FLCCsecure

How to Set Up a Secure Wireless Device for Students and Employees

Please Note: This packet is a general overview of how to setup the most commonly used personal devices here on campus at FLCC; the following pictures may not be 100% accurate to what you will see on your own device. Should you encounter difficulties please contact the IT Help Desk, Canandaigua Campus Room B388, (585) 785-1419, helpdesk@flcc.edu.

If you do not have a FLCC Network Account please visit the IT Help Desk at the Canandaigua Campus or the front desk at any other Campus location. Photo ID will be required to create your account. It is best to present your FLCC ID Card.
MAC Instructions

Click on the Airport icon which is generally found in the top right hand part of the screen.

Then, click on “Open Network Preferences”.

Once this window appears, click “Advanced…”

IMPORTANT! DO NOT IGNORE!

Ensure that FLCCsecure and FLCCguest are NOT already in the list. If either is, select the network and click on the “-” button.
Once you have removed existing FLCCsecure and FLCCguest connections or ensured none exist, click on the “802.1X” tab.

Click the triangle next to User Profiles and remove any entries named “WPA: FLCCsecure” (there could be more than 1).

IMPORTANT! DO NOT IGNORE!

Click OK when you are finished.

Click OK when you are back at this window.
Click on **Apply** and enter your computer’s password if prompted.

Then, navigate to the top left hand corner of the screen and click “**System Preferences**” and then click “**Click System Preferences**”.

If you have removed any existing connections, please **restart** your computer before proceeding. Otherwise, continue to the next page of this packet.
Click on the Airport icon which is generally found in the top right hand part of the screen.

Then, click on “Join Other Network…”

Click on the Airport icon which is generally found in the top right hand part of the screen.

Click on the Airport icon which is generally found in the top right hand part of the screen.

No Spaces!!

Set the Network Name to FLCCsecure

Set the Network Name to FLCCsecure

Select WPA2-Enterprise from the Security dropdown.

Select WPA2-Enterprise from the Security dropdown.

If you are a student you must put student\ in the username field. That is a BACK SLASH (\) and NOT a forward slash (/). The back slash is generally located above the Enter/Return Key on the Keyboard.

If you are a student you must put student\ in the username field. That is a BACK SLASH (\) and NOT a forward slash (/). The back slash is generally located above the Enter/Return Key on the Keyboard.

If you are an employee you must put employee\ in the username field. That is a BACK SLASH (\) and NOT a forward slash (/). The back slash is generally located above the Enter/Return Key on the Keyboard.

If you are an employee you must put employee\ in the username field. That is a BACK SLASH (\) and NOT a forward slash (/). The back slash is generally located above the Enter/Return Key on the Keyboard.
Then, fill in your **FLCC Network Account**’s username and password. That is, the same account you use to logon to a **Computer** on campus. Make sure you fill out the username after the `student\` or `employee\`. If you do not have a **FLCC Network Account** please visit the IT Help Desk at the Canandaigua Campus or the front desk at any other Campus location. **Photo ID will be required to create your account. It is best to present your **FLCC ID Card**.**

Once you have entered all of the appropriate information, click “**Join**”.

When this window appears, click “**Show Certificate**”. **ATTENTION STUDENTS!!**
Then, check the “Always trust 'securelogin.arubannetworks.com’” checkbox.

Now, click Continue.

If prompted, enter your Computer’s Password to save the setting.

Click on the Airport icon which is generally found in the top right hand part of the screen and then click “Turn AirPort Off”.

Click on the Airport icon again and click on “Turn Airport On”. Be patient and then you should be connected to FLCCsecure!
