS 236 Special Topics in Business
- OR
- 6 credit hours of Business Electives**

Mathematics
- MAT 110 Business Math
- 3 credit hours of Mathematics Electives*

Business
- ACC 101 Principles of Financial Accounting
- BUS 123 Business Communications
- BUS 142 Professional Selling
- BUS 146 Retail Business Management
- BUS 147 Small Business Management
- BUS 222 Marketing
- BUS 227 Business Law I
- BUS 229 Advertising
- BUS 236 Special Topics in Business
- 6 credit hours of Business Electives**

Computer Science
- 3 credit hours of Computer Science (CSC) Electives***

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

General Electives
- 3 credit hours of General Electives

Notes:
* MAT 121 Statistics I recommended
** BUS 120 Business Organization and BUS 123 Business Communications recommended
*** Recommended CSC Elective sequence: CSC 134 Core Word AND CSC 135 Core Excel AND CSC 136 PowerPoint

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester (16 Credit Hours)
- ENG 101 Composition I ............................................ (3)
- OR
- ENG 104 Freshman English I Honors .......................... (3)
- MAT 110 Business Math ........................................... (3)
- BUS 142 Professional Selling .................................... (3)
- BUS 146 Retail Business Management ......................... (3)
- PSY 100 Introduction to Psychology ........................... (3)
- Health/Physical Education (PE) Elective ...................... (1)

Second Semester (17 Credit Hours)
- ENG 102 Introduction to Literature ............................ (3)
- OR
- ENG 105 Freshman English II Honors ........................ (3)
- ACC 101 Principles of Financial Accounting ................. (4)
- BUS 147 Small Business Management ...................... (3)
- BUS 222 Marketing .................................................. (3)
- COM 110 Public Speaking ........................................ (3)
- Health/Physical Education (PE) Elective ...................... (1)
Third Semester (16 Credit Hours)
- BUS 123 Business Communications .............................................. (3)
- ECO 100 Survey of Economics or higher ........................................ (3)
- Computer Science (CSC) Elective* ................................................. (3)
- Mathematics Elective** ................................................................. (3)
- General Elective ............................................................................. (3)
- Health/Physical Education (PE) Elective ................................. (1)

Fourth Semester (16 Credit Hours)
- BUS 227 Business Law I ................................................................. (3)
- BUS 229 Advertising ........................................................................ (3)
- BUS 236 Special Topics in Business .............................................. (3)
- Business Elective*** ....................................................................... (3)
- Business Elective*** ....................................................................... (3)
- Health/Physical Education (PE) Elective ................................. (1)

Notes:
* Recommended CSC Elective sequence: CSC 134 Core Word AND CSC 135 Core Excel AND CSC 136 PowerPoint
** MAT 121 Statistics I recommended
*** BUS 120 Business Organization or BUS 124 Organizational Behavior recommended
Mechanical Technology
Associate in Applied Science
Degree (A.A.S.)
HEGIS 5303

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
The U.S. Department of Labor forecasts growth for the field of mechanical technology through the year 2020. Those who have completed at least two years of post-secondary training and have developed strong technical skills and experience using CAD systems will be well qualified for the many opportunities that are anticipated. The A.A.S. Mechanical Technology degree at Finger Lakes Community College is designed to provide you with the skills and experience required to build a successful and rewarding career.

The Program
The Associate in Applied Science (A.A.S.) degree in Mechanical Technology provides knowledge and technical experience that enables you to assist engineers design, develop, test, and manufacture industrial machinery, consumer products, and other equipment. Instruction emphasizes developing your technical competence and utilizes computer-aided drafting (CAD). The majority of the core courses needed for this degree are offered at FLCC’s Victor Campus Center.

Technology: The CAD Lab offers twenty four networked PCs with current versions of AutoCAD, Inventor, AutoCAD Architecture, and Microsoft Office. Networked output devices include a 3D printer, color laser printer, and large format color plotter. Students also have access to the Engineering Lab with electronics and machining equipment.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 71 credit hours with a grade point average of not less than C (2.0). All technology students take a common core of courses during the first semester along with an introductory course in their chosen degree program. After the first semester, it is possible to transfer from one technology degree program to another without loss of credit.

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities

• ENG 101 Composition I
  AND ENG 102 Introduction to Literature
  OR

• ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors

Social Science

• 6 credit hours of Social Science Electives

Mathematics

6 credit hours from the following Mathematics Electives:

• MAT 145 College Algebra
  OR

• MAT 152 Pre-Calculus
  OR

• MAT 271 Calculus I
  OR

• MAT 272 Calculus II

Physics

• PHY 118 College Physics I
  AND PHY 119 College Physics II
  OR

• PHY 151 General Physics I
  AND PHY 152 General Physics II

Mechanical Technology

• TECH 101 Materials and Processes I
• TECH 104 Materials and Processes II
• TECH 105 Engineering Drawing I
• TECH 106 Engineering Drawing II (2D AutoCAD)
• TECH 115 Technology Freshman Seminar
• TECH 122 Electronic Theory I
• TECH 205 Engineering Drawing III
• TECH 206 Engineering Drawing IV
• TECH 216 Statics and Strength of Materials
• TECH 217 Dynamics and Strength of Materials
• TECH 220 Machine Design I
• TECH 221 Machine Design II

Approved Mechanical Technology Electives

6 credit hours from the following Technology Electives:

• CHM 121 General Chemistry I
• ESC 173 Computing for Engineers I
• ESC 174 Computing for Engineers II
• MAT 121 Statistics I
• MAT 122 Statistics II
• MAT 271 Calculus I
• MAT 272 Calculus II
• TECH 123 Digital Electronics
• TECH 130 Construction Materials
• TECH 219 3D AutoCAD
• TECH 233 Introduction to Process Improvement
• TECH 249 Building Mechanical Systems
• TECH 250 Technology Co-op

Health/Physical Education

• 4 credit hours of Health/Physical Education (PE) Electives

Sample Schedule

The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. Natural Resources Conservation
Associate in Applied Science
Degree (A.A.S.)
HEGIS 5499

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
Careers in Natural Resources Conservation are as diverse as the environment itself. Positions such as environmental conservation officers, wildlife and fish technicians, land managers, rangers, nature center educators, environmental conservation technicians, and soil and water technicians bring graduates to locations from National Parks to urban areas. Finger Lakes Community College is one of the most successful colleges in New York State at placing graduates in these highly competitive positions. Graduates with this degree hold conservation jobs in more than 25 different states and are employed by federal, state, local and private agencies.

The Program
The Associate in Applied Science (A.A.S.) degree in Natural Resources Conservation at FLCC integrates diverse field experiences with classroom study, providing students with a broad awareness of environmental issues and an appreciation of our natural world. Courses in field botany, terrestrial and aquatic ecology, soils, waters and forests, fish and wildlife, and environmental science provide theoretical basis for what is learned outside the classroom.

In addition, students have the opportunity to use industry-standard research technology such as electro-fishing equipment, water quality probes, GIS computer software, and wildlife tracking radio-telemetry devices.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 71 credit hours with a grade point average of not less than C (2.0). The Conservation Field Camp course (CON 190) is designed to provide one week of intense field experiences in conservation and recreation. The camp is held in May, immediately after the Spring Semester, and runs for one week. This course is required and should be taken as early as possible.

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- ENG 102 Introduction to Literature
- ENG 104 Freshman English I Honors
- ENG 105 Freshman English II Honors

Social Science
- 6 credit hours of Social Science Electives

Natural Science and Mathematics
- BIO 121 General Biology I
- BIO 122 General Biology II
- BIO 221/CON 202 Principles of Terrestrial and Aquatic Ecology
- BIO 250/CON 205 Field Botany
- 3 credit hours of Mathematics Electives

Natural Resources Conservation
- CON 100 Introduction to Environmental Conservation
- CON 101 Principles of Soils, Waters, Forests
- CON 102 Introduction to Fish and Wildlife
- BIO/CON 103 Environmental Science
- CON 190 Conservation Field Camp
- CON 200 Field Experiences in Conservation I
- CON 203 Seminar in Environmental Conservation
- 12 credit hours of Conservation Electives

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

Electives
- The remainder of required hours must be made up of approved electives.

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester (17 Credit Hours)
- ENG 101 Composition I ....................................... (3)
- OR
- ENG 104 Freshman English I Honors ........................... (3)
- BIO 121 General Biology I ......................................... (4)
- CON 101 Principles of Soils, Waters, Forests ....................... (3)
- CON 100 Introduction to Environmental Conservation ........... (3)
- Social Science Elective ............................................ (3)
- PE 150 Beginning Camping ........................................ (1)

Second Semester (18 Credit Hours)
- ENG 102 Introduction to Literature ............................... (3)
- OR
- ENG 105 Freshman English II Honors .......................... (3)
- BIO 122 General Biology II ...................................... (4)
- BIO/CON 103 Environmental Science .......................... (4)

- **CON 200 Field Experiences in Conservation I** ..........(2)
- Health/Physical Education (PE) Elective .........................(1)

### Fourth Semester (16 Credit Hours)
- **CON 203 Seminar in Environmental Conservation** ..........(3)
- Social Science Elective .......................................(3)
- Conservation Elective*** ..................................(3)
- Conservation Elective*** ..................................(3)
- Conservation Elective*** ..................................(3)
- PE 252 Survival Camping .....................................(1)

**Notes:**
* **CON 190 Conservation Field Camp** is held in May, immediately after the Spring Semester, and runs for one week. This course is required and should be taken as early as possible.
** Statistics course recommended
*** In the A.A.S. Natural Resources Conservation degree program, students may take one ENV Elective in place of one CON Elective.
Natural Resource Conservation: Law Enforcement
Associate in Applied Science Degree (A.A.S.)
HEGIS 5499

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
Increasing concern with the health of the global environment has resulted in the enactment of numerous laws to regulate solid and hazardous waste disposal and the use of wildlife, plant, land, air, and water resources. Careers as environmental conservation law enforcement officers, marine recreational vehicle officers, fish and wildlife agents, park rangers, park police, and police officers address the needs of protecting our natural assets. The program at Finger Lakes Community College brings the relationship between conservation and law enforcement into focus.

The Program
The Associate in Applied Science (A.A.S.) degree in Natural Resource Conservation: Law Enforcement at FLCC integrates conservation law courses and environmental conservation courses such as terrestrial and aquatic ecology, fish and wildlife management, and environmental science with courses in criminal justice.

Field work: The program includes an extensive field study component through which students learn about the natural resources that they wish to protect. Students have the opportunity to use industry-standard research technology such as electro-fishing equipment, water quality probes, GIS computer software, and wildlife tracking radio-telemetry devices. Field experiences include classes at Muller Field Station, the East Hill Campus, a week-long Conservation Field Camp, and day trips to landfills, petroleum storage facilities, and lawn and garden centers to monitor their compliance with environmental laws.

Honors Courses: In addition, the College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 72 credit hours with a grade point average of not less than C (2.0). The Conservation Field Camp course (CON 190) is designed to provide one week of intense field experiences in conservation and recreation. The camp is held in May, immediately after the Spring Semester, and runs for one week. This course is required and should be taken as early as possible.

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

- Humanities
  - ENG 101 Composition I
  - AND ENG 102 Introduction to Literature
  - OR
  - ENG 104 Freshman English I Honors
  - AND ENG 105 Freshman English II Honors

- Social Science
  - 6 credit hours of Social Science Electives

- Natural Science and Mathematics
  - BIO 121 General Biology I
  - BIO 122 General Biology II
  - BIO 221/CON 202 Principles of Terrestrial and Aquatic Ecology
  - 3 credit hours of Mathematics Electives

Notes:
* CON 190 Conservation Field Camp is held in May, immediately after the Spring Semester, and runs for one week. This course is required and should be taken as early as possible.
Nursing
Associate in Applied Science
Degree (A.A.S.)
HEGIS 5208.10

The Associate in Applied Science in Nursing degree program is offered to men and women of all ages and is fully accredited by the National League for Nursing Accrediting Commission®. The program develops basic skills necessary for the associate degree level of registered nursing, while concurrently providing a broad base of personally enriching studies in general education.

The goals of the A.A.S. Nursing degree program are:

- To prepare nurses who apply theoretical knowledge and skills necessary for giving direct nursing care to patients with predictable, commonly occurring health problems in structured settings within a broad diverse geographic area.
- To respond to the needs of the community, times, and society by providing opportunities in nursing for students having diverse cultural and/or educational backgrounds.
- To prepare graduates who are lifelong learners and to provide a liberal arts and nursing foundation for persons planning to pursue a baccalaureate in nursing.
- To develop in students all of the 10 Outcomes identified by Finger Lakes Community College as outcomes of a liberal education.

Among the general hospitals in Ontario, Monroe, Wayne, and Yates Counties utilized for clinical learning experiences in nursing are: F.F. Thompson Hospital, Department of Veterans’ Affairs Medical Center in Canandaigua, Clifton Springs Hospital and Clinic, Geneva General Hospital, Newark Wayne Community Hospital, Soldiers and Sailors Memorial Hospital in Penn Yan, Rochester General Hospital, and Strong Memorial Hospital. Students also affiliate at a wide variety of community-based settings. Students are responsible for their own transportation to affiliating clinical sites. Nursing students should expect additional costs for uniforms and other clinical supplies.

The Associate in Applied Science in Nursing degree program may be completed in two academic years, or students may enroll under a part-time curricular study plan. Except with special permission, nursing courses should be taken sequentially over a consecutive, two-year period. Graduates of the nursing program are eligible to apply for the National Council Licensure Examination for Registered Professional Nursing (NCLEX-RN). Each candidate for graduation must first be approved as having successfully completed program requirements.

Entering students having prior, non-collegiate nursing studies may seek up to 16 credits for advanced placement in nursing by examination or transfer credit. Options include Finger Lakes Community College Challenge Examinations for Fundamentals of Nursing and Care of the Adult and Child I and Excelsior College Examinations (formerly Regents College) in Nursing offered by the State University of New York. A passing score of C or better as determined by Excelsior College is acceptable for transfer credit for Excelsior Challenge Exams. Additionally, students may be required to pass selected skill competency tests administered by the Nursing Department prior to admission. Traditional students are not allowed to challenge any nursing courses.

* FLCC’s program is accredited by the National League for Nursing Accrediting Commission, 3343 Peachtree Road NE Suite 850, Atlanta, GA 30326. Telephone: 1-404-975-5000.

Nursing courses or challenge exams for advanced placement will be considered if taken within two years prior to matriculation in the Associate in Applied Science in Nursing degree program. The Nursing Department will accept as two general elective credits NYS certification in a health care field (i.e. CNA, EMT). The College reserves the right to consider out-of-state certification.

Students who lack two or more of the required natural science credits by transfer or Excelsior Challenge Exams must fulfill these credits in the mathematics or science areas. Science courses (Anatomy and Physiology and Microbiology) must have been taken within ten years of matriculation in the nursing program.

Transfer-in students and former students desiring to re-enter the Nursing Program must be approved by the faculty of the Nursing Department. The faculty reserves the right to require a demonstration of theoretical knowledge and skill competency through testing before admission.

One year residence is required in this curriculum for transfer students. Former students are required to reactivate through the Admissions Office and be pre-approved to be officially matriculated.

A special accelerated option of limited enrollment is offered to qualified licensed practical nurses. The nursing component of this program may be completed in two semesters and one summer session. Advanced placement is granted after knowledge and skills assessment of NUR 100 content. Students must enroll for a minimum of 32 credit hours, 17 of which must be in Nursing, to attain an A.A.S. Nursing degree at Finger Lakes Community College. Interested persons should contact the Nursing Department directly for further information.

Candidates who wish to undertake the Excelsior College Degree for an Associate in Applied Science in Nursing in New York State may enroll at Finger Lakes Community College for required general education courses. Information about this external degree can be obtained by contacting Excelsior College at www.excelsior.edu or at 888-647-2388.

Students wishing to pursue a baccalaureate degree in nursing (B.S.N.) are advised to make this desire known early to help facilitate transfer to any of several upper division nursing programs in the area. Transfer articulation agreements are in place for Nazareth College, State University College at Brockport, St. John Fisher College, The Sage Colleges, LeMoyne College, SUNY IT and SUNY Upstate Medical University. Joint Admissions Agreements are in place for Roberts Wesleyan College, University of Rochester, and St. John Fisher College.

Students accepted to the Nursing Program must submit a complete physical examination report and proof of immunization as required by the Public Health law prior to the established deadline. Student nurses are to subscribe to the same laws as health facility employees which state “No person is employed unless he/she is free from a health impairment which is a potential risk to the patients or which might interfere with the employee’s performance of his/her duties, including habituation or addiction to depressants, stimulants, narcotics, alcohol or other substances that may alter behavior.” Other requirements include (1) graduation from an approved high school or a high school equivalency diploma; (2) evidence of physical and emotional health; (3) biology (Regents recommended), (4) mathematics (algebra required), and (5) chemistry. Students lacking biology and/or math will be expected to satisfy these prerequisites prior to consideration for admission to the Nursing Program. Students without chemistry may be admitted provisionally to the Nursing Program; however, they must successfully complete CHM 102 Introduction to Chemistry or its equivalent prior to starting professional nursing course work. Once admitted to the Nursing 135 Program, students must adhere to Nursing Departmental Policies and Standards.

Readmission to the Nursing Program:
The Nursing Department DOES NOT GUARANTEE re-admission to the nursing program! There must be substantial evidence that the applicant’s circumstances or attitude has improved so that academic success is likely.
An applicant seeking readmission to Nursing 100 must re-apply through the admissions office.

A. Readmission Exclusions:
- A student with a nursing failure defined as ‘C- or below’ [‘C’ or below for Fundamentals of Nursing], ‘WF’, ‘Q’, ‘W’ from another school who fails a nursing course at FLCC is ineligible for readmission.
- Any student who has been deemed a clinical failure for patient safety reasons (physical or psychological) may not be considered for readmission.
- Students will not be admitted to the nursing program more than twice except in extremely rare and unusual circumstances whose validity would require individual consideration by the Department of Nursing. However, a former student may be allowed a third admission into the program if the third admission occurs due to a change in status, i.e. generic student to LPN.

B. All requests for re-admission to Nursing 100, 101, 202, 203, 204, or 215 MUST be made in writing to the Department Chairperson and must follow current Nursing Department Policies and Standards (available at http://www.flcc.edu/pdf/nursing/policies.pdf). Students requesting readmission to Nursing 100 are also required to submit a copy of the letter written to the Department Chairperson to the Admissions Office. Requests must be received by October 1st for consideration for the following spring semester and by April 1st for the following fall semester.

C. An applicant seeking readmission to Nursing 101, 202, 203, 204, or 215 must do so within two years of leaving the program. For example, if a student completes NUR 100 satisfactorily in 2011 and either doesn’t continue on to NUR 101 or begins NUR 101 but does not complete it satisfactorily, s/he may request readmission to NUR 101 for the spring of 2013 or 2014. If more than two years have lapsed the applicant must either repeat or successfully challenge prior nursing course work.

D. Evaluation for re-admission will use but not be limited to the following criteria:
- personal letter that includes:
  - A detailed explanation as to why the student failed or withdrew
  - An explanation of the steps the student has taken to change the situation
  - A thoughtful, reasoned plan for success
  - Justification for readmission
- current GPA
- review of previous clinical/academic performance
- the Nursing Department's evaluation of the likelihood of the applicant's successful performance
- class space availability

E. If more than two years have lapsed the applicant must either repeat or successfully challenge prior nursing course work.

F. Fresh Start:
- Any non nursing courses which were taken prior to the Fresh Start status and received an unsuccessful outcome and then were repeated after a Fresh Start was granted will not be considered as a retake for the Admission Point system.
- Any non nursing courses which were taken prior to the Fresh Start status and received a successful outcome will be awarded the number of points allotted through the Admissions Point System. However, a retake of the successfully completed course, will be considered a retake and subjected to the rules of the admission Point System.

G. Applicants seeking readmission must follow current Nursing Department Policies and Standards (available at http://www.flcc.edu/pdf/nursing/policies.pdf)

H. If the applicant is unsuccessful in meeting readmission requirements, s/he has the following options:
- S/he may seek readmission the following year per the current policy
- S/he may seek readmission to repeat the previous nursing coursework prior to the one for which they were unsuccessful, i.e. a student seeking readmission to NUR 202 who is unsuccessful in meeting readmission standards, may seek readmission to NUR 101, per the current policy.

I. Accepted Students:
- The faculty reserves the right to require the student to successfully demonstrate his/her theoretical knowledge and skill competency through selected testing before admission.
- Students seeking readmission shall be given two attempts to be successful on selected skill competencies.
- All students readmitted to NUR 101 are required to take Nursing Process (NUR 105) in Winter Session.
- Students who are readmitted to Nursing 101, 202, 203, 204 are eligible and strongly encouraged to take a clinical practicum preceding the re-entry semester.
- Readmitted students are required to utilize current required textbooks and materials for the course which is being repeated.

Expected Qualities for Success: Associate Degree Nursing
The following list of abilities/qualities, with or without reasonable accommodation, are necessary for success in the Nursing Program. Reasonable accommodation is a modification or adjustment that enables an otherwise qualified individual with a disability to have the opportunity to attain the same level of performance or to enjoy equal benefits and privileges that are available to a similarly situated individual without a disability. A reasonable accommodation is defined on a case-by-case basis and must take into consideration:
- the specific abilities and functional limitations of the individual.
- the specific functional requirements of the Nursing Program.

Reasonable accommodations are directed toward providing an equal educational and/or employment opportunity for the disabled individual while providing for the safety of the individual, patient, and agency staff.

Physical Functioning:
- Tolerate sitting, standing, bending, reaching, stooping, and walking for long periods of time.
- Lift, carry, push, pull, or support objects, extremities, or persons: i.e., during ambulation, transferring from bed to chair, turning, moving and lifting patients in bed, supporting arms or legs during treatments or procedures, and lifting children onto chairs, beds, scales, or examining tables. (50 – 100 lbs. occasionally, 25 – 50 lbs. frequently, and 10 – 25 lbs. constantly.)
- Moving efficiently enough to meet the needs of several patients in a timely fashion.
- Demonstrate motor coordination and manual dexterity required to handle and operate equipment, i.e., wheelchairs, beds, IV pumps, blood pressure cuffs, computer keyboard, syringes, open packages, and perform procedures.
All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

The student must successfully complete:

*Humanities
- ENG 101 Composition I
- AND ENG 102 Introduction to Literature
- OR
- ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors
- 3 credit hours Humanities Elective

Social Science
- PSY 100 Introduction to Psychology
- PSY 200 Developmental Psychology
- SOC 100 Introduction to Sociology

Natural Science
- BIO 171 Human Anatomy and Physiology I
- BIO 172 Human Anatomy and Physiology II
- BIO 230 Microbiology

Nursing
- NUR 100 Fundamentals of Nursing
- NUR 101 Nursing Care of the Adult and Child I
- NUR 202 Nursing Care of the Adult and Child II
- NUR 203 Maternal-Child Health Nursing
- NUR 204 Psychiatric/Mental Health Nursing
- NUR 215 Nursing Seminar

Physical Education Elective
- Minimum 1 credit hour (activity class)

Electives
- Minimum 2 credit hours

Sample Schedule

The following schedule shows how the requirements for the A.A.S. Nursing degree may be met in four semesters. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. Many students attending Finger Lakes Community College who have work and/or family obligations choose a different sequence of courses and take more than four semesters to fulfill the requirements for the A.A.S. Nursing degree. Similarly, students who find they need to take some additional course work to prepare them to do well in the types of courses included in the A.A.S. Nursing degree program may plan a schedule that takes more than four semesters to complete the degree. Students registering for a January or Summer Nursing Practicum or Summer Nursing Course must do so by established deadlines. All students should consult their Nursing advisor when they plan their schedule.

First Semester (17 Credit Hours)
- ENG 101 Composition I .............................................. (3)
- OR
- ENG 104 Freshman English I Honors .......................... (3)
- PSY 100 Introduction to Psychology .............................. (3)
- BIO 171 Human Anatomy and Physiology I .................. (4)
- NUR 100 Fundamentals of Nursing .............................. (6)
- PE Physical Education Elective (activity class) ............... (1)
Second Semester (18 Credit Hours)
- ENG 102 Introduction to Literature .................................(3)
  OR
- ENG 105 Freshman English II Honors ...............................(3)
- PSY 200 Developmental Psychology ................................(3)
- BIO 172 Human Anatomy and Physiology II ......................(4)
- NUR 101 Nursing Care of the Adult and Child I ....................(8)

Third Semester (16 Credit Hours)
- NUR 202 Nursing Care of the Adult and Child II .................(9)
- BIO 230 Microbiology ....................................................(4)
- SOC 100 Introduction to Sociology ....................................(3)

Fourth Semester* (16/17 Credit Hours)
- NUR 203 Maternal-Child Health Nursing .........................(5)
- NUR 204 Psychiatric/Mental Health Nursing ........................(4)
- NUR 215 Nursing Seminar ..............................................(2)
- Humanities Elective ......................................................(3)
- General Elective** ......................................................(2/3)

Notes:
* Qualify to sit for the National Licensing Exam for Registered Nursing after completing the course of study.
** The Nursing Dept. will accept NYS certification in a health field (i.e. CNA, EMT) as two general elective credits.

*RECOMMENDED SEQUENCE FOR PRE-NURSING*
The Pre-Nursing sequence is provided for those students who (1) apply too late in the year for admission to the nursing curriculum, (2) have not met the prerequisites for admission, or (3) prefer to pursue the nursing curriculum on a part-time or reduced course load basis. Enrollment in the nursing curriculum would be on a space-available basis and conditional upon successful completion of the Pre-Nursing sequence of courses (minimum C in every course and a minimum overall GPA of 2.5) and written notification to Admissions during December or January advising them of the desire to be considered in the following Fall Semester. A two-year, four-semester sequence of professional nursing courses, plus any other requirements in the A.A.S. Nursing degree program that were not taken during the pre-nursing year would follow. If a student has not completed high school chemistry or the equivalent, this requirement must be successfully met prior to enrolling in the Nursing Program.

* See program prerequisites or consult a nursing program advisor.

Fall Semester (12/14 Credit Hours)
- ENG 101 Composition I ....................................................(3)
  OR
- ENG 104 Freshman English I Honors ...............................(3)
- PSY 100 Introduction to Psychology ................................(3)
- Biology Elective (Fundamentals of Human Anatomy and Physiology OR
  Human Anatomy and Physiology I) ................................(3/4)
- **General Elective ......................................................(2/3)
- PE Physical Education Elective (activity class) ......................(1)

Spring Semester (16 Credit Hours)
- ENG 102 Introduction to Literature .................................(3)
  OR
- ENG 105 Freshman English II Honors ...............................(3)
- PSY 200 Developmental Psychology ................................(3)
- SOC 100 Introduction to Sociology ....................................(3)
- Biology OR
- Chemistry Elective ......................................................(4)
- Humanities Elective ....................................................(3)

** If a student has not completed high school algebra or its equivalent, DST 042, Fundamental Mathematics and Algebraic Skills, this must be successfully met prior to enrolling in the Nursing Program. This requirement is not satisfied for students who have completed a high school equivalency program (GED).

ACCELERATED OPTION FOR L.P.N.s (Spring Entry Only)
Through appropriate testing, L.P.N.s may be granted advanced standing in the Finger Lakes Community College Nursing program. This minimizes repetitive course work for qualified students. Before admission to this sequence, the following prerequisites must be met:

1. High School
   Graduation or equivalency diploma, Math (Algebra required), Chemistry or college equivalent (CHM 102 at FLCC).

2. General Education
   FLCC courses or approved transfer credit:
   - Human Anatomy and Physiology I ................................3 cr.
   - Composition I .......................................................3 cr.
   - Introduction to Psychology .......................................3 cr.

3. Nursing Component
   a. ***Current licensure as an L.P.N. (copy of registration must be submitted).
   b. ***Fundamentals of Nursing 6 credits granted by successful completion of FLCC Challenge Exam (C+), Excelsior College (formerly Regents College) Examination (a passing score of C or better as determined by Excelsior College is acceptable) or FLCC Waiver.
   c. ***Two letters of professional reference.
   d. ***Transcript of L.P.N. program.
   e. Skill assessment - DSD, Gloving.
   f. Math assessment.

*** Must be submitted to the Nursing Department by October 1.

To qualify for the A.A.S. degree under the Accelerated Option for L.P.N.s, the nursing student must have enrolled and satisfactorily completed a minimum of 32 credit hours, 17 of which must be in Nursing, and have met the minimum one-year residency requirement at Finger Lakes Community College. If all degree requirements are met, students qualify for December or March graduation. All Nursing Department and Admission Office policies apply to this option. Program enrollment is limited and competitive.

Relevant sequence:
Winter Session (1 Credit Hour)
- NUR 105 Nursing Process ..............................................(1)

Spring Semester (18 Credit Hours)
- NUR 101 Nursing Care of the Adult and Child I .................(8)
- BIO 172 Human Anatomy and Physiology II ......................(4)
- PSY 200 Developmental Psychology ................................(3)
- ENG 102 Introduction to Literature ..................................(3)

Summer Session I (4 Credit Hours)
- NUR 204 Psychiatric/Mental Health Nursing ........................(4)

Summer Session II (6/7 Credit Hours)
- Humanities Elective ....................................................(3)
- General Elective .........................................................(2/3)
- Health/Physical Education Elective (activity class) ..............(1)
Fall Semester (18 Credit Hours)
• NUR 202 Nursing Care of the Adult and Child II (9)
• NUR 215 Nursing Seminar ..................................... (2)
• BIO 230 Microbiology ............................................. (4)
• SOC 100 Introduction to Sociology ...........................(3)

Spring Semester (5 Credit Hours)
• *NUR 203 Maternal-Child Nursing .......................(5)

For more information or to schedule an interview, contact the Nursing Department at 585.785.1345.

Nursing courses or exams must be taken within three years of matriculation.

* All approved nursing challenge exams must be completed by September 1 of the sophomore year in the Nursing program; otherwise, coursework will have to be taken in the Spring Semester after successful completion of NUR 202.
Paralegal
Associate in Applied Science
Degree (A.A.S.)
HEGIS 5099

The Degree
Associate of Applied Science (A.A.S.)

The Outlook
The paralegal profession has experienced dramatic growth since the 1960's as a direct result of the need for affordable legal services. Job growth in this field is expected to continue to grow through 2020 as employers try to reduce costs and increase the efficiency of legal services through the utilization of paralegals and legal assistants.

The profession is one that is exciting as well as rewarding. Paralegals — although not attorneys themselves - assist attorneys in substantive work. On an average day, a paralegal might be involved in handling a real estate closing, interviewing clients and witnesses, drafting legal documents, performing legal research and conducting an investigation. All work is done under the supervision of an attorney and in compliance with strict ethical standards. By allowing a paralegal to handle such tasks, the attorney is available for other work and, at the same time, is able to provide the client with quality legal services at a lower rate.

The Program
The Associate in Applied Science (A.A.S.) Paralegal degree program at Finger Lakes Community College is designed to prepare you for entry into the job market immediately upon graduation. The curriculum was developed in accordance with the American Bar Association guidelines and in consultation with area legal practitioners. We emphasize practical skills and knowledge utilized in common legal specialties such as real property law, family law, and trust and estate law.

The goal of the Paralegal program at Finger Lakes Community College is to provide students a quality paralegal education in order to prepare them to competently assist attorneys upon graduation. To this end, the Paralegal Program has sought and achieved American Bar Association (ABA) approval. ABA approval is a voluntary goal but one which signifies that an institution is providing the highest quality paralegal education. Further, the program is an institutional member of the American Association for Paralegal Education, which also maintains strict standards to obtain such membership status.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Transferring Credits to FLCC:
The maximum number of credits of legal specialty courses which can be transferred into the A.A.S. Paralegal Program and the Paralegal Certificate Program is nine (9) due to ABA requirements. A legal specialty course is one that (1) covers substantive law or legal procedures or process, (2) has been developed for paralegals, and (3) emphasizes practical paralegal skills.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 68 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- AND ENG 102 Introduction to Literature
- OR
- ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors

Social Science
- 3 credit hours of Social Science Electives*

Mathematics/Science
- 3 credit hours of Mathematics Electives (except MAT 110 Business Mathematics)
- 3 credit hours of Mathematics Electives/Science Electives (BIO 115 Human Biology recommended)

Paralegal
- PLG 100 Introduction to Legal Practice
- PLG 115 Computers in the Law Office
- PLG 125 Legal Research and Writing I
- PLG 210 Real Property Law and Practice
- PLG 225 Legal Research and Writing II
- PLG 230 Family Law
- PLG 235 Administration of Wills, Trusts and Estates
- PLG 240 Courts and Litigation
- PLG 250 Paralegal Internship
- OR
- PLG 265 Law Office Practice
- 3 credit hours of Paralegal (PLG) Electives

Office Technologies
- OFT 150 Basic Accounting
- OFT 156 Office Communications**
- BUS/OFT 200 Office Management

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

General Electives
- The remainder of required electives must be made up of approved electives and include a minimum of 6 credit hours of Liberal Arts Electives***
- 2 credit hours of General Electives
- 3 credit hours of Professional Electives****

Notes:
A minimum typing competency of 35 WPM through testing or successful completion of OFT 100 and OFT 131 will be required to receive the A.A.S. Paralegal degree.

* PSY 100 Psychology, SOC 100 Introduction to Sociology, and POL 100 American Government recommended

** Prerequisites for OFT courses are waived for Paralegal degree program students.

*** Liberal Arts Electives are to be selected from any Humanities, Social Science, Math, or Science courses except MAT 110, PSY 124, PSY 150, SCI 100, and Applied or Performing Arts courses.

**** Professional Electives must be selected from courses with the prefixes PLG, BUS, OFT, or CJC.
Sample Schedule

The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester
(16 Credit Hours)

- ENG 101 Composition I
- OR
- ENG 104 Freshman English I Honors .................................................(3)
- PLG 100 Introduction to Paralegal Practice ............................................(3)
- PLG 125 Introduction to Legal Practice...................................................(3)
- OFT 156 Office Communications...........................................................(3)
- MAT 121 Statistics (suggested) ..............................................................(3)
- Health/Physical Education (PE) Elective .................................................(1)

Second Semester
(17 Credit Hours)

- ENG 102 Introduction to Literature .......................................................(3)
- OR
- ENG 105 Freshman English II Honors ...................................................(3)
- PLG 115 Computers in the Law Office .....................................................(3)
- PLG 225 Legal Research and Writing II ..................................................(3)
- BIO 111 Biology of Man (suggested) .....................................................(4)
- Liberal Arts Elective ..................................................................................(3)
- Health/Physical Education (PE) Elective .................................................(1)

Third Semester
(19 Credit Hours)

- PLG 210 Real Property Law ......................................................................(3)
- PLG 230 Family Law ................................................................................(3)
- PLG 250 Paralegal Internship ...................................................................(3)
- OR
- PLG 265 Law Office Practice ...................................................................(3)
- BUS 227 Business Law (suggested Professional Elective) .........................(3)
- OFT 150 Basic Accounting .......................................................................(3)
- COM 110 Public Speaking (suggested) ......................................................(3)
- Health/Physical Education (PE) Elective .................................................(1)

Fourth Semester
(18 Credit Hours)

- PLG 235 Administration of Wills, Trusts and Estates ................................(3)
- PLG 240 Courts and Litigation .................................................................(3)
- PLG 245 Tort Law (Suggested Paralegal Elective) ......................................(3)
- BUS/OFT 200 Office Management ............................................................(3)
- Social Science Elective ..............................................................................(3)
- General Elective .......................................................................................(2)
- Health/Physical Education (PE) Elective .................................................(1)

Notes:
A minimum typing competency of 35 WPM through testing or successful completion of OFT 100 and OFT 131 are required to receive the A.A.S. Paralegal degree.
Therapeutic Massage/Integrated Health Care
Associate in Applied Science Degree (A.A.S.)
HEGIS 5299

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
More and more people are turning to complementary therapies such as meditation and massage to cope with stress, recover from illness or injury, or to maintain a balanced, healthy outlook on life. Finger Lakes Community College's Associate in Applied Science (A.A.S.) degree program in Therapeutic Massage/Integrated Health Care is designed to meet the growing demand for trained professionals in this health care field.

The Program
The A.A.S. Therapeutic Massage/Integrated Health Care is a unique program which develops the knowledge and basic skills necessary for the practice of massage therapy while also providing a base of studies in life sciences and alternative therapies. This holistic approach is complemented with coursework in general education, as well as introducing the student to massage research. The program is designed for those students who are preparing for a new career in massage therapy. Professionals who are currently working in other health care fields may choose to seek further training in integrated therapies through this program.

The Program combines both massage and other forms of complementary therapies as well as a strong focus on research.

FLCC is one of a few colleges in New York State to offer this type of program. FLCC’s degree program is less expensive than private massage schools in the State. At the same time, students are taking credit bearing courses many of which transfer into baccalaureate programs.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Admission to the program is competitive. Courses are completed over a two year schedule.

A limited number of seats may be available for January admission. Applying students must have a minimum of 13 credits applicable to the program, including A&P I, by the December preceding admission. Total number of credits and GPA will be used as admission criteria. Students, accepted into this track, will complete the program in three semesters from the time of his/her January admission. This requires enrolling in Massage 110, in addition to the other required massage courses, during the fall semester of the sophomore year. Interested pre-massage students should contact Admissions by December 1.

For more information about admission requirements and a pre-Therapeutic Massage/Integrated Health Care sequence of courses, contact the FLCC One Stop Center at (585)/785-1000.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 64 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- AND ENG 102 Introduction to Literature
- OR
- ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors

Social Science
- PSY 100 Introduction to Psychology

Science
- BIO 171 Human Anatomy and Physiology I
- BIO 172 Human Anatomy and Physiology II
- BIO 165 Kinesiology and Myology I
- BIO 265 Kinesiology and Myology II

Massage Therapy
- MAS 110 Swedish Massage
- MAS 205 Medical Massage
- MAS 210 Shiatsu I
- MAS 211 Shiatsu II
- MAS 215 Connective Tissue/Neuromuscular Massage
- MAS 220 Law and Ethics
- MAS 225/NUR 220 Alternative Therapies
- MAS 245 Massage Therapy Research
- MAS 250 Practicum

Health/Physical Education
- PE 112 Yoga
- PE 165 Oriental Healing Arts
- PE 166 Biofield Therapy
- PE 214 Advanced First Aid, CPR and AED
- PE 212 Health

Sample Schedule
This program is designed to prepare students for the New York State massage license examination. Students are required to complete a minimum of 64 credit hours with a grade point average of not less than C (2.0) with a minimum of 150 hours of general theory and techniques in the fundamentals of Western Massage therapy and Oriental Massage therapy, with an additional 325 hours of instruction and student practice in massage therapy techniques for a total of 475 hours.

The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.
First Semester (17 Credit Hours)
• ENG 101 Composition I ...................................(3)
  OR
• ENG 104 Freshman English I Honors .....................(3)
• BIO 171 Human Anatomy and Physiology I ..............(4)
• PSY 100 Introduction to Psychology ........................(3)
• MAS 110 Swedish Massage .................................(4)
• PE 212 Health...................................................(3)

Second Semester (17 Credit Hours)
• ENG 102 Introduction to Literature ..........................(3)
  OR
• ENG 105 Freshman English II Honors .....................(3)
• BIO 172 Human Anatomy and Physiology II ..............(4)
• BIO 165 Kinesiology and Myology I ........................(4)

• PE 214 Advanced First Aid, CPR and AED ...............(3)
Tourism Management Associate in Applied Science Degree (A.A.S.)
HEGIS 5011.10

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
Tourism Management is the largest industry in the world. Today’s travelers demand quality experiences, and this heightened demand requires a higher level of professionalism from those in the tourism industry.

The diversity of tourism careers includes event/festival management, group tour management, outdoor/adventure tourism, or historical tourism. The Tourism Management program at Finger Lakes Community College is designed to prepare you for an exciting marketing or management career in this growing industry.

The Program
The Tourism Management Associate in Applied Science (A.A.S.) degree is designed with an emphasis on the development of entry level skills for managerial positions in destination marketing organizations, convention services, convention centers, meeting/planning, event management, commercial and public attractions, chambers of commerce, and wineries. Students will develop the skills and aptitudes necessary to succeed in the tourism industry through the application of authentic case studies and group projects.

Awards: The Tourism Management program at FLCC received the Edward Allen Tourism Award as an outstanding tourism program in New York State. The New York State Travel and Vacation Association, in bestowing the award, cited the tourism program at FLCC as “the most appropriate preparation for students seeking careers in the tourism industry.” The New York State Division of Tourism recognized our faculty as outstanding tourism educators.

Online Courses: As part of the SUNY Learning Network (SLN), students pursuing the A.A.S. Tourism Management degree may take all of the curriculum requirements online. Students may take a course at a convenient time and place without the need to travel to campus, thus eliminating any time and location restrictions a student may have.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 65 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
- OR ENG 102 Introduction to Literature
- OR ENG 104 Freshman English I Honors
- AND ENG 105 Freshman English II Honors
- OR COM 110 Public Speaking
- OR COM 115 Interpersonal Communication

Social Science
- ECO 100 Survey of Economics or higher level Economics
- PSY 100 Introduction to Psychology

Mathematics/Science
- MAT 121 Statistics I
- 3 credit hours of Mathematics Electives/Science Electives

Tourism Management
- BUS 100 Introduction to Tourism
- BUS 205 Services Marketing
- BUS 215 Tourism Planning and Development
- BUS 225 Destination Marketing
- BUS 232 Event Management
- BUS 255 Tourism Internship
- BUS 260 Tourism Seminar

Business Administration
- ACC 101 Principles of Financial Accounting
- BUS 123 Business Communications
- BUS 210 Legal Environment of Business
- BUS 224 Human Resource Management

Computer Science
- CSC 100 Computing in the Information Age

Health/Physical Education
- 4 credit hours of Health/Physical Education (PE) Electives

General Electives
- 3 credit hours of General Electives

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester (16 Credit Hours)
- ENG 101 Composition I ......................................... (3)
- OR ENG 104 Freshman English I Honors ................. (3)
- OR BUS 100 Introduction to Tourism ..................... (3)
- OR CSC 100 Computing in the Information Age ........ (3)
- OR ECO 100 Survey of Economics ...................... (3)
- OR MAT 121 Statistics I ...................................... (3)
- OR Health/Physical Education (PE) Elective ........... (1)
### Second Semester (17 Credit Hours)
- ENG 102 Introduction to Literature ........................................ (3)
- OR
- ENG 105 Freshman English II Honors ................................ (3)
- ACC 101 Principles of Financial Accounting .............................. (4)
- BUS 205 Services Marketing .................................................. (3)
- BUS 232 Event Management .................................................. (3)
- PSY 100 Introduction to Psychology ....................................... (3)
- Health/Physical Education (PE) Elective ................................. (1)

### Third Semester (16-17 Credit Hours)
- BUS 123 Business Communications ........................................ (3)
- BUS 215 Tourism Planning and Development ........................... (3)
- BUS 260 Tourism Seminar .................................................... (3)
- COM 110 Public Speaking ..................................................... (3)
- OR
- COM 115 Interpersonal Communication .................................. (3)
- Mathematics (MAT) Elective ............................................... (3-4)
- OR
- Science (SCI) Elective ....................................................... (3-4)
- Health/Physical Education (PE) Elective ................................. (1)

### Fourth Semester (16 Credit Hours)
- BUS 210 Legal Environment of Business .................................. (3)
- BUS 224 Human Resource Management .................................. (3)
- BUS 225 Destination Marketing Organization Management ........ (3)
- BUS 255 Tourism Internship* .................................................. (3)
- General Elective ................................................................. (3)
- Health/Physical Education (PE) Elective ................................. (1)

**Notes:**
* BUS 255 Tourism Internship may be completed during the Summer Session or Spring Semester.
Viticulture and Wine Technology
Associate in Applied Science Degree (A.A.S.)
HEGIS 5402

The Degree
Associate in Applied Science (A.A.S.)

The Outlook
Create a career that – like a fine wine – gets better with time. Based on the dramatic growth in almost all aspects of the wine industry, the need for individuals with the specialized knowledge and skills necessary for employment in the viticulture and wine industry will continue to grow for the foreseeable future. Your path to a career in this growing field begins with FLCC’s A.A.S. Viticulture and Wine Technology degree. This degree combines courses in the science of wine making, hands-on experience in commercial vineyards, with a focus on sustainability. Graduating with this interesting and exciting degree will prepare you for a career in one of many facets of the viticulture and wine industry.

The Program
FLCC’s A.A.S. Viticulture and Wine Technology degree is designed to provide you with the knowledge and training necessary to pursue a career in viticulture, vineyard management, winery operations, tasting room management, and wine sales. Building on FLCC’s well-known and established Environmental Conservation and Horticulture programs, this degree also includes an emphasis on sustainability, ensuring that the environmental issues so very important in the region will be addressed.

Honors Courses: The College offers honors courses that provide enhanced educational experiences for students who have demonstrated outstanding academic ability. Enrollment in honors courses is open to qualified students in this degree program, as well as all other qualified FLCC students. Successful completion of honors courses or an Honors Certificate may increase student transfer options to four-year institutions.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 67 credit hours with a grade point average of not less than C (2.0).

All associate degree programs require ENG 101 Composition I and ENG 102 Introduction to Literature. You must pass skills assessment for entrance into these courses. If you are well prepared, you may substitute ENG 104 Freshman English I Honors and ENG 105 Freshman English II Honors for ENG 101 and ENG 102. (If you are considering the English Honors sequence, you should consult the Director of Honors by calling 585.785.1367.) For this degree program, you must successfully complete the following:

Humanities
- ENG 101 Composition I
  AND ENG 102 Introduction to Literature
  OR
- ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking
  OR
- COM 115 Interpersonal Communication
- SPN 140 Occupational Spanish

Science
- BIO 121 General Biology I
- BIO 251 Plant Structure and Function
- CHM 121 General Chemistry I

Social Science
- 3 credit hours of Social Science Electives

Horticulture
- AGR 100 Soil Science
- HRT 110 Introduction to Horticulture
- HRT 200 Integrated Pest Management

Viticulture
- HRT/VIT 100 Introduction to Wines and Vines
- HRT/VIT 105 Basic Viticulture Techniques
- VIT 110 Summer Vineyard Technology Practicum
- VIT 200 Vineyard Management
- VIT 205 Fall Vineyard Technology Practicum
- VIT 210 Introduction to Enology
- VIT 215 Enology

Physical Education
- PE 214 Advanced First Aid, CPR and AED
- 1 credit hour of Physical Education (PE) Elective

Mathematics/Business
- BUS 147 Small Business Management
  OR
- 3 credits of approved Mathematics Elective*

Notes:
* Approved mathematics elective: MAT 121, MAT 122, MAT 145, MAT 152, MAT 220, MAT 271, MAT 272, MAT 273, MAT 274, MAT 276.

Sample Schedule
The schedule below shows how the requirements for this degree may be met in four semesters. This schedule is an example of one of many possible schedules that might be followed by a full-time student. Many students attending FLCC who have work and/or family obligations choose a different sequence of courses and may take more than four semesters to fulfill the requirements for the degree. Similarly, students who find they need to take some preparatory coursework may plan a schedule that takes more than four semesters to complete. You should consult with your advisor when planning your schedule. If you plan to continue your studies at a four-year college or university, you also should check with your transfer institution with regard to specific courses and requirements.

First Semester (17 credit hours)
- ENG 101 Composition I ......................................................... (3)
- ENG 104 Freshman English I Honors ................................. (3)
- AGR 100 Soil Science .......................................................... (3)
- BIO 121 General Biology ....................................................... (4)
- HRT 110 Introduction to Horticulture .................................. (3)
- HRT/VIT 100 Introduction to Wines and Vines ................. (3)
- Physical Education (PE) Elective ................................. (1)
Second Semester  
(17 credit hours)
- ENG 102 Introduction to Literature ........................................ (3)
- OR
- ENG 105 Freshman English II Honors .................................... (3)
- BIO 251 Plant Structure and Function .................................... (4)

* Approved mathematics elective: MAT 121, MAT 122, MAT 145, MAT 152, MAT 220, MAT 271, MAT 272, MAT 273, MAT 274, MAT 276.
Certificates

Applied Computer Applications Certificate
HEGIS 5103

Program Overview
Develop marketable skills with just one year of study in FLCC's certificate in Applied Computer Applications. You'll be among graduates who are qualified for employment opportunities in computer operations, computer support or computer applications. Credits are fully transferable to FLCC's A.A.S. Information Technology program.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 31 credit hours with a grade point average of not less than C (2.0). For this certificate, you must successfully complete:

Mathematics
- 3 credit hours of Mathematics Electives

Business
- ACC 101 Principles of Financial Accounting
- BUS 123 Business Communications
- OFT 100 Computer Keyboarding

Computer Science
- CSC 102 Tools for Internet Users
- CSC 103 Computer Science Portal
- CSC 115 Introduction to Programming and Computing
- 3 of the following courses:
  - CSC 134 Core Word
  - CSC 135 Core Excel
  - CSC 136 Core PowerPoint
  - CSC 139 MS Access
- 3 credit hours of Computer Science Electives
  - OR
- PLG 110 Computer Law and Policy
- CSC 251 Applied Database Concepts

General Electives
- 3 credit hours of General Electives

Sample Schedule
The following schedule shows how the requirements for the Applied Computer Applications Certificate may be met. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. All students should consult their advisors when they plan their schedules.

First Semester (17 credit hours)
- ACC 101 Principles of Financial Accounting .......................... (4)
- BUS 123 Business Communications ................................. (3)
- CSC 102 Tools for Internet Users ............................... (3)
- Choose 3 of the following:
  - CSC 134 Core Word, CSC 135 Core Excel,
    CSC 136 PowerPoint, CSC 139 MS Access .......... (3)
  - Math Elective ................................................. (3)
  - OFT 100 Computer Keyboarding .............................. (3)

Second Semester (14 credit hours)
- CSC 103 Computer Science Portal ........................ (2)
- CSC 115 Introduction to Programming and Computing .......... (3)
- CSC 251 Applied Database Concepts ........................ (3)
- CSC Elective
  - OR
- PLG 110 Computer Law and Policy ........................ (3)
- General Elective ................................................. (3)

Criminal Justice Certificate
HEGIS 5505

Program Overview
A certificate in Criminal Justice provides you with the opportunity to pursue studies in the law enforcement field. Credits are fully transferable to FLCC's A.A.S. Criminal Justice and is fully transferable to the two-year degree program.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 18 credit hours with a grade point average of not less than C (2.0). For this certificate, you must successfully complete:

Humanities
- ENG 101 Composition I
  OR
- ENG 104 Freshman English I Honors

Social Science
- PSY 100 Introduction to Psychology
- SOC 100 Introduction to Sociology

Criminal Justice
- CJC 105 Criminal Law
- CJC 110 Criminal Procedure Law
- CJC 117 Issues in Constitutional Law

Sample Schedule
The following schedule shows how the requirements for the Criminal Justice Certificate may be met. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. All students should consult their advisors when they plan their schedules.

First Semester (18 credit hours)
- ENG 101 Composition I .................................... (3)
  OR
- ENG 104 Freshman English I Honors .................. (3)
- CJC 105 Criminal Law ..................................... (3)
- CJC 110 Criminal Procedure Law ....................... (3)
- CJC 117 Issues in Constitutional Law ................. (3)
- PSY 100 Introduction to Psychology ................... (3)
- SOC 100 Introduction to Sociology .................... (3)

Gainful Employment Information

Culinary Arts Certificate
HEGIS 5404

Program Overview
The certificate program will focus on culinary art instruction, wine education, sustainability, and agriculture. The goal of this education program is to provide individuals with the job skills needed to gain entry level positions in restaurants and business, industry, school food service sectors. Graduates will find careers as chefs, menu planners, and other food service occupations. The certificate will give students hands-on experience and the knowledge necessary to be successful in the food services industry and will give them the foundation for building a lifelong career. Students may also choose to progress to FLCC’s Culinary Arts program.

Students will take their courses at the New York Wine & Culinary Center, just a short distance from FLCC’s main campus in Canandaigua. By aligning this certificate with the New York Wine & Culinary Center, students will learn the latest trends and apply practical skills in real world setting. The program will focus on local foods and wines preparing students to embrace and showcase the best of the Finger Lakes and Upstate New York. Credits are fully transferable to FLCC’s A.A.S Culinary Arts program.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 29 credit hours with a grade point average of not less than C (2.0). For this certificate, you must successfully complete:

Culinary Arts
• CUL 100 Culinary Fundamentals
• CUL 110 Basic Culinary Application & Baking
• CUL 150 Front of the House Practicum
• CUL 200 Advanced Culinary Application & Baking
• CUL 210 Advanced Customer Service
• CUL 250 Back of the House Practicum
• CUL 260 Culinary Capstone Internship

Sample Schedule
The following schedule shows how the requirements for the Culinary Arts Certificate may be met. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed. All students should consult their advisors when they plan their schedules.

First Semester (10 Credit Hours)
• CUL 100 Culinary Fundamentals ......................... (5)
• CUL 110 Basic Culinary Application & Baking .......... (5)

Second Semester (12 Credit Hours)
• CUL 150 Front of the House Practicum ................. (3)
• CUL 200 Advanced Culinary Application & Baking .... (4)
• CUL 210 Advanced Customer Service ................... (5)

Summer or Third Semester (7 Credit Hours)
• CUL 250 Back of the House Practicum ................. (3)
• CUL 260 Culinary Capstone Internship ................. (4)

Emergency Medical Technician – Paramedic Certificate
HEGIS 5299

Program Overview
Designed to prepare students to serve as pre-hospital emergency medical care professionals, FLCC’s 18-month Emergency Medical Technician-Paramedic certificate program delivers instruction through lecture, lab experiences, clinical lessons, and field training. The curriculum also prepares students to take the New York State Paramedic Certification exams and the National Registry of EMT-Paramedic exam, and to obtain American Heart Association certification in basic cardiac life support, advanced cardiac life support, and pediatric advanced life support.

FLCC’s intensive program gives students an opportunity to learn in the classroom and in the field. Students are required to complete 372 hours of in-hospital clinical field experience in emergency departments, operating rooms, intensive care units, psychiatric treatment units, labor/delivery rooms, and other specialized care units. They are also required to complete a 100 to 200-hour field internship with area advanced life support ambulance services.

The curriculum and objectives of each course follow the USDOT paramedic course outline. Classes will be held through the College in affiliation with the Finger Lakes Regional EMS Council. Credits are fully transferable to FLCC’s A.A.S Emergency Medical Technician – Paramedic.

Finger Lakes Regional EMS Council
For more information about EMS courses and the EMT-Paramedic certificate program, contact the Finger Lakes Regional Emergency Medical Service Council at (315)789-0108 or visit www.flremsc.org.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 38 credit hours with a grade point average of not less than C (2.0). For this certificate, you must successfully complete:

Emergency Medical Services
- EMCR 146 Introduction to Paramedicine
- EMCR 156 Paramedic Airway & Patient Management
- EMCR 166 Paramedic - Cardiology
- EMCR 176 Paramedic - Medical Emergencies
- EMCR 186 Paramedic - Trauma

Sample Schedule
The following schedule shows how the requirements for the Emergency Medical Technician – Paramedic Certificate may be met. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed. All students should consult their advisors when they plan their schedules.

First Semester (18 credit hours)
- EMCR 146 Introduction to Paramedicine .................. (5)
- EMCR 156 Paramedic Airway & Patient Management ....... (7)
- EMCR 166 Paramedic – Cardiology .......................... (6)

Second Semester (20 credit hours)
- EMCR 176 Paramedic - Medical Emergencies ............... (7)
- EMCR 186 Paramedic – Trauma ................................. (13)

Notes:
* EMCR 166 extends into August.
**Program Overview**

This one-year certificate program is designed for individuals currently employed in the horticulture-landscaping plant preservation fields who desire further training or who wish to update their skills and knowledge. It also serves as an exploratory program for those individuals who have a general interest in flowers and plants and wish to grow ornamental or native plants or plan to manage their own landscapes. In addition, it is well suited for individuals in both the public and private sector who are responsible for horticultural decisions.

Students in this program may specialize in plant protection, general horticulture or landscaping. Students should contact their faculty advisor for courses required in each specialization. Credits are fully transferable to FLCC’s A.A.S Horticulture program.

**Curriculum Requirements**

As a student in this program, you are required to complete a minimum of 32 credit hours with a grade point average of not less than C (2.0). For this certificate, you must successfully complete:

- **Natural Science**
  - BIO 121 General Biology I
  - BIO 251 Plant Structure and Function

- **Horticulture**
  - AGR 100 Soil Science
  - BIO/HRT 151 Plant Materials
  - HRT 110 Introduction to Horticulture
  - HRT 200 Integrated Pest Management
  - HRT 220 Field Experiences in Horticulture
  - 9 credit hours of Horticulture Elective

- **General Elective**
  - 1 credit hour of General Electives

**Sample Schedule**

The following schedule shows how the requirements for the Horticulture Certificate may be met. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. All students should consult their advisors when they plan their schedules.

**First Semester**

- AGR 100 Soil Science ................................................. (3)
- BIO 121 General Biology I .......................................... (4)
- BIO/HRT 151 Plant Materials ....................................... (3)
- HRT 110 Introduction to Horticulture ............................ (3)
- Horticulture Elective .................................................. (3)

**Second Semester**

- BIO 251 Plant Structure and Functions .......................... (4)
- HRT 200 Integrated Pest Management ............................ (3)
- HRT 220 Field Experiences in Horticulture ...................... (2)
- Horticulture Elective .................................................. (3)
- Horticulture Elective .................................................. (3)
- General Elective ....................................................... (1)

Based on the sequence of courses listed, the individual may specialize in (1) plant protection, (2) general horticulture, or (3) landscaping. Students should contact their faculty advisor for courses required in each specialization.
Information Security Certificate
HEGIS 5199

Program Overview
Information security has become a global concern. The increasing reliance on automated systems, the ubiquity of the internet and the lack of security mechanisms in current network infrastructures places personal and organizational information at risk. The need for employees trained in this field is expected to continue to grow. FLCC’s Information Security certificate program is designed to provide you with the opportunity to gain marketable skills after one year of study, as it includes the curriculum necessary to obtain generic (non-vendor specific) certification in information security. Graduates certified in Security+ will be in high demand to ensure the security of systems and data. Credits are fully transferable to FLCC’s A.A.S. Information Technology program.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 32 credit hours with a grade point average not less than C (2.0). For this certificate, you must successfully complete:

Paralegal
- PLG 110 Computer Law and Policy

Computer Science
- CSC 247 Electronic Commerce
- CSC 248 Command Line Network Administration
- CSC 260 Networking Technologies
- CSC 261 Routing and Switching
- CSC 270 Principles of Information Security
- CSC 271 A+ Core Hardware and Operating Systems Technologies
- CSC 272 Linux
- CSC 273 Ethical Hacking
- CSC 274 Computer Forensics and Investigations
- CSC 275 Preparing for Security+ Certification

This certificate program in Information Security is designed to provide students with the opportunity to gain saleable skills after one year of study.

Sample Schedule
The following schedule shows how the requirements for the Information Security Certificate may be met. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. All students should consult their advisors when they plan their schedules.

First Semester (15 credit hours)
- PLG 110 Computer Law and Policy .................... (3)
- CSC 247 Electronic Commerce ......................... (3)
- CSC 248 Command Line Network Administration .... (3)
- CSC 260 Networking Technologies ..................... (3)
- CSC 261 Routing and Switching ....................... (3)

Second Semester (17 credit hours)
- CSC 270 Principles of Information Security ............ (3)
- CSC 271 A+ Core Hardware and OS Technologies ... (3)
- CSC 272 Linux ............................................ (3)
- CSC 273 Ethical Hacking ................................ (3)
- CSC 274 Computer Forensics and Investigations ... (3)
- CSC 275 Preparing for Security+ Certification ...... (2)

Gainful Employment Information

Natural Resources Conservation Certificate HEGIS 5401

Program Overview
You can earn a Natural Resources Conservation certificate in as little as one year. This program is designed for you if you plan to seek employment or further your skills in the Environmental Conservation fields. This program also will benefit you if you hold a degree in other disciplines that will pair well with Conservation training. You also may be interested if you serve, or plan to serve, in an appointed or elected environmental decision-making position. Credits are fully transferable to FLCC’s conservation degree programs.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 30 credit hours with a grade point average of not less than C (2.0). For this certificate, you must successfully complete the following:

Social Science
- 3 credit hours Social Science or Humanities Elective*

Conservation
- CON 100 Introduction to Environmental Conservation
- CON 101 Principles of Soils, Waters, Forests
- CON 102 Introduction to Fish and Wildlife
- BIO/CON 103 Environmental Science
- CON 190 Conservation Recreation Field Camp
- CON 200 Field Experiences in Conservation
- 9 credit hours Conservation Electives

Sample Schedule
The following schedule shows how the requirements for the Natural Resources Conservation Certificate may be met. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. All students should consult their advisors when they plan their schedules.

First Semester (13 credit hours)
- CON 100 Introduction to Environmental Conservation ............... (3)
- CON 101 Principles of Soils, Waters, Forests ...................... (3)
- CON 102 Introduction to Fish and Wildlife ......................... (3)
- BIO/CON 103 Environmental Science .............................. (4)

Summer Session (3 credit hours)
- CON 190 Conservation Recreation Field Camp ...................... (3)

Second Semester (14 credit hours)
- CON 200 Field Experiences in Conservation ...................... (2)
- Conservation Electives ............................................. (3)
- Conservation Electives ............................................. (3)
- Conservation Elective .................................................... (3)
- Social Science or Humanities Elective* ......................... (3)

Notes:  
* After consultation with an advisor, students may fulfill this requirement with a General Elective.

Office Technology Certificate  
HEGIS 5005

Program Overview
The Office Technology Certificate program prepares students for entry-level employment in nearly all business areas. Students gain valuable office procedure knowledge and technology skills need for success in almost any corporate environment.

Prepare for employment after just one year of training! Credits are fully transferable to FLCC’s AAS Office Technologies-Administrative Assistant program.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 30 credit hours with a grade point average of not less than C (2.0). For this certificate, you must successfully complete:

Business and Office Technologies
- BUS 120 Business Organization
- OFT 140 College Keyboarding I
  AND/OR
- OFT 141 College Keyboarding II*
  AND/OR
- OFT 213 Office Automation
- OFT 150 Basic Accounting**
  AND/OR
- OFT 210 Word Processing I***
- OFT 156 Office Communications
- OFT/BUS 200 Office Management
- OFT 247 Office Procedures I
- OFT 248 Office Procedures II
- 3 credit hours of Business Elective

Sample Schedule
The following schedule shows how the requirements for the Office Technology Certificate may be met. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. All students should consult their advisors when they plan their schedules.

First Semester (15 Credit Hours)
- BUS 120 Business Organization ................................................. (3)
- OFT 140 College Keyboarding I
  OR
- OFT 141 College Keyboarding II*
  ................................................................. (3)
- OFT 150 Basic Accounting
  OR
- OFT 210 Word Processing I*** .............................................. (3)
- OFT 156 Office Communications ............................................. (3)
- OFT 247 Office Procedures I .................................................. (3)

Second Semester (15 Credit Hours)
- OFT 141 College Keyboarding II
  OR
- OFT 213 Office Automation ...................................................... (3)
- OFT/BUS 200 Office Management ............................................ (3)
- OFT 210 Word Processing I
  OR
- OFT 150 Basic Accounting** .................................................. (3)
- OFT 248 Office Procedures II .................................................. (3)
- Business Elective ................................................................. (3)

Notes:
* Placement will be based on student’s skills. The student is required to take OFT 141 College Keyboarding II in order to receive the certificate.
** OFT 140 College Keyboarding I or permission of instructor is a prerequisite for this course. Also, the student must take OFT 210 Word Processing I if enrolling in OFT 141 College Keyboarding II during the first semester.
*** The student must take OFT 150 Basic Accounting if OFT 141 College Keyboarding II has been taken in the first semester.

Program Overview
The purpose of this program is to allow those individuals in the community who possess a college degree in something other than paralegal the opportunity to pursue a Certificate in Paralegal without the redundancy of additional general education courses.

The Certificate in Paralegal is designed for those students who already have an associate degree or higher college degree. The program is designed to be completed in 18 months taking evening classes 4 nights per week. The courses will focus on legal theory, practical legal skills and instruction on the twenty-first century office environment. The curriculum was developed following ABA guidelines and in consultation with area legal practitioners. The certificate is approved by the American Bar Association (ABA) and is designed to prepare students for entry level employment in a law firm, cooperation or other entity as a paralegal. The students will be required to complete one of two capstone courses: an actual internship in a law office or other legal environment or a course entitled “Law Office Practice” in which they will perform paralegal duties in a virtual law office under the supervision of an attorney/instructor.

Students wishing to pursue the Paralegal Certificate Program must provide evidence of completion of either an associate's degree or a bachelor's degree with at least 18 credits in a liberal arts curriculum. Credits are fully transferable to FLCC's AAS Paralegal program.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 33 credit hours with a grade point average of not less than C (2.0). For this certificate, you must successfully complete:

Paralegal
- PLG 100 Introduction to Legal Practice
- PLG 115 Computers in the Law Office
- PLG 125 Legal Research and Writing I
- PLG 210 Real Property Law and Practice
- PLG 225 Legal Research and Writing II
- PLG 230 Family Law
- PLG 235 Administration of Wills, Trusts and Estates
- PLG 240 Courts and Litigation
- PLG 250 Paralegal Internship
  OR
- PLG 265 Law Office Practice

Office Technologies
- OFT 156 Office Communications
- BUS/OFT 200 Office Management

Sample Schedule
The following schedule shows how the requirements for the Paralegal Certificate may be met. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. All students should consult their advisors when they plan their schedules.

First Semester (12 Credit Hours)
- PLG 100 Introduction to Legal Practice ............. (3)
- PLG 115 Computers in the Law Office ............... (3)
- PLG 125 Legal Research and Writing I ............... (3)
- OFT 156 Office Communications ...................... (3)

Second Semester (9 Credit Hours)
- PLG 210 Real Property Law and Practice ............... (3)
- PLG 225 Legal Research and Writing II ............... (3)
- PLG 250 Paralegal Internship
  OR
- PLG 265 Law Office Practice ........................... (3)

Third Semester (12 Credit Hours)
- PLG 230 Family Law ........................................ (3)
- PLG 235 Administration of Wills, Trusts and Estates (3)
- PLG 240 Courts and Litigation ............................. (3)
- BUS/OFT 200 Office Management ........................ (3)

Notes:
A minimum typing competency of 35 WPM through testing or successful completion of OFT 100 and OFT 131 will be required to receive the Paralegal Certificate.

Program Overview
Did you know that FLCC is the only higher education institution in New York state offering the Taxidermy Certificate Program? Your employment opportunities after graduating from this one-year program include full-time taxidermy positions with federal or state agencies or private enterprise. You may even be employed by museums that employ full-time taxidermists. Courses in this certificate are transferrable to related A.A.S. programs in Conservation.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 30 credit hours with a grade point average of not less than C (2.0). For this certificate, you must successfully complete:

Art
- ART 107 Natural Forms
- 3 credit hours Art Electives

Conservation
- CON 102 Introduction to Fish and Wildlife
- CON 200 Field Experiences in Conservation I
- 4 credit hours of Conservation Electives

Taxidermy
- TAX 100 Principles of Taxidermy
- 9 credit hours of Taxidermy Electives

General Electives
- 3 credit hours of General Electives

Sample Schedule
The following schedule shows how the requirements for the Taxidermy Certificate may be met. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. All students should consult their advisors when they plan their schedules.

First Semester  (16 Credit Hours)
- TAX 100 Principles of Taxidermy .......................... (3)
- Taxidermy Elective ........................................ (3)
- General Elective ........................................... (3)
- Art Elective ................................................ (3)
- Conservation Elective ................................... (4)

Second Semester  (14 Credit Hours)
- Taxidermy Elective ........................................... (3)
- Taxidermy Elective ........................................... (3)
- ART 107 Natural Forms ................................... (3)
- CON 102 Introduction to Wildlife and Fish .......... (3)
- CON 200 Field Experience in Conservation I ...... (2)

Notes:

Taxidermy Electives: TAX 101 Small Mammal Taxidermy, TAX 102 Fish Mount Preparation, TAX 201 Bird Mount Preparation, TAX 202 Topics in Advanced Taxidermy.

Teaching Assistant Certificate
HEGIS 5503

Program Overview
If you envision yourself working in the classroom, FLCC’s Teaching Assistant Certificate is designed for you! In this program, you’ll complete courses that will prepare you to test for certification through the New York State Education Department. You will take courses in Humanities, Social Science and Math. You also will benefit from two required courses, GST 201 Teacher Assistant I and GST 202 Teacher Assistant II, which will prepare you for teacher assistant positions in the area of public education; these courses focus on federal and state laws and regulations, child and adolescent development and learning, classroom and behavior management, and instructional strategies.

After graduation, you will be eligible to apply for the Teaching Assistant Level III certification through the New York State Department of Education. Credits are fully transferable to FLCC’s A.A. Liberal Arts and Sciences: Childhood Education (Teacher Education Transfer) degree program or A.A. Liberal Arts and Sciences degree program.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 24 credit hours with a grade point average of not less than C (2.0). For this certificate, you must successfully complete:

Humanities
- ENG 101 Composition I AND ENG 102 Introduction to Literature
  OR
- ENG 104 Freshman English I Honors
  AND ENG 105 Freshman English II Honors
- COM 110 Public Speaking
  OR
- COM 115 Interpersonal Communication

Teaching Assistant
- GST 201 Teacher Assistant I
- GST 202 Teacher Assistant II

Social Science
- PSY 100 Introduction to Psychology

Mathematics
- MAT 180 Mathematics for Elementary School Teachers I

General Electives
- 3 credit hours of General Electives*

Sample Schedule
The following schedule shows how the requirements for the Taxidermy Certificate may be met. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. All students should consult their advisors when they plan their schedules.

First Semester (12 credit hours)
- ENG 101 Freshman English ........................................... (3)
  OR
- ENG 104 Freshman English I Honors ............................ (3)
- GST 201 Teacher Assistant I ................................. (3)
- MAT 180 Mathematics for Elementary School Teachers I .... (3)
- PSY 100 Introduction to Psychology .............................. (3)

Second Semester (12 credit hours)
- ENG 102 Introduction to Literature .............................. (3)
- ENG 105 Freshman English II Honors ......................... (3)
- COM 110 Public Speaking ................................ (3)
  OR
- COM 115 Interpersonal Communication ..................... (3)
- GST 202 Teacher Assistant II ................................. (3)
- General Elective* ........................................... (3)

Notes:
* General Electives should be determined in consultation with the student's advisor.

Wildland Fire Suppression Certificate
HEGIS 5507

Program Overview
Your career in Wildland Fire Suppression is within reach! FLCC’s Wildland Fire Suppression certificate offers a solid foundation in wildland fire suppression. This certificate will provide you with the training wildland fire fighters need for the Federal Interagency “Red Card” and will meet and exceed the minimum requirements for state and federal agencies that hire wildland fire fighters.

If you plan to pursue employment with the New York State Department of Environmental Conservation (DEC) and federal agencies such as the U.S. Forest Service, the Bureau of Land Management, the National Park Service and U.S. Fish and Wildlife Service, this program is for you! This certificate also is perfect for you if you have a general interest in wildland fire suppression, or if you are a volunteer firefighter who would like to expand your knowledge and career opportunities. Courses in this certificate are transferable to FLCC’s related A.A.S. programs in Conservation.

Courses are offered in the evening and on weekends to accommodate the schedules of busy adult students and employed students.

You may also receive federally-recognized certification through the completion of Wildland Fire Suppression (S130/S190); Portable Pumps and Water Use (S211); Fire Fighter Type I (S131/S134); Wildland Fire Chain Saws (S212); Basic Incident Command System (I100/I200); and Fire Operations in the Wildland/Urban Interface (S215).

If you are a prospective firefighter, you must first complete WFS 130/CON 255 Wildland Fire Suppression, offered as part of this certificate program. This course provides the required training to obtain the S130 and S190 state and federally-recognized certification. Additionally, you must pass an employer’s physical fitness test consisting of a timed run or “pack” test.

Curriculum Requirements
As a student in this program, you are required to complete a minimum of 27 credit hours with a grade point average of not less than C (2.0). For this certificate, you must successfully complete:

Humanities
• COM 110 Public Speaking
  OR
• COM 115 Interpersonal Communication

Conservation
• 6 credit hours of Conservation Electives

Wildland Fire Suppression
• WFS 100 Orienteering
• WFS 101 Fire Science Agencies and Careers
• WFS 130/CON 255 Wildland Fire Suppression
• WFS 131 Firefighter Type I
• WFS 200 Basic Incident Command System
• WFS 211 Portable Pumps and Water Use
• WFS 212 Wildland Fire Chain Saws
• WFS/CON 256 Fire Ecology
• 2 credit hours of Wildland Fire Suppression Electives

Physical Education
• PE 214 Advanced First Aid, CPR and AED

Sample Schedule
The following schedule shows how the requirements for the Taxidermy Certificate may be met. This schedule is an example of one of many possible different schedules. It is included here only as an illustration of the type of schedule that might be followed by a full-time student. All students should consult their advisors when they plan their schedules.

First Semester (15 Credit Hours)
• COM 110 Public Speaking .................................. (3)
• COM 115 Interpersonal Communication ............... (3)
• WFS 100 Orienteering .................................. (1)
• WFS 101 Fire Science Agencies and Careers ........ (1)
• WFS 130/CON 255 Wildland Fire Suppression ....... (2)
• WFS 211 Portable Pump and Water Use ............. (2)
• Conservation Elective ................................... (3)
• PE 214 Advanced First Aid, CPR and AED .......... (3)

Second Semester (12 Credit Hours)
• WFS 131 Fire Fighter Type I ............................ (1)
• WFS 200 Basic Incident Command System .......... (1)
• WFS 212 Wildland Fire Chain Saw .................... (2)
• WFS/CON 256 Fire Ecology .......................... (3)
• Wildland Fire Suppression Elective ................... (2)
• Conservation Elective ................................... (3)

Coaching Courses Leading to Certification

The Outlook
FLCC offers an online three-course sequence (PE 230, PE 231, and PE 232) designed to prepare you for the Coaching certification required for coaching athletic teams in New York state public schools.

All courses are offered online through the SUNY Learning Network. These courses will provide you with an understanding of the basic philosophy and principles of Athletics in Education, the health-related aspects of athletes, and the techniques used to coach a specific sport. For more information, call 585.785.1459, or email lowdenrf@flcc.edu.

Course Requirements
- PE 230 Philosophy, Principles, and Organization of Athletics in Education
- PE 231 Theory and Techniques of Coaching
- PE 232 Health Sciences Applied to Coaching
Course Descriptions

The following pages present descriptions of courses offered at Finger Lakes Community College. Students are advised to consult the official list of course offerings issued prior to the start of each semester before making up their schedules.

All courses offered at Finger Lakes Community College are equal to, in content and quality, freshman and sophomore courses offered at most four-year colleges and universities. Courses offered at Finger Lakes Community College are identified under the following system.

How to read a course description

1. Prefix
Courses are listed alphabetically by their prefix. Prefixes appear in capital letters and range from two to four letters long. They indicate the course’s subject matter. For example, ACC is the prefix for courses in the accounting subject area.

2. Course Number
A course number is assigned to identify the specific course and whether it is a first- or second-year course. Courses numbered in the 100s are considered first-year. Those numbered in the 200s are second-year courses. For example, ACC 101 is a first-year accounting course, and ACC 201 is a second-year accounting course.

3. Title

4. Lecture, Lab, or Contact Hours
The numbers in parentheses signify the number of lecture hours, lab hours, or other contact hours per week if the course is offered for 15 weeks. The first number is the lecture hours per week, followed by the lab hours. Occasionally these are followed by a third number designating additional contact hours of recitation or seminar.

5. Credit Hours
The number of credits you will earn for this course.

6. Description

7. Semester Offered
F – Fall Semester
S – Spring Semester
B – Both or either Spring and Fall Semesters
WS – Winter Session (January Intersession)
SU – Summer Session

8. Prerequisites
Certain courses require that you have prerequisites in order to add that course to your schedule. These courses are identified by the word “Prerequisite” at the end of the course description in WebAdvisor and in the College Catalog. Prerequisites may be successful completion of one or more college level courses with a C- or better unless otherwise noted and/or a minimum placement test score.

Co-requisite: Concurrent (simultaneous) enrollment in or prior successful completion of a companion course is required.

Imputed Credit: Credit assigned to remedial courses that can be used for financial aid purposes but does not count as fulfilling requirements for a degree.

Dual-Listed Courses

The following courses are offered under two different course prefixes and are called “dual-listed.” Students opt for one of the two prefixes at the time of registration, depending on their curriculum requirements.

BIO/CON 103  Environmental Science
BIO/HRT 151  Plant Materials
BIO 221/CON 202  Principles of Terrestrial and Aquatic Ecology
BIO/NUR 223  Pathophysiology
BIO 225/CON 211  Ornithology
BIO 245/CON 210  Field Natural History
BIO 250/CON 205  Field Botany
BIO/CON 246  Limnology
BUS/COM 122  Television Advertising
BUS/COM 203  Public Relations
BUS/CSC 212  MS Excel for Business Applications
BUS/CSC 247  Electronic Commerce
BUS/OFT 200  Office Management
BUS/PSY 124  Organizational Behavior
CON/CJC 118  Introduction to Natural Resource Law
CON/GIS 130  Introduction to Geographic Information Systems
CON/GJC 233  Laws for the Use and Protection of Water and Land Resources
CON/CJC 234  Laws for the Management of Air Resources, Solid Waste and Hazardous Substances
CON/ENV 217  Environmental Planning and Impact Analysis
CON/HRT 221  Conservation/Horticulture Topics I
CON/HRT 222  Conservation/Horticulture Topics II
CON/HRT 223  Conservation/Horticulture Topics III
CON/PHL 110  Sustainable Earth: Spiritual and Scientific Consilience
CON 255/WFS 130  Wildland Fire Suppression (S-130/S-190)
CON/WFS 256  Fire Ecology
ENG 213/THE 210  Introduction to Dramatic Literature
HIS/HUM 100  Shaping of Western Society I
HIS/HUM 101  Shaping of Western Society II
HRT/VIT 100  Introduction to Wines and Vines
HRT/VIT 105  Basic Viticulture Techniques
MAS 225/NUR 220  Alternative Therapies
NUR 270/PHL 170  Ethical Considerations in Health Care
PE/THE 181  Mime
PSY/SCI 215  Biological Psychology
SCI 220/CON 220  Glacial Environments of the Finger Lakes

Offering Times
F – Fall Semester
S – Spring Semester
B – Both or either Spring and Fall Semesters
WS – Winter Session (January Interseession)
SU – Summer Session
Accounting

ACC 101 Principles of Financial Accounting (4-0) 4 hrs.
The emphasis of this introductory course is to develop an understanding of accounting information systems for the business entity and for the individual. The basic concepts, procedures, business documents, and financial statements are included as they relate to the accounting cycle. Analysis of business decisions is stressed for the internal and external aspects of the business. ........................................ B

ACC 102 Principles of Managerial Accounting (4-0) 4 hrs.
This course is an introductory course in managerial accounting. Fundamentals cost accounting concepts, financial statement analysis, profitability analysis, budgeting and decision making issues will be discussed. Prerequisite: ACC 101 ........................................ B

ACC 201 Intermediate Accounting I (3-0-1) 4 hrs.
Stresses a broader application of accounting principles. Theory is emphasized as it relates to valuation and changes in the financial position and operations of the business entity. Problems and cases are studied as they relate to generally accepted accounting principles. Prerequisite: ACC 102 ................................. F

ACC 202 Intermediate Accounting II (3-0-1) 4 hrs.
A continuation of ACC 201, stressing a broader application of principles in previous accounting courses. Prerequisite: ACC 201 ................. S

ACC 205 Cost Accounting (3-0) 3 hrs.
A systematic study of the fundamental procedures applied in the determination of production costs and inventory balances. Analysis of cost behavior and decision-making for planning and control of the business are also covered. Prerequisites: ACC 102 ................. B

ACC 207 Income Tax Accounting (3-0) 3 hrs.
This course is designed to familiarize accounting students with aspects of income taxation of individuals and provide a foundation upon which they can act in either an advisory or functional capacity. Prerequisite: ACC 102 ......................... B

ACC 210 Contemporary Accounting Applications (3-0) 3 hrs.
Provides an in-depth study of current accounting applications in the private sector, with emphasis on the more widely-used applications packages available to the modern accountant. Topics will include computerized accounting packages, accounting information systems, auditing and control, and the accountant's role in the organization. Prerequisite: ACC 102 ......................... B

American Sign Language

ASL 101 American Sign Language I (3-0) 3 hrs.
The course is the first in a series of courses designed to develop the skills and knowledge needed to communicate in American Sign Language. This course introduces basic sign language vocabulary and fingerspelling. In addition, students will be introduced to aspects of American Deaf culture and history. Other relevant topics will be addressed. ....................... B

ASL 102 American Sign Language II (3-0) 3 hrs.
The course is the second in a series of courses designed to develop the skills and knowledge needed to communicate in American Sign Language. This course continues to develop American Sign Language vocabulary and sentence construction as well as fingerspelling. In addition, students will continue to refine their knowledge of the Deaf community and Deaf education. Other relevant topics will be addressed. Prerequisite: ASL 101 or requisite experience .......................................................... B

ASL 110 Deaf Culture and Community (3-0) 3 hrs.
This course will introduce students to the intercultural and socio-cultural aspects within Deaf culture and the deaf community. The purpose of the course is also to increase students' knowledge of and experience with Deaf culture, the deaf community, and the issues relating to the deaf community within the majority hearing culture. ........................................ B

ASL 111 ASL For Health Care Professionals (3-0) 3 hrs.
This course is designed to address the communicative needs between health care professionals and the deaf community. Target specific vocabulary, conversational phrases, and context specific situational interactions will be the main objectives. Topics on cultural practices and interactions common in the deaf community will be discussed. In addition, the law, Americans with Disabilities Act (ADA) specific to the deaf patient, and the role of interpreters in the health care setting will be addressed. ......................... S

ASL 201 American Sign Language III (3-0) 3 hrs.
American Sign Language III is an intermediate course that emphasizes and expands on grammar, syntax, spatial referring, classifiers, and vocabulary development. Sentence constructions will be reviewed and communicative competencies in ASL beyond the basic level will be addressed. Fluency and accuracy of fingerspelling will be developed as well as the use of lexicalized signs. Prerequisite: ASL 102 or requisite experience ......................... F

ASL 202 American Sign Language IV (3-0) 3 hrs.
The course, the fourth in a series of American Sign Language courses, focuses upon the grammatical features of ASL and ASL vocabulary. Content of the course will focus on sentence constructions (topics/comment statements, yes/no and wh-word questions, rhetorical questions, negative statements and conditional sentences), classifiers, inflecting verbs, and role-shifting. Fluency and accuracy of fingerspelling will continue to be developed as well as the use of lexicalized signs and numbering. Prerequisites: ASL 201 or requisite experience ................................. S

Anthropology

ANT 110 Human Prehistory (3-0) 3 hrs.
An introduction to early human biological and cultural variability emphasizing evolution, cultural adaptation and cultural change within different environments using the subfields of physical anthropology and archaeology. ........................................ B

ANT 111 Cultural Anthropology (3-0) 3 hrs.
An introduction to the ethnology that is the cross-cultural study of the diverse adaptive patterns humans use to satisfy the requirements of life in specific natural and socio-cultural environments. Data will be drawn from contemporary nonindustrial and urban industrial societies to illustrate how and why cultural variations exist in today's ever-shrinking world. B

ANT 200 Comparative Cultures (3-0) 3 hrs.
A comparative approach to the content and processes of culture as adaptation. This course will examine and describe the ways selected pre-literate and complex societies have used culture to adapt to their environments. Case studies drawn from American, Asian, African and European societies will be the basis for engaging in cross-cultural studies ......................... B

Agronomy

AGR 100 Soil Science (3-0) 3 hrs.
A study of origin of soils, soil formation, taxonomy, physical and chemical properties, bacteria and fungi, organic matter, water and fertility. .................. B
ART 100 Art History I (3-0) 3 hrs.
A study of the creative process with development of an appreciation and understanding of the history and methods of artistic expression from prehistoric art to the middle ages. This course may be taken to fulfill either a humanities or social science elective and can be taken for SUNY Gen. Ed. credit in the arts knowledge and skill area.

ART 101 Art History II (3-0) 3 hrs.
A study of the creative process with development of an appreciation and understanding of the history and methods of artistic expression from the Renaissance to the present. Class will cover European, American, and Contemporary art. This course may be taken to fulfill either a humanities or social science elective and can be taken for SUNY Gen. Ed. credit in the arts knowledge and skill area.

ART 102 Foundation Drawing I (4-0) 3 hrs.
The foundation for all studio courses. The fundamentals of freehand drawing techniques are discussed and worked with in depth. The study of natural forms and three-dimensional still-life objects will be developed based on the study of line, perspective, light and shade, form and proportion...

ART 103 Foundation Drawing II (4-0) 3 hrs.
A continuation of ART 102. Study of contour drawing including indication of surface texture, form, line, value and composition. Students work in various media. Prerequisite: ART 102 or permission of instructor...

ART 104 Design I (4-0) 3 hrs.
A broad foundation in the principles and elements of design are applied to two-dimensional work. Various media and their application are employed.

ART 105 Design II (4-0) 3 hrs.
A continuation of ART 104. Emphasis is placed on color theory and its application to two-dimensional design. Prerequisite: ART 104 or permission of instructor.

ART 106 Ceramics I (4-0) 3 hrs.
A study of the basic techniques of ceramic materials, slab building, coil, wheel throwing, firing and glazing; and ceramics as an art form, with emphasis on design and function.

ART 107 Natural Forms (3-0) 3 hrs.
An introduction to two- and three-dimensional representation of natural forms (i.e. plant and animal), using basic drawing and sculpture techniques.

ART 115 Computer Imaging (4-0) 3 hrs.
An introduction to techniques of creating computer-generated images for commercial and fine art. Hands-on experience with drawing and design packages for the non-programmer.

ART 116 Computer Publishing (4-0) 3 hrs.
An introduction to the use of computers in creating publications. Topics include the Publishing Industry, Typographical Design, Grids, Layout and Graphic Techniques. Prerequisite: ART 115.

ART 200 Figure Drawing I (4-0) 3 hrs.
Representation and dynamic drawing of the human figure based on observation of organic relationship, gestures, action, motion, and rhythm. Prerequisite: ART 103.

ART 201 Figure Drawing II (4-0) 3 hrs.
A continuation of ART 200. Drawing form figures to develop proportion, structure, gesture, movement, and composition, in various media. Prerequisite: ART 200.

ART 202 Painting I (4-0) 3 hrs.
Introduction to painting, using still-life and portraiture as the basis for the study of light, color and form. The basic material is oil; however, acrylic paint and other media will be used. Prerequisites: ART 102, ART 103.

ART 203 Painting II (4-0) 3 hrs.
A continuation of ART 202, with more advanced problems for the experienced students. Prerequisite: ART 202.

ART 204 Painting II (4-0) 3 hrs.
A continuation of ART 204, with an emphasis on individual projects. Students will further an understanding of three-dimensional form by working with different processes and media such as: woodworking, welding, carving, and casting in bronze. Prerequisite: ART 205.

ART 205 Modeling and Sculpture I (4-0) 3 hrs.
Working from life, developing three-dimensional understanding of the figure and sculpture techniques. Casting, working with composition, and portraiture.

ART 206 Modeling and Sculpture II (4-0) 3 hrs.
A continuation of ART 205, with an emphasis on individual student projects. Students will further an understanding of three-dimensional form by working with different processes and media such as: woodworking, welding, carving, and casting in bronze. Prerequisite: ART 205.

ART 207 Photography I (4-0) 3 hrs.
An introduction to black & white photography covering basic techniques of camera operation, artistic picture composition, film processing and printing. Students should have an adjustable camera.

ART 208 Photography II (4-0) 3 hrs.
This course offers advanced photographic instruction for those with basic camera and darkroom experience. It introduces the skills related to the capture, editing and printing of digital images. Emphasis will be on artistic expression and style through the use of digital technology. Film or digital cameras may be used. Prerequisite: ART 207.

ART 209 Printmaking I (4-0) 3 hrs.
An introductory survey of the processes used in the production of multiple, fine art prints. Basic techniques of woodcut, dry-point and monotypes will be explored. Prerequisite: ART 102 or ART 200.

ART 210 Printmaking II (4-0) 3 hrs.
A continuation of ART 209. Emphasis will be on further development of intaglio techniques including line etching, aquatint, and soft-ground impressions. Prerequisite: ART 209.

ART 211 Ceramics II (4-0) 3 hrs.
A continuation of ART 106. The course will introduce the student to more challenging techniques and processes, expanding the scope and dimension of previously learned material. Prerequisite: ART 106.

ART 212 History of American Art (3-0) 3 hrs.
A study of the history of American painting, sculpture, architecture, decorative arts and photography from the early colonial period to the present day.

ART 213 Graphic Design I (2-2) 3 hrs.
The student will have an intensive introduction to the technical and aesthetic aspects of communication relative to graphic design. This will include typography, design application, communication language, comprehensive layout, technical considerations, research and development of ideas. The subject matter will be presented based on current industry standards. Prerequisite: ART 105.
ART 216 Graphic Design II (2-2) 3 hrs.
The student will be given practical graphic problems to solve using established design principles as well as current pre-press production techniques. The student will be developing an expressive awareness from a graphic viewpoint. Students will learn the process and skill of presentation, and in so doing, build a personal graphics portfolio for entry into the job market or the next level of education. Prerequisite: ART 215. .............. S

ART 220 Graphic Illustration (3-0) 3 hrs.
This course will focus on the process of illustration through the exploration of professional working methods leading to the production of a portfolio representative of advertising, corporate, editorial and publishing themes. Prerequisite: ART 103. ................................. S

ART 221 Advanced Drawing (4-0) 3 hrs.
This course will emphasize the development of the student's visual vocabulary and more personal approaches to media, technique, and thematic content. This course will be offered only in the fall semester. Prerequisite: ART 103. ................................. F

ART 222 Design for the Web (4-0) 3 hrs.
This course introduces the skills related to the design, production and maintenance of web based graphics. Emphasis will be on the visual and communicative aspects of site design with the integration of multimedia components. Prerequisite: ART 115, ART 215. ................................. S

ART 223 Women in Art (3-0) 3 hrs.
A survey of the achievements of women painters, sculptors, architects, designers, photographers, and craftpersons from earliest times to the present. In addition, woman as image in the visual arts will be examined as it relates to her role in society. Prerequisites(for art students): ART 100 and ART 101........................................... S

ART 250 Graphic Design Internship 3 hrs.
The Internship provides a hands-on work experience for the Graphic Design student in a professional work environment. A minimum of 120 work hours will be required. Students will be required to enter into an internship contract, complete an orientation, and submit a portfolio and written report at the conclusion of the work experience. Prerequisite: ART 215, instructor approval and a minimum GPA of 2.5. (Satisfactory or Unsatisfactory grade). ................................. WS/SU

Biology

BIO 103 Environmental Science (3-2) 4 hrs.
Environmental Science is a course that explores the interactions and relationships between humans and the Earth. The course will follow the basic themes of sustainability and critical analysis of environmental issues. Students will gain an understanding and appreciation of the impact of humans on the environment while studying ecosystems, the human population, renewable resources, energy, pollution and its prevention, and ways to work toward a sustainable future. In the laboratory component of the course students will learn scientific methodology, sampling procedures and methods used to test environmental quality. A portion of the lab will include outdoor experiences. ................................. B
(Also listed as CON 103)

BIO 110 Fundamentals of Human Anatomy and Physiology (3-0-1) 3 hrs.
Study of the basics of human anatomy and physiology including anatomical terminology, basic biochemistry, cells and tissues, and the integumentary, skeletal, muscular, nervous, endocrine, cardiovascular, lymphatic/immune, respiratory, digestive, and urinary systems. Introduction to common human disease processes. Four hours of lecture weekly with potential lab experience within the four contact hours (three credit hours). Prerequisite: Successful completion of all required remedial courses. ................................. B

BIO 115 Human Biology (3-2) 4 hrs.
A principles course with a laboratory experience designed for non-science majors. This course approaches basic biological principles with a human orientation. Basic chemistry, cell division, genetics, cancer, systems physiology, evolution and human ecology are the major topics. The course will consist of three hours of lecture and two laboratory hours weekly (four credit hours). Prerequisite: Successful completion of all required remedial courses. ................................. B

BIO 119 Contemporary Biology II (3-2) 4 hrs.
Part II of an introductory laboratory biology course for non-science majors. Topics covered in part II include: Evolution, biodiversity, plant and animal anatomy and physiology, ecology, and environmental science. The emphasis is on application of basic biological principles to contemporary issues and problems. Students will achieve basic scientific literacy with a goal of improved critical thinking, writing, and problem-solving skills. Three hours of lecture and two hours of laboratory weekly. Prerequisite: Successful completion of all required remedial courses. ................................. B

BIO 121 General Biology I (3-2) 4 hrs.
Basic principles of biology, photosynthesis and respiration, levels of cellular complexity, genetics and evolution. Prerequisite: Successful completion of all required remedial courses. ................................. B

BIO 122 General Biology II (3-2) 4 hrs.
A study of evolutionary concepts and survey of taxonomic levels of organization (domain, kingdom, phylum, class, order, family, genus, species). Emphasis will be on anatomical/physiological adaptations, life history traits and ecology of representative organisms. Prerequisite: BIO 121. ................................. B

BIO 151 Plant Materials (3-0) 3 hrs.
This course exposes students to the identification, selection, adaptation, and utilization of common ornamental and native plants in New York State. Landscape value and wildlife usage of plants will be discussed where appropriate. The student will gain identification proficiency in association with knowledge of plant pattern and environmental planning. Field trips to Canandaigua area plant viewing locations are included. ................................. F
(Also listed as HRT 151)

BIO 165 Kinesiology and Myology I (3-3) 4 hrs.
This is a lecture and laboratory course designed to acquaint students with a detailed study of the major muscles of the lower torso and extremities of the body and their function. Focus will be placed on the origin, insertion, action, innervation, and range of motion of specific muscles. This course includes the study of the name, shape, and location of bones and tendons, as well as their related joints. Prerequisite: BIO 171 and Corequisite: BIO 172. ................................. S

BIO 171 Human Anatomy & Physiology I (3-2-1) 4 hrs.
Structure and function of the human body dealt with at the following levels of organization: chemical/biochemical, cell/tissue, organ/system. Organ systems include integumentary, skeletal, muscular, digestive, nervous and
BIO 172 Human Anatomy & Physiology II (3-2-1) 4 hrs.
A continuation of BIO 171 to include the circulatory, respiratory, urinary, reproductive and endocrine systems, along with genetics and pH balance. Laboratory will constitute a continuation of BIO 171 lab studies: microscopic and macroscopic levels of analysis, the latter including electronic apparatus, mammalian dissection, and elementary physiological experiments. Prerequisite: BIO 171. .................................................. B

BIO 210 Winter Ecological Adaptations and Field Techniques (0-0-3) 3 hrs.
A five day residential course with a combination of lecture and field work to foster student proficiency in the over wintering adaptations of organisms in the northeast, specifically the Finger Lakes region. Adaptations of mammals will be emphasized. Lectures will focus on identification, natural history, behavior, physiology and ecology of mammals. Laboratory will include field trips to various habitats in and around Honeoye, NY, identification of animal signs, and mark & recapture techniques to assess habitat selection of small mammals residing in the subnivean environment. Prerequisites: BIO 122. ................................ B

BIO 214 Herpetology: Natural History and Field Techniques of NY State Amphibians and Reptiles (3-2) 4 hrs.
An investigation of amphibians and reptiles of NY State, specifically the Finger Lakes Region, including, but not limited to ecology, behavior, natural histories, environmental impact and evolutionary relationships. A 5 day residential component for Amphibian and reptile identification and learning field sampling techniques will be an integral part of this course. Evaluation of students is based on 1) class participation, 2) group summary of field project, 3) critique of oral presentation of natural history of a species, 4) maintenance of a field journal, 5) identification of amphibians and reptiles of northeast. Prerequisite: BIO 122. .......................................... S

BIO 221 Principles of Terrestrial and Aquatic Ecology (3-0) 3 hrs
A study of climatic, edaphic and biotic factors as they relate to species distribution and population dynamics in selected biomes of New York State and the world. Students develop deeper understanding of the ecological principles concerning the interaction between organisms and their environment. Writing Intensive. Prerequisites: ENG 101 or ENG 104, BIO 121, BIO 122 or BIO 251. ............................ F
(Also listed as CON 202)

BIO 222 Introduction to Cell Biology (3-0-1) 3 hrs.
This course is designed to provide students with an intense study of cell structure and function. A wide range of topics will be covered and will include: biochemistry, membrane structure and function, organelle structure and function, the cell cycle and cancer, necrosis and apoptosis, cell signaling, and the cellular basis of tissue structure. Prerequisite: BIO 121. .................................................. S

BIO 223 Pathophysiology (3-0) 3 hrs.
This course is designed for students who wish to apply their knowledge of physiology to disease states occurring across the lifespan. The course will consist of a review of normal functioning of selected body systems, analysis of pathological function during disease of those systems and standard treatments for these pathological conditions. Prerequisite: BIO 171 and BIO 172 with a grade of B or higher. ................................. B
(Also listed as NUR 223)

BIO 225 Ornithology (3-2) 4 hrs.
The study of birds with special emphasis on anatomy, physiology, life histories and identification of birds common to Western New York. Lecture and laboratory work will be supplemented by several field trips, including early morning bird observations. Trips to selected local birding areas are required. Prerequisites: BIO 121, BIO 122. ................................. B
(Also listed as CON 211)

BIO 230 Microbiology (3-3) 4 hrs.
The course is designed to give the student a broad understanding of microbiology covering areas of microbial structure and function, growth, metabolism, genetics, control of microorganisms, principles of immunology, diseases of man and selected aspects of applied microbiology. The laboratory will give the student an appreciation of the problems and methods involved with culturing and identification of microorganisms. Three lecture hours, one two-hour laboratory period and one one-hour laboratory time to be assigned weekly. Prerequisite: BIO 121 & 122, or BIO 171 & 172. ....... B

BIO 240 Principles of Genetics (3-0) 3 hrs.
A course designed to introduce the student to the aspects of modern genetics. Topics will include: gene structure and function, Mendelian genetics, gene expression, recombinant DNA technology, population genetics with attention given to human aspects and applications. Prerequisite: BIO 121 or BIO 171; Corequisite: BIO 241. ............................ S

BIO 241 Laboratory in Genetics (0-3) 1 hr.
A laboratory offering to compliment BIO 240. This course provides a variety of laboratory experiences including classical, morphological, and molecular genetics. Corequisite: BIO 240. ............................ S

BIO 245 Field Natural History (3-0) 3 hrs.
This course is a series of extended field trips into a selection of local ecosystems such as gorges, bogs, streams, and marshes. Students will analyze these ecosystems both as examples of each ecological situation and as areas managed in different ways by man. Natural history topics such as insects, aquatic life, migratory birds, glacial geology, and human interactions with the environment are studied in appropriate areas. .............................. F
(Also listed as CON 210)

BIO 246 Limnology (3-2) 4 hrs.
An introduction to the scientific study of inland waters, Limnology concerns itself with all the factors that affect living populations within those waters. Through lecture and field experiences, the student will become familiar with physical and chemical processes in water, especially those that have a direct effect on biological organisms. Standard methods and highly technical instrumentation will be used on board the College’s educational vessel. A survey of life forms and identification skills will be emphasized as well as aquatic community structure and interactions. . . F
(Also listed as CON 246)

BIO 250 Field Botany (3-0) 3 hrs.
Field identification, taxonomy, habitat preferences, and growth characteristics of trees, shrubs and herbaceous plants are the major topics covered in this course. Emphasis is placed on local flora and its utilization by man and wildlife. Important ornamental trees, New York State rare plants, introduced plants that are management problems, nonvascular plants, and the ecology of the eastern deciduous forest biome are highlighted. Considerable class time will be spent outdoors on campus and at nearby natural areas. ................................. B
(Also listed as CON 205)

BIO 251 Plant Structure and Function (3-3) 4 hrs.
An integrated approach to the study of plant anatomy and physiology, dealing with both the total plant and its constituent parts. Emphasis is on plant growth, development and regulatory mechanisms. The student will follow the growth of a plant from germination to maturity, examining its anatomical and physiological development. Three hours lecture, three hours laboratory. Prerequisite: BIO 121. ................................. B
BIO 255 Plant Micropropagation (2-3) 3 hrs.
The asexual in vitro propagation of plants from tissues and cells utilizing sterile technique. Theory and practical application are stressed. Upon approval of the instructor and advisor, this course may be used as a Horticulture elective. Prerequisite: BIO 251 or BIO 122. B

BIO 260 Plant Pathology (3-2) 4 hrs.
Investigation of the nature, cause, diagnoses of plant health problems. The interaction of the environment, the disease causing organism, and the plant will be considered in relation to environmentally sound control. Site development and corrective horticulture practices in relation to health building will be considered. Students will be trained to identify common plant diseases including environmentally caused disorders. Field analysis, sampling and diagnostic techniques. Field Trips. Prerequisite: BIO 121, BIO 251. B

BIO 265 Kinesiology and Myology II (3-3) 4 hrs.
This is a lecture and laboratory course designed to acquaint students with a detailed study of the major muscles of the upper torso and extremities of the body and their functions, including a brief review of the muscles of the lower extremity covered in Kinesiology and Myology I. Focus will be placed on the origin, insertion, action, innervation, and range of motion of specific muscles. This course includes the study of the name, shape, and location of bones and tendons, as well as their related joints. Prerequisite: BIO 165. F

BIO 280 Entomology (2-2) 3 hrs.
This course investigates insect structure and function, ecology, behavior, and life histories of economically environmentally important insects. The relationship between these topics and biological chemical control will be discussed. Insect identification and insect sampling methods are emphasized. BIO 121. B

BIO 281 Biotechnology Module 1- Spectrophotometric Techniques (1-2) 1 hr.
A laboratory module introducing the student to techniques for quantitative visible and ultraviolet spectrophotometry. (Also listed as CHM 261) S

BIO 283 Biotechnology Module 3- Electrophoresis (1.5-0.5) 2 hrs.
A laboratory module introducing the student to polyacrylamide and agarose gel electrophoresis. Seven weekly laboratory exercises (4 hours each). Prerequisite: BIO 121. F

BIO 286 Cell and Tissue Culture Techniques (0.5-1) 1 hr.
A laboratory module introducing students to the basic techniques used in culturing tissues and cells. An emphasis will be placed on mammalian systems. Topics covered include sterile and aseptic technique, media preparation, cell count and viability cryopreservation, subculturing, and research applications using cell cultures. Prerequisite: BIO 222 or permission of instructor. S

BIO 287 Introduction to Biomanufacturing I (1-1/2) 1 hr.
Students in the Introduction to Biomanufacturing I course will learn how a biopharmaceutical makes its way from “bench to bottle.” Upstream and downstream manufacturing processes will be introduced through a combination of lecture and laboratory (hands-on) activities. Students will be introduced to regulatory affairs and will follow proper documentation procedures as outlined in the Good Laboratory and Good Manufacturing Practices (Food and Drug Administration). Prerequisites: BIO 121, BIO 122. F

BIO 288 Introduction to Biomanufacturing II (1-1/2) 1 hr.
Introduction to Biomanufacturing II is a continuation of Introduction to Biomanufacturing I. While part I introduced students to the process of bringing a biopharmaceutical from “bench to bottle,” this course focuses on the many functional areas specific to a biomanufacturing operation. Through a combination of lecture and laboratory (hands-on) activities, students will be introduced to the roles of these functional areas in the manufacturing process. Included in this exploration are the roles of technicians working in Environmental Health and Safety, Quality Control, Quality Assurance, and Validation. In addition, students will be exposed to basic analytical tools used in a manufacturing environment (RCA and FMEA). Students will continue the application of regulatory affairs introduced in part I of the course, and will follow proper documentation procedures as outlined in the Good Laboratory and Good Manufacturing Practices (Food and Drug Administration). Prerequisite: BIO 121, BIO 122, BIO 287. S

BIO 291 Research Methods in Biology (2-4) 3 hrs.
Under supervision of biology faculty mentors, students will select a research project, write a literature review and research proposal, conduct preliminary experiments, and write a research report. Research methods and experimental design will be emphasized, including the location and study of articles from the professional literature. The undergraduate research projects will help students develop valuable research skills, and it will provide students with an opportunity to apply scientific knowledge in the context of “real world” problems. Participation will also open up opportunities for students to take part in analyzing data and conducting field research. One two-hour lecture period, and four hours of laboratory work per week. Students must also schedule time for consultation with the supervising faculty member. Prerequisites: BIO 121, 122, and permission of the instructor. S

BUS 100 Introduction to Tourism (3-0) 3 hrs.
This course is designed to provide an overview of the tourism industry. The student will be exposed to the various components which comprise tourism. There will be opportunities for the student to observe the tourism industry through field experiences. This course provides the basis for further study in the hospitality programs. Students enrolled in this course, as an elective, will have the opportunity to explore another business-related field as a career option. B

BUS 120 Business Organization (3-0) 3 hrs.
Introduction to such business factors as ownership, careers, dynamics of business, organizational structures, production, marketing, finance, government regulations, business ethics, and current topics. B

BUS 122 Television Advertising (3-0) 3 hrs.
A workshop planning, writing and producing television commercials. Students will receive experience in writing, production techniques (recording and videotaping commercials), and evaluating advertising. (Also listed as COM 122) B

BUS 123 Business Communications (3-0) 3 hrs.
A comprehensive introduction to the theory and practice of basic business communication skills. Emphasis is placed on the process of communication and on typical forms of business communication such as business reports, business letters, speeches, and resumes. Prerequisite: ENG 101 or ENG 104. B

BUS 124 Organizational Behavior (3-0) 3 hrs.
Organizational Behavior is an introductory business course that will provide information to the student about individuals, groups, organizational structure and function. Topics to be studied include: Interpersonal Communications, Decision-making, Human Perception, Dynamics of Groups, Human Needs and Motivation, Concept of Organization,
BUS 126 Introduction to Sports Studies (3-0)  3 hrs.
This course is designed to provide an introduction to sport management and an overview of the role and scope of sport events, sport management and sport marketing as they contribute to the planning and development of a sport business or tourism destination. The student will study the components of management as applied to sport enterprises, as well as the historical, psychological and sociological foundations of sport. The student will understand the components of sport management, event logistics, sponsorship, hospitality, use of volunteers, and licensing agreements. The student will be exposed to various sports and tourism careers...

BUS 131 Personal Money Management (3-0)  3 hrs.
This course deals with management of personal finances over the life cycle of the individual consumer. Topics covered include establishment of personal financial objectives, budgeting, use of credit, property, liability and life insurance, major purchases such as housing, transportation and education; taxes, savings, investments, and retirement and estate planning...

BUS 142 Professional Selling (3-0)  3 hrs.
A study of the fundamentals of professional selling as a prerequisite to the success in retailing and business occupations. Emphasis is placed on acquiring effective communication skills, self-confidence, and basic selling techniques through practical demonstration, on-site observation, and practice in retail setting. The importance of product knowledge, consumer buying motivations, and the role played by the salesperson in the store's total image are examined...

BUS 146 Retail Business Management (3-0)  3 hrs.
This course is an introduction to contemporary retailing as a service industry and profitable operation. A study is made of each of the five major organizational functions: merchandising, personnel, finance, operation, and promotion, with emphasis placed on career opportunities in each division...

BUS 147 Small Business Management (3-0)  3 hrs.
A management approach to the study of contemporary small business practices. Students evaluate alternatives to be considered in forming policies regarding organizational structure, location, financial and legal requirements, merchandising and service standards, personnel considerations, methods of operation, promotional strategy, inventory control and accounting procedures. This course will serve as preparation for the establishment and operation of a small retail business...

BUS 200 Office Management (3-0)  3 hrs.
This course is a comprehensive overview of the administration of the modern office in the public and private sector. The application of management principles to office operations will be covered. The course provides practical information about human relations, office technology, and management process. Prerequisite: BUS 120 or BUS 124...

BUS 203 Public Relations (3-0)  3 hrs.
This survey course introduces students to the field of public relations. It will describe the responsibilities and roles of the public relations professional in private and public companies. Topics covered will include the profession of public relations, the process of public relations, the publics involved in public relations and how public relations is practiced. Prerequisites: ENG 101.

BUS 205 Services Marketing (3-0)  3 hrs.
This course is designed to provide an introduction to the general principles of marketing and an in-depth study of services marketing theory. The concepts the student learns will enable them to develop the skills and attitudes required in our emerging service economy. The student will be exposed to the relationship between services marketing and the consumer experience. There will be opportunities for the student to apply services marketing theory utilizing case studies and models in health care, entertainment, business services, tourism, retailing and financial services. This course provides the basis for further study in marketing management...

BUS 210 Legal Environment of Business (3-0)  3 hrs.
This course is designed to provide a student with a knowledge of preventive law. The position of business in the legal environment and the interaction business has with legal entities will be examined by the understanding of jurisprudence, legal ethics, administrative law, anatomy of regulation, antitrust law, product liability and environmental law...

BUS 212 MS Excel for Business Applications (3-0)  3 hrs.
This course offers students the opportunity to master the advanced functionality of Microsoft Excel, and to apply those skills to genuine business applications such as financial modeling, reporting, and the automation of accounting and financial tasks. Although the basic functions of Excel will be covered, areas of focus include graphs and charts, the use of advanced financial functions and analytical tools, reporting templates, linking of worksheets and workbooks, importing and manipulating data, macros (automation of tasks), auditing tools, and other features especially useful to the financial or accounting professional. Prerequisites: ACC 101, MAT 110 (or higher), OFT 150.

BUS 215 Sustainable Tourism Planning (3-0)  3 hrs.
This course is designed to provide the student with knowledge regarding the role of management science in the design of a sustainable destination. The student will have an understanding of management science and its application to sustainable tourism destination planning and development. The planning process will be a major focus of study. The student will be exposed to management issues that relate to urban and rural tourism development. The student will have the opportunity to apply course concepts knowledge through case studies of selected destinations. The course will culminate with student teams developing a case study for a specific New York State destination.

BUS 220 Principles of Supervision (3-0)  3 hrs.
Practical application of planning, organizing meetings and committees, communicating with subordinates and supervisors, employee orientation training and appraisal, the supervisor and labor relations, problem solving, decision making, and management of time.

BUS 221 Principles of Management (3-0)  3 hrs.
The basic purpose of this course is to provide an understanding and appreciation of the part management plays in the successful operation of a business. The evolution of management practices is explored along with present applications in order to maintain effective coordination and control. Prerequisite: BUS 120.

BUS 222 Marketing (3-0)  3 hrs.
A comprehensive introduction to procedures and practices involved in marketing, such as: product research, development and packaging; pricing; sales, advertising and sales promotion; distribution and transportation; wholesalers and retailers; marketing research. This is an excellent course for all business-related majors as focus is placed upon marketing cooperation with all other business functions and disciplines.
BUS 224 Human Resource Management (3-0) 3 hrs.
A detailed study of personnel practices as they relate to the behavioral science concept of the management of human resources. Topics considered are recruitment, selection and training, motivation, job analysis, salary and wages, and performance appraisal. .................................................... B

BUS 225 Destination Marketing (3-0) 3 hrs.
This course is designed to provide an in-depth study of the variety of organizations and strategies utilized to market a destination. The student will study marketing management as it relates to a destination. The student will be exposed to the structures of destination marketing organizations, funding sources, and operations. There will be opportunities for the student to apply marketing management theory utilizing authentic destination marketing organizational models. This course provides an understanding of the various careers in destination marketing organizations. ........... S

BUS 227 Business Law I (3-0) 3 hrs.
A study of legal principles applied to business transactions. Topics covered include: court systems, constitutional authority, torts, contracts, criminal law and business and commercial paper. ................................. B

BUS 228 Business Law II (3-0) 3 hrs.
A continuation of BUS 227--the study of legal principles applied to business transactions. Topics covered include: partnerships, corporations, agency, franchises, bankruptcy, real property, personal property, sales and secured transactions. ........................................... B

BUS 229 Advertising (3-0) 3 hrs.
Examines advertising as an important component in managerial marketing. Emphasis is placed on objectives, media study, strategic planning, budget considerations, control, and the measurement of advertising effectiveness. The role of advertising agencies and departments are examined. ........... B

BUS 231 Sports Marketing (3-0) 3 hrs.
This course is designed to provide a study of the general principles of sports marketing. Students will study services marketing theory. The student will be exposed to the relationship between sports marketing, the success of sporting events, and the economic development for a destination. The student will study the effects sports marketing has upon the creation and development of sports facilities and venues. The student will study the role and impact of sports marketing intermediaries. The course emphasis will be focused upon public relations, sponsorship development, media relations, and various promotional techniques as they apply to professional, amateur, and youth sporting events. There will be opportunities for the student to apply sports marketing theory utilizing case studies. Prerequisite: BUS 126. ......................................................... F

BUS 232 Event Management (3-0) 3 hrs.
This course is designed to provide an introduction to the principles of event management. A conceptual framework will be developed through definitions, models, and the utilization of case studies. The student will learn how to formulate event tourism strategies for destinations. The planning, development, management, and implementation of festivals, entertainment events, corporate events, cultural events, and sports events will be the focus of study. Specific topics will include event studies, bid preparation, public and corporate sponsorship, negotiations, and volunteer staff management. Students will have the opportunity to volunteer and participate in a variety of authentic events and festivals. ........................................... S

BUS 235 International Business (3-0) 3 hrs.
This course is designed to provide an introduction to international business and the global economic environment in which it is conducted. The process of economic globalization, international law, global finance and currencies, and the impact of information technology on international business operations will be covered. The impact of global business competition on the workplace will be discussed. Special focus will be applied to understanding the business risks that arise when firms engage in international trade, and on how global business enterprises manage those risks. Prerequisites: BUS 120; ECO 100 or ECO 210. ......................................................... S

BUS 236 Special Topics in Business (3-0) 3 hrs.
This course is designed to select and analyze current topics associated with the field of Marketing. Topics may include Marketing Research, Customer Service, Consumer Behavior, Careers in Marketing, Customer Relationship Management, Visual Merchandising, Marketing Communications and Current events. The content of this course will vary from semester to semester. ......................................................... S

BUS 240 Dynamics of Leadership (3-0) 3 hrs.
This course is a management course wrapped in a voyage of self-discovery. Through the critical study of proven leadership theories and their practical applications, students will develop leadership styles, focus their values and beliefs, develop communication and interpersonal skills, strengthen decision-making and problem-solving abilities, and awaken the leader within. Students will be encouraged to embrace and develop a leadership style best suited to their individual personality, attributes, and temperament. .............................................................. F

BUS 247 Electronic Commerce (3-0) 3 hrs.
This course provides the learner with an overview of the basic principles of electronic commerce and the related concepts, which are reflected in the current environment of the global economy. Students will develop a deeper understanding of the critical attributes of a successful participant in today's ever-changing electronic markets. Current issues related to the electronic commerce will be explored, including the evolving Internet; security; digital money; and ethical, legal and environmental considerations. During this course, the student will utilize fundamental concepts learned in economics and marketing classes, integrated with computer skills to create an online business. ................................................................. B

(Also listed as CSC 247)

BUS 250 Business Internship Program 3 hrs.
The Internship Program enables a Finger Lakes Community College student to supplement their academic studies and increase their career awareness through field experience. Students can acquire first-hand experience in the work environment related to their academic and/or career interests. The students' activities during the internship will include both participation and observation so that they can gain skills relevant to the interest as well as an understanding of the overall organization and operation of the internship site. A student who makes a thoughtful, serious commitment to the opportunities for learning in an internship can also increase their ability to make well-informed decisions about their careers and/or graduate study. Based upon faculty recommendation, this course may be taken twice for credit. Prerequisite: Completion of 30 credit hours toward a degree with a minimum grade point average of 2.0 or permission of instructor. .............................. B

BUS 255 Tourism Internship 3 hrs.
This is an experiential learning course of study. Students will be required to complete a minimum of 150 hours of field experience. This experience may consist of interaction with the tourism industry which may include but not be limited to work experience, participation in trade seminars, professional meetings, volunteer experience, special projects, and trade shows. Tourism field experiences will be provided by the following types of tourism organizations: destination marketing organizations, various types of events, convention and visitor bureaus, convention centers, chambers of commerce, travel companies, tour operators, conference centers, attractions, meeting/planning companies, governmental agencies involved in tourism planning and development. Students will be required to enter into an internship contract, submit written report(s), and attend two special topic seminars. Prerequisites: BUS 100, 30 credit hours completed, 2.0 grade point average and permission of instructor. .............................. B
The Tourism Seminar is a capstone course designed to provide Tourism students with an opportunity to integrate theory and principles learned in other required courses. This knowledge will be applied to an “authentic” Tourism project or destination in New York State. Students will have the opportunity to attend annual industry conferences such as the Travel Industry of America Marketing Outlook Forum and the students will work as a team with an assigned mentor from the field to research, evaluate, synthesize information and create an appropriate document. This document will be submitted to the professional mentors for input and evaluation. The document will include research findings and recommendations.

Chemical Dependency Counseling

CDC 102 Concepts of Chemical Dependency I (3-0) 3 hrs.
This course addresses the scope and cost of chemical use, abuse and dependency. It covers definitions, terms, modals and theories. It also covers the nature and effect of chemicals of abuse on the body and brain as well as the impact on society.

CDC 103 Concepts of Chemical Dependency II (3-0) 3 hrs.
This course addresses concepts and issues that move beyond the chemicals themselves. This includes the impact of chemical use on families and workplaces, use by adolescents, and the impact of gender, race and culture both on the use of chemicals and on treatment. The course will also cover the process of evaluation, intervention, Fetal Alcohol Spectrum Disorder, recovery, relapse and the self help movement. Prerequisite: CDC 102.

CDC 115 Issues in Ethics for Chemical Dependency Counselors (3-0) 3 hrs.
This course addresses ethics for chemical dependency counselors by presenting an overview of ethical thought and the basics of ethical decision making. The major focus will be professional ethics as they relate to chemical dependency counseling, including the ethical canons of OASAS and other counseling organizations. The course will include the examination of the student’s personal values and belief system as it relates to becoming an ethical and competent chemical dependency counselor. Prerequisite: CDC 102 or permission of instructor.

CDC 200 Addiction Counseling (3-0) 3 hrs.
This course is designed to introduce the student to the uniqueness of counseling addicts and/or alcoholics. It presupposes an introductory knowledge of counseling in general, and a reasonable working knowledge of alcoholism, drug abuse and addiction. The course surveys the essential body of knowledge needed to begin addiction counseling. Ten hours of role playing or actual counseling sessions are included. Prerequisites: CDC 103, PSY 150.

CDC 210 Field Experience I 4 hrs.
One hundred and fifty hours of field experience will be spent in a rehabilitation or treatment facility for alcoholics or addicts. The student will enter the facility under terms laid down by said facility. The facility will provide direct supervision and the field coordinator indirect supervision for the student. Prerequisites: CDC 102, CDC 103. Corequisite: PSY 150.

CDC 211 Field Experience II 4 hrs.
One hundred and fifty hours of field experience will be spent in a rehabilitation or treatment facility for alcoholics or addicts. The student will enter the facility under terms laid down by said facility. The facility will provide direct supervision and the field coordinator indirect supervision for the student. CDC 211 is an extension of CDC 210 Field Experience I and will place the student in a different facility or program or branch of the same facility or program with new or added responsibilities. Prerequisites: CDC 102, CDC 103, CDC 210, PSY 150.

Chemistry

CHM 102 Introduction to Chemistry (3-2) 4 hrs.
An introductory course in chemistry for students who have not had high school chemistry. Designed for non-science majors as well as those who plan to take General Chemistry. Emphasizes the metric system, states of matter, elementary atomic and molecular structure, introduction to inorganic and organic chemistry, the Periodic Table, basic laboratory procedures, and descriptive chemistry as it relates to everyday experiences. Provides preparation for CHM 121. Prerequisite: DST 042 with a grade of ‘C’ or better or placement into Math Level 1 or higher.

CHM 121 General Chemistry I (3-3) 4 hrs.
This is the first semester of a two-course sequence suitable for transfer students in science or engineering. Topics include a review of problem solving using dimensional analysis, significant figures and graphing. Atomic structure, elements, ionic and molecular compounds, chemical equations, chemical stoichiometry, and gas laws are studied in more detail. Organic molecules and thermodynamic principles are studied in more detail. Organic molecules and thermodynamic principles are introduced. CHM 102 or high school chemistry is strongly recommended. Prerequisite: MAT 145 with a grade of ‘C’ or better or placement into Math Level 3 or higher.

CHM 122 General Chemistry II (3-3) 4 hrs.
Second semester of a two-course sequence suitable for transfer students in science or engineering. Topics include periodic properties of the elements, VSEPR, intermolecular forces, solutions, chemical kinetics and equilibrium, and acid and bases. Polymers, esterification, and thermodynamics are briefly covered. Prerequisites: CHM 121 with a grade of ‘C’ or better and MAT 145 with a grade of ‘C’ or better or placement into Math Level 3 or higher.

CHM 211 Organic Chemistry (3-1) 5 hrs.
A systematic study of the chemistry of carbon compounds emphasizing reactions, mechanisms, and synthesis with a focus on functional groups, addition reactions to alkenes and alkynes, alcohols and ethers, stereochemistry, nomenclature, acid-base chemistry, reaction kinetics and thermodynamics. Laboratory techniques include separation, recrystallization, distillation, extraction, chromatography and simple synthetic reactions. Prerequisite: CHM 122 with a grade of ‘C’ or better.

CHM 212 Organic Chemistry II (3-1) 5 hrs.
A continuation of the study of the reactions, mechanisms, and synthesis of organic compounds including amines, aldehydes, ketones, amines, carboxylic acids, carbonyl-containing compounds and their derivatives as well as a brief introduction to bio-organic molecules. The basic spectroscopic methods and principles to determine the structure of organic compounds is developed. Laboratory techniques include functional group transformations, multi-step synthesis and a research project. Prerequisite: CHM 211 with a grade of ‘C’ or better.

Cinema

CIN 110 Cinema of Spain (3-0) 3 hrs.
CIN 110 is an integrated course including highlights of Iberian film, history, and culture across Spain. Also included are a variety of activities to stimulate critical conversations and writing skills. This course is taught in ENGLISH. Prerequisite: Successful completion of all required remedial courses. Previous experience with the Spanish language is recommended, but not required.
CIN 115 Latin American Cinema (3-0) 3 hrs.
CIN 115 is an integrated course including highlights of Iberian film, history, and culture across Latin America. Also included are a variety of activities to stimulate critical conversations and writing skills. This course is taught IN ENGLISH. Prerequisite: Successful completion of all required remedial courses. Previous experience with the Spanish language is recommended, but not required.

CIN 260 Cinema as an Art Form I: Silent Era (3-0) 3 hrs.
The motion picture as an integral art form will be studied from historic and aesthetic perspectives. Emphasis will be placed on the silent era and its technological development, genres, directors, stars, and themes. Writing Intensive. Prerequisite: ENG 101 or ENG 104.

CIN 261 Cinema as an Art Form II: Sound Era (3-0) 3 hrs.
The motion picture as an integral art form will be studied from historic and aesthetic perspectives. Emphasis will be placed on the sound era and its technological development, genres, directors, stars, and themes. Writing Intensive. Prerequisite: ENG 101 or ENG 104.

CIN 263 Minority Groups in Film (3-0) 3 hrs.
Minority Groups in Film fosters awareness of cultures deemed “other,” according to ethnicity, sexuality, or identity by the mainstream society of the United States. Utilization of films from, by, and/or about these groups, as well as documentaries, will provide an artistic and historical representation of these cultures. This course also analyzes films as they relate to social issues dealing with minorities. Prerequisite: ENG 101 or ENG 104.

CIN 264 Global Cinema (3-0) 3 hrs.
Global Cinema focuses on fostering global awareness and knowledge of cultures, both Western and non-Western, by utilizing films, from their countries of origin, to provide an artistic representation through cinema into these cultures. Many of the movies will be subtitled in English. Films may be narrative, experimental, propaganda, and/or documentary and will be explored in an international, historical, and/or contemporary context. Prerequisite: ENG 101 or ENG 104.

CIM 110 Public Speaking (3-0) 3 hrs.
A study in communication with emphasis on the organization, presentation, and delivery of speeches for various occasions.

COM 111 Vocal Communication (3-0) 3 hrs.
A one semester course in the improvement of the speaking voice through vocal techniques and the interpretation of literature.

COM 115 Interpersonal Communication (3-0) 3 hrs.
The course focuses on the development of the interpersonal communication skills necessary for building and maintaining positive relationships in both a personal and professional environment. Topics of study will include an orientation to interpersonal communication, verbal and non-verbal communication in career and personal relationships, perception of self and others, listening, managing conflict, response skills, cultural and gender considerations, characteristics of leadership and effective work groups, and job interviewing. Students will study various theories and practice skill development.

COM 122 Television Advertising (3-0) 3 hrs.
A workshop in planning, writing, and producing television commercials. Students will receive experience in writing, production techniques (recording and videotaping commercials), and evaluating advertising.

COM 123 Video Production I (4-0) 4 hrs.
This course introduces students to the basic techniques of video production. Students will be given hands-on experience in camera operation, lighting, sound, computer graphics, switching, directing, and video tape editing. Experience with the local Public Access Television Channel (FLTV) is included.

COM 124 Video Production II (4-0) 4 hrs.
This course provides advanced work in video production techniques. Students work in groups to develop and produce newscasts that are televised on the local, public access cable television channel, FLTV. Emphasis is placed on script writing, news writing, videography and editing. Experience with FLTV is included. Prerequisites: COM 123 or equivalent experience.

COM 202 Introduction to Mass Communication (3-0) 3 hrs.
This course is designed to orient students to the field of Mass Communication and its impact and influence on their lives. Included is an overview of the field and discussion of the mass media industries (newspapers, magazines, radio, television, movies, music, and the Internet). Regulations, responsibilities, and emerging technologies are discussed and evaluated.

COM 203 Public Relations (3-0) 3 hrs.
This survey course introduces students to the field of public relations. It will describe the responsibilities and roles of the public relations professional in private and public companies. Topics covered will include the profession of public relations, the process of public relations, the publics involved in public relations and how public relations is practiced. Prerequisites: ENG 101 or ENG 104.

COM 210 Communications Practicum (2-0) 2 hrs.
Work experiences are arranged on campus and with appropriate agencies to provide students with practical experience in advertising, public relations, radio, journalism, video production and new media. Prerequisites: Permission of the Instructor and a minimum overall grade-point average of 2.0.

COM 215 Script Writing (3-0) 3 hrs.
This course is designed to introduce students to the fundamentals of developing and writing scripts for film, television, and the live event. The course emphasizes theme, story, plot, dialogue, character arc, dramatic structure, script format, and the process of developing and writing a script. Prerequisite: ENG 102 or ENG 105.

COM 220 Digital Video Editing (3-0) 3 hrs.
This course is designed to enhance students’ video editing skills through hands-on use of a nonlinear editing system. Students will learn the fundamental and advanced capabilities of this sophisticated digital system, which is widely used in professional video production. Prerequisite: COM 123 or permission of instructor.

CSC 100 Computing in the Information Age (3-0) 3 hrs.
A study of the development and usage of computers for the non-computing sciences majors. This course will prepare and instruct the student to use computers in attaining solutions to issues they face in the information society of today. The component parts of a computer information system will be studied: hardware, software, networking, and systems. Student hands-on activities will support the underlying concepts and theories taught. Special emphasis will be placed on using applications software, a variety of hardware, and networks to solve problems. (Will not carry CSC credit for A.A.S. Computer Information Systems, A.A.S. Computer Technology and Networking, or A.A.S. Computer Science degrees.)
CSC 102 Tools for Internet Users (3-0) 3 hrs.  This is a results-oriented course designed to teach students the use of the basic tools of the Internet for research, knowledge, and enjoyment. An overview of the Internet and WWW will be included. Included in this overview will be a discussion of what it is, reasons for its tremendous growth, and connection options. A security overview and ethics will also be discussed. Other course topics for discussion and hands-on activity will include e-mail options, web browsers, newsgroups, listservs, chat, ftp, search engines, finding people, finding a job, government and financial resources, and some elementary web page creation. (Will not carry CSC credit for A.A.S. Computer Information Systems, A.A.S. Computer Technology and Networking, or A.S. Computer Science degrees) .............................................. B

CSC 103 Computing Sciences Portal (2-0) 2 hrs.  This course is designed for students to learn about the college computer systems and computer literacy as well as college life. Students will learn about computers as well as explore career options in the computer field. Students will also learn about motivation, goal setting, critical thinking abilities, problem solving techniques and time management strategies. (Satisfactory or Unsatisfactory grade) .............................................. B

CSC 105 Core Word, Core Excel, PowerPoint (3-0) 3 hrs.  This course is designed to teach the student core skills in MS Word, MS Excel, and MS PowerPoint, which are MS Office Applications. The course will include topics appropriate to prepare the student to take the MOS (Microsoft Specialist) certification test upon completion. This course is offered on-line only. Familiarity with Windows including Win file management is highly recommended before taking this course. .............................................. B

CSC 115 Introduction to Programming and Computing (3-1) 3 hrs.  Introduction to computing serves as a first course for all computer related majors. This course emphasizes the development of languages and software, problem solving, and programming in a structured language. Prerequisite: DST 042. .............................................. B

CSC 116 Introduction to Visual Basic (3-0) 3 hrs.  This course focuses on developing good problem-solving skills, and building a strong foundation that will give students a sustainable overview of computer programming. The course starts with a brief review of the preliminaries of Windows, and then focuses on problem-solving using the Visual Basic language. Visual Basic is an object-oriented computer programming language where programs are developed in an integrated development environment (IDE). All programs have a graphical user interface. A broad range of real-world examples, case studies, and programming projects gives students significant hands-on experience. This course is intended for a general audience with little or no prior formal programming experience. This course does not carry Computing Science credit for any computing sciences majors. .............................................. F

CSC 134 Core Word (1-0) 1 hr.  This course is designed to teach the student Word, a Microsoft Office application software product. The course will include topics appropriate to prepare the student to take the MOS (Microsoft Office Specialist) certification test upon completion. Topics covered include file management, creating and formatting documents, styles and templates, tables, desktop publishing features, web publishing features, mail merge, and collaboration. This course is considered an introductory course; however, familiarity with Windows including Win file management is highly recommended before taking this course. .............................................. B

CSC 135 Core Excel (1-0) 1 hr.  This course is designed to teach the student Excel, a Microsoft Office application software product. The course will include topics appropriate to prepare the student to take the MOS (Microsoft Office Specialist) certification test upon completion. Topics covered include file management, creating and formatting spreadsheets, formulas and functions, creating and formatting charts, sorting and filtering lists, pivot tables and charts, data consolidation across spreadsheets, collaboration, Web publishing features, and an introduction to macros. Familiarity with Windows including Win file management is highly recommended before taking this course. .............................................. B

CSC 136 PowerPoint (1-0) 1 hr.  This course is designed to teach the student PowerPoint, a Microsoft Office application software product. The course will include topics appropriate to prepare the student to take the MOS (Microsoft Office Specialist) certification test upon completion. Topics covered include file management, creating and formatting presentation materials such as slides, shows and handouts, creation and modification of slide masters and design templates, adding tables, graphics, clip art, charts and animation to presentations, and the automation of slide shows. Familiarity with Windows including Win file management is highly recommended before taking this course. .............................................. B

CSC 139 MS Access (1-0) 1 hr.  This course provides an overview of the fundamentals of the Microsoft Office application Access. A database management system (DBMS) such as Access provides the user with the software tools he/she needs to organize that data in a flexible manner. Access includes facilities to add, modify or delete data from the database, ask questions (or queries) about the data stored in the database and produce forms and reports summarizing selected contents. Microsoft Access provides users with one of the simplest and most flexible desktop DBMS solutions on the market today. Familiarity with Windows including Win file management is highly recommended before taking this course. .............................................. B

CSC 141 Introduction to the Game Industry (3-0) 3 hrs.  This course provides an introduction to the game industry. Topics covered include how games are made, the evolution of games, an overview of game genres and game platforms. The production cycle including the development of the production team, game development schedule and budget will be examined. The process for creating and developing a game including the elements of game play, committing ideas to paper, game design document, technical review, coding, visualizing, hearing, interface design, math and logic, artificial Intelligence, storytelling, prototyping and building playfields will be studied. Additionally, the course will examine marketing games, economics of the game industry, and breaking into the game industry. .............................................. B

CSC 190 Data Structures I (3-1) 3 hrs.  This course is designed to present to the student the basic data structures necessary to design and write structured programs. The topics covered include procedures and modules, functions, arrays, records, strings, and files. Prerequisite: CSC 115 with a grade of C or better. .............................................. B

CSC 200 Data Structures II (3-2) 4 hrs.  This course is a study of the more common data structures utilized in computing science applications. Topics to be covered include linked lists, queues, stacks, matrices, storage allocation, tree structures, searching techniques and sorting techniques. Development of algorithms for practical applications will demonstrate the advantages of the above topics. Prerequisite: CSC 190. .............................................. B

CSC 212 MS Excel for Business Applications (3-0) 3 hrs.  This course offers students the opportunity to master the advanced functionality of Microsoft Excel, and to apply those skills to genuine business applications such as financial modeling, reporting, and the automation of accounting and financial tasks. Although the basic functions of Excel will be covered, areas of focus include graphs and charts, the use of advanced financial functions and analytical tools, reporting templates, linking of worksheets and workbooks, importing and manipulating data, macros...
CSC 215 Visual Basic (3-0) 3 hrs.
Visual Basic is a Windows application whose function is to help the user build their own special-purpose Windows applications. This course will provide detailed instruction on how to use Visual Basic for Windows to create applications. Prerequisite: CSC 115 with a grade of C or better or equivalent experience. (Also listed as BUS 212)

CSC 222 Web Development I (3-0) 3 hrs.
Web Development I is an introduction to, and the first of a 2-course sequence in web page development. Students will learn how to design and develop basic Web pages using current technologies and tools. Topics covered include the World Wide Web, HTML, XHTML, CSS, and basic digital imaging techniques. This course will serve as an introduction to Internet technologies used to support browsing, file transfers, e-commerce, and standardization. Other topics addressed include web site publishing, accessibility, social communication, and intellectual property rights as they relate to Web content. Prerequisite: Either CSC 115 or CSC 116 with a grade of C or better, or equivalent experience.

CSC 223 Web Development II (3-0) 3 hrs.
Web Development II builds on the basic web page development concepts presented in Web Development I, and is the second of a 2-course sequence in web page development. Assuming a basic knowledge of HTML coding and CSS, the goal of this course is to create large-scale, interactive, professional Web sites that are in accordance with current standards. The focus of this course is on dynamic HTML, a collection of web technologies such as HTML and scripting languages used together to create interactive and animated Web pages. Students will learn to program client-side scripts using JavaScript and the Document Object Model in order to transform static Web pages created with HTML and CSS into dynamic Web pages. In addition to the substantial programming element in this course, students will learn to use an industry-leading Web Authoring and Management tool to expedite the design and development of large-scale Web sites. Other Web design topics include information architecture, scalability, multimedia integration, browser compatibility, standardization, and maintenance. Prerequisite: CSC 222 Web Development I, or equivalent experience.

CSC 224 User Interface Design (3-0) 3 hrs.
This course will provide a general introduction to the theory and practice of computer user interface design. The student will learn how to create high-quality user interfaces. The emphasis will be on the design of 2D graphical user interfaces, in three environments: stand-alone, Web and mobile devices. The study of several important paradigms and principles of design and how these can be applied to the screen will be explored. This will provide a framework within which we can analyze existing user interfaces and design new ones. Prerequisite: CSC 115 with a grade of C or better or equivalent experience.

CSC 228 Introduction to Java (3-1) 3 hrs.
This course will introduce students to Java and software design. Students with a basic programming background (e.g. C++) will learn the syntax and semantics for planning and writing a computer program in Java. Successful completion of this course will allow the student to plan, build, implement, and execute both Windows applications (graphical user interfaces) and Java applets for Web pages. In addition, students will learn to translate a program design into a functional Java program. Prerequisite: CSC 115.

CSC 231 Systems Administration (3-0) 3 hrs.
The interconnections of computer systems, including hardware, software, and networks, on both small and large scales, requires a systems administrator's management and troubleshooting skills. The installation and maintenance of clients and servers, storage, backup, processing, and in some cases, networking, fall square on the shoulders of the systems administrator. When things go wrong and are in immediate need of a fix, the systems administrator's problem solving skills are tested, usually with no time to spare and lots of stress. This extensive hands-on course is designed to provide students the essential knowledge and skills to be successful system administrators. Students will install and configure a network operating system (NOS); use Active Directory to manage accounts; configure, manage, and troubleshoot resource access; configure network printing; configure and manage data storage; manage network services; configure remote access services; secure operating systems; monitor servers and networks; and manage system reliability and availability. In addition, virtualization software, Hyper-V, will be installed, configured, and used. Prerequisite: CSC 260 or equivalent experience.

CSC 232 Programming Mobile Applications (3-0) 3 hrs.
Mobile applications have infiltrated virtually every area of our lives both personally and professionally. Apps can provide a wide range of services from educational to informational, and social to recreational, helping us to navigate our lives as well as our surroundings. This course provides a comprehensive project experience in the development of mobile applications on a popular software platform. Currently, the course will be taught using either Apple’s iOS or Google’s Android development kits. Students will receive intensive tutorial introductions to a development platform, covering hardware capabilities and limitations, the development environment, and the communications infrastructure available. Students will practice mobile application development and execute the prototypes both in a team-base and individual setting. Development activity includes the generation of design documentation., specifications, UI mockups, diagrams for execution and communications, presentations, and reports at various stages. Prerequisite: CSC 115 with a grade of C or better or equivalent experience.

CSC 235 Active Server Pages and Server-Side Scripting (3-0) 3 hrs.
This course will familiarize the student with different approaches in creating server-side scripts using Active Server Pages (ASP). Successful completion of this course will allow the student to build, implement, and execute scripts that will create fully functional, interactive, and dynamic Web applications. Included in the course will be developing Web sites that depend on databases. Additionally, the student will learn how to set cookies, make an e-commerce shopping cart, and schedule the timing and placement of Web advertisements. Prerequisite: CSC 262.

CSC 241 Fundamentals of Game Design (3-0) 3 hrs.
This course is a guide through the concepts, principles, and techniques for designing an entire video game. Students will study a variety of design technologies relevant to games including operating systems, file systems, networks, simulation engines, and multi-media design systems. Students will also study some of the underlying scientific concepts from computer science and related fields including: simulation and modeling, graphics, artificial intelligence, real-time processing, and game theory. Topics that may also be included in the course are design principles for developing usable and engaging games including: software engineering, human computer interaction, thematic structure, graphic design, choreography, music and sound effects, and game aesthetics. Prerequisite: CSC 141.

CSC 242 Introduction to 3D Computer Animation (3-0) 3 hrs.
Traditional animation principles and a thorough understanding of the technical aspects and limitations of creating and manipulating 3D characters (and other assets) for both real-time and pre-rendered 3D environments will be studied. Students will be responsible for designing and creating an entire video game. Specific topics of study include 3D animation, modeling, texturing, rendering, lighting, cinematography, and the study of motion. Prerequisite: CSC 141.

CSC 243 Systems Analysis and Design I (3-0) 3 hrs.
This course is an introduction to systems analysis and design. It includes such
topics as: defining the scope and objectives of a system project, investigative techniques, performing a feasibility analysis, design of input/output forms, database concepts and transaction file organization. Tools that the analyst uses are also introduced, i.e., data flow diagrams, system flowcharts, and use case diagrams. A variety of exercises and a case study will be performed by the students in teams, which will serve to emphasize the material covered in the text. Prerequisite: CSC 115 or equivalent experience. .......................... B

CSC 247 Electronic Commerce (3-0) 3 hrs.
This course provides the learner with an overview of the basic principles of electronic commerce and the related concepts, which are reflected in the current environment of the global economy. Students will develop a deeper understanding of the critical attributes of a successful participant in today’s ever-changing electronic markets. Current issues related to the electronic commerce will be explored, including the evolving Internet; security, digital money; and ethical and legal environmental considerations. During this course, the student will utilize fundamental concepts learned in economics and marketing classes, integrated with computer skills to create an online business. .......................... B

(Also listed as BUS 247)

CSC 248 Command Line Network Administration (3-0) 3 hrs.
This course covers system administration and engineering through the DOS command line environment. Students will learn how to automate tasks, maintain enhanced control over systems, and master advanced administration capabilities. Commands learned will include DOS holdovers, commands that mirror GUI tasks, and advanced commands for administrators. Students will learn how to use the command line to establish a proper computing environment. Automation skills, within the command environment, will allow students to run commands, in the form of batch files, without user intervention, saving both time and money. Automation, in terms of administration, will also be explored. Command line data and file manipulation, often chosen over GUI methods, will be examined. In addition, network administration, including the determination of connectivity status and network connection analysis, which requires the use of commands that have no GUI counterparts will be explored. Prerequisite: CSC 260 or equivalent experience. .......................... B

CSC 250 Computing Sciences Internship 3 hrs.
The Computing Sciences Internship will provide the student with an opportunity to gain “real-world” experience. The student will apply learned skills acquired through course work in any of the computing sciences degree programs to a work experience. The internship will also supply an awareness of career opportunities in the computing science field. Lastly, it will give the student a much needed advantage on acquiring a job after graduation because an internship is a full-time work experience. Students must have a minimum 2.0 GPA. Prerequisites: permission of instructor.B

CSC 251 Applied Database Concepts (3-0) 3 hrs.
An introduction to database design and development. Database normalization, data integrity, concurrent updates, and data security will also be discussed and practiced. Emphasis will be on using Access to build and maintain relational databases. The student will create databases, queries, custom forms and reports, use macros and modules with VBA. Additionally, SQL programming will be used extensively. Prerequisite: CSC115 with a grade of 'C' or better. .......................... S

CSC 252 Multimedia Development (3-0) 3 hrs.
This course is an introduction to Web-based interactive media development. Students will learn to create interactive media using industry-standard authoring tools. The focus of this course will be on the integration of text, images, animation, audio, and video into Web-based applications. Students will learn to create programming scripts for interactive user interfaces and complex components. Topics covered in this course include: uses of Web-based multimedia, differences between Web-based and standalone multimedia, vector-based image creation and animation, how to incorporate audio, video, and animated components into Web pages, how to deploy multimedia applications over multiple platforms, and object-based scripting. Prerequisite: Either CSC 115 or CSC 116 with a grade of C or better. .......................... B

CSC 255 Game Programming Team Capstone Project (3-0) 3 hrs.
This capstone course provides an opportunity for students to demonstrate that they have achieved the goals for learning established by FLCC and the Computing Sciences Department. This course is offered in a student-centered and student-directed manner which requires the command, analysis, and synthesis of game programming knowledge and skills. It requires the application of learning to a team project game which serves as an instrument of evaluation. Prerequisites: CSC 242. Corequisite: CSC 200 .......................... S

CSC 260 Networking Technologies (3-0) 3 hrs.
The increasing computerization of today’s workplace has created the need for knowledgeable technicians, managers, and administrators well-grounded in the techniques of connecting multiple computer platforms, enabling networking in diverse hardware and software environments, and providing reliable communication between all parts of the organization. This course provides an overview of the essential fundamentals of networking and system administration required in today’s local area network (LAN) environment as well as a solid foundation for the student’s pursuit of industry certification, such as CompTIA’s Network+ and Cisco’s CCNA. Specifically, the course will focus on the networking technology, including telecommunication basics, LAN fundamentals, and wide area network (WAN) principles that comprise today’s complex networking environment. Prerequisite: CSC 115 with a grade of C or better or equivalent experience. .......................... B

CSC 261 Routing and Switching (3-0) 3 hrs.
This course is a study of Routing and Switching fundamentals, and how the Internet is integrated into the computing environment to enable organizations to share resources, collaborate, and meet organizational goals. The networking essentials and the creation of simple Local Area Networks (LANs) introduced in CSC 260, Networking Technologies, are expanded upon to incorporate the linking of these simple networks to each other and to the Internet, to create an internetwork. Routing and Switching devices such as switches and routers will be examined in great detail. Students will focus on techniques to analyze, plan, and manage an enterprise network. In support of these techniques, lab activities will include subnetting, packet-sniffing, and switch and router configuration. Prerequisite: CSC 260 or equivalent experience. .......................... B

CSC 262 Web Site Development and Programming (3-0) 3 hrs.
This course is a study in the design and development of Web sites for the World Wide Web. Students will learn design techniques and an appreciation for well-formed web pages. Web technologies covered in this course include markup languages, styles, and scripting languages. Students will be required to use several popular web browsers for the rendering of their pages so that they become familiar with the inconsistencies across browsers. The appropriate use of static web pages, dynamic Web pages, and multimedia will be examined. Prerequisite: CSC 115 or CSC 116 with a grade of 'C' or better or permission of instructor. .......................... B

CSC 270 Principles of Information Security (3-0) 3 hrs.
An introduction to the various technical and administrative aspects of information security and assurance. This course provides the foundation for understanding the key issues associated with protecting information assets, determining the levels of protection and response to security incidents, and designing a consistent, reasonable information security system, with appropriate intrusion detection and reporting features. Students will be exposed to the spectrum of security activities, methods, methodologies, and procedures. Coverage will include inspection and protection of information assets, detection of and reaction to threats to information assets, and examination of pre- and post-incident procedures, technical and managerial responses and an overview of the information security
planning and staffing functions. Corequisite: CSC 260 or permission of instructor. .................................................... B

CSC 271 A+ Hardware and Operating Systems Technologies (3-1) 3 hrs.
A+ Hardware and Operating Systems Technologies is a course designed to prepare students to successfully complete the CompTia A+ Exams. CompTia A+ exams are generalized exams designed to evaluate the knowledge and skills of entry level computer professionals. While completion of the test is optional, many employers look to the certification as proof of the skills of perspective employees. (Currently following the 2009 exams as amended 1/11.) This course requires students to assemble, repair, configure and optimize modern computer systems. Students will be given a broad overview of computer systems, problems and solutions, which may be encountered during employment. Emphasis will be made to allow students to experience actual challenges with a computer, and design their solution. Working with the general public to assist in diagnosing and repairing computer systems are included in this course. Prerequisite: CSC 115, with a grade of ‘C’ or better, or permission of instructor. .................................................... B

CSC 272 Linux (3-0) 3 hrs.
This course is designed to provide the student with an understanding of the architecture and management of today's commonly used computer operating systems. The course surveys the operating systems and included tools and utilities to acquire an understanding of how the operating systems work and how to use the tools and techniques to manage and automate computing system tasks. This course will use the Windows Command line and UNIX/Linux shell programming as teaching tools to provide the fundamental skills needed to prepare and use scripts to manage and automate daily computer/network management tasks and provide a deeper knowledge of operating system functions. Prerequisite: CSC 260 or equivalent experience. .................................................... B

CSC 273 Ethical Hacking (3-0) 3 hrs.
This course provides an in-depth look at network security concepts and techniques. It will adopt a practical, hands-on approach when examining networking security techniques. Along with examining different network strategies, the student will explore the advancement of network implementation as well as exploring problem solving strategies necessary in the field of info security. Prerequisites: CSC 260 or equivalent experience. .................................................... S

CSC 274 Computer Forensics and Investigations (3-0) 3 hrs.
Computer Forensics and Investigation presents principles and techniques of conducting computer investigations. Computer forensics involves obtaining and analyzing digital information for use as evidence in civil, criminal, or administrative cases. Topics include: ethics, current computer forensic tools, digital evidence controls, processing crime and incident scenes, data acquisition, e-mail investigations, and becoming an expert witness. Hands-on experience, using a forensic software package will be part of the course. Prerequisites: CSC 260 or equivalent experience. .................................................... S

CSC 275 Preparing for Security+ Certification 2 hrs.
This course prepares the student to take the Security+ Certification examination. It is intended for the experienced network administrator or the student who has completed all of the other IT/CSC security courses offered at FLCC. This course focuses on the topics covered in the Security+ certification examination and is intended to be a culminating course as well as a supplement to the student’s prior studies and/or experience. Prerequisite: Permission of instructor. .................................................... SU

CSC 290 Preparing for A+ Certification 2 hrs.
This course prepares the student to take the A+ Certification examination. It is intended for the experienced PC Repair Technician or the student who has completed the FLCC Information Technology degree program. This course focuses on the topics covered in the A+ certification examination and is intended to be a refresher course as well as a supplement to the student’s prior studies and/or experience. Prerequisite: Permission of instructor. .................................................... SU

CSC 291 Preparing for Network+ Certification (2-0) 2 hrs.
This course prepares the student to take the Network+ Certification examination. It is intended for the experienced network technician or the student who has completed the FLCC Information Technology degree program. This course focuses on the topics covered in the Network+ certification examination and is intended to be a refresher course as well as a supplement to the student’s prior studies and/or experience. Prerequisite: permission of instructor. .................................................... WS/SU

CSC 295 Current Topics in Computing and Technology (3-0) 3 hrs.
This course covers new topics and developments in the field of computing sciences. These topics are beyond the scope of standard CSC courses, and are of interest to faculty and students. Topics of current interest in the industry may include game programming, new programming language, programming for hand-held technology, and new networking technology. This course may be taken more than once, as long as the course content changes. Prerequisite: Permission of the instructor. Course offered as appropriate.

Conservation

CON 100 Introduction to Environmental Conservation (3-0) 3 hrs.
This course focuses on environmental conservation and outdoor recreation, controversial issues, and current topics. Throughout the semester improvement of critical thinking, writing and oral communication skills are emphasized. .................................................... F

CON 101 Principles of Soils, Waters, Forests (3-0) 3 hrs.
To provide students with an introduction to principles of soil science, meteorology, hydrology, forestry and forest ecology. The student should gain knowledge and field experience in the conservation and management of these interrelated natural resources, especially as they apply to outdoor recreation, wildlife, fisheries, and land use planning. .................................................... B

CON 102 Introduction to Fish and Wildlife (3-0) 3 hrs.
The study of fish and wildlife as a valuable aesthetic, recreational, and economic resource. Ecological consideration, life histories, identification, populations, habits, habitat characteristics and relationship to man of regional wildlife and fish are topics which will be covered. Special attention is paid to fish and mammals of New York State. .................................................... S

CON 103 Environmental Science (3-2) 4 hrs.
Environmental Science is a course that explores the interactions and relationships between humans and the Earth. The course will follow the basic themes of sustainability and critical analysis of environmental issues. Students will gain an understanding and appreciation of the impact of humans on the environment while studying ecosystems, the human population, renewable resources, energy, pollution and its prevention, and ways to work toward a sustainable future. In the laboratory component of the course students will learn scientific methodology, sampling procedures and methods used to test environmental quality. A portion of the lab will include outdoor experiences. .................................................... B (Also listed as BIO 103)

CON 110 Sustainable Earth: Spiritual and Scientific Consilience (3-0) 3 hrs.
Students will examine the impact of human populations on earth ecosystems. Students will explore psychological, cultural, spiritual, economic, and political factors that accelerate the deterioration of earth's ecosystem and alternate perspectives of those factors which might lead to a more life-sustaining society. Emphasis will be placed on discovering
common ground between science and spiritualism. Students will serve as discussion leaders for course topics of their choice. A community involvement component will be required. Prerequisite: Permission of instructor.  .............................................. S  
(Also listed as PHL 110)

**CON 113 Wildlife Field Techniques (3-0)**  3 hrs.  
This course focuses on field techniques employed by wildlife professionals. Topics include proper animal handling, various capture techniques, measuring and tagging, telemetry, camera traps, sampling protocols and basic research design. Mammal and bird techniques will be emphasized with some reptile and amphibian techniques covered as appropriate. . . . F

**CON 116 Fisheries Techniques (3-0)**  3 hrs.  
This hands-on course provides students with field experiences utilizing various types of fisheries equipment. Emphasis is placed on sampling techniques for both fish and aquatic habitats. Topics include small boat operation, fish identification, fish capture and handling techniques, data collection, tagging and marking, aging, electrofishing, netting, radio telemetry, hydro acoustics, habitat assessment, and equipment maintenance.  ...................................................... F

**CON 118 Introduction to Natural Resource Law (3-0)**  3 hrs.  
This course introduces students to laws for the protection and conservation of fish, wildlife and natural resources. The focus of the course is New York State and Federal law regulating the conservation of fish, wildlife and forest resources. Particular areas of study include the New York State Fish and Wildlife Law and Federal Fish and Wildlife Laws (eg: Lacey Act, Endangered Species Act, Migratory Bird Act). Students will study the evolution of the current body of New York State and Federal law relating to management of fish, wildlife and forest resources from a historical prospective. Students will also study legislative and administrative processes employed in the formation of Fish and Wildlife Laws and the functions and duties of the New York State and federal agencies charged with enforcing these laws. Instruction methods include lecture, class discussion and guest speakers.  ...................................................... F  
(Also listed as CJC 118)

**CON 130 Introduction to Geographic Information Systems (2-2)**  3 hrs.  
This is an introductory level geospatial technology course designed to introduce students to the concepts and theories of geographic information systems (GIS) and the practice of geospatial analysis. This course consists of a lecture component and a laboratory component. Students will learn to apply GIS concepts through hands-on exercises designed to explore and analyze spatial data. Students will use leading geospatial software used by numerous professionals including natural resources conservation and sustainability, business management, criminal justice, and community planning.  ...................................................... F  
(Also listed as GIS 130)

**CON 190 Conservation Field Camp (3-0)**  3 hrs.  
Field Camp is designed to provide one week of conservation field experiences. Emphasis will be on fish, wildlife, and forest management techniques; conservation field studies and investigations; field natural history; outdoor recreation skills; and rustic conservation construction.  SU

**CON 200 Field Experiences in Conservation I (2-0)**  2 hrs.  
This course is comprised of classroom sessions that total 15 hours and at least 45 hours of individual field experiences. Topics in the classroom include: resume writing, interview strategies, job searching, Civil Service examination preparation and identification of field experiences appropriate to the student’s career goals. Field experiences will be arranged with appropriate agencies, which may include the NYS Department of Environmental Conservation, County Conservation Services, BSA Camps, National Park Service, Nature Conservancy, water treatment plants and nature centers. Field experiences will provide students the opportunity to assume the responsibilities for the jobs (Fish and Wildlife Technician, Nature Interpreter, Camp Ranger, etc.), they will be performing after graduation. The type of experience varies with student career interest and previous experience. (Satisfactory or Unsatisfactory grade.) Prerequisite: Students must complete 9 credits of CON courses prior to enrolling in this course.  .............................................. B

**CON 201 Field Experiences in Conservation II (2-0)**  2 hrs.  
This course is comprised of limited classroom sessions and 75 hours of individual field experiences. Topics in the classroom are intended to build from the material learned in CON 200 and include: resume writing, job searching and identification of field experiences appropriate to the student’s career goals. Field experiences will be arranged with appropriate agencies, which may include the NYS Department of Environmental Conservation, County Conservation Services, BSA Camps, National Park Service, Nature Conservancy, water treatment plants and nature centers. Field experiences will provide students the opportunity to assume the responsibilities for the jobs (Fish and Wildlife Technician, Nature Interpreter, Camp Ranger, etc.), they will be performing after graduation. The type of experience varies with student career interest and previous experience. (Satisfactory or Unsatisfactory grade.) Prerequisite: CON 200.  ............................... B

**CON 202 Principles of Terrestrial and Aquatic Ecology (3-0)**  3 hrs.  
A study of climatic, edaphic and biotic factors as they relate to species distribution and population dynamics in selected biomes of New York State and the world. Students develop deeper understanding of the ecological principles concerning the interaction between organisms and their environment. Writing Intensive. Prerequisites: ENG 101 or ENG 104, BIO 121, BIO 122 or BIO 251.  .............................................. F  
(Also listed as BIO 221)

**CON 203 Seminar in Environmental Conservation (3-0)**  3 hrs.  
This course presents topics in the field of environmental conservation. Current topics include: Herpetology, Entomology, Winter Botany, Alternative Energy, Forest Fire Control, Environmental Conservation Research, and Public Lands. A comprehensive field identification test is required.  ...................................................... S

**CON 205 Field Botany (3-0)**  3 hrs.  
Field identification, taxonomy, habitat preferences, and growth characteristics of trees, shrubs and herbaceous plants are the major topics covered in this course. Emphasis is placed on local flora and its utilization by man and wildlife. Important ornamental trees, New York State rare plants, introduced plants that are management problems, nonvascular plants, and the ecology of the eastern deciduous forest biome are highlighted. Considerable class time will be spent outdoors on campus and at nearby natural areas.  ...................................................... B  
(Also listed as BIO 250)

**CON 210 Field Natural History (3-0)**  3 hrs.  
This course is a series of extended field trips into a selection of local ecosystems such as gorges, bogs, streams, and marshes. Students will analyze these ecosystems both as examples of each ecological situation and as areas managed in different ways by man. Natural history topics such as insects, aquatic life, migratory birds, glacial geology, and human interactions with the environment are studied in appropriate areas.  .............................................. F  
(Also listed as BIO 245)

**CON 211 Ornithology (3-2)**  4 hrs.  
The study of birds with special emphasis on anatomy, physiology, life histories and identification of birds common to Western New York. Lecture and laboratory work will be supplemented by several field trips, including
early morning bird observations. Trips to selected local birding areas are required. Prerequisites: BIO 121, BIO 122. (Also listed as BIO 225)

CON 214 Fisheries Management (3-0) 3 hrs. Fisheries Management stresses the relationship between humans, fish and their environments. Students are introduced to the principles of fishery management including, history, theory, and management strategies. The importance of habitat management, and population dynamics and their interactions is explored. Management strategies will be introduced through case studies of selected fisheries. S

CON 215 Unique Ecological Communities (3-0) 3 hrs. The purpose of this course shall be to provide students with field and travel experiences relative to their course work in Natural Resources Conservation. This expedition course, to different areas of the country, will emphasize identification and natural history of birds, mammals, reptiles, plants, and a variety of ecological communities. Students will be provided with opportunities to observe employment opportunities in conservation and gain experience in camping and group travel. Examples of travel experiences include trips to: Florida Everglades, Wilderness Alaska, Costa Rican Rainforests, and various National Parks. WS/SU

CON 216 Wildlife Management (3-0) 3 hrs. This course will provide intensive classroom and some field experience in wildlife management theory including: population dynamics, mortality, natality and the relationship between wildlife and their habitats. Practical techniques used for aging, sexing, marking, trapping and transferring game and non-game wildlife will be presented. Rearing and releasing endangered and game species, habitat evaluation, nuisance control and wildlife population estimation techniques are discussed. Prerequisite: CON 102. (Also listed as HRT 221)

CON 217 Environmental Planning and Impact Analysis (3-0) 3 hrs. This is an introductory course in the multi-disciplinary field of environmental planning. Techniques used to identify, inventory, and evaluate natural resources are examined. Local case studies, regulatory laws, and the environmental decision-making process are reviewed. Topics are developed further through assigned readings and classroom discussions. Students put concepts into use with realistic projects involving local environmental land use issues. (Also listed as ENV 217)

CON 218 Fish Culture Techniques (3-0) 3 hrs. This course is designed to provide second year students enrolled in the A.A.S. Fisheries Technology degree, in depth exposure to fish culture practices and techniques. Students will review historic and current status of fish culture in the United States and world. Culture methods, data collection, egg take, incubation, and fry hatching of walleye (Sander vitreus) cultured at the FLCC-Muller Conservation Field Station-Fish Culture and Aquatic Research Center will be emphasized. Trips to other culture facilities will provide hands-on experience. Essential factors involving water quality, fish health, nutrition, species requirements, system design, equipment, and advances in Recirculation Aquaculture Systems (RAS) will be investigated. F

CON 220 Glacial Geology of the Finger Lakes (3-0) 3 hrs. This course is an introduction to glaciation emphasizing historic events within the Finger Lakes region. The mechanics of glacial motion, erosion, and deposition will be studied and then used to interpret our modern landscape. Students will be introduced to the technique of air photo interpretation. Our modern biodiversity and distributional patterns of organisms will be related to postglacial events. Scenic values associated with glacial landscapes will be a focal point of the class field trips. (Also listed as SCI 220)

CON 221 Conservation/Horticulture Topics I (1-0) 1 hr. This course is designed to provide students with specialization in an area related to their occupational or educational interest and to provide students the opportunity to become more familiar with conservation and horticulture practices. Topics typically involve a field component and may be held as a residential course at the Muller Field Station or the East Hill campus. (Also listed as HRT 221)

CON 222 Conservation/Horticulture Topics II (2-0) 2 hrs. This course is designed to provide students with specialization in an area related to their occupational or educational interest and to provide students the opportunity to become more familiar with conservation and horticulture practices. Topics typically involve a field component and may be held as a residential course at the Muller Field Station or the East Hill campus. (Also listed as HRT 222)

CON 223 Conservation/Horticulture Topics III (3-0) 3 hrs. This course is designed to provide students with specialization in an area related to their occupational or educational interest and to provide students the opportunity to become more familiar with conservation and horticulture practices. Topics typically involve a field component and may be held as a residential course at the Muller Field Station or the East Hill campus. (Also listed as HRT 223)

CON 225 Introduction to Wildlife Diseases (3-0) 3 hrs. This course is intended to provide students with a basic understanding of wildlife diseases and environmental contaminants which adversely affect the health of wildlife populations. Infectious and noninfectious wildlife diseases as well as parasitology will be explored through discussion, assignments, guest speakers, and the completion of a technical research paper. Students will then be able to apply knowledge of these topics to other aspects of environmental conservation including environmental chemistry, ecology, wildlife rehabilitation, and environmental law. S

CON 226 Fisheries Field Assessment (3-0) 3 hrs. This course is an intensive one-week session that gives the student in-depth experience in fish inventory methods, data interpretations, operation of water analysis equipment, navigation, and general vessel operation and maintenance. The majority of class time will be in the field, allowing the student to gain hands-on training in fisheries management techniques. The class is divided into five daily modules. The order in which the modules are taught are weather dependent; therefore, the starting and ending times will vary. Students should plan on being available from 6 a.m. to midnight each day. (Satisfactory or Unsatisfactory grade.) Prerequisite: permission of instructor. SU

CON 228 Small Woodlot Management (3-0) 3 hrs. This course will provide a practical guide to the optimum utilization of several acres of privately owned woodlands. Topics covered will include
CON 229 Stream Ecology and Monitoring (3-0) 3 hrs.
This course provides students with an introduction to hydrology, stream ecology and sampling design. Students will intensively study aquatic invertebrate identification. The students will learn through field and laboratory experiences with data collected, analyzed, and production of a final professional report. Prerequisite: MAT 121, CSC 134, CSC 135. .................................................. F

CON 233 Laws for the Use and Protection of Water and Land Resources (3-0) 3 hrs.
This course focuses on Local, New York State and Federal Laws for the protection of water resources and land use. Students will study New York State Environmental Conservation Law as it relates to the management of water resources, protection of freshwater and tidal wetlands, and regulation of mining and energy exploration. Students will study the New York State Environmental Quality Review Act (SEQRA) process and the Federal Clean Water Act, landowner rights and liabilities. Legal processes for the introduction of new laws and the enforcement of current laws will be discussed in depth. Students will be introduced to potential careers through the study of local, state and federal regulatory agencies charged with protection and wise use of water and land resources. Instruction methods include lecture, class discussion and guest speakers. ............... F

(Also listed as CJC 233)

CON 234 Laws for the Management of Air Resources, Solid Waste and Hazardous Substances (3-0) 3 hrs.
This course focuses on New York State and Federal laws for the protection of air resources, the management of solid waste and regulation of substances harmful to the environment. Students will study the New York State Environmental Conservation Law as it relates to protection of air resources, the management, transportation and disposal of solid and hazardous waste and the use substances potentially hazardous to the environment such as pesticides. Students will also study related federal statutes including the Clean Air Act, NEPA and CLERCA. Students will be introduced to potential careers through the study of local, state and federal regulatory agencies charged with protection of air resources, the management, transportation and disposal of solid and hazardous waste and the use of substances potentially harmful to the environment. Instruction methods include lecture, class discussion and guest speakers. ............... S

(Also listed as CJC 234)

CON 235 Wetland Science and Practice (3-0) 3 hrs.
A survey and in-depth investigation of wetland types and terms, characteristic features and processes, and delineation, management and restoration practices. The course examines wetland hydrology and biogeochemical processes as well biotic adaptations to wetland environments. An emphasis is placed on achieving competency in recognizing the hydrophytic vegetation and hydric soil indicators commonly encountered in the non-tidal, freshwater wetlands of northeastern United States. The culmination of the course is an experiential project that applies this field-based knowledge with GIS resources to delineate a wetland on a local site according to current government standards. ............... F

CON 236 Wetland Mammals (3-0) 3 hrs.
This residential course will be held at the Muller Field Station over two weekends plus two additional class meetings. The focus of the course will be the natural history, research and management of four wetland mammals: beaver, muskrat, mink and river otter. Students will design and conduct a field study. Students will be required to stay at the Muller Field Station for the two weekends as some field work is done in the late evenings and early mornings, rain or shine. Students will be required to canoe. Prerequisite: CON 102. .................................................. F

CON 237 Black Bear Management I (1-0) 1 Hrs.
This course covers the identification, natural history and management of black bears in North America with special emphasis on New York State. Students who enroll in this course are also expected to take CON 238 Black Bear Management II the following semester. Prerequisite: CON 102. ............... F

CON 238 Black Bear Management II (2-0) 2 hrs.
This course covers the research, natural history and management of black bears in North America with specific emphasis on New York State. Students may have the opportunity to participate in hands on black bear management activities. Students who enroll in this course are expected to be able to devote several full weekdays to conduct field work. An additional original project will be undertaken by the class. Prerequisite: CON 237 or permission of instructor. ................................. S

CON 240 Wildlife Crime Scene Investigation & Forensics (3-0) 3 hrs.
This course introduces the student to the study of criminal investigative techniques and the analysis of evidence with an emphasis on crimes against wildlife and the environment. The focus throughout the course will be the collection, protection and preservation of evidence as it relates to the investigative process. Analysis of actual closed criminal cases and simulations with mock crime scenes will allow students to put into practice classroom discussions and readings. ....................... S

CON 242 Field Study of Birds (3-0) 3 hrs.
This course provides students the opportunity to identify and study birds in the field. Emphasis is placed on birds of New York State. Topics include identifying birds by sight and sound, capture and handling techniques, banding, field study methods such as breeding bird atlas, waterfowl counts, nestbox surveys and hawk counts. ................................. S

CON 246 Limnology (3-2) 3 hrs.
An introduction to the scientific study of inland waters, limnology concerns itself with all the factors that affect living populations within those waters. Through lecture and field experiences, the student will become familiar with physical and chemical processes in water, especially those that have a direct effect on biological organisms. Standard methods and highly technical instrumentation will be used on board the college’s educational vessel. A survey of life forms and identification skills will be emphasized as well as aquatic community structure and interactions. ............... F

(Also listed as BIO 246)

CON 255 Wildland Fire Suppression (S-130/S-190) (2-0) 2 hrs.
This course provides the training necessary for the Federal Interagency ‘RED’ Card for wildland firefighter. Topics covered include: ignition, behavior, and spread of wildfires; the role of topography and fuels in wildfires; prescribed fires as a management tool; use of fire suppression equipment; methods of fire prevention and suppression; State and Federal wildland fire control agencies. Graded on a satisfactory/unsatisfactory basis. ....................... B

(Also listed as WFS 130)

CON 256 Fire Ecology (3-0) 3 hrs.
This course is designed to give students an appreciation and understanding of the ecological role of fire in a variety of North American ecosystems. Advantageous adaptations of species inhabiting fire prone ecosystems will be discussed. The effects of fire on plants and animals will be discussed within the context of ecological time scales. The effect of past state and federal policies concerning wild fire will be examined using various case studies. Students will also be introduced to the use of prescribed burning as a habitat restoration technique. ....................... S

(Also listed as WFS 256)
Criminal Justice

CJC 100 Introduction to Criminal Justice (3-0) 3 hrs.
This course examines the functions and interrelationships of the component parts of the criminal justice system - the police, courts, and corrections. Relevant constitutional law and Supreme Court decisions are reviewed, and contemporary problems and issues in criminal justice are highlighted. B

CJC 105 Criminal Law I (3-0) 3 hrs.
A study of the New York State Penal Law. Sections of the Penal Law will be discussed and analyzed. Specific attention will be given to offenses that are considered to be both serious and frequently committed. Legal definitions, interpretations and classifications of crimes will be examined. General legal principles, recent court decisions and case law will also be considered. B

CJC 110 Criminal Law II (3-0) 3 hrs.
A study of the New York State Criminal Procedure Law. Specific topics include court procedures, laws of arrest and search warrants. Special emphasis will be placed on Constitutional limitations, criminal proceedings, and legal terminology. B

CJC 117 Issues in Constitutional Law (3-0) 3 hrs.
A study of Constitutional Law, including constitutional aspects of criminal law and procedure. Special emphasis will be placed on civil liberties, and individual rights guaranteed and protected by the Constitution. Jurisprudence, legal principles, government restraint, and Constitutional limitations will also be examined. Specific attention will be given to Supreme Court cases in order to emphasize the constitutional aspect of criminal justice. B

CJC 118 Introduction to Natural Resource Law (3-0) 3 hrs.
This course introduces students to laws for the protection and conservation of fish, wildlife and natural resources. The focus of the course is New York State and Federal law regulating the conservation of fish, wildlife and forest resources. Particular areas of study include the New York State Fish and Wildlife Law and Federal Fish and Wildlife Laws (eg: Lacey Act, Endangered Species Act, Migratory Bird Act). Students will study the evolution of the current body of New York State and Federal law relating to management of fish, wildlife and forest resources from a historical prospective. Students will also study legislative and administrative processes employed in the formation of Fish and Wildlife Laws and the functions and duties of the New York State and federal agencies charged with enforcing these laws. Instruction methods include lecture, class discussion and guest speakers. F

(Also listed as CON 118)
CUL 227 Introduction to Terrorism (3-0) 3 hrs.
This course will examine the concept of terrorism with a focus on the contemporary definitions of terrorism. It will explore the historical perspective to provide context for the issues being addressed today. There will be a dichotomy between domestic terror and international terror groups. The infiltration of foreign groups into the United States will be addressed. This course will also consider the legal implications associated with terrorist activities against the United States. ................................ F

CUL 233 Law for the Use and Protection of Water and Land Resources (3-0) 3 hrs.
This course focuses on Local, New York State and Federal laws for the protection of water resources and land use. Students will study New York State Environmental Conservation Law as it relates to the management of water resources, protection of freshwater and tidal wetlands, and regulation of mining and energy exploration. Students will study the New York State Environmental Quality Review Act (SEQRA) process and the Federal Clean Water Act, landowner rights and liabilities. Legal processes for the introduction of new laws and the enforcement of current laws will be discussed in depth. Students will be introduced to potential careers through the study of local, state and federal regulatory agencies charged with protection and wise use of water and land resources. Instruction methods include lecture, class discussion and guest speakers. .............. F
(Also listed as CON 233)

CUL 234 Laws for the Management of Air Resources, Solid Waste and Hazardous Substances (3-0) 3 hrs.
This course focuses on New York State and Federal laws for the protection of air resources, the management of solid waste and regulation of substances harmful to the environment. Students will study the New York State Environmental Conservation Law as it relates to protection of air resources, the management, transportation and disposal of solid and hazardous waste and the use substances potentially hazardous to the environment such as pesticides. Students will also study related federal statutes including the Clean Air Act, NEPA and CLERCA. Students will be introduced to potential careers through the study of local, state and federal regulatory agencies charged with protection of air resources, the management, transportation and disposal of solid and hazardous waste and the use of substances potentially harmful to the environment. Instruction methods include lecture, class discussion and guest speakers. .............. F
(Also listed as CON 234)

CUL 100 Culinary Fundamentals (3-4) 5 hrs.
This course teaches foundational culinary skills and knowledge. Students will learn the basic tenets of kitchen safety and organization including food sanitation, knife and equipment safety, and product identification and evaluation. The history of culinary arts and the food industry will be explored. ................................................................. F

CUL 110 Basic Culinary Application & Baking (3-4) 5 hrs.
This course is the second in the sequence of culinary arts courses. The course examines current industry standards and trends. Students will develop knowledge and skills in basic baking and culinary applications including dry and moist; and combination cooking methods. Cold food preps, stocks, soups, sauces, vegetable and starch cooking will also be covered. Prerequisite: CUL 100 ................................. F

CUL 150 Front of the House Practicum 3 hrs.
This is an experiential learning course of study in the 'front of the house' culinary operations. Students will be required to complete a minimum of 135 work hours of field experience at the New York Wine and Culinary Center. Students will be required to enter into an internship contract. Prerequisite: CUL 200 .......................................................... S

CUL 200 Advanced Culinary Application & Baking (3-2) 4 hrs.
This course builds on the Basic Culinary Application and Baking. It examines additional advanced techniques in baking and cooking and begins to explore the management of the kitchen including inventory and control, the chef/server perspective, and the menu development. This course also introduces the concept of local sustainable farming and the 'Locavor' movement. Prerequisite: CUL 110 ............................................ S

CUL 210 Advanced Customer Service (3-4) 5 hrs.
This course focuses on the business of culinary arts, including advanced customer service, kitchen and dining room operations, and effective customer management. Prerequisite: CUL 200 .............................................. F

CUL 250 Back of the House Practicum 3 hrs.
This is an experiential learning course of study in the 'back of the house' culinary operations. Students will be required to complete a minimum of 135 work hours of field experience at the New York Wine and Culinary Center. Students will be required to enter into an internship contract. Prerequisite: CUL 150, CUL 210 ........................................ F

CUL 260 Culinary Capstone Internship 4 hrs.
This is an experiential learning course of study in kitchen operations. Students will be required to complete a minimum of 180 work hours at a culinary institution based on their career goals. Students may choose to participate in a kitchen in the health care industry, restaurants, hotel banquet facilities, etc. Students will be required to enter into an internship contract. Prerequisite: CUL 210, CUL 250 ............................................. S

Developmental Studies

DST 031 Basic Mathematical Concepts for Nursing Students (1)*
This course is designed to help incoming nursing students to understand and carry out the mathematics for the problems they will encounter in their nursing curriculum; specifically dosage problems. Topics include unit conversion, rounding rules, formatting decimals, conversion factors and dimensional analysis. This course carries imputed (financial aid) credit. It does not fulfill FLCC’s Mathematics or general elective requirements. Course is graded on a satisfactory/unsatisfactory basis. ............................. B

DST 042 Fundamental Mathematics & Algebra Skills (3-0) (3)*
A beginning course in mathematics designed to prepare the student for further pursuits in algebra or statistics. This is an introductory course in algebra for the student that has no algebra or minimal algebra skills. Topics include integers, algebraic expressions, exponents, one variable first-degree equations and inequalities, applied problems, algebraic fractions with whole number denominators, exponent rules, graphing lines and slope of a line. This course carries imputed (financial aid) credit. It does not fulfill FLCC’s Mathematics or general elective requirements. Prerequisite: Placement in Math Level 0 ................................................................. B

DST 043 Intermediate Algebra (3-0) (3)*
A transitional course in mathematics designed to provide the student with a solid algebraic background for further studies in mathematics or the sciences. This is a mid-level course in algebra for the student that has some algebra skills. Topics include a review of solving and graphing linear equations, expressions with integer and rational exponents, scientific notation, operations on polynomials, factoring techniques, algebraic fractions and solving quadratic equations. This course carries imputed (financial aid) credit. It does not fulfill FLCC’s Mathematics or general elective requirements. Prerequisite: DST 042 or Placement into Math Level 1 ................................................................. B

DST 090 Basic Reading (3-0) (3)*
This course is an imputed credit course designed to strengthen reading
Digital Media

DIG 100 Introduction to Digital Media (3-1) 3 hrs.
This course introduces the tools, techniques, and concepts behind the production of digital media. Application of digital media technologies including operating systems, hardware, software, and multimedia design are explored. ......................................................... F

DIG 110 Digital Photography (3-0) 3 hrs.
This course is an introduction to the basic principles and techniques of digital photography. Topics include: the digital camera and its functions; theory, mechanics, and aesthetics of digital imagery; image editing software; and preparing digital images for print, the web and other digital media. Digital camera and basic computer skills required. ......................................................... B

DIG 120 Digital Media Design (3-1) 3 hrs.
This course examines the integration of new media with the practice of good design. Students develop an understanding of basic design principles and applications. The course emphasizes principles of design for the virtual community, linking theory, criticism and practice. Prerequisite: DIG 100. ......................................................... S

DIG 200 Audio for Film & Video (3-1) 3 hrs.
This course is an exploration of the principles and applications of digital audio in today's recording and multi media industries. Topics discussed include: digital audio fundamentals, recording and reproduction systems theory, computer and hardware based recording, editing, and audio for music and multimedia applications. ......................................................... F

DIG 230 New Media Production (4-0) 3 hrs.
This course serves as a capstone experience for students in the A.S. New Media program. Students will utilize digital video, audio, and design skills to complete new media projects. Projects may include development of a Web site and production of an original DVD. Prerequisites: COM 215; CSC 262, DIG 120, DIG 200. ......................................................... S

Economics

ECO 100 Survey of Economics (3-0) 3 hrs.
This course is a survey of economic theory. It will include a study of microeconomic issues such as supply and demand, economic decision making, competition and its effects and pricing. Also, it will include a study of macroeconomic issues such as inflation, recession, pollution, money, fiscal and monetary policy. ......................................................... B

ECO 210 Principles of Macroeconomics (3-0) 3 hrs.
This is an introductory course dealing with the principles of economics and how they are applied at the domestic economy and global level. Students will examine the public and private sectors, national income accounts, unemployment, inflation, income distribution, and fiscal and monetary policies as they relate to the U.S. and global economy. ......................................................... B

ECO 211 Principles of Microeconomics (3-0) 3 hrs.
This is an introductory course dealing with the methods and principles of microeconomics and how to better understand economic behavior and economic decision-making. Specifically students will understand the fundamental concepts of microeconomics dealing with the characteristics of market structures, how business firm prices, costs, and profits are determined. In addition, students will learn how resource prices are established and what specific roles of government within the market system are. ......................................................... B

Education

EDU 200 Foundations of American Education (3-0) 3 hrs.
A study of the historical, philosophical, social and cultural influences on education in America, including European and non-European influences on American educational thought. Prerequisites: Admission to Teacher Education program, 30 credit hours completed with a 2.0 GPA or higher, ENG 102, PSY 225, HIS elective and SOC 100. ......................................................... F

EDU 210 Schools in America: Organization and Issues (3-2) 4 hrs.
The course focuses on the dynamics of the school setting and on the interaction between and among students, teachers, administrators, families and others in the community. Issues covered in this course include schools as social systems, school governance, group processes, curriculum design, social class and educational equity, and attention to diverse learners. This course includes thirty hours of guided observation field experience in the K-12 school setting. Prerequisites: EDU 200 and COM 110. ......................... S

Emergency Medical Services

EMCR 125 EMS Management (3-0) 3 hrs.
This course is intended to provide information that will enable persons just entering the profession or expanding their roles to have the ability to work with emergency management issues. The course provides an overview of the characteristics, functions and resources of an integrated system and how various emergency management services work together in an integration of resources and capabilities. Emphasis will be placed on how this system is applied to all hazards for all government levels, across the four phases and all functions of emergency management. Also included is instruction on federal requirements for meeting the NIMS objectives. Prerequisite: Open to all EMS/Fire providers, or with permission of instructor. ......................... B

EMCR 130 Certified First Responder 2 hrs.
This course offers basic training to the professional rescuer who arrives first on the scene of a medical emergency. The purpose of this course is to
EMCR 135 Certified First Responder Refresher 1 hr.
This course is designed for individuals who have been certified by NYS Department of Health as a Certified First Responder for the purpose of maintaining their competency in providing emergency medical care. The content reviews the concepts and materials covered in the CFR course. After successful completion of this course, students are eligible to take the NYS certification exam. Recertification is required every three (3) years. Persons who have previously taken the CFR course for 3 credits or the CFR refresher for 1 credit are not eligible to receive credit for this course again. Prerequisite: Proof of certification as a CFR. ...

EMCR 146 Introduction to Paramedicine 5 hrs.
This initial course established the parameters that a paramedic operates within the pre-hospital setting. Topics include roles and responsibilities of a paramedic, medical and legal considerations, EMS communications and documentation. This course provides students with a general overview and principles of anatomy and pathology along with life span development. The paramedic student will be provided with the fundamentals of pharmacology including routes of drug absorption, administration, distribution, bioinformation and elimination, dosage calculations, and packaging. This course also begins to establish the parameters that a paramedic operates within the pre-hospital setting. During this course students will begin clinical requirements in communications and morgue labs. Prerequisites: Student must be accepted into the Paramedic Certification Program. Must hold a minimum certification of Basic EMT and maintain that certification throughout the entire program. Must have a minimum of one year EMS field experience.

EMCR 156 Paramedic Airway & Patient Management 7 hrs.
This course is the second in a series of courses leading to eligibility for certification as a New York State Paramedic. The course covers the anatomy and physiology of the respiratory system and airway. Emphasis on oxygen therapy and advanced and difficult airway management techniques will be covered during this portion of the program. Endotracheal intubation, paralytics and surgical airways are some of the procedures taught. Topics will also include anatomy of the vascular system with emphasis on the pathophysiology of shock. The student will be provided with a solid understanding of patient assessment which is the foundation for providing quality patient care. Clinical requirements required in this portion of the program will be the operating room labs, burn trauma, emergency departments and phlebotomy labs. Along with these clinical requirements, the student will begin a field internship with approved advanced life support agencies and designated preceptors. Prerequisites: Must be accepted into the Paramedic Certification Program. Must hold minimum certification of Basic EMT and must maintain that certification throughout the entire program. Must have a minimum of one year EMS field experience. EMCR 146.

EMCR 166 Paramedic - Cardiology 6 hrs.
This course established the parameters that a paramedic operates within the pre-hospital setting. Topics will include cardiac emergencies. Basic anatomy, physiology, pathophysiology of the heart, and identification of arrhythmias are presented along with the appropriate pre-hospital management modalities. Twelve lead ECG interpretations, pharmacotherapy, defibrillation, cardioversion, and pathophysiology of more common cardiovascular diseases which will be covered. Also, the student will be prepared for certification by the American Heart Association in Advanced Cardiac Life Support along with Pediatric Advanced Life Support, which includes care for the pediatric and neonate patients. During this course of the semester, the student will continue clinical requirements in coronary care units and emergency departments shadowing physicians and nurses. Students will continue the necessary requirements for field clinical experience as they continue to ride with approved advanced life support agencies and their preceptors. Prerequisite: Must be accepted into the Emergency Medical Technician Paramedic Certification Program. Must hold a minimum certification of Basic EMT and must maintain that certification throughout the entire program. Must have a minimum of one year EMS field experience. EMCR 146, 156.

EMCR 176 Paramedic - Medical Emergencies 7 hrs.
This course is the fourth in a series that covers the parameters that a paramedic operates within the pre-hospital setting. Topics include medical emergencies frequently covered in the pre-hospital setting, with an emphasis on pathophysiology and management. Topics include abdominal, genitourinary, neurological, behavioral, and respiratory emergencies. Also will include basic anatomy, physiology and pathophysiology of the endocrine system, including allergies, anaphylaxis, toxicology, hematology, pulmonology and infectious diseases. Also covered will be behavioral and environmental emergencies. During this course, students will be required to complete clinical requirements in pediatric emergency departments, pediatric intensive care units, obstetrics, medical/surgical intensive care units, adult care and emergency departments shadowing with physicians and nurses. Students will also be required to complete the necessary requirements for field clinical experience they receive while riding with approved advanced life support units and preceptors. Prerequisites: Student must be accepted into the Paramedic Certification Program. Must hold a minimum certification of the Basic EMT and must maintain that certification throughout the entire program. Must have a minimum of one year EMS field experience. EMCR 146, 156, 166.

EMCR 186 Paramedic - Trauma 13 hrs.
This course is the last in a series that covers the parameters that a paramedic operates within the pre-hospital setting. The student will study trauma to the various body systems, including burns, along with the kinematics and mechanism of injury. Students will also be prepared for certification in International Trauma Life Support. This course will also include scene management in various situations. Areas covered include providing care to geriatric patients with emotional and psychological emergencies and addressing emergency care to patients involved in abuse, assault and domestic violence. Students will also study ambulance and rescue operations, along with the Medical Incident Command System. During the course, students will be required to complete all remaining clinical requirements, along with the necessary requirements for field clinical experience by riding with approved advanced life support units and preceptors. At the end of this semester, the student will meet with the Paramedic Review Committee to determine eligibility to take the New York State Department of Health Practical and Written Exam. Prerequisite: Students must be accepted into the Emergency Medical Technician Paramedic Certification Program. Must hold a minimum of the Basic EMT and must maintain that certification throughout the entire program. Must have a minimum of one year field experience. EMCR 146, 156, 166, 176.

EMCR 200 Emergency Medical Technician with Defibrillation (1-3-2) 6 hrs.
This course is designed for professional rescuers who are treating and transporting the sick and injured patient to medical care facilities. The purpose of this course is to give the pre-hospital care providers the skills and knowledge to assess, treat, package, and transport the patient to the medical care facility. Students will be trained to the New York State Department of Health and National Department of Transportation standards. Students who complete the curriculum and pass both the NYS practical and written exam will be certified as EMTs. ...

EMCR 205 Emergency Medical Technician with Defibrillation Refresher (1-3) 2 hrs.
This course is designed for individuals who have been certified by NYS Department of Health as Emergency Medical Technicians for the purpose...
of maintaining their competency in providing emergency medical care. The content reviews the concepts and materials covered in the EMT course. After successful completion of this course students are eligible to take the NYS certification exam. Recertification is required every three (3) years. Persons who have previously taken the EMT course for 6 credits or the EMT refresher for 2 credits are not eligible to receive credit for this course again. Prerequisite: Proof of certification as an EMT.

EMCR 251 EMT Paramedic Refresher (6-0) 5 hrs.
This course is designed for individuals who have been certified by NYS Department of Health as an Emergency Medical Technician-Paramedic for the purpose of maintaining their competency in providing advanced adult and pediatric life support. The content reviews the concepts and materials covered in the Paramedic course. After successful completion of this course students are eligible to take the NYS certification practical and written exams. Recertification is required every three (3) years. Persons will only be able to receive college credit for this course once. Prerequisite: Proof of certification as a paramedic or RN or PA with special criteria is required. Call the EMS office at (315)789-0108 for further details regarding specific criteria.

EMCR 260 Critical Care Emergency
Medical Transport - Paramedic (5.5-2.5) 6 hrs.
The Critical Care Emergency Medical Transport course is designed to prepare paramedics and nurses to function as members of a critical care transport team. Critical patients that must be transported between facilities require a different level of care from hospital or emergency field patients. Participants will gain an understanding of the special needs of critical care patients during transport, become familiar with the purpose and mechanisms of hospital procedures and equipment, and develop the skills to maintain the stability of hospital equipment and procedures during transport. CEEMTP is open to any paramedic or nurse who has worked in that capacity for two years. Conditional waivers for paramedics granted by UMBC. Current BLS CPR, ACLS, PALS, and ITLS, PHTLS, or TNCC is required.

EMCR 261 Critical Care Emergency
Medical Transport - Paramedic Refresher 1 hr.
The CCETMTP certificate and renewal are valid for three years. Part of this renewal process is to provide documentation of thirty-six (36) credits of continuing education (CE) as the ALS level with an emphasis in critical care. One of the ways to obtain continuing education is to attend the CCETMTP original program offered. Lectures and labs are broken into the following modules: Critical Care Environment, Breathing Management, Surgical Airways Management, Hemodynamic Management, Cardiac Management, Pharmacological Management, GI, GU and Renal Management, Neurological Management, Complications of Transport and Special Considerations. A student could arrange through the EMS Programs Coordinator to attend the various modules to gain the required continuing education credits. The student would receive written documentation as to the modules attended with the appropriate credits. The student only need attend the hours needed for the refresher. Prerequisite: Current CCETMTP certification.

EMCR 310 Advanced EMT - Intermediate (1-3) 4 hrs.
This course is a more complex course designed for professional rescuers who are interested in expanding and building on their knowledge and skills in the pre-hospital setting. A heavy concentration in the area of trauma evaluation and rapid field evaluation and intervention are covered. Competencies include early recognition, assessment, treatment of the patient and use of advanced airway management and intravenous infusions and the use of a defibrillator. The Advanced EMT-Intermediate will be able to provide advanced pre-hospital care to acutely ill or injured patients by ambulance services and mobile advanced life support units under medical control. Pretesting is required for all students in this class. Prerequisites: Current NYS Certification as Emergency Medical Technician through either the Emergency Medical course or EMT Refresher course and one year, minimum, active field experience.

EMCR 315 Advanced EMT-Intermediate Refresher (1-3) 2 hrs.
This course is designed for individuals who have been certified by the NYS Department of Health as an Advanced Emergency Medical Technician-Intermediate for the purpose of maintaining their competency in providing emergency medical care. The content reviews the concepts and materials covered in the AEMT-I course. After successful completion of this course students are eligible to take the NYS certification exam. Recertification is required every three (3) years. Persons will only be able to receive college credit for this course once. Prerequisite: Proof of certification as an EMT-I.

EMCR 320 Advanced EMT Critical Care (2-3-2) 6 hrs.
This course is designed to prepare the student to administer many Advanced Life Support (ALS) procedures on patients in the pre-hospital setting. This course builds upon the EMT-D and EMT-Intermediate courses. The student that successfully completes the didactic, clinical, and field internship will be eligible to sit for the NYS certifying exam. The EMT-Critical Care will work under the direction of medical control physicians to provide one of the highest levels of pre-hospital care available in New York State. Prerequisites: Current NYS Certificate as an Advanced EMT-Intermediate through the Advanced EMT-Intermediate course or Advanced EMT-Intermediate Refresher course. The student must have been or be currently field active with an EMS agency that provides ALS care. Pretesting will be required for all students that enroll in the course.

EMCR 325 Advanced EMT Critical Care Refresher (3-1) 6 hrs.
This course is designed for individuals who have been certified by the NYS Department of Health as a Critical Care Advanced Emergency Medical Technician for the purpose of maintaining their competency in providing emergency medical care. The content reviews the concepts and materials covered in the Critical Care course. After successful completion of this course, students are eligible to take the NYS certification exam. Recertification is required every three (3) years. Persons will only be able to receive college credit for this course once. Prerequisite: Proof of certification as a Critical Care Technician.

ENG 101 Composition I (3-0) 3 hrs.
The goals of Composition I are to develop students’ abilities to write at a college level and to think critically. Students will learn to make decisions based on rhetorical concerns of a writer’s purpose, the readers’ needs, and the context in which documents are read. As using sources effectively is one of the goals in the course, research will be interwoven into documents as a way to support ideas and connect with the audience. The course emphasizes process-based writing, student reflection of their learning progress, and it culminates in a learning portfolio.Placement testing indicating direct entry into ENG 101 or ENG 104. A grade of C or better required if students take DST 095 (Foundational Writing) and/or DST 092 (Foundational Reading). Corequisite: Students placed in DST (Foundational Reading) only.

ENG 102 Introduction to Literature (3-0) 3 hrs.
Continuing the educational goals of English101 (critical thinking and confident writing), this course helps students to develop reader response and critical analysis papers related to several genres of literature. Writing Intensive. Prerequisite: ENG 101 or ENG 104.

ENG 103 Composition II (3-0) 3 hrs.
Continuing the educational goals of Composition I (critical reading and thinking, focused research, reflective writing, and process-based writing),
Composition II shifts the focus to the rhetorical concerns of persuasion and argument. The course provides students with increased practice in research, analysis, and genres of writing done throughout college as well as in the professional realm. The course emphasizes academic research-based writing and culminates in a best-works portfolio. Prerequisite: ENG 101 or ENG 104.

ENG 105 Freshman English II Honors (3-0) 3 hrs.
This course may substitute for or be taken in addition to ENG 101. Those who qualify through high interest and skills may be recommended into the Honors English courses or apply to the chairperson of the Department of Language and Philosophy. All processes of library-based research are taught through writing research papers. Readings in different disciplines will be discussed and analyzed to show the interrelatedness of knowledge. Prerequisite: Placement testing indicating direct entry into ENG 104... B

ENG 106 Foundations of Literature: Stories of the Bible, Mythology, and Folk Tales (3-0) 3 hrs.
This course provides a cultural base for students interested in reading and studying literature. A wide variety of stories from the Bible, mythology, and folk tales are read and analyzed for universal qualities and as sources for analogies, symbols, and themes found in much of the world's literature. Prerequisite: ENG 101 or ENG 104.

ENG 201 American Literature: 1620 - 1865 (3-0) 3 hrs.
A study in selected readings from the important literature of the United States. Emphasis is placed on the most significant writings of representative authors from colonial times to 1865. Prerequisite: ENG 102 or ENG 105.B

ENG 202 American Literature: 1865 - Present (3-0) 3 hrs.
A study of selected readings from the important literature of the United States. Emphasis is placed on the most significant writings of representative authors from 1865 to the present. Prerequisite: ENG 102 or ENG 105 . B

ENG 203 World Literature I (3-0) 3 hrs.
A chronological survey of selected readings from the important literature of Greece, Rome, the Far East, and continental Europe, from ancient times to the Renaissance. Prerequisite: ENG 102 or ENG 105.B

ENG 204 World Literature II (3-0) 3 hrs.
A continuation of ENG 203. A chronological survey of selected readings from the important literature of Europe, the Far East, South America, and Africa, from the Neoclassical, Romantic, Realism and Modern Periods. Prerequisite: ENG 102 or ENG 105.B

ENG 206 The Short Story (3-0) 3 hrs.
The study of the short stories of 19th century and contemporary writers. The different stories include themes of love and loss, families and relationships, and questions of faith. Discussion, analysis and writing formulate the activities. Prerequisite: ENG 102 or ENG 105.B

ENG 207 Topics in Literature (3-0) 3 hrs.
This course is designed to treat literature as it illustrates certain themes of human concern and the content will vary from semester to semester. Specimen topics might include Alienation in Modern Literature, Black Literature, Women in Literature, the Initiation Theme in Literature, Utopias: Alternative Life Styles, Literature into Film, Literature of the Environment, and Science Fiction. Prerequisite: ENG 102 or ENG 105.

ENG 209 Introduction to Children’s Literature (3-0) 3 hrs.
A survey of quality literature past and present for children and young adults. In this course there will be an exploration of a range of works written for or read by children and early adolescents in an effort to understand better the nature and value of children’s literature. The exploration will start with picture-books and progress through read-to-me, read-with-me books and continue up to works designed for young adults. An examination of Caldecott and Newberry Award Winners will help the student understand what makes certain works written for and read by children good. Prerequisite: ENG 102 or ENG 105.

ENG 213 Introduction to Dramatic Literature (3-0) 3 hrs.
This course is an introduction to the history and genre of drama. By exploring some of the best-known plays throughout theatre history and how they were performed students will develop an understanding of, and appreciation for the theatre. Lectures, films, and attendance will provide students with a partial overview of the vast range of theatre history and literature. Prerequisites: ENG 101 or ENG 104.

ENG 215 Literature of the Environment (3-0) 3 hrs.
The purpose of this course is to develop a deeper understanding and appreciation for writings on nature. The focus is on American nature writing presented chronologically from William Wood (1634) to Barry Lopez (2000). The selected writings are illustrative of the three main dimensions of nature writing: natural history information, personal responses to nature, and philosophical interpretation of nature. Prerequisite: ENG 101 or ENG 104.

ENG 221 Creative Writing (3-0) 3 hrs.
This course focuses on the writing of short stories and poetry. Techniques and skills of these forms are examined in class and practiced in student writing. Previous experience in fiction writing or in poetry is not required, but the student is expected to be proficient in the mechanics of writing. Prerequisite: ENG 101 or ENG 102.

ENG 222 Creative Writing II (3-0) 3 hrs.
A writing seminar for serious practitioners of literary forms. Participants will engage in organizing a personal writing project and will present writing in the seminar for appraisal. Previous experience in various forms of writing is assumed. Prerequisite: ENG 101 or ENG 104.

ENG 223 Journalism (3-0) 3 hrs.
This is an introductory course into the skills of the practicing journalist. Emphasis will be on the study of news gathering and news writing techniques. Students will employ these skills in the production of material suitable for use in the school newspaper and other news publications. Prerequisite: ENG 101 or ENG 104.

ENG 230 Perspectives on Tolkien (3-0) 3 hrs.
The lasting influence and power of Tolkien’s Lord of the Rings saga is undeniable - and seeing more mainstream success only with the release of a critically acclaimed series of films and an award-winning massively multiplayer online game. The purpose of this course is to look critically at such things as the books, the films, the game, and other ‘versions’ to explore how different media handle the same material. We will, as a class, discuss such issues as character and plot development, themes and literary elements, story-telling styles, cultural and historical contexts, benefits and limitations of various media, identity and role-playing games, and the role of audience in storytelling. Placing three different media into socio-cultural contexts will allow us to explore such issues as the role of story-teller, the importance of the visual, and the role of ‘game’ in today’s society. Students
in this class can expect to engage in activities such as reading the novels, watching the films, playing the game, writing, discussing and participating in individual and/or group projects that delve into the Tolkien’s work and the power of translation. Prerequisite: ENG 102 or ENG 105. ......... B

**Engineering Science**

**ESC 100 Introduction to Engineering (1-0)** 1 hr.
An introductory descriptive course about engineering. Topics include, the various branches of engineering and their history, famous engineers, engineering education today, and the career paths in engineering. .... F

**ESC 105 Engineering Graphics (1-5)** 3 hrs.
This course includes technical sketching, visualization, design, and the use of computer aided design (CAD). Topics include geometric construction and modeling, lettering, freehand sketching, orthographic projection, isometric projection, oblique projection, sectional views, dimensioning, working drawings, and the use of CAD software. Emphasis is on developing both manual sketching and CAD skills to convey engineering designs in accordance with industry standards. ....................... S

**ESC 173 Computing for Engineers I (1-2)** 2 hrs.
This is the first computation course for engineering and technical students. It is a standalone course and can be taken independently from Computing for Engineers II. Topics covered include: problem solving, numerical analysis, and computer programming concepts. The course uses MATLAB software package as the main computational tool. ................. B

**ESC 174 Computing for Engineers II (1-2)** 2 hrs.
This is the second computation course for engineering and technical students. It is a standalone course and can be taken independently from Computing for Engineers I. Topics covered include: problem solving, data acquisition, instrumentation and control, computer programming concepts, and spreadsheet concepts. The course uses LabVIEW software package as the main computational tool. ................. B

**ESC 210 Engineering Design I (1-3)** 2 hrs.
This course is the first part of a two-course sequence in engineering design. The students will work in teams. Topics include: Engineering design principles, fundamentals of microcontrollers, sensors, electric motors, engineering materials, mechanical systems, circuit board design, and manufacturing concepts. Prerequisite: Permission of instructor. .... F

**ESC 211 Mechanics I (Statics) (3-0)** 3 hrs.
This introductory course presents the theory and application of the principles of statics for use in subsequent courses and in engineering practice. The subject of statics deals with bodies at rest or in equilibrium, including a study of force systems, vectors, analytical methods of solution, friction, center of gravity and centroids, moments of inertia of areas. Prerequisites: MAT 272, PHY 151. ......................... F

**ESC 212 Mechanics II (Dynamics) (3-0)** 3 hrs.
This course is the second semester of a two-semester sequence in Engineering Mechanics. It presents the fundamental laws of Newtonian dynamics for particles and rigid bodies, provides a rigorous methodology for solution of problems, and presents a wide variety of examples of application. The course relies heavily on the use of vectors and vector algebra. Subject areas discussed are kinematics of particles, including rectilinear, relative and curvilinear motion; kinetics of particles including Newton’s Laws, dynamic equilibrium, angular momentum, work, energy principle, conservation of energy, and impulse-momentum; kinematics of rigid bodies including Newton’s Laws, angular momentum, plane motion, work and energy; introduction to vibrations (time permitting). Prerequisite: ESC 211. ................................. S

**ESC 213 Strength of Materials (3-0) 3 hrs.**
A study of the basic concepts of strength of materials; stress and strain in external loading, shear and torsion; centroids and moments of inertia; shear, moment and stress in beams; load, shear and moment diagrams; design and deflection of beams (statically determinate and indeterminate); combined stresses; welded, bolted and riveted joints; columns. Prerequisite: ESC 211. ................................. S

**ESC 220 Engineering Design II (4-0)** 2 hrs.
This course is a continuation of Engineering Design I. The students will work in teams on an engineering design project. They will design and build a prototype of their project using the principles learned in the first course. Prerequisite: ESC 210. ................................. S

**ESC 222 Electric Circuits (3-2)** 4 hrs.
This course is designed as the introductory course in linear circuit analysis normally offered to engineering students in the sophomore year. It provides an introduction to the theory of circuit analysis. Subject areas include: basic circuit quantities, voltage and current sources, purely resistive circuits, Kirchhoff’s Laws, equivalent resistances, nodal analysis, loop analysis, linearity, source transformation, Thévenin and Norton theorems, capacitance and inductance, RC, RL and RLC circuits, sinusoidal response, phasors, power. An introduction to op-amps is included. There is a strong emphasis on problem solving, and many examples will be worked in class. Homework will be assigned at each class. Prerequisite: PHY 152 or permission of instructor. ................. S

**ESC 235 Thermodynamics (3-0)** 3 hrs.

**Environmental Science**

**ENV 217 Environmental Planning and Impact Analysis (3-0)** 3 hrs.
This is an introductory course in the multi-disciplinary field of environmental planning. Techniques used to identify, inventory, and evaluate natural resources are examined. Local case studies, regulatory laws, and the environmental decision-making process are reviewed. Topics are developed further through assigned readings and classroom discussions. Students put concepts into use with realistic projects involving local environmental land use issues. ......................... F

(Also listed as CON 217)

**French**

**FRN 101 French I (3-0)** 3 hrs.
FRN101 is a beginning language course designed for students with no previous experience in French, or whose experience does not make placement in a higher level French course advisable. The course is designed to provide students with the fundamentals of French pronunciation and grammar, as well as an introduction to Francophone culture. The course will stress the development of communication skills, especially listening and speaking, but will also promote reading and writing skills. Prerequisite: Placement testing indicating direct entry into ENG 101 or ENG 104. A grade of C or better required if students take DST 095 (Foundational Writing). ......................... F

185
FRN 102 French II (3-0) 3 hrs.
FRN 102 is a continuation of the introductory level language course (FRN 101), with increased emphasis on vocabulary enrichment and the development of speaking ability as well as strengthening listening and reading comprehension skills. Students at this level will also continue to develop insights into Francophone culture and to draw comparisons with their own culture. Prerequisites: Successful completion of FRN 101 or an equivalent skill level in the language as recommended by the Modern Languages @ FLCC Language Placement Guide. ............................ S

FRN 175 French Language Immersion (3-0) 3 hrs.
The purpose of this course is to provide students with a linguistic and cultural travel experience. This study abroad experience is conducted in different locations throughout the French-speaking world. The course will emphasize improving French language proficiency as well as developing an understanding and appreciation of the host country culture. Students will study French at a recognized language institute in the destination site, and will also have the opportunity to participate in escorted touring to sites of interest. Students will be housed in family homestay accommodations for the duration of the trip (to the extent possible). Prerequisite: Placement testing indicating direct entry into ENG 101 or ENG 104. A grade of C or better required if students take DST 095 (Foundational Writing). . . . SU Previous study of French is recommended but not required. Students must complete an application form, provide two (2) letters of recommendation, and receive permission of instructor.

FRN 201 French III (3-0) 3 hrs.
FRN 201 expands on the vocabulary and grammatical structures introduced in the first two semesters of study. Emphasis is on the continued development of French language skills through the study and discussion of authentic readings in Francophone literature and culture. Students will learn strategies to improve reading comprehension and fundamental composition writing skills. Students at this level will also continue to develop deeper insights into Francophone culture and to draw comparisons with their own culture. Prerequisites: Successful completion of FRN 102 or an equivalent skill level in the language as recommended by the Modern Languages @ FLCC Language Placement Guide. ............................ B

FRN 202 French IV (3-0) 3 hrs.
FRN 202 is a continuation of the intermediate level course (FRN 201). Emphasis is on enhancing communication skills in French, both spoken and written. Students will refine critical reading and writing skills through further exploration of Francophone literature and culture. Prerequisite: Successful completion of FRN 201 or an equivalent skill level in the language as recommended by the Modern Languages @ FLCC Language Placement Guide. ............................ B

Freshman Seminar

FS 100 Liberal Arts First Year Seminar (2-0) 2 hrs.
First year seminar teaches students about the nature and purpose of a college education. Course topics provide students the opportunity to acquire and apply the skills and strategies necessary to meet their educational goals. Topics range from personal growth issues such as goal setting and time management to the academic survival skills of textbook reading, test-taking, and writing. Additionally, students will learn the resources and services the college offers to help maximize their educational experience. . . . B

General Studies

Courses do not fulfill humanities, social science, science, or mathematics requirements. GST courses only fulfill general electives.

GST 101 First Year Student Seminar (3-0) 2 hrs.
First Year Student Seminar is designed to acquaint students with the nature and purpose of a college education. Course topics provide students with the opportunity to acquire and apply the skills and strategies necessary to achieve their academic goals and to gain an awareness of available College resources. ................................. S

GST 106 Grammar and Sentence Basics (1-0) 1 hr.
The focus of this five week course is to provide students with instruction in basic grammar and sentence construction. This course is graded S (Satisfactory) or U (Unsatisfactory). ................................. B

GST 107 Paragraph Basics (1-0) 1 hr.
The focus of this five week course is paragraph development and the use of organizational patterns. This course is graded S (Satisfactory) or U (Unsatisfactory). ................................. B

GST 108 Essay Basics (1-0) 1 hr.
The focus of this five week course is the development of multiple paragraph essays and includes prewriting, drafting, revising and editing. This course is graded S (Satisfactory) or U (Unsatisfactory). ................................. B

GST 116 College Study Strategies (3-0) 3 hrs.
An examination of learning theories and strategies necessary for college success. Topics include note taking, memory development, textbook reading, test taking, current research techniques, goal setting, and time and stress management. Students will also complete a community project. The course objective is for students to become independent learners who will succeed in college. ................................. B

GST 117 College Success Strategies (1-0) 1 hr.
This five week course will address goal setting, motivation, time and stress management, note-taking and test taking strategies. ................................. B

GST 118 College Reading Strategies (1-0) 1 hr.
This course will focus on college reading strategies, reading comprehension, and read/study systems. ................................. B

GST 119 College Writing Strategies (1-0) 1 hr.
In this course, students will be guided through the steps of the writing process. ................................. B

Note: The student can enroll in one, two or all three of the modules. The course is similar to GST 116 and is considered its equivalent if all three modules are elected.

GST 201 Teacher Assistant I (3-0) 3 hrs.
This course is designed to prepare paraprofessionals to assist certified teachers in the education of children. Students will develop the instructional techniques necessary to function as a teacher assistant, gain an understanding of the functioning of a school system, and explore current trends in education. ................................. F

GST 202 Teacher Assistant II (3-0) 3 hrs.
This course is also designed to help prepare paraprofessionals to assist certified teachers in the education of children. Students in the course will develop the skills necessary to effectively manage student’s behavior and environment, develop an understanding of the various levels of child growth and development, and learn to communicate and cooperate effectively with students and co-workers. ................................. S
High School Equivalency Preparation (SCP 087/088)  no credit
This course is offered in the fall and spring to help students prepare for the High School Equivalency (GED). There is no cost for the course.  

Adult Basic Education Program (SCP 087/088)  no credit
This course is offered in the fall and spring and is designed to help students without a high school diploma to improve basic reading, writing, and mathematics skills. It often leads to enrollment in the High School Equivalency Preparation course. It is held in the day and evenings. There is no cost for the course.  

Geographic Information Systems

GIS 130 Introduction to Geographic Information Systems (2-2)  3 hrs.
This is an introductory level geospatial technology course designed to introduce students to the concepts and theories of geographic information systems (GIS) and the practice of geospatial analysis. This course consists of a lecture component and a laboratory component. Students will learn to apply GIS concepts through hands-on exercises designed to explore and analyze spatial data. Students will use leading geospatial software used by numerous professions including natural resources conservation and sustainability, business management, criminal justice, and community planning.  

(Also listed as CON 130)

History

HIS 100 Shaping of Western Society I (3-0)  3 hrs.
This course, the first half of the history of western civilization sequence, explores the social, political, intellectual and cultural origins of the western tradition in Europe. Using a variety of sources (primary and secondary) and spanning the two millennia from Classical Greece (5th c B.C.) and the era of Alexander the Great and the Roman Empire, through the Christian Middle Ages to the Italian Renaissance and the Age of Overseas Exploration (16th - 17th c.), this course traces the development of peculiarly western attitudes, values and institutions in Europe, and the notions of reason, individual rights, humanism, rule of law, and political liberty, that underpin them. This course also examines the manifold points of contact between the west and the wider world.  

(Also listed as HUM 100)

HIS 101 Shaping of Western Society II (3-0)  3 hrs.
This course, the second half of the history of western civilization sequence, continues the exploration of the social, political, intellectual and cultural development of the western tradition, from 1700 to the present. Using a variety of sources (primary and secondary) and encompassing a range of topics from the Scientific Revolution through the post Cold War era, this course examines the flowering of the rational, scientific and democratic western outlook in the modern era, and the various challenges posed by revolution, industrialization, totalitarianism, world war and the nuclear age. Topics include, the Enlightenment, French Revolution, Napoleon, Industrial Revolution, Age of Imperialism, World War I, Russian Revolution, Hitler and Nazism, World War II, the Holocaust, and the Cold War.  

(Also listed as HUM 101)

HIS 105 Regional History of the Finger Lakes (3-0)  3 hrs.
This course interprets State and National History from the local point of view, emphasizing the Finger Lakes Region. The local orientation will be treated through an interdisciplinary methodology with multimedia presentations (slides, movies, sound, etc.) combined with establishing lectures for each segment.  

HIS 110 United States History I (3-0)  3 hrs.
This course begins the exploration of the social, political, intellectual and cultural development of America from 1500 to 1877, covering such topics as the first European settlements, the American Revolution, Age of Jefferson, Westward Expansion, Slavery and the Old South, the Civil War and Reconstruction.  

HIS 111 United States History II (3-0)  3 hrs.
This course, the second half of the history of the United States sequence, continues the exploration of the social, political, intellectual and cultural development of America from 1865 to the present, covering such topics as industrialization, the Progressive era, the Great Depression and the New Deal, World War II and America’s rise as a world power, the Cold War, Vietnam, the Civil Rights movement, Watergate, the Reagan presidency and the post-9/11 War on Terror.  

HIS 122 Modern World History (3-0)  3 hrs.
A survey of modern history since 1500, from a truly global perspective. This course charts the rise of the West to a position of political, technological and industrial dominance in the modern era, but the principal focus will be upon major historical developments elsewhere: Africa, the Middle East, India, Latin America and East Asia. Considerable emphasis will be placed upon frequent intersections between the western and non-western worlds during the Age of Imperialism, World Wars I and II, the Cold War and post-1945 decolonization.  

HIS 206 The Indian in American History (3-0)  3 hrs.
An introduction to the role played by the Native American peoples in the history of the American nation from pre-Columbian times to the present. The student will examine the white images of the Indian as they evolved in our nation and the relations between white and Indian in order to understand more clearly the contemporary Indian Americans as people. Special emphasis will be given to northeast Native people, in particular the Iroquois. Prerequisite: HIS 111.  

HIS 215 Ireland: History, Culture and the Politics of Peace (3-0)  3 hrs.
This course will examine Irish history and culture through a wide spectrum of topics, covering: mythology, folklore, literature, music, art, history and politics. Issues of cultural identity will be discussed with special focus on literary response to social events in the course of Irish history. This course emphasizes reading, writing and oral presentation with strong emphasis on critical evaluation and discussion of historical, social, cultural and political issues. Students will also be exposed to Irish Art and Irish music and theatre.  

HIS 261 War and Society in the 20th Century (3-0)  3 hrs.
Focusing on the period 1890 to 1950 - from the First World War, through the Second World War and emergence of the Cold War - this course will examine the crucial interaction between war and society in the conflict-ridden twentieth century. Topics will include: how war has sparked dramatic social change and how society has given both form and substance to modern war. Prior completion of HIS 101, HIS 111 or HIS 122 is strongly recommended, but not required.  

HIS 269 The United States History since 1945 (3-0)  3 hrs.
Liberal ascendancy and the Cold War; the Fair Deal; modern Republicanism; the Great Society; an assertive America, culminating in Vietnam; the New Right; the post Cold War world. Prerequisites/Corequisites: History 111 or 122 or, A score of 85 or higher on the Regents Exam in US history.  

187
Honors

HON 100 Interdisciplinary Honors Seminar I (3-0) 3 hrs.
A course developed around major themes that will be approached from the perspective of various academic disciplines. This course is designed to facilitate in depth study of the topics selected each semester. Open to all students interested in a particular seminar topic as well as Honors students. See Honors Director for details. ............................................. B

HON 200 Interdisciplinary Honors Seminar II (3-0) 3 hrs.
This course description is the same as HON 100. The Honors Seminars will alternate between problem topics such as “Challenges of the Technological Society” and such philosophical considerations as “Justice: Absolute and Transitional Aspects.” Open to all students interested in a particular seminar topic as well as Honors students. See Honors Director for details. ................................................................. B

Horticulture

HRT 100 Introduction to Wines and Vines (3-0) 3 hrs.
This course is designed to introduce the student to the world of wine grapes, from cultural history and geography to plant taxonomy and anatomy. Topics covered in this course include wine producing regions, varieties grown, and important factors for successful crops. The wine tasting component of the course will be conducted at the Canandaigua Wine and Culinary Center, where the students will learn to distinguish wines and how to pair wines with food. They will take the examination to become internationally certified wine tasters. ............................................. B
(Also listed as VIT 105)

HRT 105 Basic Viticulture Techniques (3-0) 3 hrs.
This course is designed to introduce students to current practices for establishing a commercial vineyard and maintaining its vigor and productivity once established. Topics covered include site analysis, varietal selection, grafting and rootstock choices, planting, pruning and trellising methods. Tractor operation and equipment safety will be covered, along with fertilization techniques, crop rotation, and weed management strategies. ................................................................. S
(Also listed as VIT 105)

HRT 110 Introduction to Horticulture (3-0) 3 hrs.
Emphasis on the numerous specialties in Horticulture. Also a study of plants as living organisms, theory of pruning, fertilizing for healthy plants, hormones in plants, grafting and soil conditioning. Nutrient response of plants, plant fertility, fertilizers, fertilizer calculations, and spreader calibration will also be covered. This is recommended as a beginning course in Horticulture. ................................................................. F

HRT 111 Tree Culture & Maintenance (3-0) 3 hrs.
(Course can be used as either a conservation or horticulture elective.) Designed for individuals who desire a knowledge of tree health, value assessment, pruning, cavity work, wound treatment, climbing, general repair of trees, techniques of fertilization and transplanting. Practical aspects and field experience are emphasized. .................................................. S

HRT 130 Introduction to Floriculture (3-0) 3 hrs.
This course deals with flower production, use, and merchandising. Special emphasis on production and forcing of flowers for holidays as well as floral arrangements. Practical greenhouse experience included. .................................................. S

HRT 151 Plants Materials (3-0) 3 hrs.
This course exposes students to the identification, selection, adaptation, and utilization of common ornamental and native plants in New York State. Landscape value and wildlife usage of plants will be discussed where appropriate. The student will gain identification proficiency in association with knowledge of plant pattern and environmental planning. Field trips to Canandaigua area plant viewing locations are included. ......................... F
(Also listed as BIO 151)

HRT 160 Unique Horticulture Facilities (1-1) 1 hr.
This three- to four-day course provides students with field and travel experiences relative to their coursework in horticulture. This travel course is conducted in different locations in the Northeastern United States that are noted for their botanical gardens and horticulture facilities. Students will be provided with the opportunities to observe a wide variety of plant species and learn about their identification and care. Employment opportunities at the visited facilities will be explored. ............................................. S

HRT 200 Integrated Pest Management (3-0) 3 hrs.
Designed to provide the students with a working knowledge in developing environmentally sound programs in limiting harmful plant diseases and pests. The course will emphasize the principles and practices of integrating chemical, cultural, and biological controls; and pesticides and the environment. Training students in the types and usage of pesticides and pesticide equipment will be included. Field trips. ................................................................. S

HRT 201 Landscape Design I (3-0) 3 hrs.
An introduction to landscape design for those interested in reading, installing or drawing designs. Theory and principles of landscape design for private homes and/or commercial enterprises, techniques for understanding how to accurately place real world items into the drawing and drawn items into the landscape, presentation techniques, development of drawing skills, and visual communication of landscape designs on paper will be covered. Also included will be discussion of the integration of landscape design principles with elements of the environment that lead to sound ecological practices and the calculation of the quantity of materials needed to complete the ecological practices and the calculation of the quantity of materials needed to complete the installation of the project. Prerequisite: HRT 151. F

HRT 202 Landscape Construction and Maintenance (3-0) 3 hrs.
This course will familiarize students with construction of walks, drives, walls, patios, fireplaces, garden structures, lawns, flowerbeds; and the planting and staking of trees and shrubs. Maintenance practices for the landscape, including actual pruning of small trees and shrubs, irrigation, and Spring and Fall preparation of the landscape will be studied. Topics on business establishment and operation as well as bidding the job will be discussed. ................................................................. S

HRT 203 Turf Management (3-0) 3 hrs.
This course deals with grasses and grass varieties, cultural requirements of turfgrass, establishment, mowing, dethatching, aerating, fertilizing, irrigation, and weed control. ................................................................. S

HRT 204 Plant Propagation and Nursery Management (3-0) 3 hrs.
This course will familiarize the student with methods of increasing plant number and producing a salable product. Topics include growth structures, media, plant culture, sexual and asexual propagation, grafting, and nursery management. Practical greenhouse and field experience included. ..... B

HRT 210 Landscape Design II (3-0) 3 hrs.
An intense, hands-on extension of Landscape Design I that focuses on the development of professional design skills for the residential and commercial landscape. The student will develop designs, time, materials and labor cost estimates and presentation skills for a variety of real-world design projects. First-hand experience using professional level techniques will be gained during this class. Required field trips to landscape sites will be held during class hours. Prerequisite: HRT 201. ................................................................. S
HTM 100 Principles of Hotel/Resort Operations (3-0) 3 hrs.
An overview of the history, organizational structure, and economics of the hotel business and career opportunities in the hospitality industry. The emphasis of the course will be an examination of the technical operations integral to hotel and resort management. Areas of study will include: hotel and resort operations; front office operations; food, beverage, and restaurant operations; housekeeping and engineering; sales; and staff management. B

HTM 130 Introduction to Food and Beverage (3-0) 3 hrs.
This course examines the complexities of food and beverage management. Both hotel food service operations and free-standing restaurants will be discussed. Students will explore menu planning, pricing, sanitation and safety, kitchen layout, storage facilities and principles, food preparation techniques, purchasing and inventory, beverage control, responsible beverage management and food service presentation methods. B

HTM 135 Rooms Division Management (3-0) 3 hrs.
This course will provide detailed analysis of the policies and procedures utilized in managing the rooms division of a hotel. Predominant areas if study will include the front office and housekeeping. The student will explore guest check-in and check-out, front office operations and structure, reservations and the switchboard, the accounting process, and the night audit. The day-to-day functions of an effective housekeeping department, cleanliness standards, housekeeping procedures, inspecting, and cleaning supplies and equipment will also be discussed. Each student will focus on methods for cultivating a service-oriented attitude in rooms division employees. B

HTM 205 Principles of Food Production (1.5-2.5) 4 hrs.
This course is an introduction to the basic principles of food preparation. Topics of study include kitchen organization and efficiency, equipment usage, recipe utilization and manipulation, food composition, preparation methods, ingredient uses and availability, product evaluation, sanitation techniques, and kitchen safety. Prerequisites: HTM 100 and HTM 130 S

HTM 210 Hospitality Computer Applications (3-0) 3 hrs.
This course allows the student to interact with LODGEMATE, a state-of-the-art, Front Office Property Management System. Students will simulate an actual front desk experience as they enter the system and manage hypothetical guest accounts. Current hotel computerization trends will also be examined including the latest technological advances and software packages. Additionally, students will explore hospitality applications of the PageMaker desktop publishing package. Prerequisite: HTM 100. S

HTM 220 Hospitality Marketing and Sales (3-0) 3 hrs.
This course allows the student to analyze basic sales management policies and procedures. The functions of a working hotel sales department will be discussed with an emphasis on the utilization of property management system data in sales planning, brief preparation, sales presentations, and client contact. The student will also consider trade show and exhibit sales techniques, sales blitz planning and execution, and marketing research and promotional programs. Prerequisite: HTM 100. S

HTM 225 Meeting Planning and Conference Management (3-0) 3 hrs.
This course discusses the specialized field of meeting and conference management and its impact on the hotel industry. Each student will consider the component parts of a successful meeting and analyze these parts from both a meeting planner and hotel management team standpoint. Areas of study will include: site selection and negotiations, program development, banquet food service, function room set-up, conference support services, and meeting evaluation. Prerequisite: HTM 100. F

HTM 230 Hotel Law (3-0) 3 hrs.
Hotel law is designed to introduce the student to the legal issues surrounding the practices of the hospitality industry. Topics to be covered include, but are not limited to, contract law, negligence, bailment, rights of innkeepers, rights of guests, liability with respect to the sale of food and alcohol, regulation and licensing, employment issues, and casino law. F

HTM 250 Hotel and Resort Management Internship (3-0) 3 hrs.
The Hotel and Resort Management Internship Program enables Finger Lakes Community College students to supplement their academic studies and increase career awareness through field work related to the hospitality industry. The students’ activities during the internship will include both participation and observation so that they can develop applicable skills and an understanding of the overall organization and operation of a hotel facility. B

Human Services

HUS 102 Human Services in Contemporary America (3-0) 3 hrs.
An introduction to the contemporary Human Services field. It includes a philosophical and theoretical orientation to Human Services; exploration
of agency structure, personnel and services; and an agency visitation. Professional and personal human services competencies, ethics and the law are also examined. .................................................. B

HUS 103 Case Management (3-0) 3 hrs.
This course focuses on the case management process. Students develop a basic understanding of the primary concepts and process of case management. Attention is paid to documentation, the interview, assessment, developing a service plan, managing information, networking, monitoring services, referral and successful termination and discharge. Prerequisite: HUS 102 .................................................. S

HUS 204 Field Experience I (4-0) 4 hrs.
Field Experience with individual and group supervision. The student will spend six-eight hours per week in direct agency service under supervision, for a total of ninety hours during the semester and class time in small group supervision. Emphasis will be on developing and strengthening work related competencies. Prerequisites: HUS 102, PSY 150 and permission of instructor. .................................................. B

HUS 205 Field Experience II (4-0) 4 hrs.
Field experience with individual and group supervision. The student will spend six-eight hours per week in direct agency service under supervision, for a total of ninety hours during the semester and class time in small group supervision. Field Experience II affords students a second placement with possibilities of exposure to a different area of human services or a similar more intense experience. It also includes a major research project. Prerequisites: HUS 102, HUS 204, PSY 150 and permission of instructor. .................................................. B

Humanities

HUM 100 Shaping of Western Society I (3-0) 3 hrs.
This course, the first half of the history of western civilization sequence, explores the social, political, intellectual and cultural origins of the western tradition in Europe. Using a variety of sources (primary and secondary) and spanning the two millennia from Classical Greece (5th c B.C.) and the eras of Alexander the Great and the Roman Empire, through the Christian Middle Ages to the Italian Renaissance and the Age of Overseas Exploration (16th - 17th c.), this course traces the development of peculiarly western attitudes, values and institutions in Europe, and the notions of reason, individual rights, humanism, rule of law, and political liberty, that underpin them. This course also examines the manifold points of contact between the west and the wider world. .................................................. B
(Also listed as HIS 100)

HUM 101 Shaping of Western Society II (3-0) 3 hrs.
This course, the second half of the history of western civilization sequence, continues the exploration of the social, political, intellectual and cultural development of the western tradition, from 1700 to the present. Using a variety of sources (primary and secondary) and encompassing a range of topics from the Scientific Revolution through the post Cold War era, this course examines the flowering of the rational, scientific and democratic western outlook in the modern era, and the various challenges posed by revolution, industrialization, totalitarianism, world war and the nuclear age. Topics include, the Enlightenment, French Revolution, Napoleon, Industrial Revolution, Age of Imperialism, World War I, Russian Revolution, Hitler and Nazism, World War II, the Holocaust, and the Cold War. .......................... B
(Also listed as HIS 101)

MAS 110 Swedish Massage (3-4) 4 hrs.
In this course, the student will learn the history, theory, and technique of the Swedish Massage. The five strokes of the Swedish System and the application of these strokes in full body massage will be taught. Other topics will include techniques for draping and body positioning of clients. An overview of the indications and contraindications for Swedish massage, basic hygiene, equipment, lubricants, and supplies will be presented. Instruction in Body Mechanics for the massage therapist and self care techniques will be covered. Corequisite: BIO 171 with a grade of C or better. .................................................. F

MAS 205 Medical Massage (5-2) 5 hrs.
This course will cover an introduction to medical massage including various healthcare settings: hospital for both inpatients and outpatients, private practice, and clinics. Topics include specific medical terminology, specific techniques for pathologies and injuries, subjective and objective assessment and planning documentation for insurance cases, and the benefits of massage as prevention versus medicine. Prerequisites: BIO 165, BIO 171, BIO 172, BIO 265, MAS 110, MAS 210, MAS 211, MAS 215, MAS 245 each with a grade of ‘C’ or better. Corequisite: MAS 220, MAS 250. .................................................. F

MAS 210 Shiatsu I (4-3) 4 hrs.
This course will present the fundamentals of classical Shiatsu theory, the emerging styles of classical and modern Shiatsu modalities, the history of Chinese medicine, traditional Chinese medical concepts as they relate to Shiatsu, Oriental anatomy, the anatomy of energy, and Oriental physiology. The methods of assessment and the techniques for formulating a treatment will also be covered. This course will prepare students for MAS 211 Shiatsu II. The students will be introduced to the practice of Shiatsu with hands-on demonstrations and practice during the two-hour laboratory component of the course. Prerequisite: BIO 171, MAS 110 with a grade of ‘C’ or better. Corequisite: BIO 165, BIO 172. .................................................. S

MAS 211 Shiatsu II (1-3-3) 4 hrs.
This course will emphasize hands-on demonstrations and practice of the Shiatsu technique. The philosophy of Oriental thought and Oriental medical theory taught in MAS 210 Shiatsu I will be expanded upon and will be the basis for the evolution of the Shiatsu technique practiced in this course. Central theoretical concepts will be reviewed through a combination of lecture and hands-on palpation of energy centers, meridians, and acupuncture points (tsunobo). Students will practice energy assessment and will learn to give a full Shiatsu treatment. The practice of Shiatsu involves body mechanics which train the practitioner to originate thought, energy, and movement from the Hara. Therefore, the study of Shiatsu includes not only the practice of a physical technique, but requires the integration of Oriental philosophical principles to reach a state of centeredness and calm necessary to energy assessment. Students will learn the concept of “Bodymind” as one entity. Prerequisite: BIO 165, BIO 171, BIO 172, MAS 110, MAS 210 each with a grade of ‘C’ or better. Corequisite: BIO 265, MAS 215. .................................................. F

MAS 215 Connective Tissue and Neuromuscular Massage Therapies (3-4) 4 hrs.
This course will cover two bodywork modalities utilized in the relief of myofascial (soft tissue) pain/dysfunction syndromes: 1) neuromuscular therapy (NMT), which emphasizes the role of the nervous system in muscle pain, and 2) connective tissue therapy (CTT), which focuses on freeing muscle structures from hardened and adhered connective tissue. Prerequisites: BIO 165, BIO 171, BIO 172, MAS 110, MAS 210 each with a grade of ‘C’ or better. Corequisite: BIO 265, MAS 211. .................................................. S

MAS 220 Law and Ethics (2-0) 2 hrs.
This course informs students about the legal and ethical aspects for the profession of a licensed massage therapist (LMT). Topics included in the
course are: legal standards, professional conduct, unprofessional conduct, professional misconduct, and disciplinary procedures. Other topics include the examination of the code of ethics of a LMT, standards for practice, and ethical decision making. Paperwork and procedures necessary for applying to take the New York State Massage Therapy licensing exam will be reviewed. Prerequisite: BIO 165, BIO 171, BIO 172, BIO 265, MAS 110, MAS 210, MAS 211, MAS 215, MAS 245 each with a grade of ‘C’ or better. Corequisite: MAS 205, MAS 250.

MAS 225 Alternative Therapies (3-0) 3 hrs.
This course explores the variety of options available today for use in the pursuit of holistic health. Alternative therapies will be viewed as complementary to the existing medical system. The course will look at the theories, clinical research, politics and controversies around the use of various alternative healing modalities. It will provide the student with information to evaluate the use of complementary therapies in healing and health maintenance. The format of this course includes lecture, class discussion, guest speakers, audiovisual aids, and student presentations. This course is open to anyone interested in alternative therapies. 

(Also listed as NUR 220)

MAS 240 Massage Field Experience 2 hrs.
Seventy hours of field experience will be spent in a massage/complimentary treatment center. The student will enter the facility under terms laid down by said facility. The facility will provide direct supervision and the field coordinator indirect supervision for the student. Five hours of classroom experience will also be included. Prerequisite: MAS 110, MAS 210 with a grade of ‘C’ or better. 

MAS 245 Massage Therapy Research (2-0) 2 hrs.
This course introduces students to research and critical appraisal in the complementary and alternative health care field with a special emphasis on massage therapy research. It will focus on the need to ask questions about the practice of massage therapy and how to construct good clinical questions. Topics will include: becoming a reflective massage therapist, finding evidence to support the work of the massage therapist, understanding the scientific evidence, evaluating the evidence and then applying the evidence to practice. Prerequisite: MAS 110, Corequisite: BIO 165, MAS 210.

MAS 250 Massage Therapy Practicum (0-4) 2 hrs.
This course affords massage therapy students the opportunity to administer their massage skills to fellow students, acquaintances, and members within the community. Supervised by massage therapy faculty, these clinic sessions will closely simulate a massage therapists practice. Students will utilize communication skills, intake procedures, massage techniques, as well as post-massage feedback from clients and instructors. Students keep detailed records of their work and reflect upon their experience and progress in workbook study. A percentage of each student’s practice sessions are community service massages. The practicum provides students with a wide range of experience and provides members of the community with the benefits of therapeutic massage. Prerequisites: BIO 165, BIO 265, MAS 110, MAS 205, MAS 210, MAS 245 each with a grade of ‘C’ or better. Corequisites: MAS 211, MAS 215.

MAS 255 Massage Travel/Study Experience (3-0) 3 hrs.
This course provides students with an observational and hands-on study of various massage techniques and healing modalities that derive from other cultures. This course may be conducted in different locations throughout the world where specific styles of massage therapy techniques originated. Students will also partake in lecture about the cultural history and underlying theory that these practices are based on, as well as travel within the country to visit historical sites that are relevant to the history of massage therapy and wellness in the specific culture. Due to the extensive travel requirements, a limited number of students will be enrolled in each section. Unless otherwise specified by the course instructor, the course will be limited to students who are matriculated in the Therapeutic Massage/ Integrated Health Care Program with a minimum of two semesters completed, or have a New York State Massage Therapy License.

Mathematics

MAT 101 College Mathematics I (3-0) 3 hrs.
This course is intended for the liberal arts student. The purpose of this course is to share the excitement and enjoyment of contemporary mathematical thinking. The course answers the question, "What do mathematicians do, practice, or believe in?" The use of mathematics in areas of business and industry, politics, networking and telecommunication will be studied with the intent to develop reasoning ability, logical thinking, critical reading, and written and oral communication. The topics are selected so that they are self-contained.

MAT 110 Business Mathematics (3-0) 3 hrs.
This course is directed toward the student who wishes to study mathematics with business and financial applications. The philosophy of the department is that this course is a mathematics course using business-related topics to enhance the student’s abilities in and appreciation for mathematics. The course topics are chosen so as to be of interest to a broad range of students. Among the topics chosen are simple interest, simple discount, compound interest, present and future value of annuities, spreadsheets and other specific financial applications.

MAT 121 Statistics I (3-0) 3 hrs.
A continuation of Statistics I (MAT 121) with an introduction to statistical research. Topics included are statistical inferences of hypothesis testing and estimation for means, proportions and variances, determination of sample size, uses of the Chi- square distribution, analysis variance, linear correlation and linear regression: non-parametric statistics and statistical research. Also included is an application of computer usage - specifically Minitab. Prerequisite: MAT 121.

MAT 122 Statistics II (3-0) 3 hrs.
A continuation of Statistics I (MAT 121) with an introduction to statistical research. Topics included are statistical inferences of hypothesis testing and estimation for means, proportions and variances, determination of sample size, uses of the Chi- square distribution, analysis variance, linear correlation and linear regression: non-parametric statistics and statistical research. Also included is an application of computer usage - specifically Minitab. Prerequisite: MAT 121.

MAT 145 College Algebra (3-1) 3 hrs.
This course is directed towards the student learning algebraic concepts necessary to enter into Pre-Calculus (MAT 152). Topics included in this course are the concept of a function, linear, quadratic, polynomial and trigonometric functions, systems of equations, right triangle trigonometry and trigonometry on general triangles. Solutions to equations and inequalities will be found numerically, algebraically, and graphically. Throughout the course, applications are emphasized as a reason for learning algebra. Prerequisite: DST 043 or Placement into Math Level 2.

MAT 152 Pre-Calculus (3-1) 3 hrs.
A continuation of the concept of functions learned in College Algebra expanding to exponential, logarithmic, polynomial, and rational functions. In addition, topics for consideration include transformations, composition, inverse functions and trigonometric functions. This course provides in depth study of a variety of functions, solving equations and applications of functions. Moreover the course provides a bridge to the beginning groundwork of Calculus with the study of rates of change, extrema and concavity. Graphing calculator required. Prerequisite: MAT 145 or Placement into Math Level 3.
MAT 180 Mathematics for Elementary School Teachers I (3-0) 3 hrs.
This course is the first of a two-semester sequence designed for prospective elementary education teachers. The course presentation and material will conform to the NCTM Standards and therefore will present mathematics in the context of problem solving, communication (both oral and written), reasoning, including direct and indirect proofs, and mathematical connections. Students will explore mathematical concepts and theories underlying the topics including: set theory, numeration and different number systems, operations on integers, rational and irrational numbers, prime and composite numbers, divisibility and modular arithmetic. Prerequisite: MAT 180. .......... B

MAT 220 Discrete Mathematics Structures (3-0) 3 hrs.
This course covers the basic foundation principles for the study of mathematical structures that are finite or countable in number (Discrete). Topics to be studied include set theory, logic, number theory, and functions. Prerequisite: MAT 271. ................. B

MAT 271 Calculus I (4-0) 4 hrs.
A first course in Calculus focusing on the mathematics of changing rates. The derivative of polynomial and transcendental functions is investigated from a numerical, graphical, and algebraic approach. Applications for the use of derivatives are also explored. Introduction to the definite integral and the Fundamental Theorem of Calculus is included in this course. Graphing calculator required. Prerequisites: MAT 152 or Placement into Math Level 4. ................. B

MAT 272 Calculus II (4-0) 4 hrs.
A continuation of the topics studied in Calculus I, in particular anti-differentiation and integration of functions and their applications. Also included are various techniques of integration, improper integrals, indeterminate limit forms, infinite series, Taylor polynomials, power series, and an introduction to differential equations. Prerequisite: MAT 271. B
Graphing calculator required; see department chair for specific model.

MAT 273 Calculus III (4-0) 4 hrs.
The calculus of multivariable functions and vectors. Topics include partial differentiation, multiple integrals, optimization, multiple integration, line integrals and vector fields. Prerequisite: MAT 272. .... F
Graphing calculator required; see department chair for specific model.

MAT 274 Differential Equations (3-0) 3 hrs.
A course work of the study of elementary differential equations. Differential equation solution techniques are studied in conjunction with simplified modeling applications. Topics include variable separation, undetermined coefficients, parameter variation, series solution, Laplace transforms, and Euler's methods. Prerequisite: MAT 272. .... S

MAT 276 Linear Algebra (3-0) 3 hrs.
A survey course of the study of elementary linear algebra through the study of finite dimensional vector spaces, linear transformations and matrices. Topics covered include vector and matrix operations, determinants, systems of linear equations, linear independence, eigenvalues and eigenvectors. Prerequisite: MAT 271. .......... S

MAT 280 Mathematics for Elementary School Teachers II (3-0) 3 hrs.
This course is the second of a two-semester sequence designed for prospective elementary education teachers. The course presentation and material will conform to the NCTM Standards and therefore will present mathematics in the context of problem solving, communication (both oral and written), reasoning, including direct and indirect proofs, and mathematical connections. Students will explore mathematical concepts and theories underlying the topics including: proportional reasoning, statistics, probability, and geometry in terms of shape, transformations, and measurement. Prerequisite: MAT 180. .......... B

MUS 100 Music Appreciation (3-0) 3 hrs.
A course for the general interest student, the intent of which is to heighten the student's awareness of the place of music in our culture and enhance his or her enjoyment of the art form itself. ......................... B

MUS 105 Basic Musicianship (3-0) 3 hrs.
Study of scales, intervals, key signatures, meters, rhythmic reading, and chords. This course is for students with little or no background in music performance or theory. ......................... B

MUS 106 Music Theory I (3-0) 3 hrs.
An introductory course designed for the general student and for individuals majoring in Music or Music Recording. Students learn the fundamentals of harmony, music reading, part-writing in root position, simple choral analysis, keyboard skills, and sight singing. Attendance at two hours of aural dictation and one hour of keyboard lab weekly is required in addition to the lectures. Prerequisite: A score of 13 or higher on theory placement exam or MUS 105. Co-requisite: MUS 106L. Prerequisite: A score of 13 or higher on the Theory Placement Exam or MUS 105. Corequisite: MUS 106L......... B

MUS 106L Music Theory I Lab (0-3) 1 hr.
An introductory course designed for individuals majoring in Music or Music Recording to amplify the material covered in the lecture portion. Co-requisite: MUS 106. ................................. B

MUS 107 Music Theory II (3-0) 3 hrs.
Continuation of Music Theory I. Continuation of part-writing trials, study of secondary dominants, continuation of study of chord and non-chord tone function in tonal system (including modulation), analysis of choral, introduction to analysis of easy keyboard literature of the 18th and 19th centuries. Attendance at two hours of aural dictation and one hour of keyboard lab weekly is required in addition to the lectures. Prerequisite: MUS 106, Corequisite: MUS 107L. .......... B

MUS 107L Music Theory II Lab (0-3) 1 hr.
Continuation of Music Theory Aural Lab I. Designed for individuals majoring in Music and Music Recording to amplify the material covered in the lecture portion. Prerequisite: MUS 106L. Co-requisite: MUS 107. ................. B

MUS 108 Class Piano (3-0) 3 hrs.
This course provides an introduction to keyboard performance in a group setting for students with little or no prior background. It is especially appropriate for non-piano majors who must gain basic keyboard proficiency. Although music majors will be given priority, class piano is also suitable for any student who wishes to learn how to play. The course emphasizes sight reading, transposition, harmonization and improvisation, as well as exposing the student to solo and ensemble repertoire from a number of styles. ................. B

MUS 109 Vocal Jazz Ensemble (3-0) 1 hr.
A select group of ‘day students’ chosen annually through audition who perform jazz and pop standards. Prerequisite: Audition and approval of instructor. ......................... B

MUS 111 Master Composers I (3-0) 3 hrs.
A study of canonic pieces of Western Music Literature as well as critical issues involved in the assertion of canonicity or “greatness”. .......... F

MUS 117 Master Composers II (3-0) 3 hrs.
In Master Composers II, students will continue to study particular examples of mainstream music literature from the 17th century to the present. The course aims to create a foundation for the broad perception of historic style across genres by developing a repertory of specific representative pieces
MUS 170 Techniques of Audio Recording I (3-0)
A study of mixer formats, patch bays, decibels, acoustics, and microphones. Emphasis is on gaining practical knowledge through working with recording equipment. Consideration is also given to production concepts and aesthetics. Students will work on both studio and field recording projects.

MUS 174 Techniques of Audio Recording II (3-0)
Consideration of the business aspects of each step in the marketing of music, music services, and music products. The student learns about recording studio operation, record companies, record distribution, merchandising, promotion, administration, the media, and careers in music.

MUS 206 Music Theory III (3-0)
Intermediate level work with harmony, voice leading and analysis grounded mainly in the stylistic practice of the 18th and 19th Century tonal repertory. Includes introduction to form. Aural labs and keyboard labs develop sight-singing, dictation and performance competencies based on, or supportive of, material discussed in lecture. Prerequisite: MUS 107 or permission of instructor. Corequisite: MUS 206L.

MUS 207 Music Theory IV (3-0)
Continuation of Music Theory III. Attendance at two hours of aural dictation and one hour of keyboard lab weekly is required in addition to the lectures. Prerequisite: MUS 206 or permission of instructor.

MUS 216 Music History II: Classic to Modern (3-0)
The history of music from the rise of sonata form in the works of Haydn and Mozart to the twelve-tone, atonetic, and electronic music of the present. Writing Intensive. Prerequisite: ENG 101 or ENG 104, MUS 107.

MUS 225 Audio Recording Practicum/Internship (3-0)
Students are provided with practical experiences on commercial projects in area recording studios. Prerequisites: MUS 170, 174 or 176, 270, 271, and permission of instructor.

MUS 229 Chamber Music (3-0)
Rehearsal and performance of chamber music written for a combination of brass and woodwind instruments.

MUS 230 Jazz History (3-0)
A study of the history of jazz, from the late 19th century to present day. Major trends will be explored, including dixieland, swing, bebop, cool, hard bop, fusion, free and contemporary. Topics will also include contributions by important musicians, changes in technology, and societal trends and their effect on jazz.

MUS 235 Music Composition Using Sibelius (3-0)
This course is an introduction to Apple Mac Computers with a concentration on Sibelius music notation software. Topics covered will include computer literacy, the Mac operating system, file management and formatting, and problem solving. Students will apply these techniques to Sibelius software via hands-on projects in music composition, notation, scoring, MIDI, rhythm, and note entry using the computer. Prerequisite: A score of 13 or higher on the Music Theory Placement Exam or a grade of 'C-' or better in MUS 105.

MUS 250 Music Business (3-0)
Consideration of the business aspects of each step in the marketing of music, music services, and music products. The student learns about recording studio operation, record companies, record distribution, merchandising, promotion, administration, the media, and careers in music.

MUS 270 Techniques of Audio Recording II (3-0)
A study of equalization, reverberation, tape recorders, compressors, recording consoles, tape editing, disc manufacturing, and routine studio maintenance. The student heightens his aural skills through applying critical listening techniques to prerecorded music. Students will work on both studio and field recording projects.

MUS 271 Techniques of Audio Recording III (3-0)
This course is a sequel to the Techniques of Audio Recording II. The student is introduced to computer software basic operations, computer based sequencing, MIDI, time code synchronization, and digital hard disk recording. Emphasis is on the impact of computers in music and in the modern recording studio.

MUS 272 Techniques of Audio Recording IV (3-0)
A continuation of Techniques of Audio Recording III incorporating additional computer techniques. Topics include digital editing, automation, mixing, and mastering.
NUR 101 Nursing Care of the Adult and Child I (5-9) 8 hrs.
This is the first of a two-semester sequence concerned with commonly occurring health problems and chief impact on man in relation to developmental stages and Maslow’s needs. Health is presented as alterations in wellness/illness as a human experience. Nursing is presented utilizing the nursing process applied to patient problems. Included are the associate degree core components and competencies. Major units of study include: transitions in health care, commonalities in the illness experience, coping with problems of oxygenation, nutrition, metabolism, elimination, and motor activity. Laboratory experiences in hospitals and other health agencies are planned concurrent with theory. Prerequisites: Successful challenge or waiver of NUR 100 or completion of NUR 100 with a grade of ‘C’S or better, and BIO 171 with a grade of ‘C’ or better. Prerequisite/Corequisite: ENG 101 or its equivalent, BIO 171 with a grade of ‘C’ or better. .......................... F

NUR 105 Nursing Process (1 week -15 hours) (1-0) 1 hr.
This course is an overview of the Nursing Process aimed at guiding the learner in the use of the process in planning care. Each step - assessment, diagnosis, planning, intervention, and evaluation - will be analyzed in relation to the Nursing Care Plan. Special focus will be applied to the process of nursing diagnosis, i.e., the identification and description of client problems amenable to nursing care. Goal setting and the process of writing care plans will also be considered as major topics. (Satisfactory or Unsatisfactory grade.) Prerequisite: NUR 100 or an L.P.N./R.N . WS/SU

NUR 110 Gerontologic Nursing (3-0) 3 hrs.
This course is designed for nursing students and health care providers interested in the area of gerontology. Topics can be applied in primary, secondary, or tertiary settings. Topics will include the cognitive disorders, drug interactions, group work, and rehabilitation techniques in the elderly. An overview of gerontology is offered. .......................... B

NUR 202 Nursing Care of the Adult and Child II (5-12) 9 hrs.
This is the second of a two-semester sequence concerned with increasingly complex health problems and their impact on man’s ability to progress through his developmental stages and meet his needs as defined by Maslow. Emphasis is placed on the more common alterations in health along the wellness-illness continuum. Nursing is presented utilizing the nursing process applied to client problems. The nursing core components of professional behaviors, communication, assessment, clinical decision making, caring interventions, teaching and learning, collaboration and managing care, are further developed. Major units of study include coping with problems of: motor activity and sensory function, self esteem, oxygenation, nutrition, metabolism and elimination, and environmental crises. Hospital laboratory and community experiences are correlated with theory. Prerequisite/Corequisite: BIO 230. Prerequisite: NUR 101, BIO 171, BIO 172 with a grade of ‘C’ or better. .......................... F

NUR 203 Maternal-Child Health Nursing (8 weeks) (5-12) (1 week) (15-0) 5 hrs.
This course is composed of 8 weeks of maternal-child nursing and is the study of the expanding family unit and the role of the nurse and others in providing for child bearing health needs of families. The aim is to enable the student to acquire a background of knowledge, understandings, attitudes and skills which will prepare the student to participate effectively in the care of mother and infant through the maternity cycle and of children from birth through adolescence. One week of this course is devoted to group discussion of topics related to human sexuality. Prerequisites: Successful completion of NUR 101, NUR 202 or permission of instructor; PSY 100, PSY 200. A Summer session may be offered for accelerated students. Traditional students who have a B- in NUR 101, are satisfactory clinically, and have the recommendation of their clinical instructor may take the Summer session on a space available basis. .......................... S

NUR 204 Psychiatric/Mental Health Nursing (7 weeks) (5-12) 4 hrs.
This course is intended to provide the nursing student with a basic knowledge of the dynamics of behavior and nursing needs of clients with commonly occurring functional and organic mental disorders. Major emphasis is placed on the importance of the nurse client relationship and the therapeutic use of self in the clinical setting. Additional emphasis is placed on the nurses’ role in interdisciplinary treatment planning and in community mental health. The clinical laboratory includes affiliations with both inpatient and outpatient psychiatric services. The student will develop and acquire the skills, attitudes, abilities and appreciations necessary to provide nursing care to clients with psychiatric disorders and to apply the nursing process in the care of the psychiatric client. Prerequisites: Successful completion of NUR 101, NUR 202, or permission of instructor, PSY 100, PSY 200. Spring Semester, Summer Session. Traditional students who have a B- in NUR 101, are satisfactory clinically, and have the recommendation of their clinical instructor may take the Summer session on a space available basis. .......................... S

NUR 206 Nursing Clinical Practicum (1 week - 40 hrs) 1 hr.
This intensive one-week elective is offered during Winter Session or Summer Session to provide reality-oriented nursing practice based upon knowledge and skills accrued by nursing students during their Freshman or Sophomore year at Finger Lakes Community College. The course is intended to permit the nursing student the curricular freedom to identify personal learning needs and initiate these learnings under the guidance of an expert clinical nursing instructor in an acute care hospital setting. This course offers the student the unique exposure to a full day or evening shift of clinical experience for a week’s time, thereby allowing for continuity and intensity of clinical learning not provided in other nursing clinical laboratory courses. (This elective also available for R.N.’s.) Prerequisite: Successful completion of NUR 100 or NUR 101 and current enrollment in the nursing program. .......................... JP/SU

NUR 210 Pharmacodynamics of Nursing Practice (3-0) 3 hrs.
A basic course designed to familiarize the learner with those groups of drugs frequently employed in the treatment of commonly occurring health problems. The course will include the study of drugs that affect the following body systems: nervous, cardiovascular, endocrine, gastrointestinal, hematopoietic, immune and respiratory. Drugs utilized in the treatment of
infections and cancer will also be studied. Course restricted to R.N.’s and senior level students enrolled in an R.N. program. L.P.N.’s and any other students must secure permission of instructor or department chair to take this course. .......................... WS/SU

NUR 211 Clinical Make-up Practicum (0-1) 1 hr.
This intensive, forty hour clinical make up course is required for the student in good clinical standing who has been absent for more than 10% of the required clinical hours in an FLCC required nursing courses with a clinical component. This course offers the student exposure to clinical experience with time possibly being divided between day, evening or weekend shifts, thereby allowing for continuity and intensity of clinical learning. This course is graded S (satisfactory) or U (unsatisfactory). Prerequisite: Successful completion of theory component of FLCC nursing course in which the student received an incomplete due to clinical absenteeism and recommendation of course level faculty. .......................... WS/SU

NUR 215 Nursing Seminar (2-0) 2 hrs.
Supplements the learning in other nursing courses by providing the sophomore nursing student with global concepts of the professional registered nurse and responsibilities of the graduate of the Associate degree program. This course includes lecture and discussion on such topics as the definition of nursing, nursing as a profession, ethical/legal consideration, nursing theory, and current trends affecting nursing practices. Reviews requirements for R.N. licensure application, responsibilities for triennial registration, and limited work permit filing in New York State. Focuses on role of the nurse as member within the discipline of nursing. Prerequisite: Successful completion of NUR 101 and concurrent enrollment in NUR 202 or NUR 203 and NUR 204. .......................... B

NUR 220 Alternative Therapies (3-0) 3 hrs.
This course explores the variety of options available today for use in the pursuit of holistic health. Alternative therapies will be viewed as complementary to the existing medical system. The course will look at the theories, clinical research, politics and controversies around the use of various alternative healing modalities. It will provide the student with information to evaluate the use of complementary therapies in healing and health maintenance. The format of this course includes lecture, class discussion, guest speakers, audiovisual aids, and student presentations. This course is open to anyone interested in alternative therapies. .......................... B
(Also listed as PHL 170)

NUR 223 Pathophysiology (3-0) 3 hrs.
This course is designed for students who wish to apply their knowledge of physiology to disease states occurring across the lifespan. The course will consist of a review of normal functioning of selected body systems, analysis of pathological function during disease of those systems and standard treatments for these pathological conditions. Prerequisite: BIO 171 and BIO 172 with a grade of "B" or higher. .......................... B
(Also listed as BIO 223)

NUR 230 Physical Assessment (2-2) 3 hrs.
This course focuses on the knowledge and skills necessary for conducting a complete nursing physical assessment. Lecture, demonstrations, small group interactions, and videotaped interviews focus on subjective assessment. Laboratory practices and audiovisual materials focus on objective assessment. Students to bring own stethoscope and pen light. Prerequisites: BIO 171, 172, NUR 100, or completion of an LPN/RN program; or permission of instructor. .......................... B

NUR 254 Nursing Leadership (3-0) 3 hrs.
Effective leadership is based upon awareness of self and others and confidence in communication combined with an understanding of the dynamics of the delivery system in which one assumes a leadership position. This course will include methods for understanding your leadership/coaching abilities and how to further develop these into successful skills that will position you for leadership in your future career endeavors. .......................... B

NUR 265 Trans-Cultural Considerations in Health Care (3-0) 3 hrs.
This course is designed for healthcare providers and nursing students who are interested in examining several different cultures in regards to heritage, family, education, occupation, communication, family roles, work force issues and spirituality. Responses to health, illness and death will also be explored. Prerequisite: ENG 101 or ENG 104. .......................... F

NUR 270 Ethical Considerations in Health Care (3-0) 3 hrs.
The purpose of this course is to involve the student in reading and discussing medical issues from an ethical perspective to create depth in our awareness of the moral problems which cannot be ignore and more often than not, cannot necessarily solve. The scope of this course will entail examination of different ethical approaches to moral problems in medicine and their success or failure in a broad range of medical issues, including the physician-patient relationship, the role of the nurse, euthanasia and "death with dignity," rights to health care/costs of health care and an examination of important concepts such as autonomy, paternalism, rights, consent, confidentiality, etc. .......................... B

Nutritional Sciences

NS 115 Introduction to Nutrition (3-0) 3 hrs.
An introduction to the field of human nutrition and food focused on the mutual relationships between humans and their biological and physical environment. Includes the study of human nutritional needs; problems encountered in providing food to meet nutritional needs; the relationships among human’s physiological needs, their sociocultural system, and food; and the significance of these relationships to the attainment of health. Recommended: high school biology. .......................... B

Office Technologies

OFT 100 Computer Keyboarding (2-0) 1 hr.
A seven-week course to develop touch keyboarding skills on the computer. It is designed for students entering a variety of occupational fields that utilize the keyboard to input information. Concentration is placed on correct techniques, accuracy, and speed building of alphabetic and numeric characters. Assignments and timed speed drills form the basis for grading. Not open to Office Technologies students. Course is graded on a S (Satisfactory) or U (Unsatisfactory) basis. .......................... B

OFT 131 Keyboarding Improvement (1-2) 1 hr.
The course, which is designed to improve students’ typing speed and accuracy, integrates the microcomputer and the leading-edge technology, Windows. The seven-week course is based on a diagnostic approach for improving keyboarding skills. Each unit consists of pretests, timings, individualized assignments based on each student’s weaknesses, and post-test timings for evaluation and measurement of improvement. The course is graded on a satisfactory or unsatisfactory basis. Prerequisite: OFT 100 or OFT 140 or equivalent. .......................... B

OFT 140 College Keyboarding I (4-0) 3 hrs.
This course integrates the microcomputer, the leading-edge technology, Windows, and primary word processing application software to develop keyboarding skills. Students learn the alphabetic, numeric, and symbols characters and the keypad by the "touch" method. Also included is formatting and editing of simple business/personal correspondence, reports, term papers, and tables. The desired speed at the end of the course for the
OFT 141 College Keyboarding II (4-0) 3 hrs.
This course integrates the microcomputer, the leading-edge technology, Windows, and primary application software to refine keyboarding skills. Emphasis is also placed on formatting and the development of speed and accuracy in preparing advanced business correspondences, reports, tabulations, and other business documents. The desired speed at the end of the semester is 45 words per minute. Prerequisite: OFT 140 (speed requirement 30 words per minute). ................................................. F

OFT 150 Basic Accounting (4-0) 3 hrs.
A study of the principles of business accounting with emphasis on the accounting cycle for students in the Administrative Assistant and Paralegal programs. .................................................. B

OFT 156 Office Communications (4-0) 3 hrs.
This course stresses the development of skills in business letter writing and English grammar and usage. There is also concentration on spelling improvement, speaking skills, listening skills, and interviewing techniques. Corequisite: OFT 140 or equivalent. ................................................. B

OFT 200 Office Management (3-0) 3 hrs.
This course is a comprehensive overview of the administration of the modern office in the public and private sector. The application of management principles to office operations will be covered. The course provides practical information about human relations, office technology, and management process. Prerequisite: BUS 120 or BUS 124. (Also listed as BUS 200) ................................................................. B

OFT 210 Word Processing I (4-0) 3 hrs.
This course provides comprehensive, hands-on instruction in Microsoft Word. Students learn the theories and practical applications of document creation for business or home use. Students will learn to create, edit, print, format, and store office documents. This course also introduces additional word processing functions including mail merge, sorting, document management, charts, and macros. Prerequisite: OFT 140 or equivalent, Corequisite: OFT 141......................................................... S

OFT 211 Word Processing II (4-0) 3 hrs.
This course provides hands-on training in word processing and presentation application software to learn desktop publishing techniques. Students build on their knowledge developed in OFT 210 to create professional-looking documents including flyers, brochures, and newsletters. Prerequisite: OFT 210................................................. F

OFT 213 Office Automation (4-0) 3 hrs.
This course provides comprehensive, hands-on training in the integration features of the Microsoft Office Suite. Students will learn the integration of Microsoft Word, Excel, and Access. Prerequisite: OFT 210................................................. S

OFT 247 Office Procedures I (4-0) 3 hrs.
This is a course which provides preparation for the administrative business office. This course includes techniques and topics such as the work environment, communication skills, computer hardware and software, records management, ethics, business documents, mail handling, and office machines. ................................................................. F

OFT 248 Office Procedures II (3-1) 3 hrs.
A continuation of OFT 247. Course content includes telework, telecommunications, time management, business presentations, travel arrangements, meetings and conferences, telephone efficiency, leadership skills, and planning your career path. (OFT 248 may be taken before OFT 247) ................................................................. S

PLG 100 Introduction to Legal Practice (3-0) 3 hrs.
This course will introduce students to the organization and operation of the legal system and fundamental legal concepts. The course gives an overview of constitutional law, civil litigation, contracts, agency law, and commercial paper. Corequisite: ENG 101 or ENG 104 and successful completion of all required remedial courses. ................................................. F

PLG 110 Computer Law and Policy (3-0) 3 hrs.
This course provides fundamental information needed to have a basic understanding of issues related to cyberspace such as ethics, security, privacy, content control, computer crime, and e-commerce among other topics. For students in the Paralegal program, the course only qualifies as a professional elective. ................................................................. F

PLG 115 Computers in the Law Office (3-1) 3 hrs.
This course introduces the fundamentals of how to use computer technology to accomplish tasks performed by legal assistants or paralegals in a law office. Computer applications will include word processing, spreadsheets, databases, presentations, timekeeping and billing, and case management. Prerequisite: PLG 100 and basic computer knowledge. ................................................. B

PLG 120 Business Structures (3-0) 3 hrs.
This course will introduce the student to the various types of business structures used by businesses today including: sole proprietorships, general partnerships, limited partnerships, S corporations and C corporations. The course will define and describe each type of business structure and give the student an understanding of the practicalities involved in establishing each type of structure. Prerequisites: PLG 100, PLG 125. Offered on a regular rotating basis.

PLG 125 Legal Research and Writing I (3-0) 3 hrs.
This course is designed to introduce the student to the fundamental concepts of legal research and analysis through the use of FLCC’s law library. The student will be introduced to primary and secondary sources of law. Emphasis will be placed on finding and analyzing both statutory and case law along with proper citation format. Further, the student will also be introduced to the preparation of simple legal documents. Corequisite: PLG 100, ENG 101 or ENG 104......................................................... F

PLG 210 Real Property Law and Practice (3-0) 3 hrs.
Real Property Law and Practice is designed to introduce the student to the principles and practices of real property law. Topics covered include: elements of real property law, contracts, deeds, encumbrances, legal descriptions, title protection, mortgages, closings, and leases. Emphasis will be placed on the completion of instruments and the processes involved in filings and recordings. Prerequisites: PLG 100, PLG 125. Offered on a regular rotating basis.

PLG 225 Legal Research and Writing II (3-0) 3 hrs.
This course is a continuation of Legal Research & Writing I with an emphasis on clear and effective legal writing. In this course, the student is exposed to more complicated legal research problems requiring careful research and detailed legal analysis. Students will also be instructed in computer assisted legal research. Assignments include various pleadings and court briefs. Prerequisite: PLG 100, PLG 125......................................................... S

PLG 230 Family Law (3-0) 3 hrs.
This course is designed to introduce students to the basic concepts of family law including: antenuptial agreements, valid and void marriages, annulments, separation agreements, custody and child support, divorce, patriarchy, adoption and surrogacy. Emphasis will be placed on the preparation of necessary documents, filing procedures and interview techniques. Prerequisites: PLG 100, PLG 125. Offered on a regular rotating basis.

196
PLG 235 Administration of Wills, Trusts, and Estates (3-0) 3 hrs.
This course will introduce the student to laws relating to estate planning, the administration of estates (both testate and intestate), and the establishment and administration of trusts. Emphasis will be placed on the practicalities of estate law including interview techniques, preparation of wills, trusts and administrative documents, and filing requirements and procedures. Prerequisites: PLG 100, PLG 125. Offered on a regular rotating basis.

PLG 240 Courts and Litigation (3-0) 3 hrs.
This course is designed to introduce the student to the federal and state court system and offer instruction in civil litigation procedures commencing from the initial client interview and file organization to the trial and any subsequent appeals. It will include instruction on procedures authorized under the code of civil procedure. Special emphasis will be placed on the content and preparation of documents used in civil law suits. Prerequisite: PLG 100, PLG 125. Offered on a regular rotating basis.

PLG 245 Tort Law (3-0) 3 hrs.
This course is designed to give the student an introduction to the principles of personal injury law. Topics to be covered include: negligence, assault, battery, false imprisonment, intentional infliction of emotional distress, trespass to land, trespass to chattel, conversion, defamation, strict product liability, and professional malpractice. Emphasis will be placed on the role of a paralegal in personal injury litigation with preparation and discussion of pertinent documents and filing issues. Prerequisites: PLG 100, PLG 125. Offered on a regular rotating basis.

PLG 250 Paralegal Internship 3 hrs.
This course provides the student with the opportunity to gain practical work experience under the supervision of an attorney or experienced paralegal in day-to-day, on-site office work. The student must complete a minimum of 128 hours of internship work at the internship site during the first eight weeks of the semester, which may be a public or private law office, corporate or government legal department, abstract company, or other appropriate law-related site. It will be the student’s responsibility to secure an internship site with the help of the program director. During the eight weeks of the semester, the student must attend four internship seminar sessions in which issues regarding the student’s experiences and the paralegal profession will be discussed. Prerequisites: Attendance at an orientation session held the semester before the internship, completion of 30 credit hours at least nine of which must be paralegal classes including PLG 100 and PLG 125 with a grade of ‘C’ or better and an overall grade point average of 2.50. Internships are subject to the approval of program director as well as availability. Offered on a regular rotating basis.

PLG 255 Bankruptcy Law (3-0) 3 hrs.
This course is designed to give the student an understanding of bankruptcy law and its practical applications from both the debtor and creditor perspectives. Topics to be covered include: review of the Federal Bankruptcy Code and New York State Bankruptcy Laws, individual liquidation and reorganization, business liquidation and reorganization, the bankrupt estate, property exemptions, automatic stay and discharge. The student will have an opportunity to analyze a hypothetical financial situation and prepare a bankruptcy petition. Prerequisites: PLG 100, PLG 125. Offered on a regular rotating basis.

PLG 260 Paralegal Practice (2-0) 2 hrs.
Paralegal Practice is a seminar designed to give students a more complete appreciation of the duties and functions of a paralegal. The course covers the historical development of the role of the paralegal, legal and ethical responsibilities, client interviewing, fact investigation, and law office administration. The course also provides preparation for completion of the New York State Notary Public examination, and training in job search skills. Prerequisites: PLG 100, PLG 125. Corequisites: PLG 210, PLG 225, PLG 230, PLG 235, and PLG 240. Offered on a regular rotating basis.

PLG 265 Law Office Practice (1-2) 3 hrs.
This hybrid course provides students who are unable to complete a traditional internship with the opportunity to experience life in a law firm through simulation. The students will meet with the instructor once a week to discuss issues pertaining to the paralegal profession. Further, the students will be assigned work which will simulate the types of assignments a paralegal will receive in the workplace. The first weekly meeting will be on campus; all future weekly meeting will be via webinars or some other hybrid format. In this course, the instructor will assume the role of an internship supervisor. During the week, the students will be required to check in with the instructor / supervisor on a regular basis regarding assignments which will be provided via email, phone, or Angel. During the semester, the student will be required to complete a total of 96 hours of internship work which may include, but is not limited to the preparation of the following: letters, court documents, billing sheets, real estate documentation, wills, probate petitions as well as attendance at a court session or shadowing a paralegal or an attorney in a legal setting. All work will be provided and completed under the guidance of the instructor / supervisor. Prerequisites: The student must have completed at least 30 college credits which include a minimum of 15 credits in legal specialty courses.

Philosophy

PHL 101 Introduction to Philosophy (3-0) 3 hrs.
A discussion course focusing on the most crucial questions mankind can ask, like: What is truth? Is there a God? What is ultimate reality? What is good? What ought I do? The class will discuss opposing answers to these questions and examine the evidence for each.

PHL 103 Ethics (3-0) 3 hrs.
Students will become involved in examining alternative bases for value systems. Ideas of historical and contemporary philosophers on the "good," the "right," the "moral" will be applied to today’s personal and social moral issues.

PHL 105 Philosophy of Religion (3-0) 3 hrs.
An examination and discussion of key religious issues from the philosopher’s perspective of reason and analysis, including: Nature and Role of Religion, Reason and Faith, Existence of God, Mysticism, Immortality, Symbols and Myths, and Modern World View.

PHL 110 Sustainable Earth: Spiritual and Scientific Consilience (3-0) 3 hrs.
Students will examine the impact of human populations on earth ecosystems. Students will explore psychological, cultural, spiritual, economic, and political factors that accelerate the deterioration of earth’s ecosystem and alternate perspectives of those factors which might lead to a more life sustaining society. Emphasis will be placed on discovering common ground between science and spiritualism. Students will serve as discussion leaders for course topics of their choice. A community involvement component will be required. Prerequisite: permission of instructor.

PHL 170 Ethical Considerations in Health Care (3-0) 3 hrs.
The purpose of this course is to involve the student in reading and discussing medical issues from an ethical perspective to create depth in our awareness of the moral problems which we cannot ignore and more often than not, cannot necessarily solve. The scope of this course will entail examination of different ethical approaches to moral problems in medicine and their success or failure in a broad range of medical issues: the physician-patient relationship, the role of the nurse, euthanasia and "death with dignity," rights to health care/costs of health care and an examination of important concepts such as autonomy, paternalism, rights, consent, confidentiality, etc.
Physical Education

PE 102 Basic Rhythms (1/2 - 1 1/2) 2 hrs.
In this course, you will have the opportunity to experience and learn dance steps and movement patterns for dances such as Ball Room, Foxtrot, Waltz, Cha-Cha, Tango, Rumba, and the Polka. Folk dances such as: Hora, Trioka, Greensleeves, and many popular line dances. You will learn to identify musical beats and rhythms appropriate for each dance. .......................... B

PE 103 Judo I (1/2 - 1 1/2) 1 hr.
This course includes instruction to the theory and practice of the fundamental skills of judo. .......................... B

PE 105 Ice Skating (1/2 - 1 1/2) 1 hr.
This course is designed for beginner-advanced ice skaters. Instructional emphasis will be placed on safely learning the life-long activity of ice skating. Students will be introduced to aspects of basic use and care of equipment and safety implications. Students may use their own skates or can rent skates at the rink. .......................... B

Additional fee is required. The rink is located at an off-campus site.

PE 106 Bowling (1/2 - 1 1/2) 1 hr.
This co-educational activity includes instruction in the fundamental skills, rules, and etiquette that govern the activity. An additional fee is required. .......................... B

PE 107 Golf (1/2 - 1 1/2) 1 hr.
This co-educational activity includes instruction in the fundamental skills, rules, and etiquette that govern the activity. An additional fee is required. .......................... B

PE 108 Badminton (1/2 - 1 1/2) 1 hr.
This co-educational activity includes instruction in the fundamental skills, rules, history and etiquette that govern badminton. No prerequisites... B

PE 110 Physical Conditioning (1/2 - 1 1/2) 1 hr.
A blend of aerobic activity and weight training designed to improve one's overall fitness level and encourage participation in physical fitness activities for a lifetime. Fitness testing, discussions/lecture, and individualized, workouts will be incorporated throughout the semester. .......................... B

PE 112 Yoga for Beginners (1/2 - 1 1/2) 1 hr.
Basic postures and breathing exercises devised in ancient India are taught to encourage development of a greater body-mind alliance so often ignored in our everyday existence. Relaxation, general body toning, flexibility, and meditation techniques are combined to give the student an awareness of enhanced human potential. Concepts of Yoga philosophy are also discussed to provide a base for practiced techniques. .......................... B

PE 113 Techniques of Angling (1/2 - 1 1/2) 1 hr.
This course introduces the student to fishing in the Finger Lakes area. The course will include laws and regulations, terminology, techniques, and equipment. The course will include scheduled field trips. Additional fee is required. .......................... B

PE 114 Karate (1/2 - 1 1/2) 1 hr.
Mind and body coordinating inner control through total training in the techniques and strategy of Karate-Do, blended with meditation and fitness. .......................... B

PE 115 Tennis (1/2 - 1 1/2) 1 hr.
This co-educational activity includes instruction in the fundamental skills, techniques and rules that govern the life-time activity of tennis. .......................... B

PE 116 Racquetball (1/2 - 1 1/2) 1 hr.
Racquetball is designed to offer the student introduction to the lifetime sport of racquetball. The course will include terminology, skills and techniques used in the sport. Additional fee required. .......................... B

PE 117 Basic Weight Training (1/2 - 1 1/2) 1 hr.
This course will explore basic techniques of weight training, focusing on the various exercises applied in a weight training program, demonstration of proper technique, and development of an overview of a comprehensive training program. .......................... B

PE 118 Skiing/Snowboarding I (1/2 - 1 1/2) 1 hr.
This course covers techniques, skills and practice drills designed to improve your skiing/snowboarding ability. Discussion and instruction will encompass the latest equipment, safety, and etiquette on the slopes. Time will be provided for practice and review of skills learned in class. An additional fee is required. .......................... S

PE 119 Skiing/Snowboarding II (1/2 - 1 1/2) 1 hr.
The skier/snowboarder will continue to enhance and improve on the skills and techniques taught in Skiing/Snowboarding I. Instruction will be geared toward improving your skiing/snowboarding abilities. Further discussion on equipment, care, safety, and etiquette. An additional fee is required. .......................... S

PE 120 Cross-Country Skiing (1/2 - 1 1/2) 1 hr.
This course is designed to introduce the recreational activity of cross country skiing. It will not be a challenge for someone already an accomplished skier. It will include an introduction to the basic movements, skills, concepts, and familiarize the student with available area trails. All cross country ski equipment will be provided by FLCC. At the option of the class, travel by personal transportation to locations non-adjacent to the college may be undertaken. .......................... B

PE 121 Walk and Jog (1/2 - 1 1/2) 1 hr.
This course is designed for students of any fitness level who are interested in improving their general physical condition. This course will help the students increase their cardiovascular endurance and promote weight loss through walking or jogging. .......................... B

PE 122 Concepts of Wellness (1-1) 2 hrs.
The purpose of this course is to introduce students to the concepts of wellness and how these concepts can be incorporated into their lives. This course will guide the student to the understanding that wellness is not a static condition but rather a continual balance of the physical, social, emotional, and intellectual aspects of human need. The course will also provide students with the skill to improve their quality of life and lead them to a higher state of well-being and optimal health. .......................... B

PE 123 Spinning (1/2-1 1/2) 1 hr.
Spinning is a cardiovascular workout that uses a specialized stationary bicycle which stimulates real cycling conditions. This comprehensive program is totally non-competitive, allowing newcomers and athletes to reach their prospective fitness goals. Additional fee is required. .......................... B

The class is offered at an off-campus site.

PE 124 Criminal Justice Physical Conditioning (1/2 - 1 1/2) 1 hr.
The course is intended to provide criminal justice students the opportunity to prepare for fitness tests used in the selection of entry level police officers. Fitness testing and training for standardized fitness levels that include Sit-ups, Push-ups and a 1.5 mile run will be the focus of the class. .......................... B

PE 125 Lifetime Fitness & Nutrition (1-0) 1 hr.
This course is focused on the relationship of nutrition and physical activity to promote and achieve overall lifetime fitness. The student will explore and learn to apply concepts of nutrition, body composition, weight management,
cardio repository endurance, muscular strength and endurance and flexibility to develop a personal, comprehensive fitness plan for life. ............................................................... B

PE 126 Cardio Kickbox for Women (1/2-1 1/2) 1 hr.
Cardio Kickbox for Women is a martial arts class for women that combines self-defense techniques and aerobic exercise. Instruction will include self-defense techniques to defend against chokes, grabs and ground defense. Conditioning exercises to enhance strength and flexibility will include various kicks and boxing drills that are choreographed to music. ........................................ B

PE 140 Beginning Swimming (1/2 - 1 1/2) 1 hr.
This course is designed for the student who is a non-swimmer or does not demonstrate proficiency in the water. It will include instruction in the basic areas of water safety, rescue techniques, and basic swimming strokes. The general Red Cross swimming program will be followed. ........................................ B

PE 141 Scuba (1/2 - 1 1/2) 2 hrs.
This course is an introductory course in the sport of scuba diving and is designed for the student with advanced swimming skills. The student will have the opportunity to learn the basic skills of scuba diving and to experience the unique underwater world of adventure. Equipment is furnished by the Physical Education Department. An additional fee is required. ............................................................... B

PE 150 Beginning Camping (1/2 - 1 1/2) 1 hr.
This course is designed to provide basic fundamentals of camping. Strong emphasis will be placed on the appropriate relationship between man and his natural environment. A half-day trip, an organizational meeting and a three-day trip are required. ............................................................... B

PE 151 Canoe & Kayak Paddling Experiences (1/2-1 1/2) 1 hr.
This course allows both beginners and those with experiences to learn and perfect canoe and or kayak techniques. Included in this course will be methods of steering, safety, equipment care and selection, choosing appropriate bodies of water and the enjoyment of paddling as a recreational activity. The college will furnish equipment. The course is designed to introduce the student to Canoe and Kayak knowledge and techniques through lecture, seminar activities and several half to full day outings. Safety, trip planning, mastering correct paddling techniques and an appreciation for the natural environment are main focal points throughout the course. ............................................................... B

PE 162 T’ai Chi Chuan I (1/2 - 1 1/2) 1 hr.
T’ai Chi Chuan literally means Supreme Ultimate Fist. It is a century-old Chinese discipline for health, relaxation, meditation, and self-defense. Sometimes called Chinese or Taoist Yoga, it emphasizes relaxation and inner calm rather than strength. ............................................................... B

PE 163 T’ai Chi Chuan II (1/2-1 1/2) 1 hr.
T’ai Chi Chuan II, an extension of T’ai Chi Chuan I, takes the student to the next level of training. The course includes form correction, basic push hand and sticking hands training, and introduces the T’ai Chi Cane Form (a basic weapon form). Prerequisite: PE 162. ............................................................... B

PE 164 Stress Reduction Through Exercise (1/2 - 1 1/2) 2 hrs.
This course will explore the many ways that stress affects us both physically and emotionally. Stress management techniques taught include meditation, progressive relaxation, autogenics and others. ............................................................... B

PE 165 Oriental Healing Arts (1/2 - 1 1/2) 1 hr.
This course is designed to introduce an alternative health practice through Qi Gong (energy circulation) training. These techniques promote general health by teaching the student how to cultivate and balance energy in the body. ............................................................... B

PE 166 Biofield Therapy (1/2-1 1/2) 1 hr.
This course teaches external healing techniques based upon the theory of the human energy field. Students will learn to re-pattern and balance this energy to facilitate healing. Emphasis on therapeutic touch. ............................................................... B

PE 167 Aerobics (1/2-1 1/2) 1 hr.
Aerobics is a form of cardiovascular exercise that may use an elevated platform (step), exercise routines and movement patterns that are performed to music. This class is designed for beginners and no prior exercise experience is necessary. ............................................................... B

PE 168 Zumba (1/2-1 1/2) 1 hr.
Zumba is a dance-fitness class that combines fast and slow rhythms from Latin and international music. The class adheres to a specific interval pacing formula, maximizing caloric output and body toning using easy steps and high energy music. ............................................................... B

PE 171 Recreational Shooting (2-0) 2 hrs.
This course is designed for the student who would like a more complete understanding of firearms, recreational and competitive shooting. Included are areas concerning conservation law, competitive rules, safety, mental conditioning, and firearms. An additional fee is required. ............................................................... B

PE 172 Hunting Fundamentals (2-1) 2 hrs.
A ten week student participation course, for non-hunters, designed to develop an understanding of hunting safety, techniques, and ethics. Included are areas concerning identification and safe handling of hunting implements, hunter responsibility, personal preparedness, and wildlife harvest techniques. Emphasis will be placed on important game species of New York. A Saturday class may be scheduled. The successful completion of the course will qualify the student to take the New York State Hunter Education exam. Enrollment into this course will be by permission of instructor only. ............................................................... F

PE 181 Mime (3-0) 3 hrs.
A basic course dealing with the study and application of the various techniques of the art of mime. The objective of the course is to become proficient in self-expression through the body. (Also listed as THE 181)

PE 185 Fencing (1/2-1 1/2) 1 hr.
A beginning course in Fencing with emphasis on the history of the sport, as well as introducing the student to basic foil techniques such as footwork, offensive and defensive maneuvers, and limited botting. ............................................................... B

PE 190 Care and Prevention of Athletic Injuries (3-0) 3 hrs.
Discusses the Sports Medicine Team concept as it applies to the care and prevention of injuries in the athletic or physically active population. Discusses the roles of the certified athletic trainer and provides an introduction to various sports medicine professions, such as strength and conditioning, exercise science, physical therapy, and athletic massage. ............................................................... B

PE 202 Creative Dance (1/2 - 1 1/2) 2 hrs.
This form of dance allows for the expression of ideas and feelings through the medium of human movement. This course provides an opportunity for self-expression and creativity. Discussion and workshops dealing with the basic elements of dance. ............................................................... B

PE 203 Judo II (1/2 - 1 1/2) 1 hr.
Instruction in the theory and practice of more advanced skills including eight basic throws and three hold down techniques. Knowledge of how to fall is required. Improvement of one’s speed and conditioning will be stressed. Prerequisite: PE 103. ............................................................... B
PE 204 Instructional Methods for Soccer (1/2 - 1 1/2)  1 hr.
This course is designed for Physical Education majors, coaches, or students interested in pursuing teaching as a profession. The course includes instruction in the fundamental skills and rules of the sport of Soccer. Emphasis will be placed on the instructional techniques and methodology to prepare the student to teach or coach Soccer. Prerequisite: PE 275. ... B
Students in an Education or related majors may also benefit from this class but are not required to complete PE 275.

PE 205 Instructional Methods for Tennis (1/2 - 1 1/2)  1 hr.
This course is designed for Physical Education majors, coaches, or students interested in pursuing a teaching profession. The course includes instruction in the fundamental skills and rules of the sport of Tennis. Emphasis will be placed on the instructional techniques and methodology in order to help prepare the student to instruct or coach Tennis. Prerequisite: PE 275. ... B
Students in an Education or related major may also benefit from this class but are not required to complete PE 275.

PE 206 Instructional Methods of Physical Fitness (1/2 - 1 1/2)  1 hr.
This course is designed for Physical Education majors, coaches, or students interested in pursuing a teaching profession. The course includes instruction for maintaining a healthy lifestyle and understanding the components of fitness. Emphasis will be placed on instructional techniques and methodology in order to help prepare the student to instruct concepts of physical fitness. Prerequisite: PE 275. ... B
Students in an Education or related major may also benefit from this class but are not required to complete PE 275.

PE 210 Defensive Tactics (1/2 - 1 1/2)  2 hrs.
This course is designed to provide training in the many aspects of self-defense. Course is geared to both Criminal Justice and general student population. ... B

PE 212 Health (3-0)  3 hrs.
Focuses on lifestyle factors and their relationships to well-being, behaviors, and disease. Health content areas, defined by NYS Education Department, are explored. Topics include: drug use and abuse, nutrition, personal and community health, safety education (identifying dangerous environments, prevention of child abduction, fire and arson), communication skills for productive relationships (i.e. conflict resolution), identifying and reporting suspected child abuse/maltreatment, and Safe Schools Against Violence in Education Legislation Certification. ... B

PE 213 CPR and AED for Adult, Child and Infant (1/2-1 1/2)  1 hr.
The student will be prepared to deal with breathing and cardiac emergencies, and become proficient in the application and use of the Automatic External Defibrillator. Successful completion of the written and practical training will result in 2-year certification of CPR/AED for the Adult, Child and Infant. ... B
This course will not satisfy the PE 214 requirements for the AS Physical Education Studies program. Students will NOT receive credit for this course if enrolled in PE 214.

PE 214 Advanced First Aid, CPR and AED (3-0)  3 hrs.
This course will teach the student how to recognize an emergency and how to respond. The student will be prepared to make appropriate decisions regarding first aid care and how to provide care for injuries or sudden illness until professional medical help arrives. Upon completion of this course, student will be eligible for National Safety Council Certification in Advanced First Aid, CPR and AED. ... B

PE 215 Standard First Aid (2-0)  1 hr.
This course will teach the basic First Aid skills in compliance with Emergency Cardiovascular Care (ECC) standards covering immediate care procedures for injuries and common illness. Successful completion will result in a Certificate valid for two (2) years in National Safety Council Standard First Aid. The course is a hybrid course that requires a one (1) hour practical skills session on campus for certification. The course will not satisfy PE 214 requirement. ... B

PE 230 Philosophy, Principles, and Organization of Athletics in Education (3-0)  3 hrs.
Designed for the student who wishes to pursue a career in coaching in New York State elementary and secondary schools. Course covers philosophy and principles of athletics as integral parts of physical education and general education. Requirement for coaching certification. ... F

PE 231 Theory and Techniques of Coaching (2-0)  2 hrs.
Provides experience in techniques of coaching a specific sport. Designed for persons who are preparing to meet the New York State certification requirements to coach in public schools. Via an internship, students will get hands-on experience working with an area program specific to the sport they desire to coach. Prerequisite: PE 230 or permission of instructor. ... B

PE 232 Health Sciences Applied to Coaching (3-0)  3 hrs.
Course designed for students who wish to pursue a career in coaching in New York State elementary and secondary schools. Selected principles of biology, human anatomy and physiology, psychology, and sociology related to coaching. This course also meets the requirements of American Red Cross Sport Safety Training including Adult and Child CPR. ... B

PE 233 Lifeguarding (3-0)  3 hrs.
This is the standard Red Cross Senior Lifeguarding course and is offered to those demonstrating the necessary swimming proficiency. The successful completion of the course includes the Red Cross Senior Lifeguarding Authorization Card. An additional fee is required for Red Cross Certification. ... B

PE 242 Lifeguarding (3-0)  3 hrs.
This is the standard Red Cross Senior Lifeguarding course and is offered to those demonstrating the necessary swimming proficiency. The successful completion of the course includes the Red Cross Senior Lifeguarding Authorization Card. An additional fee is required for Red Cross Certification. ... B

PE 243 Advanced Swimming (1/2 - 1 1/2)  1 hr.
This course is designed for the more advanced swimmer and the necessary instruction based on individual need will be emphasized. It will also include survival techniques, basic lifesaving procedures, and an introduction to diving. ... B

PE 244 Water Safety Instruction (1-1)  2 hrs.
An advanced course to provide the student with the opportunity to earn the American Red Cross Water Safety Instructor’s Certificate. Prerequisites: Must be 17 years of age. An additional fee is required for Red Cross Certification. ... F

PE 250 Wilderness Camping (1/2 - 1 1/2)  1 hr.
Designed to provide an enrichment of learning through the use of outdoor experiences. This advanced course will give the student an opportunity to better understand the ecological balance and to take part in a wilderness camping environment. A half-day trip, an organizational meeting, and a three-day trip are required. ... B
A minimal fee is required.

PE 251 Advanced Wilderness Camping (2-0)  2 hrs.
This course is offered during the summer months. The week-long canoe trip will be in the Canadian Wilderness, offering the student an opportunity to better understand the ecological balance and take part in a wilderness camping environment. Prerequisite: PE 150 or PE 250 or equivalent experience. An additional fee is required. ... B

PE 252 Semi-Survival Camping (1/2 - 1 1/2)  1 hr.
This course is designed for the student who is interested in a wilderness survival experience. Skills will include camping, hiking, orienting, and foraging skills. There is a required one-half-day trip and a three-day trip. Prerequisite: permission of instructor. ... B
PE 260 Kinetics of Exercise & Sport (3-0) 3 hrs.
This course will allow students to study the biomechanical and kinesiological basis of movement in exercise and sport. Students will focus on the mechanical basis of movement to identify simple and complex motor skills. Students will identify the appropriate musculoskeletal and neurological components of the human anatomy and will explain how these work together to create skillful, coordinated movement during everyday activity, exercise/physical fitness, and sports participation. Students will also learn to identify deficiencies of these skillful, coordinated movements. Prerequisite: BIO 171 with a grade of 'C' or better. ................................. B

PE 271 Recreational Shooting II (3-0) 3 hrs.
This course is designed to complement Recreational Shooting I. It provides the student with advanced training in shooting skills. Emphasis will be placed on physiological, anatomical, psychological, advanced shooting principles, individual and team concepts. An additional fee is required. ................................. B

PE 275 Instructional Practices of Physical Education (3-0) 3 hrs.
This is an introductory course in physical education teaching methodology. Students will observe, learn, and practice basic teaching skills in a college, K-12, and Adapted Physical Education setting. This course will include teaching experiences and observations, lesson plans, opportunities in Physical Education and basic certification requirements. ................................. B

PE 290 Athletic Training Practicum I (1-2) 2 hrs.
Laboratory participation for students will be accomplished under actual athletic training room conditions. Students will learn, practice, and apply athletic training techniques. Prerequisites: BIO 171, BIO 172. ................................. B

PE 291 Athletic Training Practicum II (1-2) 2 hrs.
Continuation of Athletic Training Practicum I. Prerequisites: BIO 171, BIO 172. ................................. B

PE 900-967 Intercollegiate Sports 1 hr.
Designed for the student who has athletic skill beyond the recreational level. Skills are refined and integrated into concepts of team play. Competitive opportunities within conference and region are part of these courses.

PE 955 Men's & Women's Cross Country I F
PE 956 Men's & Women's Cross Country II F
PE 957 Men's & Women's Track & Field I S
PE 958 Men's & Women's Track & Field II S
PE 960 Men's Lacrosse S
PE 961 Men's Lacrosse S
PE 964 Women's Lacrosse S
PE 965 Women's Lacrosse S
PE 966 Women's Volleyball I F
PE 967 Women's Volleyball II F
Prerequisite: Permission of instructor. Continued enrollment is at the discretion of the instructor.

PHY 101 Introduction to Physics (3-2) 4 hrs.
An introductory course in physics for students who have not had high school physics, designed for non-science majors as well as those who plan to take College Physics or General Physics. Emphasizes measurement, mechanics and heat and includes selected topics from sound, light, electricity, and magnetism as they relate to our daily lives. Prerequisite: DST 042 with a grade of 'C+' or better or placement into Math Level 1 or higher. ................................. B

PHY 105 Physics of Sound (3-2) 4 hrs.
An introductory course in physics for students who have not had high school physics, designed for non-science majors. This is a required course for music majors as well as Music Recording Technology majors. Emphasizes: Scientific method, measurement, laboratory proficiency: and includes some selected topics form motion, waves, sound production and detection, musical instruments, standing waves as they relate to our daily lives. This fulfills the laboratory science requirements for non-science degrees. Prerequisite: DST 042 with a grade of 'C+' or better or placement into Math Level 1 or higher. ................................. B

PHY 108 Applied Physics I (3-2-1) 4 hrs.
Applied Physics I is the first of two course sequence in physics required for students pursuing AAS degree in Instrumentation and Control Technologies geared towards careers in high-tech industries. Students are introduced to the elements of Kinematics, Dynamics, Energetics, Momentum, Rigid Bodies, Fluids and Thermodynamics, in context of technological systems using contemporary computational modeling, data acquisition and analysis. The incoming student must have a good grounding in high school algebra, with some exposure to trigonometry desired but not required. Preparation at the level of high school Physics or PHY 101 is strongly recommended. May not be substituted for PHY 118, PHY 119, PHY 151, or PHY 152. Co-requisite: MAT 145. ................................. F

PHY 109 Applied Physics II (3-2-1) 4 hrs.
Applied Physics II is the second of a two course sequence in physics required for students pursuing AAS degree in Instrumentation and Control Technologies. Students are introduced to Oscillations, Waves, Electrostatics, DC Circuits, Magnetic Force and Sources, Faraday's Law, Resonance in AC Circuits, Electromagnetic Waves and Optics in context of technological systems using contemporary computational modeling, data acquisition and analysis. May not be substituted for PHY 118, PHY 119, PHY 151 or PHY 152. MAT 145, PHY 108, Corequisite: MAT 152.. S

PHY 118 College Physics I (3-2-1) 4 hrs.
First semester of a two-course sequence suitable for transfer students seeking a laboratory science elective, life science students and those in the engineering technologies. This course is at the mathematical level of intermediate algebra and trigonometry. Topics include motion in one and two dimensions, force laws, energy, momentum, conservation principles, gravity, and rotational motion. PHY 101 or high school Physics is strongly recommended. Prerequisite: MAT 145 with a grade of 'C' or better or placement into Math Level 3 or higher. ................................. B

PHY 119 College Physics II (3-2-1) 4 hrs.
Second semester of a two-course sequence suitable for transfer students seeking a laboratory science elective, life science students and those in the engineering technologies. This course is at the mathematical level of intermediate algebra and trigonometry. Topics include waves, electromagnetism and optics. Prerequisites: PHY 118 with a grade of 'C' or better and MAT 145 with a grade of 'C' or better or placement into Math Level 3 or higher. ................................. B

PHY 151 General Physics I (3-3) 4 hrs.
First semester of a two-course sequence suitable for transfer students...
pursuing degrees in engineering, computer science, professional programs which require calculus based physics. Topics include motion in one and two dimensions, force laws, energy, momentum, conservation principles, gravity, and rotational motion. PHY 101 or high school Physics with a grade of 'C' or better is strongly recommended. Prerequisites: MAT 271 with a grade of 'C' or better.  

PHY 152 General Physics II (3-3)  
Second semester of a two-course sequence suitable for transfer students pursuing degrees in engineering, computer science, professional programs which require calculus based physics. Topics include electricity and magnetism, waves, AC and DC circuits, optics, and limited topics in thermodynamics. Prerequisites: MAT 272 with a grade of 'C' or better and PHY 151 with a grade of 'C' or better.

PHY 245 Physics of Animation (3-2)  
In this course the techniques from geometry, trigonometry, algebra, and pre-calculus will be integrated with the motion of objects (kinematics), and the role of forces (dynamics). Realistic collisions, deformation, oscillations and waves will be addressed using the concepts of momentum conservation and energy transfer. Physics of sources (light and sound) will be integrated with the physics of perception to elucidate the immersive experience of videogames. Physics of complex aggregates and feedback loops (fractals, fragmentation, turbulence, chaos, and cellular automata) will be used to enhance simulation of the nature. The laboratory exercises will consist of observation of real systems integrated with simulations. Prerequisites: MAT 152, PHY 118, CSC 115, CSC 190. Recommended co-requisites: CSC 200, MAT 220.

PHY 253 Physics III: Waves and Modern Physics (3-3)  
The continuation of the General Physics sequence. Topics include waves equation, electromagnetic radiation, interference, diffraction, relativity, and introduction to quantum mechanics. Prerequisites: PHY 152 and MAT 273. Corequisite: MAT 274 or permission of instructor.

Political Science

POL 100 American Government (3-0)  
This course explores the nature and dynamics of the American political system, including the basic structure, functions, and processes of the executive, legislative, and judicial branches of government, the roles of political parties and special interest groups, the mechanics of political campaigns and elections, the U.S. Constitution and the Bill of Rights, and prominent issues in U.S. domestic and foreign policy.

POL 110 State and Local Government (3-0)  
An exploration of the organization, functions and processes of State and Local Government, highlighting the activities of governors, mayors, legislatures, bureaucrats and courts, the role of political parties and lobbies, the mechanics of campaigns and elections, public administration and finance, and important areas of public policy such as taxes, health, education, welfare, immigration, energy, housing, infrastructure, environmental conservation, crime and policing.

POL 130 International Relations (3-0)  
This course surveys key aspects of International Relations including international security and international political economy, both of which drive foreign policy decision making among and between countries pursuing their national political, economic or social interests. Topics covered include the creation and nature of a sovereign state, the use of power, the making of foreign policy before and after the Cold War, international conflict and cooperation during periods of war and peace, terrorism, global democracy and capitalism, globalization, international trade, the creation of wealth and the problem of eradicating poverty in both developed and less developed nations, the protection of human rights, international law and organizations such as the United Nations and the World Trade Organization that serve to guide international interaction between countries. This course will prepare students for upper level courses in various and expanding fields of international studies.

Psychology

PSY 100 Introduction to Psychology (3-0)  
This course is a comprehensive overview of the scientific study of behavior and mental processes. It will familiarize students with the scientific methods used in the field of psychology. It will also introduce various topics within the field, such as consciousness, motivation, learning, memory, cognition, development, personality, psychological disorders and their treatments, social psychology, and the biological bases of behavior.

PSY 124 Organizational Behavior (3-0)  
Organizational Behavior is an introductory business course that will provide information to the student about individuals, groups, organizational structure, and function. Topics to be studied include: Interpersonal Communication, Decision-making, Human Perception, Dynamics of Groups, Human Needs and Motivation, Concept of Organization, Leadership, Morale and the Quality of Work Life with attention to ethical considerations.

PSY 150 Interviewing & Counseling (3-0)  
A survey of basic counseling techniques, including an overview of the various schools of counseling - the dynamics of communication, interviewing, resolving resistances by dealing with case materials and role playing.

PSY 200 Developmental Psychology (3-0)  
A study of the development of human behavior throughout the life cycle with emphasis on the principles of physical, social, cognitive, and personality development. Prerequisite: PSY 100.

PSY 205 Adolescent Psychology (3-0)  
This course provides an overview of human development during adolescence. Biological, cognitive, and socio-emotional development during adolescence are studied. Families, schools, and cultures are emphasized as contexts for development. Prerequisite: PSY 100.

PSY 210 Social Psychology (3-0)  
A study of how people think about, influence and relate to one another. This course focuses on how attitudes develop, the interrelationship between attitudes and behavior, and how societies and groups influence the way individuals act. An examination of social relationships focuses on interpersonal attraction, prejudice, aggression, conflict, and helping behavior. Prerequisite: PSY 100.

PSY 215 Biological Psychology (3-0)  
This course is an introduction to the interaction between our biology and everything we do, think and feel. More specifically, it is a survey of the theories and research pertaining to the scientific study of anatomy, physiology, and pharmacology of behavior and mental processes. It will focus primarily on the structures and functions of the nervous system and explore how the nervous system affects such phenomena as development, sensation, perception, movement, sleeping, eating, sexual behavior, learning, memory, language, thoughts, emotions, and psychological disorders. It will also consider the relationship between the body and mind, and how and why brain activity gives rise to your unique conscious experience. High school biology or BIO 111 recommended. Prerequisites: PSY 100. (Also listed as SCI 215)
PSY 220 Abnormal Psychology (3-0) 3 hrs.
This course is an introduction to the field of abnormal psychology. It introduces the student to the current edition of the DSM system of classifying disorders. It emphasizes paradigms that organize and interpret data about behavioral disorders. It seeks to make students aware of the different assumptions behind different therapeutic approaches to behavioral disorders. This course is not intended as a course in clinical psychology. Prerequisite: PSY 100, PSY 200, or permission of instructor.

PSY 225 Child Psychology (3-0) 3 hrs.
The goal of this course is to provide an understanding of child development that will be useful to those who plan to work with children or in settings designed for children. Child development will be considered within an ecological framework that includes the influences of families and institutions as well as psychological processes on the developing child. Special attention will be given to domains of development such as language and play that are important for understanding how children function in child care settings. This course will focus on normal development of the child infancy through age 12. Prerequisite: PSY 100.

Respiratory Care

RCP 101 Respiratory Care 1 4 credits
Introduces major concepts of respiratory care, including cardiopulmonary assessment, oxygen therapy, pulmonary function testing, and the therapeutic rationale for these procedures. Laboratory includes hands-on practice of respiratory care procedures and critical thinking skills. Three class hours and two laboratory hours. Prerequisite or concurrent registration in BIO 152/105: Corequisite: RCP LB1.

RCP 103 Cardiopulmonary Anatomy/Physiology 3 credits
Examines the control and function of the cardiopulmonary system and how it relates to other body organ systems. Explores cardiac and pulmonary physiology and pathophysiology in the neonatal, pediatric, adult, and geriatric patient. Prerequisite or concurrent registration in BIO 105 or BIO 152.

RCP 108 Medical Terminology for Health Studies 1 Credit
Provides an overview of medical terminology. This includes prefixes, suffixes, word roots, terms, and abbreviations.

RCP 114 Respiratory Care 2 3 credits
Provides rationale and delivery of airway management, bronchial hygiene therapy, hyperinflation therapy, humidity and aerosol medication procedures. Two class hours and two laboratory hours. Prerequisite or Concurrent: BIO 153/BIO106, BIO 201, Prerequisites RCP 101 and RCP 103; Corequisite RCP LB4.

RCP 115 Mechanical Ventilation 1 4 credits
Introduces the principles, effects, and classification of mechanical ventilation. Discusses current theory relative to modes, initiation, monitoring, and graphical interpretation. Four credit hours. Three lecture hours, two and a half lab hours. Prerequisites RCP 101, RCP 103. Prerequisite/Corequisite BIO 153/BIO 106, BIO 201.

RCP 116 Mechanical Ventilation 2 2 credits
A continuation of RCP 115. Discusses current theory in the management of a patient on mechanical ventilation, weaning from life support, and home care ventilation issues. Case studies involving all aspects of RCP 115 and RCP 116 in the management of multiple disease states and trauma care. Two credit hours. One lecture hour, two and a half lab hours. Prerequisite RCP 114 and RCP 115 with a grade of ‘C’ or better.

RCP 117 Respiratory Pharmacology 1 credit
Introduces general and specific respiratory pharmacological principles, including drug calculations, the autonomic nervous system, and delivery methods. Explores drugs used in the treatment of asthma, chronic bronchitis, chronic obstructive pulmonary disease (COPD) and other pulmonary disorders. Prerequisite: RCP 114 and RCP 115 with a grade of ‘C’ or better.

RCP 118 Clinical Practice 1 1 credit
Opportunity to practice cardiopulmonary assessments, respiratory care procedures, critical thinking, and professionalism in a supervised clinical rotation at an area hospital. 128 clinical hours. Prerequisite RCP114 and RCP 115.

RCP 201 Cardiopulmonary Diagnostics 3 credits
Introduces equipment used to monitor patients and diagnose cardiopulmonary diseases. Interprets clinical information obtained from pulmonary function testing, electrocardiography, and hemodynamics. Prerequisite: RCP114 and RCP 116.

RCP 202 Cardiopulmonary Pharmacology 2 credits
Introduces general pharmacological principles and management relative to the cardiopulmonary system. Includes management and treatment of specific cardiopulmonary disorders and drugs used in advanced cardiac life support (ACLS). Prerequisite: RCP 117.

RCP 203 Neonatal and Pediatric Respiratory Care 3 credits
Explores neonatal and pediatric respiratory care beginning with the developmental changes in utero, the transition at birth, and the continuing development thereafter. Examines the risks and problems associated with these developments and the procedures and rationales for delivering the appropriate respiratory care. Reviews specific neonatal and pediatric disease states, and their treatment relative to respiratory care. Prerequisite: RCP116, RCP 117, and RCP 118.

RCP 204 Cardiopulmonary Disease 2 credits
Examines categories of pulmonary diseases including etiology, detection, management, treatment, and prognosis. Prerequisite: RCP114 and RCP 116.

RCP 209 Cardiopulmonary Diagnostics 3 credits
Introduces equipment used to monitor patients and diagnose cardiopulmonary diseases. Interprets clinical information obtained from pulmonary function testing, electrocardiography, and hemodynamics. Prerequisite: RCP114 and RCP 116.

RCP 210 Clinical Practice 2 3 credits
Provides respiratory care clinical experiences at specialty sites such as hospital operating rooms, sleep medicine clinics, and pulmonary function testing areas. Applies cardiopulmonary assessment, critical thinking and respiratory care knowledge to adult patients. Requires demonstration of knowledge by completing a mock certification exam. Supervised respiratory care at adult critical care rotation sites (384 hours required). Prerequisite: RCP118.

RCP 216 Clinical Practice 3 3 credits

RCP 218 Respiratory Care 3 2 credits
Reinforces the total respiratory education through the use of prior national board exam questions in an interactive format. Introduces teaching skills through preparation and presentation of a classroom lecture. Requires demonstration of knowledge by completing a mock registry exam. Prerequisite: RCP 210.
SCI 100 Freshman Orientation to Science/Technology (2-0)  2 hrs.
This course is intended to provide incoming science/technology freshmen with a variety of student skills that will not only ease the transition from high school or work to college, but will enable the attainment of a higher learning level which, in turn, will reduce attrition and ensure graduation. Computer software and class participation in problem-solving exercises will be used to enhance problem-solving skills. Orientation to student services and policies, science study techniques, stress management, technological and environmental issues, calculator skills and other survival skills will be presented. (Carries science credit only in science technology programs).  B

SCI 112 Introduction to Geology (3-2)  4 hrs.
A study of the principles of physical and chemical geology as a dynamic process by which our earth can be characterized as it changes through time. The course will include integrated laboratory and field trip experiences. Offered periodically.  B

SCI 137 Chaos: The Self-Organizing Universe (3-2)  4 hrs.
An innovative introduction to Chaos which brings the new scientific paradigm to the undergraduate curriculum. Starting from geometric fractals describing trees, leaves, and snowflakes, the quantitative understanding of fractals is achieved through laboratory exercises including modeling on computers. Relevance of the Chaos theory is explored across scientific disciplines, and extended to non-science areas such as communications, economics, and arts. This course fulfills a science elective course requirement for students whose primary area of study is other than the sciences; however, interested science/mathematics students can take this course as an elective. Prerequisite: high school algebra (Course I) or GST 142.  SU

SCI 151 Introduction to Astronomy (3-1)  3 hrs.
A survey of the mechanics of the solar system as they are interpreted by current astronomers. This course includes study of the motions of the earth, time and concepts and determination, planetary motions and characteristics, and general structure of the solar system as it appears to be at the present time.  B

SCI 171 Meteorology (3-0)  3 hrs.
Main sections of this course are seasons, roles of water, other atmospheric energies, organization of the atmosphere, global flow storms, stability and instability, climate possibilities.  B

SCI 200 Global Ecosystems (0-3)  3 hrs.
The purpose of this course is to provide students with field experience relative to course work in the area of Science & Technology as presented at Finger Lakes Community College. This excursion will emphasize the ecosystems, climate change, habitat preservation and distributions within the South African Bushveld and forests, as well as identification of flora and fauna in each studied community. All aspects of the region will be studied including geology, geography, flora, fauna, culture and ecological initiatives.  SU

SCI 215 Biological Psychology (3-0)  3 hrs.
This course is an introduction to the interaction between our biology and everything we do, think and feel. More specifically, it is a survey of the theories and research pertaining to the scientific study of anatomy, physiology, and pharmacology of behavior and mental processes. It will focus primarily on the structures and functions of the nervous system and explore how the nervous system affects such phenomena as development, sensation, perception, movement, sleeping, eating, sexual behavior, learning, memory, language, thoughts, emotions, and psychological disorders. It will also consider the relationship between the body and mind, and how and why brain activity gives rise to your unique conscious experience. High school biology or BIO 111 recommended. Prerequisites: PSY 100.  (Also listed as PSY 215)

SCI 220 Glacial Geology of the Finger Lakes (3-0)  3 hrs.
This course is an introduction to glaciation emphasizing the historic events within the Finger Lakes region. The mechanics of glacial motion, erosion, and deposition will be studied and then used to interpret our modern landscape. Students will be introduced to the technique of air photo interpretation. Our modern biodiversity and distributional patterns of organisms will be related to postglacial events. Scenic values associated with glacial landscapes will be a focal point of the class field trips.  S  (Also listed as CON 220)

Social Science

SSC 125 Foundations of Child Care (3-0)  3 hrs.
This course will examine the contemporary status of child care programs. It introduces the student to child care including in-home, center-based, and institutional. Child care theory and practice as well as public policy will be studied. Prerequisites: HUS 102, PSY 100. Corequisite: PSY 205 or permission of instructor.  S

SSC 150 Human Sexuality (3-0)  3 hrs.
An interdisciplinary course designed to explore a wide range of interests. The aim of this course is to provide students with an understanding of the interactions and interrelationships of human behavior that influence sexual development and behavior. Biological developmental components of human sexuality will also be addressed. The underlying theme is the influence of our social and cultural system on the development of sexual needs, standards, and values. Prerequisite: PSY 100, SOC 100, or permission of instructor.  B

SSC 200 Introduction to Gerontology (3-0)  3 hrs.
This course will deal with basic demographic trends, concepts, issues, and myths as they pertain to the process of aging and the older population. An overview of the sociological, psychological, and biological aspects of aging will be presented in order to expand a student’s knowledge and understanding of the phenomenon of aging. Economic issues as they relate to work, retirement, and leisure; alternative living environments; spiritual needs; and legal rights of aging persons will be studied.  B

SSC 205 Service Learning (3-0)  3 hrs.
This course will provide students with the opportunity to “learn and serve” while earning academic credit. Students will gain experience volunteering a total of 40 hours at a community agency. Class time is reduced to allow for service learning. Students will attend eight classes during the semester that will focus on issues related to their volunteer experience. Service learning provides a unique opportunity to experience working within a community setting under the guidance of a mentor. This course offers students the flexibility of designing their own work schedule. Course grading is based upon both volunteer work and classroom assignments.  B
SCC 215 Topics in Social Science (3-0) 3 hrs.
This course is designed to offer students an opportunity to focus in-depth on a particular thematic area in the social sciences. The topic and content will vary from year to year. Specimen topics might include Justice in America, The History, Culture, and Politics of Peace in Ireland, The Vietnam Era 1954-75, Tourism Anthropology, or Sports in Society. Prerequisite: This course is open to all students and community members interested in a particular seminar topic. .................................................. B

SOC 100 Introduction to Sociology (3-0) 3 hrs.
This course includes topics descriptive of the scope and methods of sociology; interaction and the social nature of humans, human groupings, collective behavior and institutions and social change. ............................. B

SOC 110 Social Problems and Deviant Behavior (3-0) 3 hrs.
Social problems and deviant behavior as seen in contemporary society. Emphasis is placed upon analyzing the social structure as a means of gaining insight into the dimensions, causes, and possible solutions to the problems and deviance under study. Prerequisite: SOC 100. ............... B

SOC 120 Marriage and Family: The American Family (3-0) 3 hrs.
The course deals with marriage, family life, and alternate life styles in our society. The traditional structure is examined, with considerable emphasis placed on changes taking place, self-understanding, and areas of individual interest. Prerequisite: SOC 100. ........................................ B

SOC 209 Our Cultural Approach to Death (3-0) 3 hrs.
Our culture's attitudes, beliefs, and rituals in regard to death and the dying process are examined through media, field trips, and value clarification. Present norms and alternate death styles are emphasized to help the student understand existing cultural patterns and accept death as a natural part of the life cycle. .................................................. B

SOC 210 Racial and Ethnic Minorities (3-0) 3 hrs.
A sociological analysis of various racial and ethnic minorities in the United States. Cross cultural and historical comparison shall be studied as well as policies developed to cope with intergroup tensions. Prerequisite: SOC 100. .................................................. B

Spanish

SPN 101 Spanish I (3-0) 3 hrs.
SPN 101 is a beginning language course designed for students with no previous experience in Spanish, or whose experience does not make placement in a higher level Spanish course advisable. The course is designed to provide students with the fundamentals of Spanish pronunciation and grammar, as well as an introduction to Hispanic culture. The course will stress the development of communication skills, especially listening and speaking, but will also promote reading and writing skills. Prerequisite: Placement testing indicating direct entry into ENG 101 or ENG 104. A grade of C or better required if students take DST 095 (Foundational Writing). B

SPN 102 Spanish II (3-0) 3 hrs.
SPN 102 is a continuation of the introductory level language course (SPN 101), with increased emphasis on vocabulary enrichment and the development of speaking ability as well as strengthening listening and reading comprehension skills. Students at this level will also continue to develop insights into Hispanic culture and to draw comparisons with their own culture. Prerequisite: Successful completion of SPN 101 or an equivalent skill level in the language as recommended by the Modern Languages @ FLCC Language Placement Guide. .................................................. B

SPN 140 Occupational Spanish (3-0) 3 hrs.
This course provides immediate access to functional Spanish language skills and cultural competence for non-Spanish speaking students enrolled in a career-specific degree, diploma, or certificate program. It is a practical step toward communication in settings where comprehension is crucial. Cultural awareness will be addressed, as well. The goal is to minimize or eliminate barriers to understanding and communication in the workplace, so that once students are employed in their chosen field they can be as effective as possible when interacting with Spanish-speakers on the job. The vocabulary presented will be tailored to the specific needs of the target occupation. The target occupations include (but are not limited to) Hotel and Resort Management, Viticulture, Substance Abuse Counseling, Nursing, Law Enforcement, Social Services, and Paramedics / EMTs. No prior knowledge of Spanish is necessary. Prerequisite: Placement testing indicating direct entry into ENG 101 or ENG 104. A grade of C or better required if students take DST 095 (Foundational Writing). .................. B/SU

SPN 175 Spanish Language Immersion (3-0) 3 hrs.
The purpose of this course is to provide students with a linguistic and cultural travel experience. This study abroad experience is conducted in different locations throughout the Spanish-speaking world. The course will emphasize improving Spanish language proficiency as well as developing an understanding and appreciation of the host country culture. Students will study Spanish at a recognized language institute in the destination site, and will also have the opportunity to participate in escorted touring to sites of interest. Students will be housed in family homestay accommodations for the duration of the trip (to the extent possible). Prerequisite: Placement testing indicating direct entry into ENG 101 or ENG 104. A grade of C or better required if students take DST 095 (Foundational Writing). .................. JP

Previous study of Spanish is recommended but not required. Students must complete an application form, provide two (2) letters of recommendation, and receive permission of instructor.

SPN 201 Spanish III (3-0) 3 hrs.
SPN 201 expands on the vocabulary and grammatical structures introduced in the first two semesters of study. Emphasis is on the continued development of Spanish language skills through the study and discussion of authentic readings in Hispanic literature and culture. Students will learn strategies to improve reading comprehension and fundamental composition writing skills. Students at this level will also continue to develop deeper insights into Hispanic culture and to draw comparisons with their own culture. Prerequisite: Successful completion of SPN 102 or an equivalent skill level in the language as recommended by the Modern Languages @ FLCC Language Placement Guide. .................................................. B

SPN 202 Spanish IV (3-0) 3 hrs.
SPN 202 is a continuation of the intermediate level course (SPN 201). Emphasis is on enhancing communication skills in Spanish, both spoken and written. Students will refine critical reading and writing skills through further exploration of Hispanic literature and culture. Prerequisite: Successful completion of SPN 201 or an equivalent skill level in the language as recommended by the Modern Languages @ FLCC Language Placement Guide. .................................................. B

SPN 203 Advanced Spanish: Vistazos Hispanos (3-0) 3 hrs.
SPN 203 is an advanced language course covering such topics as the origins of Hispanic culture, religion, the family, and customs and beliefs. These topics will be reinforced by a variety of activities designed to enhance and stimulate conversation and writing skills in Spanish. Prerequisite: Successful completion of SPN 202 or an equivalent skill level in the language as recommended by the Modern Languages @ FLCC Language Placement Guide. .................................................. B
SPN 204 Advanced Spanish: Perspectivas Hispanoamericanas (3-0) 3 hrs.
SPN 204 is an advanced language course covering such topics as economic trends, revolutionary movements, education, urban life, and the Hispanic experience in the United States. These topics will be reinforced by a variety of activities designed to enhance and stimulate conversation and writing skills in Spanish. Prerequisite: SPN 202 or an equivalent skill level in the language as recommended by the Modern Languages @ FLCC: Language Placement Guide. .................................................. B

Taxidermy

TAX 100 Principles of Taxidermy (3-0) 3 hrs.
This course will introduce students to the ethics, regulations, materials, wildlife identification, and basic techniques appropriate for preparing natural specimens. This will give students a basic introduction to what a person must know to start in taxidermy. ............................ F

TAX 101 Small Mammal Taxidermy (3-0) 3 hrs.
This course will provide basic but intensive experience in the use of tools, materials, and techniques in the preparation of actual mounts. Students will prepare several mounts, partake in demonstrations, and even specialize in one type of specimen preparation. ........................... F

TAX 102 Fish Mount Preparation (3-0) 3 hrs.
Fish Mount Preparation will expose students to a variety of materials, tools, and methods appropriate for the preparation of fish mounts. Each student will produce several mounts. .............................. S

TAX 201 Bird Mount Preparation (3-0) 3 hrs.
This course will provide intensive experience in the use of tools, materials, and techniques in the preparation of bird mounts. Students will prepare several bird mounts during the course. ............................ S

TAX 202 Topics in Advanced Taxidermy (3-0) 3 hrs.
Designed to provide extensive training for taxidermists in the areas of birds, small mammals, and fish preparation. Skills developed will include fleshing, tanning, painting, and presentation of mounts. Course content will vary from semester to semester. Students may repeat this course for credit in each of the different topic areas. Prerequisite: TAX 100. .... F

Technology

Courses do not fulfill mathematics/science requirements.

TECH 101 Materials and Processes I (2-2) 3 hrs.
This is the first course in materials and processes, which is a general introduction to engineering materials and modern processes. Topics include mechanical, physical, and chemical properties of ferrous and non-ferrous metals and processes such as machining, casting, forming, powder metallurgy, and welding. ................................. F

TECH 104 Materials and Processes II (2-2) 3 hrs.
A continuation of TECH 101. Topics include mechanical, physical, and chemical properties of plastics, ceramics, and composites and processes such as extrusion, injection molding, and thermoforming. Additional topics covered are, CNC machining, inspection, and quality control. ........................ S

TECH 105 Engineering Drawing I (1-5) 3 hrs.
This course introduces the fundamental concepts related to technical drawing and hand drafting. Topics that will be explored include drawing equipment, sketching, line weights, lettering, geometric constructions, orthographic projection & multi-views, axonometric & isometric views, shade & shadow, dimensioning, sections, and working drawings. Architectural floor plans, elevations, sections, & details will also be examined. .......................... F

TECH 106 Engineering Drawing II (2D AutoCAD) (1-5) 3 hrs.
Techniques for creating, viewing, and plotting 2D AutoCAD drawings will be presented. Lectures, demonstrations, and labs in a variety of applications will enhance the student’s CAD ability and professional development. Topics include drawing, editing, and dimensioning commands; drawing setup; blocks; attributes; and plotting. Prerequisite: TECH 105 or permission of instructor. ................................. S

TECH 115 Technology Freshman Seminar (1-2) 2 hrs.
An exploration of today’s engineering and technology fields and the multifaceted role of the technologist. Orientation to student services, academic policies, stress management, science study skills, time management, and other college survival skills will be presented. Additional topics of study include applied mathematics, use of scientific calculators, teamwork and problem solving skills in the classroom, and laboratory and an introduction to the physical units and dimensions encountered in the technologies. ...................................................... B

TECH 116 Introduction to Emerging Technologies (3-0) 3 hrs.
The purpose of this “First Year Seminar” course is to introduce students to the emerging technologies careers as observed at sites of area high technology businesses, and made tangible in classroom through hands on-experiences with tools (LabVIEW) and techniques used in the curriculum. Students will practice industry recommended soft skills such as communication and team work. Students will learn how other courses including mathematics and physics are crucial for the AAS Instrumentation and Control Technologies degree program. Students will learn to articulate the relevance of the curriculum for local and regional economic development based on high technologies. GST 142 or placement into Math Level 2 or higher. ........................ F

TECH 122 Electronic Theory (2-3) 3 hrs.
An algebra based electric circuit analysis course. Topics include: voltage, current, resistance, Ohm’s law, resistor combination, Kirchhoff’s laws, power, source conversion, capacitance, relays, microcontrollers, and residential wiring. Computer analysis of circuits introduced. Lab applies classroom theory, teaches use of multimeters and power supplies, and introduces the oscilloscope, breadboarding, schematic reading and troubleshooting. Prerequisite: MAT 145 or placement into Math Level 3 or higher. .... F

TECH 123 Digital Electronics (2-3) 3 hrs.
TECH 123 is a digital electronics course focusing on the theory and application of digital devices and circuits. Topics investigated include digital signals, binary number systems, Boolean Algebra and Karnaugh Mapping circuit reduction techniques. Digital devices/circuits tested include basic logic gates, flip flops, counters, adders, registers, encoders, decoders, multiplexers, demultiplexers, and analog-digital converters. The course will also provide an introduction to microcontrollers and applications. Prerequisite: MAT 145 or placement into Math Level 3 or higher. .... S

TECH 130 Construction Materials (3-0) 3 hrs.
This course provides an introduction to the properties and use of materials employed in construction. Topics that will be covered include foundations & soils, wood (light frame & heavy timber), concrete, masonry, steel, roofing, windows & doors, and finishes. Lecture topics are supplemented with material samples, photographs of built projects, video, and field trips. F

TECH 205 Engineering Drawing III (1-5) 3 hrs.
This course includes advanced drafting skills required in a typical engineering design environment. Topics include drawing views, assembly drawings, threads and fasteners, dimensioning, tolerancing, bearings and
Control tools and techniques used in automation are introduced using
or placement into Math Level 4, TECH 122, TECH 123.

They will define and develop an innovative data acquisition solution using
analysis. Students will complete a team-based case study project in which
manually. The main topics covered include: sources of signals, selection of
strain, shear and moment in beams, load, shear, and moment diagrams.
Prerequisites: PHY 118 and MAT 145 or placement into Math Level 3 or
higher required. ................................................................. F

Continuation of Strength of Materials topics. Deflection of beams (statically
determinate and indeterminate), combined load, welded, bolted and riveted
connections, and columns. Dynamics topics include kinematics of rigid
bodies, work, energy and power, impulse and momentum. Prerequisite:
TECH 216. ................................................................. S

Continuation of Strength of Materials topics. Deflection of beams (statically
determinate and indeterminate), combined load, welded, bolted and riveted
connections, and columns. Dynamics topics include kinematics of rigid
bodies, work, energy and power, impulse and momentum. Prerequisite:
TECH 216. ................................................................. S

Introduction to the analytic design of machine elements. Study of kinematics
of mechanical linkages, cams, gears, gear trains. Ball and roller bearings.
Belt and chain drives. Prerequisites: PHY 118 and MAT 145 or placement
into Math Level 3 or higher. Corequisite: TECH 216. ............... F

Continuation of the analytic design of machine elements. Topics include
power transmission shafting, mechanical clutches and brakes, springs,
welded and riveted connections, power screws, and working stresses.
Prerequisite: TECH 220. Corequisite: TECH 217. .................. S

The automation of data acquisition is essential for measurements in R&D as
well as industrial environments where massive amounts of data collected,
especially when the data are collected more rapidly than what is possible
manually. The main topics covered include: sources of signals, selection of
appropriate transducers, and signal conditioning needed before signal is
converted to digital format for computer controlled data acquisition and
analysis. Students will complete a team-based case study project in which
they will define and develop an innovative data acquisition solution using
appropriate hardware and software tools. Prerequisite: ESC 174, MAT 152
or placement into Math Level 4, TECH 122, TECH 123.............. S

Control tools and techniques used in automation are introduced using
Microcontrollers, Programmable Logic Controllers, and Programmable
Automation Controllers. Students will apply concepts and techniques
learned to complete a team based case study project to solve problems
encountered in high technology businesses. Prerequisites: ESC 174, MAT
152 or placement into Math Level 4, PHY 109, TECH 122, TECH 123.
Corequisite: TECH 231................................. F

Students will learn the principles of process improvement through specific
methodologies such as Lean Six Sigma. Six Sigma techniques use data driven
decisions to reduce defects, drive down costs, and increase efficiency. It
focuses on minimizing variation, thereby enabling the process to operate
more smoothly and efficiently. Lean is a process that focuses on eliminating
waste and streamlining operations. Data driven decisions are still present,
but the emphasis on speed for process improvement is key. Basically, Lean
is centered around creating more value with less work. Combining these
two methodologies provides powerful tools to make improvements in any
process or business. Prerequisites: ENG 101 and MAT 152 or placement
into Math Level 4. ................................. S

Control tools and techniques used in automation are developed using
Mechtronics (automated motion control) and Industrial Machine Vision
(acquisition, processing and use of images in automation control). Students
will apply concepts and techniques learned to complete a team based case
study project to solve problems encountered in high technology businesses.
Prerequisite: TECH 231, TECH 232................................. S

An overview of principles and practices in the administration of
architectural construction projects. Topics include construction methods
and materials, planning and scheduling, job cost control, contracts,
specifications, safety, and labor relations. Prerequisite: TECH 130. .... F

Students will be introduced to the fundamental concepts required for the
drafting and design of residential buildings. The course will simulate a
professional setting by working through the steps required for a hypothesis
residential project. By the end of the semester, a set of working drawings
will be prepared. Topics that will be explored include the building code,
the energy code, presentation drawings, construction drawings, site plans,
floor plans, elevations, sections, foundations, framing plans, and schedules.
Prerequisites: TECH 106, TECH 130................................. F

Students will be introduced to the fundamental concepts required for the
drafting and design of commercial buildings. The course will simulate a
professional setting by working through the steps required to prepare
construction drawings for a project. By the end of the semester, a set of
working drawings will be prepared. Topics that will be explored include the
building code, ADA requirements, the energy code, construction drawings,
site plans, floor plans, ceiling plans, elevations, sections, foundations,
framing plans, and schedules. Prerequisite: TECH 244.......................... S

Students will be introduced to the fundamental concepts related to the design
of building structures. Topics that will be covered include 1) forces, 2) trusses,
3) shear & bending moment diagrams, 4) properties of sections, 5) estimating
live & dead loads, 6) designing wood beams, columns, & connections, and
7) designing steel beams, columns, and connections. Prerequisites: TECH
216, MAT 145 or placement into Math Level 3 or higher, required. .... S

This course will present an overview of the principles and practices used
in the design of mechanical systems for buildings. The fundamentals of
HVAC, plumbing, and electrical systems will be examined. Topics that will
be explored include: equipment selection, design of delivery systems, energy conservation strategies, application of building codes, and the integration with impact on architectural design. Prerequisites: MAT 145 or placement into Math Level 3 or higher, TECH 130.  

TECH 250 Technology Co-op 3-6 hrs.  
The co-op program enables the technology student to supplement academic studies with work experience. The student will be employed a minimum of 135 work hours (3 credits) or 270 work hours (6 credits) per semester (either full-time or part-time employment). Students will be required to enter into a co-op contract, successfully complete an orientation and submit a written report at the conclusion of the work experience. This course is a technology elective and enrollment is limited to technology students. Prerequisites: Completion of 30 credits in the degree program, advisor approval of co-op placement and a minimum GPA of 2.5 or GPA of 2.00-2.49 with faculty approval.  

TECH 260 Construction Estimating (3-0) 3 hrs.  
An introduction to cost estimating of an architectural project. Topics include an overview of the estimating process; an introduction to contracts, bonds and specifications; and the preparation of a final bid for a project including quantity takeoffs, material pricing, labor cost, equipment costs, overhead and profit. Prerequisites: TECH 130, TECH 244, and MAT 145 or placement into Math Level 3 or higher. Corequisite: TECH 246 or permission of instructor.  

Theatre

THE 100 Play Production I (3-0) 3 hrs.  
A study and application of the major features of technical production in the theatre with emphasis on scenery construction, painting, properties, costuming, special effects and makeup. Work on technical crews for department's fall mainstage production is required.  

THE 101 Play Production II (3-0) 3 hrs.  
This course places emphasis on the following areas of stage design: scene, lighting, costume, and make-up. Secondary emphasis will be on stage properties, sound design, and the use of computers in the theatre. Work on technical crews for department’s spring mainstage production is required.  

THE 102 Acting I (3-3) 3 hrs.  
A performance course in the study and application of fundamental acting techniques for the stage. Open to all students.  

THE 103 Acting II (3-3) 3 hrs.  
This performance course places emphasis on scene study. Students rehearse and present different scenes (from major plays) during the semester. Open to all students. Acting I is not a prerequisite.  

THE 104 Introduction to the Theatre (3-0) 3 hrs.  
This course is a general survey of the theatre including the exploration of the production arts (acting, directing, design, play writing, and criticism) and theatre history from 500BC to the present. The primary objectives of the course are to develop an appreciation and understanding of theatre, not merely as a way of telling a story, or a vehicle of production, but as a special kind of artistic creation that combines its own particular methods with the universal values of all art. As a result, students are required to attend departmental and/or area theatre activities as well as to write their own 10-minute play. Prerequisite: DST 092; DST 095 or placement into ENG 101 or ENG 104.  

THE 106 Children’s Theatre Tour (3-0) 3 hrs.  
A workshop/rehearsal/performance course in children's theatre. Students will prepare a one-act play for presentation at primary and elementary schools in Ontario County. Students may participate as actors or technicians (set construction, props, costumes). Open to all students. May be taken more than once for credit. Prerequisite: THE 102, THE 103 or permission of instructor.  

THE 115 Backstage Practicum (0-3) 1 hr.  
Backstage Practicum provides students the opportunity to participate in the semester’s mainstage production as a backstage technician. Students could serve as the stage manager, light board operator, sound technician, costume dresser, prop runner, or on the shift crew. Prerequisite THE 100 or 101 and permission of the department required.  

THE 181 Mime (3-0) 3 hrs.  
A basic course dealing with the study and application of the various techniques of the art of mime. (Also listed as PE 181)  

THE 210 Introduction to Dramatic Literature (3-0) 3 hrs.  
This course is an introduction to the history and genre of drama. By exploring some of the best-known plays throughout theatre history and how they were performed students will develop an understanding of, and appreciation for the theatre. Lectures, films, and attendance will provide students with a partial overview of the vast range of theatre history and literature. Prerequisite: ENG 101 or ENG 104, ENG 103.  

THE 215 Scene Shop Practicum (0-2) 1 hr.  
Scene Shop Practicum provides students the opportunity to work in the scene shop for the semester’s theatre productions as carpenters, painters, and electricians. Prerequisite THE 100 and permission of the department required.  

Viticulture

VIT 100 Introduction to Wines and Vines (3-0) 3 hrs.  
This course is designed to introduce the student to the world of wine grapes, from cultural history and geography to plant taxonomy and anatomy. Topics covered in this course include grape producing regions, varieties grown, and important factors for successful crops. The wine tasting component of the course will be conducted at the Canandaigua Wine and Culinary Center, where the students will learn to distinguish wines and how to pair wines with food. They will take the examination to become internationally certified wine tasters.  

VIT 105 Basic Viticulture Techniques (3-0) 3 hrs.  
This course is designed to introduce students to current practices for establishing a commercial vineyard and maintaining its vigor and productivity once established. Topics covered include site analysis, varietal selection, grafting and rooting cuttings, planting, pruning and trellising methods. Tractor operation and equipment safety will be covered, along with fertilization techniques, cover crop election, and weed management strategies.  

VIT 110 Summer Vineyard Technology Practicum (5-0) 5 hrs.  
This field course is designed to provide experience for students so that they develop relevant skills in current practices for summer maintenance of a commercial vineyard. Requirements will include 105 hours of work at an approved vineyard, attending 25 hours of workshops dealing with seasonal winery and vineyard operations, and participating in 15 hours of classroom discussion and lecture about their own and other students’ activities in
their work experiences. Students will maintain journals on their work experiences, and keep track of their hours of different activities. The focus will be on vineyard maintenance for maximum health and productivity of vines. Prerequisite: VIT 105. ........................................SU

VIT 200 Vineyard Management (3-0) 3 hrs. This course is designed for students already familiar with the basics of viticulture. The student will complete a project using geological survey data, evaluating a real site for its potential as a vineyard, plan a fertility program and develop irrigation management based on soil water properties. The student will design the vineyard, planning rows, and calculating the numbers of posts and plants needed. Lecture topics covered will include canopy management, foliar sampling, Best Management Practices, and how cropping systems affect fertility needs. The student will develop a task management plan for a year. Viticulture safety issues will be addressed, as well as specific strategies for management of weeds, vertebrate pests, insects, and diseases. Labor management and vineyard marketing will be discussed. Prerequisite: VIT 105. ........................................S

VIT 205 Fall Vineyard Technology Practicum (4-0) 4 hrs. This field course is designed to provide experience for students so that they develop relevant skills in current practices for harvesting grapes and processing grapes into wine at a commercial vineyard and/or winery. Students will gain hands on experience in fermentation management, winery safety, winery equipment and winery sanitation. Requirements will include 75 hours of work at an approved vineyard or winery, attending 20 hours of workshops dealing with seasonal winery and vineyard operations, and participating in 15 hours of classroom discussion and lecture about their own and other students’ activities in their work experiences. Students will maintain journals on their work experiences, and keep track of their hours of different activities. Prerequisites: VIT 100, VIT 105. .................................F

VIT 210 Introduction to Enology (2-2) 3 hrs. This course is designed to introduce students to the science of wine making. Topics covered include: microbiology of wine yeast and bacteria; analytical methods for testing juices for sugar, acid and pH; and the importance of sanitation in the winery. Students will study and perform the processes of wine cellar operations from vineyard through fermentation, and the early stages of initial stabilization of young wines. Students will become familiar with various wine making equipment including a crusher/stemmer, press, must pumps, juice and wine pumps, tri-clover fittings, and other fermentation tools. Techniques and reasons for using various winemaking additives from harvest through stabilization will be explored. Prerequisite: CHM 121, VIT 100. .................................S

VIT 215 Enology (3-0) 3 hrs. This course is designed as a continuation of the study of the science of wine making with more focus on wine stabilization, storage, waste water management and energy considerations when making wine. Topics covered include winery water and energy use, chemical and biological stability of bulk wine storage, wine preparation for bottling, and blending considerations. Students will study heat and cold stability of wines, filtration, barrel management, bottling wine, wine closures and become familiar with common analytical skills used in a wine lab. Prerequisite: VIT 210. .......S

Wildland Fire Suppression

WFS 101 Fire Science Agencies and Careers (1-0) 1 hr. This course covers the main federal, state and non-governmental agencies that hire Wildland Fire Fighters. Topics will include the missions of each agency, hiring procedures, the meaning of seasonal employment, job descriptions and job requirements. Students will be given a thorough explanation of positions within and outside of New York State. In addition, the role of volunteer fire fighters will be explored. ..........................F

WFS 130 Wildland Fire Suppression (S-130/S-190) (2-0) 2 hrs. This course provides the training necessary for the Federal Interagency “RED” Card for wildland firefighter. Topics covered include: ignition, behavior, and spread of wildfires; the role of topography and fuels in wildfires; prescribed fires as a management tool; use of fire suppression equipment; methods of fire prevention and suppression; State and Federal wildland fire control agencies. Graded on a satisfactory/unsatisfactory basis. ..........................B
(Also listed as CON 255)

WFS 131 Firefighter Type I (S-131 Wildland) (1-0) 1 hr. This interactive course contains activities to allow students to demonstrate the information learned in class. Topics include: fireline reference materials, communications, and tactical decision making. Course meets NWCG (National Wildfire Coordinating Group) standards for S-131 certification (FFT1). Graded S (satisfactory) or U (unsatisfactory) basis. Prerequisite: Firefighter type 2 (FFT2). This can be accomplished through completion of CON 255/WFS 130 or any NWCG recognized S-130 course .......F

WFS 200 Basic Incident Command System (1-200) (1-0) 1 hr. This course introduces students to the principles of the Incident Command System (ICS). Five instructional modules are presented: Principles and Features of ICS, Organizational Overview, Incident Facilities, Incident Resources, and Common Responsibilities Associated with ICS Assignments. Course meets NWCG (National Wildfire Coordinating Group) standards for I-200 certification. ..........................S

WFS 211 Portable Pumps and Water Use (S-211) (2-0) 2 hrs. This course is designed for individuals to gain competency in the use of portable pumps and water for application on a wildland fire line. Skill areas include supply, delivery and application of water. Students will be required to demonstrate their knowledge of correct water use, basic hydraulics and equipment care. A field exercise requires students to set up, operate and maintain pump equipment. Course meets NWCG (National Wildfire Coordinating Group) standards for S-211 certification. ..........................S

WFS 212 Wildland Fire Chain Saws (S-212) (2-0) 2 hrs. This course provides an introduction to the function, maintenance and use of powered chain saws and their tactical wildland fire application. This course is appropriate for students with little to no previous experience in operating a chain saw. Field exercises emphasize safety, proper cutting techniques, field maintenance and use of a saw in surroundings similar to fireline situations. Course meets NWCG (National Wildfire Coordinating Group) standards for S-212 certification. Prerequisite: Firefighter type 2 (FFT2). This can be accomplished through completion of CON 255/WFS 130 or any NWCG recognized S-130 course .......S

WFS 215 Fire Operations in the Wildland/Urban Interface (S-215) (2-0) 2 hrs. This course is designed to assist structure and wildland firefighters who will be making tactical decisions when confronting wildland fires that threaten life, property and/or improvements in the wildland/urban interface. Course meets NWCG (National Wildfire Coordinating Group) standards for S-215 certification. Prerequisite: CON 255/WFS 130. .............................S

WFS 230 WFS Crew Boss (Single Resource S-230) (2-0) 2 hrs. This course is designed to produce student proficiency in the performance of
duties associated with the single resource boss position from initial dispatch through demobilization to the home unit. Topics include: operational leadership, preparation and mobilization, assignment preparation, risk management, entrapment avoidance, safety and tactics, offline duties, demobilization and post incident responsibilities. Prerequisites: CON 255/ WFS 130, WFS 290. ............................................ S

WFS 256 Fire Ecology (3-0)  
3 hrs.  
This course is designed to give students an appreciation and understanding of the ecological role of fire in a variety of North American ecosystems. Advantageous adaptations of species inhabiting fire prone ecosystems will be discussed. The effects of fire on plants and animals will be discussed within the context of ecological time scales. The effect of past state and federal policies concerning wild fire will be examined using various case studies. Students will also be introduced to the use of prescribed burning as a habitat restoration technique. ............................................ S  
(Also listed as CON 256)

WFS 290 Intermediate Wildland Fire Behavior (S-290) (2-0)  
2 hrs.  
This course is designed to prepare the prospective supervisor to undertake safe and effective fire management operations in a wildland setting. Topics include environmental, topographic and fuel factors influencing wildland fire behavior, extreme behavior and assessment of fire behavior estimates and suppression limitations. Course meets NWCG (National Wildfire Coordinating Group) standards for S-290. Prerequisite: CON 255/WFS 130 or any other S-190 recognized course. ............................................ S

†Alan H. Thorpe, Dean Emeritus
B.A., Utica College, Syracuse University
M.S., Syracuse University

Sharon A. Tobey, Associate Professor Emeritus
B.A., Niagara University
M.S., State University College at Brockport

A. John Walker, Professor Emeritus
B. Mus., Eastman School of Music, University of Rochester
M.A., Eastman School of Music, University of Rochester
Ph.D., Eastman School of Music, University of Rochester

Christopher White, Professor Emeritus
B.S., Haverford College
M.S., University of Pennsylvania
Ph.D. Cornell University

Wayne F. Williams, Professor Emeritus
B.F.A., Syracuse University
M.F.A., Syracuse University

Donald Zamperetti, Professor Emeritus
A.A.S., Mohawk Valley Community College
B.B.A., St. John Fisher College
M.S., State University of New York at Albany
† Deceased

Faculty and Professional Staff

*25 or More Years of Service

Matthew J. Adams, IT Services Technician
B.A., Regis University

Kylene D. Abraham ’82, Assistant Professor of Nursing
A.A.S., Finger Lakes Community College
B.S., Nazareth College
M.S., St. John Fisher College

Colleen A. Aiezza, Campus Center Specialist – Geneva
B.S., Rochester Institute of Technology

Kellie M. Aitchison, Instructor of Biology
B.S., Cornell University
M.A.T., Cornell University

Douglas S. Albert, Assistant Professor of Computing Sciences
A.S., Rochester Institute of Technology
B.S., Rochester Institute of Technology
M.S., Nazareth College

Richard S. Allen, Communications/New Media Specialist
B.S., University of Massachusetts

Jacob E. Amidon, Associate Professor of Mathematics; Chairperson, Department of Mathematics
B.A., State University College at Geneseo
M.A., State University of New York at Binghamton
State University Chancellor’s Award for Excellence in Faculty Service, 2012

Wendy Amidon, Technical Specialist, Biology
B.S., State University College at Geneseo
M.A., Binghamton University

Selim Araci, Professor of Engineering Science
B.S., Syracuse University
M.S., Syracuse University
Ph.D., State University of New York at Buffalo
State University Chancellor’s Award for Excellence in Teaching, 2007

Tracy A. Archie, Campus Center Administrator, Victor
B.A., State University of New York at Buffalo
M.Ed., State University of New York at Buffalo

Waldo C. Babcock, Librarian
B.A., Georgetown University
M.L.S., Syracuse University
Paul A. Bailey '85, Coordinator, Administrative Computing Services  
A.S., Finger Lakes Community College  
B.S., Nazareth College

Andrew R. Baker, Director of Community Standards  
B.S., State University College at Oneonta  
M.S., State University of New York at Albany

Brooke Baker, Director of the Writing Center  
B.A., University of Michigan-Flint  
M.A., University of Michigan-Flint

Veronica R. Bargy, Student Assessment Assistant  
A.O.S., Bryant & Stratton

Jonathan M. Belec, Instructor of Music Recording  
B.S., State University College at Fredonia

*Gloria J. Bemben, Professor of Business Administration, Internship Coordinator  
B.S., Nazareth College  
M.S., Nazareth College  
*State University Chancellor's Award for Excellence in Teaching, 2001

Michael D. Best, IT Services Technician  
A.S., Finger Lakes Community College

Anoop Bhargava, Assistant Professor of Economics  
B.A., University of California at Los Angeles  
M.A., Claremont Graduate University

Timothy J. Biehler, Associate Professor of Mathematics  
B.A., State University of New York at Buffalo  
M.A., State University of New York at Buffalo  
*State University Chancellor's Award for Excellence in Teaching, 2005

Heather S. Bock, Technical Specialist - Biology Research Lab  
A.S., Finger Lakes Community College  
B.S., William Smith College

Paul E. Brock, II, Instructor of Viticulture  
B.S., Rensselaer Polytechnic Institute  
M.S., Cornell University

Robert J. Brown, Associate Professor of History  
B.S., State University College at Brockport  
M.A., State University of New York at Albany  
Ph.D., Syracuse University  
*State University Chancellor's Award for Excellence in Scholarship and Creative Activities, 2009

*Sandra M. Brown, Professor of Computing Sciences  
B.S., State University of New York at Buffalo  
M.S., Rochester Institute of Technology

Sara J. Brown-Russo, Assistant Professor of Social Science  
B.S., Northeastern University  
M.A., Goldsmiths' College, University of London

Elizabeth S. Brownell, Associate Professor of Graphic Design  
B.A., State University College at Oswego  
M.A., State University College at Oswego  
*State University Chancellor's Award for Excellence in Teaching, 2012

Debra A. Bruno, Financial Aid Counselor  
B.S., Towson University

Sarah R. Butler, Creative Design Specialist  
B.F.A., Rochester Institute of Technology

Sandra K. Camillo, Associate Professor of English  
A.S., Monroe Community College  
B.A., State University College at Brockport  
M.A., State University College at Brockport

Corinna M. Canough, Educational Planning and Career Services;  
Instructor  
B.S., Rider College  
M.S., Nazareth College  
*State University Chancellor's Award for Excellence in Professional Service, 1999

John L. Caraluzzo, Associate Professor of Mathematics  
B.S., Ramapo College  
M.A., Montclair State College

Laurie H. Card, Student Records Specialist  
A.A.S., Finger Lakes Community College  
*State University Chancellor's Award for Excellence in Classified Service, 2009

Heather L. Carnell, Assistant Director of Concurrent Enrollment  
B.S., State University College at Geneseo  
M.P.A., State University College at Brockport

Jennifer L. Carney, Assistant Professor of Biology  
B.A., Boston University  
M.A., Boston University

*Barbara A. Chappell '81, Associate Professor of Human Services  
A.A., Finger Lakes Community College  
B.S.W., Nazareth College  
M.S.W., Roberts Wesleyan College

Kimberly Wager Chudnick, Associate Professor of Mathematics  
B.A., State University College at Geneseo  
M.S., Rochester Institute of Technology

Michael V. Cinquino, Technical Specialist, Engineering and Technology  
B.S., Rochester Institute of Technology

Nancy E. Clarkson, Professor of Nursing; Chairperson, Department of Nursing  
B.S., Keuka College  
M.Ed., Teacher's College, Columbia University

Charlotte A. Cline, Instructor of English  
B.A., University of Rochester  
M.F.A., University of Maryland

*Stephen G. Connelly, Conservation Technician; Assistant Professor  
B.S., State University College at Geneseo

Richard D. Cook, Professor of Broadcasting; Chairperson, Department of Visual and Performing Arts  
B.A., St. John Fisher College  
M.S., Boston University
Charlotte J. Cooper, Reference/Bibliographic Librarian; Professor
B.A., Western Michigan University
M.L.S., Syracuse University
State University Chancellor’s Award for Excellence in Librarianship, 1991

Mary Coriale, Professor of Nursing
B.S., Niagara University
M.S., State University of New York at Stony Brook

Deborah L. Corsner, Campus Center Specialist – Wayne Campus
B.S., State University College at Oswego
M.B.A., State University College at Oswego

John W. Cromartie, Campus Center Administrator, Geneva; Instructor
B.A., Hobart College
M.S., State University College at Brockport

Cathy Cushman, Assistant Professor of Music
A.B., Eastman School of Music
M.A., Eastman School of Music

Teresa M. Daddis, Student Services Counselor
B.S., State University College at Oswego
M.S.Ed., State University College at Brockport
State University Chancellor’s Award for Excellence in Professional Service, 2008

Joseph L. Delforte, Controller
B.S., Rochester Institute of Technology

April Devaux, Professor of Computing Sciences; Chairperson,
Department of Computing Sciences
B.A., State University College at Potsdam
M.S., State University of New York at Binghamton

Ines Draskovic, Assistant Professor of Music
M.M., Ithaca College
D.M.A., Eastman School of Music

Lawrence S. Dugan, Director of Online Learning
B.S., Nazareth College
M.Ed., State University College at Brockport

Edward E. Einhouse, Instructor of Economics
B.S., State University College at Fredonia
M.A., State University of New York at Buffalo

Frances E. Emerson, FLCC Geneva Campus Center Evening Coordinator
B.A., Eisenhower College
M.S., Nazareth College

Donald D. Emirbayer, Campus Center Specialist, Victor Campus
B.S., Rochester Institute of Technology

Paul Engin, Instructor of New Media
B.F.A., University of Massachusetts at Amherst
M.F.A., Rochester Institute of Technology

Barbara A. Etzel, Professor of Psychology
B.S., University of Pittsburgh
M.A., University of Rochester
Ph.D., University of Rochester

*Richard W. Evans, Director of Institutional Computing Services;
Associate Professor
B.S., St. Lawrence University
Ph.D., Cornell University

*Jeanne M. Fagan ’77, Professor of Business Administration
A.A.S., Finger Lakes Community College
B.S., Nazareth College
M.S., Rochester Institute of Technology
State University Chancellor’s Award for Excellence in Teaching, 2000

Daniel P. Farsaci, Director of Instructional Technologies
B.S., University of the State of New York Regents College
M.A.Ed., East Carolina University

Amy M. Fenwick, Instructor of Biology
A.S., Brooakdale Community College
B.S., Cook College, Rutgers University
M.S., State University of New York at Stony Brook

*Victor P. Fernandez, Student Services Counselor; Assistant Instructor
B.A., Hobart College
M.S.Ed., State University College at Brockport

Deborah K. Ferrell, Professor of English
B.A., Florida State University
M.A., Florida State University
Ph.D., Florida State University

Fred E. Fink, Director of Concurrent Enrollment
A.A.S., Luzerne County Community College
B.S., Rochester Institute of Technology
M.P.A., State University College at Brockport

James R. Fisher, Vice President of Administration and Finance
B.S., Rochester Institute of Technology
M.B.A., Rochester Institute of Technology

Michael J. Fisher, One Stop Center Director
A.S., Monroe Community College
B.A., Nazareth College
M.S. Keuka College

Edward J. FitzPatrick, Professor of Business Administration, Retailing
A.A.S., Alfred State College
A.A.S., Corning Community College
B.S., Elmira College
M.B.A., University of Montana

Amy J. Flagler, Instructor of Communications
A.A., Herkimer Community College
B.A., State University College at Oswego
M.A., State University College at Brockport

John C. Foust ’97, Assistant Professor of Environmental Conservation
A.A.S., Finger Lakes Community College
B.T., State University College of Agriculture and Technology at Cobleskill
M.S., State University College at Brockport

Elizabeth L. Freid ’08, Manager of Training and Business Development
A.A., Finger Lakes Community College

Lenore Friend, Community Affairs Specialist
B.A., Colgate University
Theresa M. Gauthier, Associate Professor of Mathematics  
B.S., State University College at Fredonia  
M.A., State University College at Binghamton

Keith I. Gaylor, IT Specialist  
B.S., Rochester Institute of Technology

Margaret E. Gillio, Instructor of English  
B.A., Concordia College  
M.A., University of Arizona  
M.F.A., Minnesota State University

Bruce A. Gilman, Professor of Environmental Conservation and Horticulture  
B.S., St. John Fisher College  
M.S., State University of New York College of Environmental Science and Forestry at Syracuse  
Ph.D., State University of New York College of Environmental Science and Forestry at Syracuse

John D. Graham '95, Technical Specialist-Developmental Studies  
B.A., University of Maryland  
M.S., University of Arizona  
Ph.D., University of Arizona

Richard E. Gray, Financial Aid Counselor  
A.A.S., Finger Lakes Community College

Eileen Grooms, Instructor of Biology  
B.A., State University of New York at Buffalo  
M.A., Syracuse University

Anne M. Gulledge, Systems and Database Administrator  
B.S., Rensselaer Polytechnic Institute

Kathleen R. Guy, Adult Literacy Education Coordinator  
B.S., Edinboro University  
M.S., State University College at Buffalo

Daniel L. S. Haynes, Educational Opportunity Program Coordinator  
B.S., State University College at Oswego  
M.S., State University College at Oswego

Joshua W. Heller, Professor of Sociology; Director of International Studies; Chairperson, Department of Social Sciences  
B.A., State University College at Cortland  
M.A., Syracuse University  
State University Chancellor’s Award for Excellence in Faculty Service, 2009

James A. Hewlett, Professor of Biology  
B.S., Bucknell University  
M.S., University of Connecticut  
State University Chancellor’s Award for Excellence in Teaching, 2005

Linda L. Hobart, Professor of Physical Science  
B.S., Rochester Institute of Technology  
M.S., Rochester Institute of Technology  
State University Chancellor’s Award for Excellence in Teaching, 1995

Charles E. Hoffman '01, Instructor of Mathematics  
A.S., Finger Lakes Community College  
B.A., State University College at Potsdam  
M.A., State University College at Potsdam  
M.A., Indiana University  
M.A., Michigan State University

Jeffrey M. Howard, Associate Professor of Computing Sciences  
B.A., State University of New York at Buffalo  
Ed.M., State University of New York at Buffalo

Anthony Indorato, Instructor of Psychology/Education  
B.S., Nazareth College  
M.S., Nazareth College

Bryan M. Ingham, Associate Professor of Mathematics  
B.S., State University College at Fredonia  
M.S., State University College at Fredonia  
State University Chancellor’s Award for Excellence in Teaching, 2011

Samuel J. Iraci, Enterprise Technology Coordinator  
A.S., Rochester Institute of Technology  
B.S., St. John Fisher College

Catherine T. Johnson, Professor of Theatre  
B.A., Belmont University  
M.A., Indiana State University  
Ph.D., University of Georgia

Milton L. Johnson, Associate Professor of Speech  
B.A., Indiana State University  
M.A., Indiana State University  
State University Chancellor’s Award for Excellence in Faculty Service, 2007

Alton G. Jowers, Jr., Assistant Professor of English  
B.A., Lambuth University  
M.A., Middle Tennessee State University

Jan E. June, Director of Facilities and Grounds  
B.S., Daemen College  
M.A., Webster University

Robert O. Kalbach, Professor of Chemistry  
A.E., The Pennsylvania State University  
B.S., The Pennsylvania State University  
Ph.D., University of South Florida

Stephen G. Kalbach, Technology Specialist, Campus Centers  
B.S., Pennsylvania State University

Suzanne M. Keller, Assistant Professor of Biology  
B.A., State University of New York at Buffalo  
M.S., State University of New York at Buffalo

Edward E. Kennedy, Professor of Psychology  
B.S., Mansfield University  
B.Div., Colgate Rochester/Bexley Hall/Crozer Divinity School  
M.Div., Colgate Rochester/Bexley Hall/Crozer Divinity School  
M.Ed., University of Rochester  
Ed.D., University of Rochester

Deborah M. Kenney, Community Affairs Specialist  
B.A., State University College at Geneseo  
M.S., State University College at Brockport

Cathryn F. Kent, Professor of Paralegal Studies  
B.S., The College of Charleston  
J.D., Syracuse University College of Law

Jeffrey R. Kidd '05, Video Engineer and Technician  
A.S., Finger Lakes Community College  
B.S., State University College at Brockport
Clinton D. Krager, Associate Professor of Biology
B.S., University of South Carolina
M.S., University of South Carolina

William D. Kramp, Network Administrator; Assistant Instructor
A.A.S., State University of New York College of Agriculture and Technology at Morrisville
B.S. State University of New York at Empire State College
M.S., Capitol College
State University Chancellor’s Award for Excellence in Professional Service, 2010

Barbara L. Kruger, Professor of Modern Languages
B.S., Georgetown University
M.A., New York University
State University Chancellor’s Award for Excellence in Teaching, 2012

Emily M. Kuryla ’90, Technical Specialist, Department of Nursing; Assistant Instructor
A.A.S., Finger Lakes Community College
B.S., St. John Fisher College

Peter A. Kuryla, Assistant Professor of Business Administration; Internship Co-Coordinator
B.S., State University College at Brockport
M.A., State University College at Brockport

Susan H. Landholm, Associate Professor of Physical Education
B.A., Syracuse University
M.A., Nazareth College

William G. Langston, Assistant Professor of Mathematics
B.S., St. Lawrence University
M.S., Rensselaer Polytechnic Institute
M.S., Rochester Institute of Technology

Richard V. Larkin, Associate Professor of Hotel/Resort Management
B.S., Rochester Institute of Technology
M.S., State University College at Brockport
State University Chancellor’s Award for Excellence in Faculty Service, 2010

Elizabeth M. Larzelere, Help Desk Specialist
B.S., St. John Fisher College
M.S., University at Albany

Gina R. Lee, Technical Specialist – Viticulture
A.A.S., Finger Lakes Community College
B.A., Ithaca College

Adelaida Leon-Paliotti, Campus Center Administrator, Wayne; Assistant Instructor
B.A., William Smith College
M.S.W., Syracuse University
State University Chancellor’s Award for Excellence in Professional Service, 2001

Michael G. Lloyd, IT Services Technician
B.A., University of Colorado

Grace H. Loomis ’84, Director of Human Resources
A.A.S., Finger Lakes Community College
B.S., State University of New York Empire State College
M.B.A., St. John Fisher College

Robert F. Lowden, Director of Athletics
B.S., Miami University of Ohio
M.S., State University College at Brockport

Rosemary C. Lowden, Evening Coordinator, Victor Campus Center
B.S., Utica College of Syracuse University
M.Ed., State University College at Brockport

B.S., Rochester Institute of Technology
M.S., Nazareth College

Andrea S. Marino, Technical Specialist – Biology
B.S., State University College at Geneseo
M.S., University of Rochester

Eric J. Marsh ’98, Assistant Professor/Coach
A.A.S., Finger Lakes Community College
B.S., Canisius College
M.S., Mississippi State University
Todd A. Marsh, Associate Professor of Architectural Design and Drafting  
B.P.S., State University of New York at Buffalo  
M.Arch., State University of New York at Buffalo

Robert C. Matson, Community Affairs Director  
B.A., Houghton College

Lisa A. McAnn, Instructor of Nursing  
B.S., Keuka College  
M.S., Liberty University

Ryan L. McCabe, Assistant Director of Online Learning  
B.A., State University College at Potsdam  
M.S., State University College at Buffalo

Susan M. McCarthy, Associate Professor of Nursing  
B.S., Molloy College  
M.S., St. John Fisher College  
State University Chancellor's Award for Excellence in Teaching, 2011

Mary Jane McComb ’88, Admissions Counselor/DSS Coordinator  
A.A.S., Finger Lakes Community College  
B.A., Nazareth College  
M.A., State University College at Brockport

David R. McGuire, Professor of Music  
B.S., Nazareth College  
M.M., Arizona State University  
Ph.D., State University of New York at Buffalo  
State University Chancellor’s Award for Excellence in Teaching, 2007

William C. McLaughlin, Instructor of Computing Sciences  
B.A., State University College at Geneseo  
M.S., Rochester Institute of Technology

Christopher P. McNamara, Assistant Professor of Business  
B.S., Western New England College  
M.B.A., Western New England College

Trista M. Merrill, Associate Professor of English  
B.A., State University College at Potsdam  
M.A., State University of New York at Binghamton  
Ph.D., State University of New York at Binghamton

Michael E. Merriman, Associate Director of Admissions  
B.A., Eureka College

Ronald J. Metzger, Assistant Professor of Mathematics  
B.S., The Pennsylvania State University  
M.Ed., The Pennsylvania State University

Lori A. Miller, Instructor of Nursing  
B.S., Roberts Wesleyan College  
M.S., Roberts Wesleyan College

Melissa A. Miller ’04, Associate Professor of Biology; Chairperson, Department of Science and Technology  
A.A.S., Finger Lakes Community College  
B.A., Northern Kentucky University  
D.C., New York Chiropractic College  
State University Chancellor’s Award for Excellence in Teaching, 2010

*Richard F. Monheim ’71, Professor of Social Science  
A.A., Finger Lakes Community College  
B.A., State University College at Cortland  
M.S., State University of New York at Albany  
Ed.D., Nova University

Sarah J. Moon ’98, Automated Systems and Technical Services Librarian  
A.A.S., Finger Lakes Community College  
B.A., State University College at Brockport  
M.L.S., State University of New York at Buffalo  
State University Chancellor’s Award for Excellence in Librarianship, 2012

*Dennis T. Moore, Professor of Physical Education; Chairperson, Department of Physical Education and Integrated Health Care  
B.S., Ithaca College  
M.S., Syracuse University  
C.A.S., State University College at Brockport  
State University Chancellor’s Award for Excellence in Professional Service, 1998

Sarah E. Morgan, Assistant Professor of Art  
B.A., Houghton College  
M.F.A., New York Academy of Art

Susan P. Morgan, Assistant Director of Development  
B.S., Keuka College  
M.S., Nazareth College

Barbara J. Murphy, Professor of Developmental Studies  
A.A., Monroe Community College  
B.A., State University College at New Paltz  
M.A., State University of New York at Buffalo  
State University Chancellor’s Award for Excellence in Teaching, 2006

Mary C. Murphy ’92, Assistant Professor of Chemical Dependency Counseling/Psychology  
A.A., Finger Lakes Community College  
B.S., State University of New York Empire State College  
M.A., State University of New York Empire State College

Johnathan J. Murray ’05, One-Stop Center Assistant Director  
A.A.S., Finger Lakes Community College  
B.S., Rochester Institute of Technology

Barron R. Naegel, Assistant Professor of Art  
B.A., Connecticut College  
M.F.A., University of Michigan

Joseph T. Nairn, Assistant to the President  
B.A., Thiel College  
M.Ed., University of Vermont

Thomas E. Nau, Desktop Technology Specialist  
A.S., Monroe Community College  
B.S., State University College at Brockport

Curtis D. Nehring Bliss, Associate Professor of English; Director of Honors  
B.A., Siena College  
M.A., State University of New York at Albany  
State University Chancellor’s Award for Excellence in Faculty Service, 2008
Amy L. Nichols, Coordinator of Services to Students with a Learning Disability; Instructor
A.A., Monroe Community College
B.S., Nazareth College
M.S., Nazareth College

Norah Nolan-Cramer, Coordinator for Students with a Disability
B.S., State University College at Brockport
M.P.H., University of Oklahoma

Karen D. O’Donnell, Professor of Developmental Studies
B.A., St. Bonaventure University
M.S., Purdue University
State University Chancellor’s Award for Excellence in Teaching, 2004

*Deborah L. Olsen ’92, Technical Specialist for Institutional Research; Assistant Instructor
A.O.S., Bryant and Stratton Business Institute
A.A.S., Finger Lakes Community College
B.S., Roberts Wesleyan College

Stephanie Olsen, Instructional Specialist, Academic Support Specialist; Instructor
B.A., State University College at Brockport
M.A., Arhus University, Denmark
M.A., Aalbong University Center, Denmark
State University Chancellor’s Award for Excellence in Professional Service, 2006

Leonard E. Ortenzi, Assistant Professor of Physics
A.S., Niagara County Community College
B.S., State University College at Buffalo
M.S., State University College at Brockport

Dorothy E. Oswald, Nursing Simulation Specialist, Department of Nursing
B.S., State University College at Plattsburgh

Maureen A. Owens, Online Student Support Technical Specialist
B.S., Binghamton University
M.A., Antioch University West San Francisco

Christine M. Palace-Neininger, Assistant to the Controller
A.A.S., State University of New York College of Technology at Delhi
B.S., State University of New York at Binghamton

Jon A. Palzer, Associate Professor of English; Chairperson, Department of Humanities
B.S., State University College at Brockport
M.A., State University College at Brockport

Andrea J. Parker, Academic Coach
B.S., Syracuse University
M.S., State University College at Buffalo
M.S., Nazareth College

State University of New York (SUNY) stands as an integrated, unified system of 64 campuses enrolling more than 467,000 students. Established in 1948, it is the nation’s youngest and largest State University. SUNY consists of the following components:

UNIVERSITY CENTERS AND DOCTORAL DEGREE GRANTING INSTITUTIONS
University at Albany
Binghamton University
University at Buffalo
Cornell University
Stony Brook University
Downstate Medical Center
Upstate Medical Center at Syracuse
Environmental Science and Forestry
College of Optometry
New York State College of Ceramics at Alfred University
Agriculture and Life Sciences at Cornell University
Human Ecology at Cornell University
Veterinary Medicine at Cornell University
Industrial and Labor Relations at Cornell University

UNIVERSITY COLLEGES
State University College at Brockport
State University College at Buffalo
State University College at Cortland
State University College at Fredonia
State University College at Geneseo
State University College at New Paltz
State University College at Old Westbury
State University College at Oneonta
State University College at Oswego
State University College at Plattsburgh
State University College at Potsdam
State University College at Purchase
State University of New York Empire State College

COLLEGES OF TECHNOLOGY
State University of New York College of Technology at Alfred
